[†] These are the actual fund operating expenses prior to the application of fee waivers and/or expense reimbursements. The Adviser has contractually agreed to waive its management fee at an annual rate in the amount of 0.05% of the average daily value of the Fund's net assets for the period through February 28, 2021. This waiver has the effect of reducing the management fee shown in the table for the term of the waiver from 0.75% to 0.70%.

Growth of \$10,000 Since Inception

Results shown are since 09/04/2001. This chart illustrates a hypothetical \$10,000 investment in Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower.

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short-term performance. Current performance and expense ratios may differ from figures shown. For performance data current to the most recent month end, please call First Eagle Funds at 800.334.2143 or visit us at www.feim.com. The average annual returns are historical and reflect changes in share price, reinvested dividends and are net of expenses. "With sales charge" performance for Class A Shares gives effect to the deduction of the maximum sales charge of 5.00%. The average annual returns for Class C Shares reflect a CDSC (contingent deferred sales charge) of 1.00% in the year-to-date and first year only. Class I Shares require \$1MM minimum investment and are offered without sales charge. Class R6 Shares are offered without sales charge. Operating expenses reflect the Fund's total annual operating expenses for the share class as of the Fund's most current prospectus, including management fees and other expenses.

[°] Beta is a measure of the fund's volatility (risk) relative to the overall market. The higher the fund's Beta, the more the fund price is expected to change in response to a given change in the value of the market.

1. Standard deviation is a statistical measure of how returns over time have varied from the mean. A lower number signifies lower volatility.

2. Active share measures the percentage of a fund's portfolio holdings differing from its benchmark. Active share can range from 0% (index fund) to 100% (no commonality with the benchmark index).

Allocation By Market Capitalization (%)^{5,6}

5. Percentages may not equal 100% due to rounding.

6. Based on Morningstar's definition of Market Capitalization Breakpoints, as of 06/30/2020. Small Cap is less than \$4.0 billion, Mid Cap is between \$4.0 billion and \$21.8 billion and Large Cap is greater than \$21.8 billion.

Investment in gold and gold related investments present certain risks, and returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets.

The principal risk of investing in value stocks is that the price of the security may not approach its anticipated value or may decline in value.

The Standard & Poor's 500 Index is a widely recognized unmanaged index including a representative sample of 500 leading companies in leading sectors of the U.S. economy and is not available for purchase. Although the Standard & Poor's 500 Index focuses on the large-cap segment of the market, with approximately 80% coverage of U.S. equities, it is also considered a proxy for the total market. The Standard & Poor's 500 Index includes dividends reinvested. One cannot invest directly in an index.
