

# Vanguard Small-Cap Growth Index Fund

Domestic stock fund | Institutional Shares

## Fund facts

Risk level Low ← → High					Total net assets	Expense ratio as of 04/28/20	Ticker symbol	Turnover rate as of 12/31/19	Inception date	Fund number
1	2	3	4	5	\$2,861 MM	0.06%	VSGIX	18.1%	05/24/00	0866

## Investment objective

Vanguard Small-Cap Growth Index Fund seeks to track the performance of a benchmark index that measures the investment return of small-capitalization growth stocks.

## Investment strategy

The fund employs an indexing investment approach designed to track the performance of the CRSP US Small Cap Growth Index, a broadly diversified index of growth stocks of small U.S. companies. The fund attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

### Plain talk about risk

An investment in the fund could lose money over short or even long periods. You should expect the fund's share price and total return to fluctuate within a wide range, like the fluctuations of the overall stock market. Performance could be hurt by:

**Stock market risk:** The chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising stock prices and periods of falling stock prices. The fund's target index may, at times, become focused in stocks of a particular sector, category, or group of companies. Because the fund seeks to track its target index, the fund may underperform the overall stock market.

**Investment style risk:** The chance that returns from small-capitalization growth stocks will trail returns from the overall stock market. Historically, small-cap stocks have been more volatile in price than the large-cap stocks that dominate the overall market, and they often perform quite differently.

### Note on frequent trading restrictions
