**What Are the Risks?**

All investments involve risks, including possible loss of principal. Value securities may not increase in price as anticipated or may decline further in value. While smaller and midsize companies may offer substantial opportunities for capital growth, they also involve heightened risks and should be considered speculative. Historically, smaller- and midsize- company securities have been more volatile in price than larger-company securities, especially over the short term. The fund may invest in foreign securities, which may involve special risks, including currency fluctuations and economic and political uncertainty. These and other risks are detailed in the fund's prospectus.

**Glossary**

**Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

**Important Information**

Effective March 1, 2019, Franklin Balance Sheet Investment Fund changed its name to Franklin Mutual U.S. Value Fund and modified its principal investment strategies.
