Past performance is no guarantee of future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit nuveen.com. Performance shown for benchmark since inception is as of the Fund's oldest share class.

Class I shares have no sales charge and may be purchased by specified classes of investors. Class C shares have a 1% CDSC for redemptions within less than one year, which is not reflected in the one-year total return. Effective Jul 2018, Class C shares automatically convert to Class A shares during the month in which the 10-year anniversary of the share purchase occurred. Since Inception returns for Class C shares for periods longer than 10 years reflect the performance of Class A shares after the deemed 10-year conversion to Class A shares within such periods. Class R3 shares have no sales charge and are available only to certain retirement plan clients.

Expense ratios are based on the Fund's most recent fiscal year end. Fee waivers and/or expense reimbursements have been restated to reflect current fees. The net expense ratio reflects a contractual commitment by the Fund's investment adviser to waive fees and/or reimburse expenses through 31 Jul 2021. Absent the waiver and/or reimbursement, expenses would be higher and total returns would be less. Please see the prospectus for details.

Nuveen NWQ Large-Cap Value Fund As of 30 Jun 2020

Fund description

A strategy that employs qualitative, bottom-up research in an effort to uncover equity securities of undervalued companies with identifiable catalysts to improve profitability and generate attractive risk-adjusted returns.

Portfolio management

Effective 28 October 2019, Jujhar Sohi was added as a portfolio manager of the Fund. Ray Wicklander is no longer a portfolio manager on the Fund.

Jon Bosse, CFA | 38 years industry experience

Jujhar Sohi | 16 years industry experience

Morningstar rankings and percentiles

Morningstar Large Value Category

	1 year		3 years		5 years		10 years	
	Rank	%	Rank	%	Rank	%	Rank	%
Class I	999/1193	82	947/1109	85	836/970	86	680/703	97

Class C	1035/1193	86	1020/1109	92	917/970	94	698/703	99
Class R3	1024/1193	85	987/1109	88	891/970	92	696/703	99

Morningstar ranking/number of funds in category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less. Morningstar percentile rankings are the Fund's total return rank relative to all the funds in the same Morningstar Category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

Portfolio statistics

	Fund	Benchmark
Total net assets – all classes (\$mil.)	\$19.3	-
Number of positions	51	839
Weighted average market cap (\$bil.)	\$101.2	\$113.6
P/E ratio (forward 12-months)	15.1	17.0
Standard deviation (3 years)	22.74	18.09
Beta (3 years)	1.23	1.00

This data relates to the portfolio and the underlying securities held in the portfolio. It should not be construed as a measure of performance for the Fund itself. Fund beta and standard deviation are based on Class I monthly returns.

Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

Glossary

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. **P/E ratio** of a stock is calculated by dividing the current price of the stock by its forecasted 12 months' earnings per share. The average of the price/earnings ratio of a fund is a weighted harmonic average of all the current P/E ratios (excluding negatives) of the stocks in the Fund's portfolio. This should not be construed as a forecast of the Fund's performance. **Standard deviation** is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. **Weighted average market capitalization** is the portfolio-weighted mean capitalizations of all equity securities.

Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. It is not possible to invest directly in an index.

A word on risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Prices of **equity securities** may decline significantly over short or extended periods of time. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in **emerging markets**. These and other risk considerations, such as currency, large cap stock, and value stock risks, are described in detail in the Fund's prospectus.

Before investing, carefully consider fund investment objectives, risks, charges and expenses. For this and other information that should be read carefully, please request a prospectus or summary prospectus from your financial professional or Nuveen at 800.257.8787 or visit nuveen.com.

The Fund features portfolio management by NWQ Investment Management Company, LLC (NWQ), an affiliate of Nuveen, LLC.
