

Fund Objective

The State Street Institutional Premier Growth Equity Fund (the "Fund") seeks to provide long-term growth of capital and future income.

Process

The Fund seeks to achieve its investment objectives by investing at least 80% of its net assets (plus any borrowings for investment purposes) under normal circumstances in equity securities, such as common and preferred stocks.

The Fund invests primarily in a limited number of large and medium sized companies (meaning companies with market capitalizations of \$2 billion or more) that the portfolio managers believe have above-average growth histories and/or growth potential. The portfolio managers select equity securities from a number of industries based on the merits of individual companies, although at times the Fund's investments may be focused in one or more market sectors, such as technology. In seeking to achieve the Fund's investment objective with respect to future income, the portfolio managers also consider companies that have the potential to pay dividends in the future. Stock selection is key to the performance of the Fund.

The portfolio managers seek to identify securities of companies with characteristics such as:

- above-average annual growth rates
- financial strength (favorable debt ratios and other financial characteristics)
- leadership in their respective industries
- high quality management focused on generating shareholder value

The portfolio managers may consider selling a security when one of these characteristics no longer applies, or when valuation becomes excessive and more attractive alternatives are identified.

The Fund also may invest to a lesser extent in securities of foreign (non-U.S.) issuers and debt securities. The portfolio managers may also use various types of derivative instruments (primarily futures contracts) to gain or hedge exposure to certain types of securities as an alternative to investing directly in or selling such securities.

Call 1-800-242-0134 or visit us online at www.ssga.com/geam for the most recent month-end performance results. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

Definitions: Weighted average market cap (\$M) is a stock market index weighted by the market capitalization of each stock in the index. In such a weighting scheme, larger companies account for a greater portion of the index. **NAV** is market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding.

S&P 500® Index is an unmanaged, market capitalization-weighted index of stocks of 500 large U.S. companies, which is widely used as a measure of large-cap U.S. stock market performance. Standard & Poor's and S&P 500 are trademarks of the Standard & Poor's Financial Services LLC ("S&P"). Investors cannot invest directly in an index. The returns of the index do not reflect the actual cost of investing in the instruments that comprise it.

Russell 1000 Growth Index® is an unmanaged index that measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. Russell Investment Group owns the Russell Index data, including all applicable trademarks and copyrights. Russell Investment Group is the source and owner of the Russell index data contained or reflected in this material and all trademarks and copyrights related thereto. "Cash Equivalents" includes an investment in the State Street Institutional Government Money Market Fund. "Other" includes accruals. As of 07/01/2016 SSGA Funds Management, Inc. is the investment advisor of the Fund. SSGA Funds Management, Inc. is also the investment advisor of the State Street Institutional Government Money Market Fund.

Considering the risks: A principal risk of investing in the Fund is the risk that the value of equity securities may decline. Although the Fund is a diversified fund, it may invest in securities of a limited number of issuers to achieve a potentially greater investment return than a fund that invests in a larger number of issuers. As a result, price movements of a single issuer's securities will have a greater impact on this Fund's net asset value causing it to fluctuate more than that of a more widely diversified fund. These and other risk considerations are discussed in the Fund's prospectus.

There is a risk of loss from an investment in securities.
