Q2 2020 AMG Managers Cadence Emerging Companies Fund

FACT SHEET

ASSET CLASS | **SMALL CAP**

Class N | **MECAX** Class I | **MECIX** Class Z | **MECZX**

CADENCE

Headquarters: Boston, MA

Founded: 1988

Specialization: Growth equity investing

Portfolio Managers

Robert L. Fitzpatrick
Michael J. Skillman
Robert E. Ginsberg

Style[3]

Small Cap Growth

Primary Benchmark

Russell Microcap® Growth Index

Secondary Benchmark

Russell 2000® Growth Index

About AMG Funds

The largest network of institutional quality boutique investment solutions through a single point of access

Unrivaled access to insights of over 25 independent and autonomous investment managers

More than 75 actively managed products covering the risk spectrum for investors searching beyond the index

Fund highlights

- Subadvisor employs a growth-at-a-reasonable-price (GARP) strategy, allowing it to invest in companies that exhibit both growth and value characteristics
- Companies are analyzed for factors such as strength of management, competitive industry position, business prospects and improving earnings fundamentals
- Invests in primarily U.S. small-cap, emerging companies that have improving fundamentals and reasonable valuations

[1] Returns for periods less than one year are not annualized.
[2] Since the inception of the Fund's Class I shares on June 25, 1993.
[3] Style box placement is based on Fund's principal investment strategies. It does not necessarily represent the Fund's current or future portfolio holdings.
[4] Weights may not equal 100% due to rounding.
[5] Mention of a specific security should not be considered a recommendation to buy or a solicitation to sell that security. Holdings are subject to change.

AMG

The performance data shown represents past performance. Past performance is not a guarantee of future results. Current performance may be lower or higher than the performance data quoted. The investment return and the principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. For performance information through the most recent month end please call 800.835.3879 or visit our website at amgfunds.com.

Fund facts

[1] The Fund's Investment Manager has contractually agreed, through October 1, 2020, to limit fund operating expenses. The net expense ratio reflects this limitation, while the gross expense ratio does not. Please refer to the Fund's Prospectus for additional information on the Fund's expenses.
[2] Characteristics derived from FactSet.
[3] Weighted harmonic average.
[4] Weighted average.
[5] Annualized.
[6] Calculated for a three-year period.
[7] Relative to primary benchmark.

Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing. For this and other information, please call 800.835.3879 or visit amgfunds.com for a free Prospectus. Read it carefully before investing or sending money.

Definitions

Alpha: Alpha is a measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a security or mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the security or fund relative to the return of the benchmark index is a fund's alpha.

Beta: Beta measures the relationship between the portfolio's excess return over T-bills (representing a risk-free rate) relative to the excess return of the portfolio's benchmark. A low beta does not imply that the portfolio has a low level of volatility; rather, a low beta means that the portfolio's market-related risk is low. Beta is often referred to as systematic risk.

Downside Capture Ratio: The downside capture ratio measures a manager's performance in down markets relative to a particular benchmark. A down market is one in which the market's quarterly (or monthly) return is less than zero. For example, a ratio of 50% means that the portfolio's value fell half as much as its benchmark index during down markets.

Earnings Per Share (EPS): Earnings Per Share (EPS) is a company's profits per share of common stock.

Information Ratio: The information ratio (IR) measures a portfolio manager's ability to generate excess returns relative to a benchmark, but also attempts to identify the consistency of the portfolio manager. The higher the IR, the more consistent a manager is.

Market Capitalization: This figure represents the current stock-market value of a company's equity. It is calculated as the current share price times the number of shares outstanding as of the most recent quarter.

Price/earnings Ratio (P/E): Price/earnings (or P/E) ratio is a comparison of the company's closing stock price and its trailing 12-month earnings per share.

Sharpe Ratio: The Sharpe ratio is calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the portfolio's historical risk-adjusted performance.

Standard Deviation: Annualized standard deviation is a measure of the dispersion of a set of data from its mean. The more spread apart the data, the higher the deviation. Standard deviation is calculated as the square root of variance.

Tracking Error: Tracking error measures the standard deviation of the excess returns a portfolio generates compared to its benchmark. If a manager tracks a benchmark closely, then tracking error will be low. If a manager tracks a benchmark perfectly, then tracking error will be zero.

Upside Capture Ratio: The upside capture ratio is a measure of a manager's performance in up markets relative to a particular benchmark. An up market is one in which the market's quarterly (or monthly) return is greater than or equal to zero. For example, a ratio of 50% means that the portfolio's value increased half as much as its benchmark index during up markets.

The Fund is subject to the special risks associated with investments in micro-cap companies, such as relatively short earnings history, competitive conditions, less publicly available corporate information, and reliance on a limited number of products.

The Fund is subject to risks associated with investments in small-capitalization companies, such as erratic earnings patterns, competitive conditions, limited earnings history and a reliance on one or a limited number of products.

The Fund is subject to special risk considerations similar to those associated with the direct ownership of real estate. Real estate valuations may be subject to factors such as changing general and local economic, financial, competitive, and environmental conditions.

The Fund invests in growth stocks, which may be more sensitive to market movements because their prices tend to reflect future investor expectations rather than just current profits. Growth stocks may underperform value stocks given periods.

Market prices of investments held by the Fund may fall rapidly or unpredictably due to a variety of economic or political factors, market conditions, disasters or public health issues, or in response to events that affect particular industries or companies.

Companies that are in similar businesses may be similarly affected by particular economic or market events; to the extent the Fund has substantial holdings within a particular sector, the risks associated with that sector increase.

The Russell 2000® Growth Index measures the performance of the Russell 2000® companies with higher price-to-book ratios and higher forecasted growth values.

Unlike the Fund, indices are unmanaged, are not available for investment and do not incur expenses.

The Russell Microcap® Growth Index measures the performance of the microcap growth segment of the U.S. Equity market. It includes those Russell Microcap Index companies with higher price-to-book ratios and higher forecasted growth values.
