Morningstar Mid-Cap Value Cat. Avg		-13.56	-1.59	2.10	8.86	7.06

Past performance is no guarantee of future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit [nuveen.com](http://nuveen.com). Performance shown for benchmark since inception is as of the Fund's oldest share class.

Class I shares have no sales charge and may be purchased by specified classes of investors. Class C shares have a 1% CDSC for redemptions within less than one year, which is not reflected in the one-year total return. Effective Jul 2018, Class C shares automatically convert to Class A shares during the month in which the 10-year anniversary of the share purchase occurred. Since Inception returns for Class C shares for periods longer than 10 years reflect the performance of Class A shares after the deemed 10-year conversion to Class A shares within such periods.

### Expense ratios (%)

	Class I	Class A	Class C
Gross	1.01	1.26	2.01
Net	0.90	1.15	1.90

Expense ratios are based on the Fund's most recent fiscal year end. The net expense ratio reflects a contractual commitment by the Fund's investment adviser to waive fees and/or reimburse expenses through 31 Jul 2021. Absent the waiver and/or reimbursement, expenses would be higher and total returns would be less. Please see the prospectus for details.

## Morningstar rankings and percentiles

Morningstar Mid-Cap Value Category

	1 year		3 years		5 years		10 years	
	Rank	%	Rank	%	Rank	%	Rank	%
Class I	295/420	67	178/386	47	176/346	52	215/245	88
Class A	299/420	69	195/386	52	186/346	55	226/245	92
Class C	315/420	73	243/386	65	228/346	69	237/245	96

Morningstar ranking/number of funds in category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less. Morningstar percentile rankings are the Fund's total return rank relative to all the funds in the same Morningstar Category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

### Glossary

**Beta** is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. **P/E ratio** of a stock is calculated by dividing the current price of the stock by its forecasted 12 months' earnings per share. The average of the price/earnings ratio of a fund is a weighted harmonic average of all the current P/E ratios (excluding negatives) of the stocks in the Fund's portfolio. This should not be construed as a forecast of the Fund's performance. **Standard deviation** is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. **Weighted average market capitalization** is the portfolio-weighted mean capitalizations of all equity securities.

**Russell 3000 Value Index** is a market capitalization-weighted index of those firms in the Russell 3000 Index with lower price-to-book ratios and lower forecasted growth values. **It is not possible to invest directly in an index.**

### A word on risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Prices of **equity securities** may decline significantly over short or extended periods of time. Investments in **smaller companies** are subject to greater volatility than those of larger companies. **Non-U.S. investments** involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in **emerging markets**. These and other risk considerations, such as currency and value stock risks, are described in detail in the Fund's prospectus.

**Before investing, carefully consider fund investment objectives, risks, charges and expenses.
