Supplement to the Prospectus Dated May 1, 2020

Important Information for Shareholders of the Ave Maria Value Fund, Ave Maria Rising Dividend Fund and Ave Maria World Equity Fund:

The following changes to the portfolio management teams for the Ave Maria Rising Dividend Fund and the Ave Maria World Equity Fund will become effective on March 1, 2021 when Joseph Skornicka retires from Schwartz Investment Counsel, Inc. (the “Adviser”). All references to Joseph Skornicka in the Prospectus and Statement of Additional Information should be disregarded.

Effective on March 1, 2021

- George P. Schwartz, CFA, will serve as co-portfolio manager with Brandon S. Scheitler, co-portfolio manager of the Ave Maria Rising Dividend Fund
- Anthony W. Gennaro, Jr., CFA, CPA, will serve as the portfolio manager of the Ave Maria World Equity Fund

In addition, the following changes to the portfolio management teams for the Ave Maria Value Fund and the Ave Maria World Equity Fund became effective on January 1, 2021:

Effective on January 1, 2021:

- Ryan M. Kuyawa, CFA, serves as co-portfolio manager of the Ave Maria Value Fund in place of Joseph W. Skornicka, CFA
- Anthony W. Gennaro, Jr., CFA, CPA, serves as co-portfolio manager of the Ave Maria World Equity Fund in place of Robert C. Schwartz, CFP

Accordingly, the disclosure in the section *Management of the Fund - Portfolio Managers* in the *Risk/Return Summary* for the Ave Maria Value Fund, Ave Maria Rising Dividend Fund and the Ave Maria World Equity Fund and *Portfolio Managers in Operation of the Funds* is revised as follows.

RISK/RETURN SUMMARY

AVE MARIA VALUE FUND - Portfolio Managers (Page 7)

Timothy S. Schwartz, CFA, is the lead portfolio manager and Ryan M. Kuyawa, CFA, is co-portfolio manager of the Ave Maria Value Fund.

- Timothy S. Schwartz, CFA, President and Chief Investment Officer of the Adviser, has acted as lead portfolio manager of the Fund since January 2016.
- Ryan M. Kuyawa, CFA, Senior Research Analyst and Head Trader of the Adviser, has acted as co-portfolio manager of the Fund since January 2021.

AVE MARIA RISING DIVIDEND FUND - Portfolio Managers (Page 21)

George P. Schwartz, CFA, is the co-portfolio manager with Brandon S. Scheitler, co-portfolio manager of the Ave Maria Rising Dividend Fund.

- George P. Schwartz, CFA, Chairman and Chief Executive Officer of the Adviser, has acted as co-portfolio manager of the Fund since its inception in May 2005.
- Brandon S. Scheitler, Vice President of the Adviser, has acted as co-portfolio manager of the Fund since March 2021.

AVE MARIA WORLD EQUITY FUND - Portfolio Manager (Page 29)

Anthony W. Gennaro, Jr., CFA, CPA, is the portfolio manager of the Ave Maria World Equity Fund. Mr. Gennaro is the Senior Research Analyst of the Adviser and has acted as co-portfolio manager of the Fund since January 2021 and sole portfolio manager of the Fund since March 2021.

OPERATION OF THE FUNDS - PORTFOLIO MANAGERS (Page 66)

The portfolio managers of each Fund are responsible for the day-to-day execution of investment policy, portfolio management and investment research for such Fund. The business experience of each portfolio manager is described below. The Statement of Additional Information provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and their ownership of shares of the Funds.

George P. Schwartz, CFA, co-portfolio manager of the Ave Maria Rising Dividend Fund and the Ave Maria Bond Fund, has been the Chairman and Chief Executive Officer of the Adviser for more than 30 years.

Timothy S. Schwartz, CFA, lead portfolio manager of the Ave Maria Value Fund, joined the Adviser in 1998 and currently serves as President and Chief Investment Officer.

Brandon S. Scheitler, lead portfolio manager of the Ave Maria Bond Fund and co-portfolio manager of the Ave Maria Rising Dividend Fund, joined the Adviser in 2007 and currently serves as Vice President.

Chadd M. Garcia, CFA, lead portfolio manager of the Ave Maria Focused Fund and co-portfolio manager of the Ave Maria Growth Fund, joined the Adviser in 2014 and currently serves as Vice President and Senior Research Analyst.

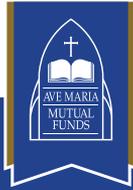

Adam P. Gaglio, CFA, lead portfolio manager of the Ave Maria Growth Fund and co-portfolio manager of the Ave Maria Focused Fund, joined the Adviser in 2013 and currently serves as Vice President and Equity Research Analyst.

Ryan M. Kuyawa, CFA, co-portfolio manager of the Ave Maria Value Fund, joined the Adviser in 2019 and currently serves as a Senior Research Analyst and Head Trader. From 2015 until 2019, he was an analyst and portfolio manager at Grey Value Management.

Anthony W. Gennaro, Jr., CFA, CPA, portfolio manager of the Ave Maria World Equity Fund, joined the Adviser in 2019 and currently serves as Senior Research Analyst. From 2014 until 2019, Mr. Gennaro was a senior research analyst at Wallington Asset Management.

RISK/RETURN SUMMARY

AVE MARIA VALUE FUND

WHAT IS THE FUND'S INVESTMENT OBJECTIVE?

The investment objective of the Ave Maria Value Fund is to seek long-term capital appreciation.

WHAT ARE THE FUND'S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and fees to intermediaries, which are not reflected in the table and example below.

Shareholder Fees (fees paid directly from your investment) None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.85% ⁽¹⁾
Other Expenses	0.26%
Acquired Fund Fees and Expenses	0.03%
Total Annual Fund Operating Expenses	<u>1.14%⁽²⁾</u>

⁽¹⁾ Management Fees have been restated to reflect a reduction in the annual percentage rate at which such fees are computed from 0.95% to 0.85%, effective May 1, 2019.

⁽²⁾ Total Annual Fund Operating Expenses will not correlate to the Fund's ratio of total expenses to average net assets in the Fund's Financial Highlights, which reflects the operating expenses of the Fund but does not include "Acquired Fund Fees and Expenses."

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
\$ 116	\$ 362	\$ 628	\$ 1,386

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 40% of the average value of its portfolio.

WHAT ARE THE FUND'S PRINCIPAL INVESTMENT STRATEGIES?

Under normal market conditions, the Ave Maria Value Fund invests primarily in common stocks believed by Schwartz Investment Counsel, Inc. (the "Adviser") to be priced at a discount to their true value according to the Adviser's criteria for value. Under normal circumstances, all of the Fund's equity investments (which include common stocks, preferred stocks and securities convertible into common stock) and at least 80% of the Fund's net assets will be invested in companies meeting the Fund's religious criteria. This process is designed to avoid investments in companies believed to offer products or services or engage in practices that are contrary to core values and teachings of the Roman Catholic Church. The Fund invests in securities of established companies of various market capitalizations.

At times, the Fund may emphasize investments in a particular issuer or issuers or hold a smaller number of portfolio securities than other diversified mutual funds. The portion of the Fund's net assets invested at any given time in securities of issuers engaged in industries within a particular sector is affected by valuation considerations and other investment characteristics of that sector. As a result, the Fund's investment in various sectors generally will change over time, and a significant allocation to any particular sector does not necessarily represent a continuing investment policy or investment strategy to invest in that sector.

The Fund may invest in securities of foreign issuers that are U.S. dollar-denominated and trade on a U.S. securities exchange or domestically in the over-the-counter markets. The Fund may, with respect to its investments in foreign issuers, invest indirectly in such companies in the form of American Depositary Receipts (stocks issued by a U.S. bank or broker that trade in the U.S. but represent ownership of securities issued by foreign companies).

The Adviser utilizes a comprehensive financial database and other sources with a universe of over 10,000 primarily domestic corporations to identify companies as candidates for the Fund. Using fundamental security analysis, the Adviser extensively analyzes stocks to identify those that meet the Fund's investment objective and standards. The price of stocks in relation to cash flow, earnings, dividends, book value and asset value, both historical and prospective, are key determinants in the security selection process. Emphasis is also placed on identifying companies undergoing changes that the Adviser believes will significantly enhance shareholder value in the future, including changes in operations, management, capital allocation, strategies and product offerings.

The moral screening process for the Fund uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation

of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute pornographic material; (iii) those that contribute corporate funds to Planned Parenthood; and (iv) those that support embryonic stem cell research. The Fund is not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. For more information about the Catholic Advisory Board, please turn to page 68 of this Prospectus.

The prices of securities held by the Fund are monitored in relation to the Adviser's criteria for value. Generally, stocks are purchased with the intent to hold them for three years or more. When a stock appreciates substantially and is no longer undervalued according to the Adviser's valuation criteria, it is sold. Stocks are also sold when a company fails to achieve expected results, or economic factors or competitive developments adversely impair the company's intrinsic value. Additionally, a stock may be sold (but is not required to be sold) if the Catholic Advisory Board determines that the company operates in a way that is inconsistent with the core values and teachings of the Roman Catholic Church. A stock will automatically be sold, if necessary, to ensure that the Fund meets its policy of investing at least 80% of its net assets in morally responsible investments.

WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE AVE MARIA VALUE FUND?

As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The Fund is not intended to be a complete investment program and there is no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

General Market Risks. The return on and value of an investment in the Fund will fluctuate in response to stock market movements. Stocks and other equity securities are subject to market risks, such as rapid fluctuations in price or liquidity due to earnings or other developments affecting a particular company or industry, stock market trends and general economic conditions, investor perceptions, interest rates and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly

disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world have become interconnected, which increases the possibility that economic, financial or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Moral Investing Risks. The Adviser invests in equity securities only if they meet both the Fund's investment and religious criteria, and as such, the Fund's return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

Foreign Exposure Risks. Investments in foreign securities involve risks that may be different from those of U.S. securities, including the risk that foreign economies may be less stable than the U.S. economy. Foreign securities may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the United States. Foreign securities are also subject to the risk of adverse changes in investment or exchange control regulations, tariffs, expropriation or confiscatory taxation, limitations on the removal of money or other assets, political or social instability, and nationalization of companies or industries.

Depository receipts are subject to some of the same risks as direct investment in foreign companies and certain additional risks. In a sponsored depository arrangement, the foreign issuer assumes the obligation to pay some or all of the depository's transaction fees. Under an unsponsored depository arrangement, the foreign issuer assumes no obligation and the depository's transaction fees are paid directly by the depository holders. Because unsponsored depository arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depositories and voting rights with respect to the deposited securities are not passed through to the holders.

Preferred Stock Risks. Preferred stock is subject to the risks of equity securities as well as risks associated with fixed income securities, such as interest rate risk. Because a company will generally pay dividends on preferred stock only after the company makes required payments to creditors, the value of a company's preferred stock may react strongly to

actual or perceived changes in the company's financial condition or outlook. Preferred stock may be less liquid than common stock and generally has limited or no voting rights. In addition, preferred stock is subject to the risk that a company may defer or not pay dividends, may call or redeem its preferred stock, or convert it to common stock.

Convertible Security Risks. A convertible security is a bond or preferred stock that can be exchanged or converted into a specific number of shares of the issuer's common stock. When the price of the underlying stock falls, the price of a convertible security tends to decline. Because a company must generally pay interest on its nonconvertible secured debt before it can pay interest on its convertible securities, the credit rating of a company's convertible securities is generally lower than on its secured nonconvertible debt securities. A convertible security may be "callable," which means the issuer can redeem the security prior to its maturity.

Sector Risks. If the Fund holds significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector. This may increase the risk of loss in the Fund and its share price volatility. As of December 31, 2019, the Fund had approximately 29% of its net assets invested in stocks within the industrials sector. Companies in the industrials sector may be impacted by factors such as general economic conditions, interest rates, insurance costs, technical progress, capital-spending levels, commodity prices, labor relations and government regulation.

Holdings Risks. If the Fund emphasizes investments in a particular issuer or issuers or holds a smaller number of portfolio securities than other diversified mutual funds, the Fund's portfolio will be more susceptible to the depreciation of any one security than a fund that invests in a larger number of stocks.

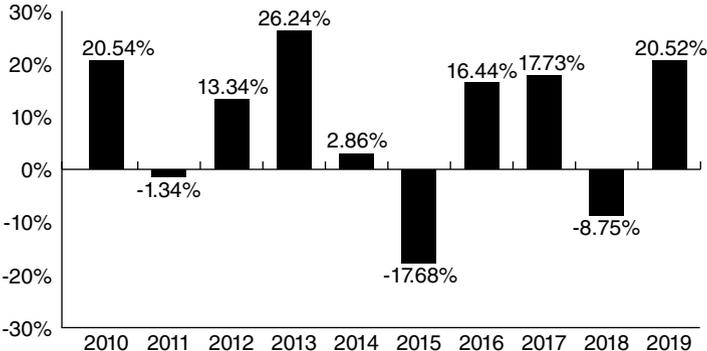

Security Selection and Investment Style Risks. Like any mutual fund, the Fund's method of security selection may not be successful and the Fund may underperform the stock market as a whole. A stock may never achieve the price appreciation the Adviser anticipates and the Fund's value style may go out of favor with investors.

Market Capitalization Risks. The Fund may emphasize investment in a particular market capitalization, which may cause its share price to be more susceptible to the financial, market or economic events affecting issuers within that market capitalization. Larger capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology developments and consumer tastes, have fewer opportunities to expand the market for their products or services, and may not be able to attain the high growth rate of successful smaller companies. Small and mid-

capitalization companies may lack the management experience, financial resources, product diversification and other competitive strengths usually present in larger companies. Micro-cap companies may have limited product lines, markets and access to financing, and may lack the management depth of larger companies. In many instances, the securities of micro, small and mid-capitalization companies are traded only over-the-counter or on a regional securities exchange, and the frequency and volume of their trading is substantially less than is typical of larger companies.

WHAT HAS BEEN THE FUND’S PERFORMANCE HISTORY?

The bar chart and performance table shown below provide some indication of the risks and variability of investing in the Ave Maria Value Fund by showing the Fund’s performance from year to year for each of the last ten calendar years, and by showing how the Fund’s average annual total returns for the 1, 5 and 10 year periods ended December 31, 2019 compare with those of a broad measure of market performance. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information, current through the most recent month end, is available on the Fund’s website (www.avemariafunds.com) or by calling 1-888-726-9331.

During the periods shown in the bar chart, the highest return for a quarter was 13.38% during the quarter ended March 31, 2019 and the lowest return for a quarter was -18.42% during the quarter ended September 30, 2011.

Average Annual Total Returns for Periods Ended December 31, 2019

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

AVE MARIA VALUE FUND	<u>ONE YEAR</u>	<u>FIVE YEARS</u>	<u>TEN YEARS</u>
Return Before Taxes	20.52%	4.42%	8.07%
Return After Taxes on Distributions	19.09%	3.31%	7.08%
Return After Taxes on Distributions and Sale of Fund Shares	13.17%	3.34%	6.48%
STANDARD & POOR'S MIDCAP 400 INDEX (reflects no deduction for fees, expenses, or taxes)	26.20%	9.03%	12.72%

MANAGEMENT OF THE FUND

Investment Adviser

Schwartz Investment Counsel, Inc.

Portfolio Managers

Timothy S. Schwartz, CFA, is the lead portfolio manager, and Joseph W. Skornicka, CFA, is the co-portfolio manager of the Ave Maria Value Fund.

- Timothy S. Schwartz, CFA, President of the Adviser, has acted as lead portfolio manager of the Fund since January 2016.
- Joseph W. Skornicka, CFA, Senior Vice President of the Adviser, has acted as co-portfolio manager of the Fund since January 2016.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Information Relevant to All Funds" on page 44 of this Prospectus.

AVE MARIA GROWTH FUND

WHAT IS THE FUND'S INVESTMENT OBJECTIVE?

The investment objective of the Ave Maria Growth Fund is to seek long-term capital appreciation.

WHAT ARE THE FUND'S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and fees to intermediaries, which are not reflected in the table and example below.

Shareholder Fees (fees paid directly from your investment) None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.75%
Other Expenses	<u>0.19%</u>
Total Annual Fund Operating Expenses	<u>0.94%</u>

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
\$ 96	\$ 300	\$ 520	\$ 1,155

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 15% of the average value of its portfolio.

WHAT ARE THE FUND'S PRINCIPAL INVESTMENT STRATEGIES?

The Ave Maria Growth Fund invests primarily in common stocks of companies believed by the Adviser to offer above-average potential for growth in revenues, profits or cash flow. Dividend and interest income are secondary considerations in investment selection. Under normal circumstances, all of the Fund's equity investments (which include common stocks, preferred stocks and securities convertible into common stock) and at least 80% of the Fund's net assets will be invested in companies meeting the Fund's religious criteria. This process is designed to avoid investments in companies believed to offer products or services or engage in practices that are contrary to core values and teachings of the Roman Catholic Church. The Fund may invest in companies of all sizes, including small and mid-capitalization companies.

At times, the Fund may emphasize investments in a particular issuer or issuers or hold a smaller number of portfolio securities than other diversified mutual funds. The portion of the Fund's net assets invested at any given time in securities of issuers engaged in industries within a particular sector is affected by valuation considerations and other investment characteristics of that sector. As a result, the Fund's investment in various sectors generally will change over time, and a significant allocation to any particular sector does not necessarily represent a continuing investment policy or investment strategy to invest in that sector.

The Fund may invest in securities of foreign issuers that are U.S. dollar-denominated and trade on a U.S. securities exchange or domestically in the over-the-counter markets. The Fund may, with respect to its investments in foreign issuers, invest indirectly in such companies in the form of American Depositary Receipts (stocks issued by a U.S. bank or broker that trade in the U.S. but represent ownership of securities issued by foreign companies).

In selecting investments, the Adviser relies primarily on fundamental analysis by reviewing the issuing company's financial statements, the fundamentals of other companies in the same industry, market trends and economic conditions. The Adviser evaluates a company's earnings growth and prospects, price to cash flow and other variables to determine whether the company meets its growth criteria.

The moral screening process for the Fund uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute

pornographic material; (iii) those that contribute corporate funds to Planned Parenthood; and (iv) those that support embryonic stem cell research. The Fund is not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. For more information about the Catholic Advisory Board, please turn to page 68 of this Prospectus.

The Fund's investments are monitored in relation to the Adviser's criteria for a growth company. Generally, stocks are purchased with the intent to hold them for three years or more. However, when a company no longer meets the Adviser's investment standards, it is sold regardless of the time held by the Fund. In addition, a stock may be sold (but is not required to be sold) if the Catholic Advisory Board determines that the company operates in a way that is inconsistent with the core values and teachings of the Roman Catholic Church. A stock will automatically be sold, if necessary, to ensure that the Fund meets its policy of investing at least 80% of its net assets in morally responsible investments.

WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE AVE MARIA GROWTH FUND?

As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The Fund is not intended to be a complete investment program and there is no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

General Market Risks. The return on and value of an investment in the Fund will fluctuate in response to stock market movements. Stocks and other equity securities are subject to market risks, such as rapid fluctuations in price or liquidity due to earnings or other developments affecting a particular company or industry, stock market trends and general economic conditions, investor perceptions, interest rates and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world have become interconnected, which increases the possibility that economic, financial

or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Moral Investing Risks. The Adviser invests in equity securities only if they meet both the Fund's investment and religious criteria, and as such, the Fund's return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

Foreign Exposure Risks. Investments in foreign securities involve risks that may be different from those of U.S. securities, including the risk that foreign economies may be less stable than the U.S. economy. Foreign securities may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the United States. Foreign securities are also subject to the risk of adverse changes in investment or exchange control regulations, tariffs, expropriation or confiscatory taxation, limitations on the removal of money or other assets, political or social instability, and nationalization of companies or industries.

Depository receipts are subject to some of the same risks as direct investment in foreign companies and certain additional risks. In a sponsored depository arrangement, the foreign issuer assumes the obligation to pay some or all of the depository's transaction fees. Under an unsponsored depository arrangement, the foreign issuer assumes no obligation and the depository's transaction fees are paid directly by the depository holders. Because unsponsored depository arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depositories and voting rights with respect to the deposited securities are not passed through to the holders.

Preferred Stock Risks. Preferred stock is subject to the risks of equity securities as well as risks associated with fixed income securities, such as interest rate risk. Because a company will generally pay dividends on preferred stock only after the company makes required payments to creditors, the value of a company's preferred stock may react strongly to actual or perceived changes in the company's financial condition or outlook. Preferred stock may be less liquid than common stock and generally has limited or no voting rights. In addition, preferred stock is subject to the risk that a company may defer or not pay dividends, may call or redeem its preferred stock, or convert it to common stock.

Convertible Security Risks. A convertible security is a bond or preferred stock that can be exchanged or converted into a specific number of shares of the issuer's common stock. When the price of the underlying stock falls, the price of a convertible security tends to decline. Because a company must generally pay interest on its nonconvertible secured debt before it can pay interest on its convertible securities, the credit rating of a company's convertible securities is generally lower than on its secured nonconvertible debt securities. A convertible security may be "callable," which means the issuer can redeem the security prior to its maturity.

Sector Risks. If the Fund holds significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector. This may increase the risk of loss in the Fund and its share price volatility. As of December 31, 2019, the Fund had approximately 25% of its net assets invested in stocks within the industrials sector. Companies in the industrials sector may be impacted by factors such as general economic conditions, interest rates, insurance costs, technical progress, capital-spending levels, commodity prices, labor relations and government regulation.

Holdings Risks. If the Fund emphasizes investments in a particular issuer or issuers or holds a smaller number of portfolio securities than other diversified mutual funds, the Fund's portfolio will be more susceptible to the depreciation of any one security than a fund that invests in a larger number of stocks.

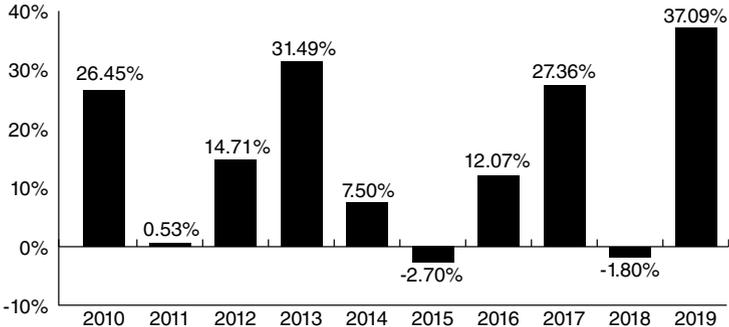

Security Selection and Investment Style Risks. Like any mutual fund, the Fund's method of security selection may not be successful and the Fund may underperform the stock market as a whole. Growth securities typically trade at higher multiples of current earnings than other securities. Therefore, growth securities may be more sensitive to changes in current or expected earnings than other securities. Growth securities also may be more volatile because growth companies usually invest a high portion of earnings in their business, and may lack the dividend income of value companies that can offset losses in a falling market. A company may never achieve the earnings growth the Adviser anticipates and the Fund's growth style may go out of favor with investors.

Market Capitalization Risks. The Fund may emphasize investment in a particular market capitalization, which may cause its share price to be more susceptible to the financial, market or economic events affecting issuers within that market capitalization. Larger capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology developments and consumer tastes, have fewer opportunities to expand the market for their products or services, and may not be able to attain the high growth rate of successful smaller companies. Small and mid-

capitalization companies may lack the management experience, financial resources, product diversification and other competitive strengths usually present in larger companies. Micro-cap companies may have limited product lines, markets and access to financing, and may lack the management depth of larger companies. In many instances, the securities of micro, small and mid-capitalization companies are traded only over-the-counter or on a regional securities exchange, and the frequency and volume of their trading is substantially less than is typical of larger companies.

WHAT HAS BEEN THE FUND’S PERFORMANCE HISTORY?

The bar chart and performance table shown below provide some indication of the risks and variability of investing in the Ave Maria Growth Fund by showing the Fund’s performance from year to year for each of the last ten calendar years, and by showing how the Fund’s average annual total returns for the 1, 5 and 10 year periods ended December 31, 2019 compare with those of a broad measure of market performance. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information, current through the most recent month end, is available on the Fund’s website (www.avemariafunds.com) or by calling 1-888-726-9331.

During the periods shown in the bar chart, the highest return for a quarter was 17.42% during the quarter ended March 31, 2019 and the lowest return for a quarter was -17.27% during the quarter ended September 30, 2011.

Average Annual Total Returns for Periods Ended December 31, 2019

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

AVE MARIA GROWTH FUND	<u>ONE YEAR</u>	<u>FIVE YEARS</u>	<u>TEN YEARS</u>
Return Before Taxes	37.09%	13.33%	14.44%
Return After Taxes on Distributions	36.55%	11.62%	13.13%
Return After Taxes on Distributions and Sale of Fund Shares	22.35%	10.23%	11.80%
STANDARD & POOR'S 500 INDEX (reflects no deduction for fees, expenses, or taxes)	31.49%	11.70%	13.56%

MANAGEMENT OF THE FUND

Investment Adviser

Schwartz Investment Counsel, Inc.

Portfolio Managers

Adam P. Gaglio, CFA, is the lead portfolio manager, and Chadd M. Garcia, CFA, is the co-portfolio manager of the Ave Maria Growth Fund.

- Adam P. Gaglio, CFA, Vice President and Equity Research Analyst of the Adviser, has acted as a co-portfolio manager of the Fund since July 2019 and lead portfolio manager since January 2020.
- Chadd M. Garcia, CFA, Vice President and Senior Research Analyst of the Adviser, has acted as a co-portfolio manager of the Fund since January 2020.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Information Relevant to All Funds" on page 44 of this Prospectus.

AVE MARIA RISING DIVIDEND FUND

WHAT ARE THE FUND'S INVESTMENT OBJECTIVES?

The investment objectives of the Ave Maria Rising Dividend Fund are to seek to provide increasing dividend income over time, long-term growth of capital, and a reasonable level of current income.

WHAT ARE THE FUND'S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and fees to intermediaries, which are not reflected in the table and example below.

Shareholder Fees (fees paid directly from your investment) None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.75%
Other Expenses	<u>0.18%</u>
Total Annual Fund Operating Expenses	<u>0.93%</u>

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
\$ 95	\$ 296	\$ 515	\$ 1,143

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 30% of the average value of its portfolio.

WHAT ARE THE FUND'S PRINCIPAL INVESTMENT STRATEGIES?

Under normal circumstances, the Ave Maria Rising Dividend Fund will invest at least 80% of its net assets, including the amount of any borrowings for investment purposes, in the common stocks of dividend-paying companies that are expected to increase their dividends over time and to provide long-term growth of capital. Under normal circumstances, all of the Fund's equity investments (which include common stocks, preferred stocks and securities convertible into common stock) and at least 80% of the Fund's net assets will be invested in companies meeting the Fund's religious criteria. This process is designed to avoid investments in companies believed to offer products or services or engage in practices that are contrary to core values and teachings of the Roman Catholic Church. The Fund may invest in companies of all sizes.

At times, the Fund may emphasize investments in a particular issuer or issuers or hold a smaller number of portfolio securities than other diversified mutual funds. The portion of the Fund's net assets invested at any given time in securities of issuers engaged in industries within a particular sector is affected by valuation considerations and other investment characteristics of that sector. As a result, the Fund's investment in various sectors generally will change over time, and a significant allocation to any particular sector does not necessarily represent a continuing investment policy or investment strategy to invest in that sector.

The Fund may invest in securities of foreign issuers that are U.S. dollar-denominated and trade on a U.S. securities exchange or domestically in the over-the-counter markets. The Fund may, with respect to its investments in foreign issuers, invest indirectly in such companies in the form of American Depositary Receipts (stocks issued by a U.S. bank or broker that trade in the U.S. but represent ownership of securities issued by foreign companies).

The Adviser believes that a track record of dividend increases is an excellent indicator of a company's financial health and growth prospects, and that over the long term, income can contribute significantly to total return. Dividends can also help reduce the Fund's volatility during periods of market turbulence and help offset losses when stock prices are falling. The Adviser looks for stocks with sustainable, above-average growth in earnings and dividends, and the Adviser attempts to buy them when they are temporarily out-of-favor or undervalued by the market.

Using fundamental security analysis, the Adviser extensively analyzes stocks to identify those that meet the Fund's investment objectives and standards. In selecting investments for the Fund, the Adviser favors companies with one or more of the following attributes:

- either a track record of, or the potential for, above-average earnings and dividend growth;
- a competitive dividend yield;
- a sound balance sheet and solid cash flow to support future dividend increases;
- a sustainable competitive advantage and leading market position; and

- reasonable valuations, such as low price/earnings, price/cash flow, or price/sales ratios.

In pursuing the Fund's investment objectives, the Adviser has the discretion to purchase securities in special situations when it perceives an unusual opportunity for gain. These special situations might arise when the Adviser believes a security could increase in value for a variety of reasons, including a change in management, an extraordinary corporate event, or a temporary imbalance in the supply of or demand for the securities.

The moral screening process for the Fund uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute pornographic material; (iii) those that contribute corporate funds to Planned Parenthood; and (iv) those that support embryonic stem cell research. The Fund is not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. For more information about the Catholic Advisory Board, please turn to page 68 of this Prospectus.

Stocks are sold when a company fails to achieve expected results, or economic factors or competitive developments adversely impair the company's value. Additionally, a stock may be sold (but is not required to be sold) if the Catholic Advisory Board determines that the company operates in a way that is inconsistent with the core values and teachings of the Roman Catholic Church. A stock will automatically be sold, if necessary, to ensure that the Fund meets its policy of investing at least 80% of its net assets in morally responsible investments.

WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE AVE MARIA RISING DIVIDEND FUND?

As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The Fund is not intended to be a complete investment program and there is no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

General Market Risks. The return on and value of an investment in the Fund will fluctuate in response to stock market movements. Stocks and other equity securities are subject to market risks, such as rapid fluctuations in price or liquidity due to earnings or other developments affecting a particular company

or industry, stock market trends and general economic conditions, investor perceptions, interest rates and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world have become interconnected, which increases the possibility that economic, financial or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Moral Investing Risks. The Adviser invests in equity securities only if they meet both the Fund's investment and religious criteria, and as such, the Fund's return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

Sector Risks. If the Fund holds significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector. This may increase the risk of loss in the Fund and its share price volatility.

Holdings Risks. If the Fund emphasizes investments in a particular issuer or issuers or holds a smaller number of portfolio securities than other diversified mutual funds, the Fund's portfolio will be more susceptible to the depreciation of any one security than a fund that invests in a larger number of stocks.

Security Selection and Investment Style Risks. Like any mutual fund, the Fund's method of security selection may not be successful and the Fund may underperform the stock market as a whole. There is no guarantee that the securities selected for the Fund will provide increasing dividend income

or earnings growth. Changes in the dividend policies or capital resources of companies in which the Fund invests may affect the Fund's ability to generate income. The investment style utilized for the Fund could fall out of favor with investors, which may cause the Fund to underperform relative to other mutual funds that do not emphasize dividend paying stocks.

Market Capitalization Risks. The Fund may emphasize investment in a particular market capitalization, which may cause its share price to be more susceptible to the financial, market or economic events affecting issuers within that market capitalization. Larger capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology developments and consumer tastes, have fewer opportunities to expand the market for their products or services, and may not be able to attain the high growth rate of successful smaller companies. Small and mid-capitalization companies may lack the management experience, financial resources, product diversification and other competitive strengths usually present in larger companies. Micro-cap companies may have limited product lines, markets and access to financing, and may lack the management depth of larger companies. In many instances, the securities of micro, small and mid-capitalization companies are traded only over-the-counter or on a regional securities exchange, and the frequency and volume of their trading is substantially less than is typical of larger companies.

Foreign Exposure Risks. Investments in foreign securities involve risks that may be different from those of U.S. securities, including the risk that foreign economies may be less stable than the U.S. economy. Foreign securities may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the United States. Foreign securities are also subject to the risk of adverse changes in investment or exchange control regulations, tariffs, expropriation or confiscatory taxation, limitations on the removal of money or other assets, political or social instability, and nationalization of companies or industries.

Depository receipts are subject to some of the same risks as direct investment in foreign companies and certain additional risks. In a sponsored depository arrangement, the foreign issuer assumes the obligation to pay some or all of the depository's transaction fees. Under an unsponsored depository arrangement, the foreign issuer assumes no obligation and the depository's transaction fees are paid directly by the depository holders. Because unsponsored depository arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depositories and voting rights with respect to the deposited securities are not passed through to the holders.

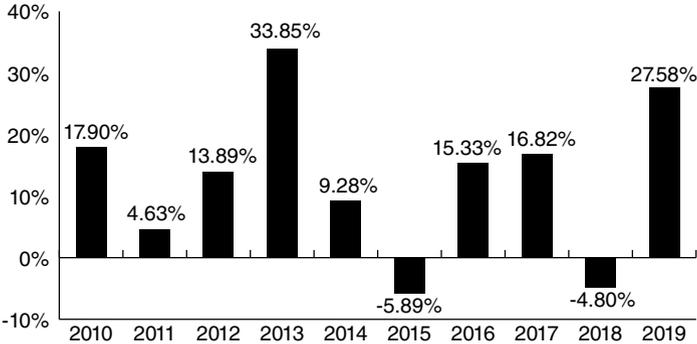

Special Situation Company Risks. Investing in special situation companies carries an additional risk of loss if the expected development does not occur or produce the intended results. The availability of special situation companies that present attractive investment opportunities may be sporadic, or rare in certain instances, which may detract from the Fund's ability to pursue its investment objectives.

Preferred Stock Risks. Preferred stock is subject to the risks of equity securities as well as risks associated with fixed income securities, such as interest rate risk. Because a company will generally pay dividends on preferred stock only after the company makes required payments to creditors, the value of a company's preferred stock may react strongly to actual or perceived changes in the company's financial condition or outlook. Preferred stock may be less liquid than common stock and generally has limited or no voting rights. In addition, preferred stock is subject to the risk that a company may defer or not pay dividends, may call or redeem its preferred stock, or convert it to common stock.

Convertible Security Risks. A convertible security is a bond or preferred stock that can be exchanged or converted into a specific number of shares of the issuer's common stock. When the price of the underlying stock falls, the price of a convertible security tends to decline. Because a company must generally pay interest on its nonconvertible secured debt before it can pay interest on its convertible securities, the credit rating of a company's convertible securities is generally lower than on its secured nonconvertible debt securities. A convertible security may be "callable," which means the issuer can redeem the security prior to its maturity.

WHAT HAS BEEN THE FUND'S PERFORMANCE HISTORY?

The bar chart and performance table shown below provide some indication of the risks and variability of investing in the Ave Maria Rising Dividend Fund by showing the Fund's performance from year to year for each of the last ten calendar years, and by showing how the Fund's average annual total returns for the 1, 5 and 10 year periods ended December 31, 2019 compare with those of a broad measure of market performance. On May 1, 2020, the Ave Maria Rising Dividend Fund changed its primary benchmark index from the Standard & Poor's 500 Index to the Standard & Poor's 500 Value Index because the Standard & Poor's 500 Value Index is more representative of the Fund's portfolio composition. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information, current through the most recent month end, is available on the Fund's website (www.avemariafunds.com) or by calling 1-888-726-9331.

During the periods shown in the bar chart, the highest return for a quarter was 13.32% during the quarter ended March 31, 2019 and the lowest return for a quarter was -15.35% during the quarter ended September 30, 2011.

Average Annual Total Returns for Periods Ended December 31, 2019

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

AVE MARIA RISING DIVIDEND FUND	<u>ONE YEAR</u>	<u>FIVE YEARS</u>	<u>TEN YEARS</u>
Return Before Taxes	27.58%	9.02%	12.21%
Return After Taxes on Distributions	25.29%	7.10%	10.75%
Return After Taxes on Distributions and Sale of Fund Shares	17.93%	6.79%	9.91%
STANDARD & POOR'S 500 INDEX (reflects no deduction for fees, expenses, or taxes)	31.49%	11.70%	13.56%
STANDARD & POOR'S 500 VALUE INDEX (reflects no deduction for fees, expenses, or taxes)	31.93%	9.52%	12.16%

MANAGEMENT OF THE FUND

Investment Adviser

Schwartz Investment Counsel, Inc.

Portfolio Managers

Joseph W. Skornicka, CFA, is the lead portfolio manager, and George P. Schwartz, CFA is the co-portfolio manager of the Ave Maria Rising Dividend Fund.

- Joseph W. Skornicka, CFA, Senior Vice President of the Adviser, has acted as co-portfolio manager of the Fund since July 2019 and lead portfolio manager since January 2020.
- George P. Schwartz, CFA, Chairman and Chief Executive Officer of the Adviser, has acted as co-portfolio manager of the Fund since its inception in May 2005.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Information Relevant to All Funds" on page 44 of this Prospectus.

AVE MARIA WORLD EQUITY FUND

WHAT IS THE FUND'S INVESTMENT OBJECTIVE?

The investment objective of the Ave Maria World Equity Fund is to seek long-term capital appreciation.

WHAT ARE THE FUND'S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and fees to intermediaries, which are not reflected in the table and example below.

Shareholder Fees (fees paid directly from your investment) None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.95%
Other Expenses	0.34%
Acquired Fund Fees and Expenses	<u>0.01%</u>
Total Annual Fund Operating Expenses	1.30% ⁽¹⁾
Fee Waiver	<u>0.04%</u> ⁽²⁾
Total Annual Fund Operating Expenses After Fee Waiver	<u>1.26%</u> ⁽³⁾

⁽¹⁾ Total Annual Fund Operating Expenses will not correlate to the ratio of total expenses to average net assets in the Fund's Financial Highlights, which reflects the operating expenses of the Fund but does not include "Acquired Fund Fees and Expenses."

⁽²⁾ The Adviser has contractually agreed to reduce Management Fees and reimburse Other Expenses so that "Total Annual Fund Operating Expenses" (excluding Acquired Fund Fees and Expenses, interest, taxes, brokerage costs and extraordinary expenses) do not exceed 1.25%. Any management fee waivers and/or expense reimbursements by the Adviser are subject to repayment by the Fund for a period of three years from the date such fees and expenses were waived or reimbursed, provided the repayment to the Adviser does not cause "Total Annual Fund Operating Expenses" (excluding Acquired Fund Fees and Expenses, interest, taxes, brokerage costs and extraordinary expenses) of the Fund to exceed the net expense ratio at the time such amount was waived or repaid. This expense limitation is in effect until May 1, 2021 and may be terminated by the Fund or the Adviser upon not less than 60 days' prior written notice, provided, however, that (i) the Adviser may not terminate the agreement without the approval of the Board of Trustees, and (ii) the agreement terminates automatically if the Adviser ceases to serve as the Fund's investment adviser.

⁽³⁾ Total Annual Fund Operating Expenses After Fee Waiver will not correlate to the ratio of net expenses to average net assets in the Fund's Financial Highlights, which reflects the operating expenses of the Fund but does not include "Acquired Fund Fees and Expenses."

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. The Example also takes into account the Adviser's contractual arrangement to maintain the Fund's expenses at the agreed upon level for a period of one year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
\$ 128	\$ 408	\$ 709	\$ 1,564

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 37% of the average value of its portfolio.

WHAT ARE THE FUND'S PRINCIPAL INVESTMENT STRATEGIES?

Under normal market conditions, the Ave Maria World Equity Fund will invest at least 80% of its net assets, including the amount of any borrowings for investment purposes, in common stocks of U.S. and non-U.S. companies. The Fund will invest at least 60% of its net assets in common stocks issued by non-U.S. companies. For purposes of this requirement, a company is deemed to be a "non-U.S. company" if the company is headquartered outside the United States, or has at least 50% of its revenues or operations outside of the United States during its most recent fiscal year, at the time of purchase. The Fund will limit its investments in securities of issuers located in any one country (other than the United States) to less than 25% of the Fund's total assets. Under normal circumstances, all of the Fund's equity investments (which include common stocks, preferred stocks and securities convertible into common stock) and at least 80% of the Fund's net assets will be invested in companies meeting the Fund's religious criteria. This process is designed to avoid investments in companies believed to offer products or services or engage in practices that are contrary to core values and teachings of the Roman Catholic Church. The Fund invests in securities of established companies of various market capitalizations. At times, the Fund may emphasize investments in a particular issuer or issuers or hold a smaller number of portfolio securities than other diversified mutual funds.

The Fund may, with respect to its investments in the stocks of non-U.S. companies, invest indirectly in such securities through depositary receipts. Depositary receipts are receipts issued by a bank or trust company and

evidence ownership of underlying securities issued by foreign companies. All of the stocks owned by the Fund will be U.S. dollar-denominated and trade on a U.S. securities exchange or domestically in the over-the-counter markets.

The Fund invests primarily in common stocks believed to be priced at a discount to their true value according to the Adviser's criteria for value. The price of stocks in relation to cash flow, earnings, dividends, book value and asset value, both historical and prospective, are key determinants in the security selection process. Emphasis is also placed on identifying companies undergoing changes that the Adviser believes will significantly enhance shareholder value in the future, including changes in operations, management, capital allocation, strategies and product offerings.

The moral screening process for the Fund uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute pornographic material; (iii) those that contribute corporate funds to Planned Parenthood; and (iv) those that support embryonic stem cell research. The Fund is not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. For more information about the Catholic Advisory Board, please turn to page 68 of this Prospectus.

The prices of securities held by the Fund are monitored in relation to the Adviser's criteria for value. Generally, stocks are purchased with the intent to hold them for three years or more. When a stock appreciates substantially and is no longer undervalued according to the Adviser's valuation criteria, it is sold. Stocks are also sold when a company fails to achieve expected results, or economic factors or competitive developments adversely impair the company's intrinsic value. Additionally, a stock may be sold (but is not required to be sold) if the Catholic Advisory Board determines that the company operates in a way that is inconsistent with the core values and teachings of the Roman Catholic Church. A stock will automatically be sold, if necessary, to ensure that the Fund meets its policy of investing at least 80% of its net assets in morally responsible investments.

WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE AVE MARIA WORLD EQUITY FUND?

As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The Fund is not intended to be a complete investment program and there is no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

General Market Risks. The return on and value of an investment in the Fund will fluctuate in response to stock market movements. Stocks and other equity securities are subject to market risks, such as rapid fluctuations in price or liquidity due to earnings or other developments affecting a particular company or industry, stock market trends and general economic conditions, investor perceptions, interest rates and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world have become interconnected, which increases the possibility that economic, financial or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Moral Investing Risks. The Adviser invests in equity securities only if they meet both the Fund's investment and religious criteria, and as such, the Fund's return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

Foreign Exposure Risks. Foreign securities and securities issued by U.S. entities with substantial foreign operations can involve additional risks relating to political, economic or regulatory conditions in foreign countries. These risks include less stringent investor protection and disclosure standards of some foreign markets; fluctuations in foreign currencies; tariffs and trade agreements; and withholding or other taxes. These factors can make foreign investments more volatile and potentially less liquid than U.S. investments. In addition, foreign markets can perform differently than the U.S. market. Even with respect to U.S. companies with substantial foreign operations, economic, regulatory and currency changes in foreign countries could dramatically affect the demand for a company's products or the cost of producing those products.

Depository receipts are subject to some of the same risks as direct investment in foreign companies and certain additional risks. In a sponsored depository arrangement, the foreign issuer assumes the obligation to pay some or all of the depository's transaction fees. Under an unsponsored depository arrangement, the foreign issuer assumes no obligation and the depository's transaction fees are paid directly by the depository holders. Because unsponsored depository arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depositories and voting rights with respect to the deposited securities are not passed through to the holders.

Brexit Risks. In 2016, voters in the United Kingdom elected to leave the European Union (the "EU"), commonly referred to as "Brexit" and the United Kingdom left the EU on January 31, 2020. There presently is considerable uncertainty regarding the impact of Brexit on the economies and financial markets of the United Kingdom and of EU and other European countries and, following Brexit, there may be an extended period of political and economic uncertainty and market volatility in the United Kingdom, the EU, other European countries and globally, which may adversely impact the prices and liquidity of securities held by the Fund.

Preferred Stock Risks. Preferred stock is subject to the risks of equity securities as well as risks associated with fixed income securities, such as interest rate risk. Because a company will generally pay dividends on preferred stock only after the company makes required payments to creditors, the value of a company's preferred stock may react strongly to actual or perceived changes in the company's financial condition or outlook. Preferred stock may be less liquid than common stock and generally has limited or no voting rights. In addition, preferred stock is subject to the risk that a company may defer or not pay dividends, may call or redeem its preferred stock, or convert it to common stock.

Convertible Security Risks. A convertible security is a bond or preferred stock that can be exchanged or converted into a specific number of shares of the issuer's common stock. When the price of the underlying stock falls, the price of a convertible security tends to decline. Because a company

must generally pay interest on its nonconvertible secured debt before it can pay interest on its convertible securities, the credit rating of a company's convertible securities is generally lower than on its secured nonconvertible debt securities. A convertible security may be "callable," which means the issuer can redeem the security prior to its maturity.

Security Selection and Investment Style Risks. Like any mutual fund, the Fund's method of security selection may not be successful and the Fund may underperform the stock market as a whole. A stock may never achieve the price appreciation the Adviser anticipates and the Fund's value style may go out of favor with investors.

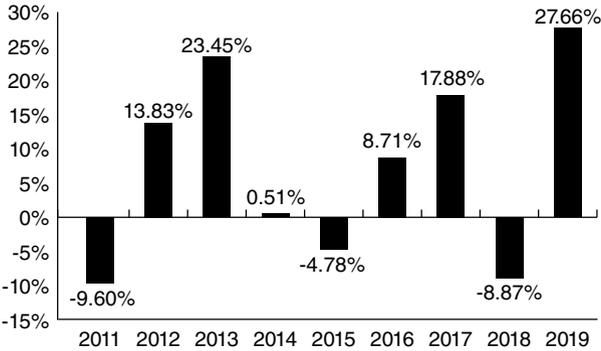

Market Capitalization Risks. The Fund may emphasize investment in a particular market capitalization, which may cause its share price to be more susceptible to the financial, market or economic events affecting issuers within that market capitalization. Larger capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology developments and consumer tastes, have fewer opportunities to expand the market for their products or services, and may not be able to attain the high growth rate of successful smaller companies. Small and mid-capitalization companies may lack the management experience, financial resources, product diversification and other competitive strengths usually present in larger companies. Micro-cap companies may have limited product lines, markets and access to financing, and may lack the management depth of larger companies. In many instances, the securities of micro, small and mid-capitalization companies are traded only over-the-counter or on a regional securities exchange, and the frequency and volume of their trading is substantially less than is typical of larger companies.

Holdings Risks. If the Fund emphasizes investments in a particular issuer or issuers or holds a smaller number of portfolio securities than other diversified mutual funds, the Fund's portfolio will be more susceptible to the depreciation of any one security than a fund that invests in a larger number of stocks.

WHAT HAS BEEN THE FUND'S PERFORMANCE HISTORY?

The bar chart and performance table shown below provide some indication of the risks and variability of investing in the Ave Maria World Equity Fund by showing the Fund's performance from year to year for each full calendar year over the lifetime of the Fund, and by showing how the Fund's average annual total returns for the 1 year, 5 year, and since inception periods ending December 31, 2019 compare with those of a broad measure of market performance. The MSCI World Index is included as an additional comparative index because it is representative of a large cross-section of the global equity markets. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Certain performance information reflects fee reductions and/or expense reimbursements by the Adviser; without such fee reductions and/or expense reimbursements, returns would be less than those shown.

Updated performance information, current through the most recent month end, is available on the Fund’s website (www.avemariafunds.com) or by calling 1-888-726-9331.

During the periods shown in the bar chart, the highest return for a quarter was 13.36% during the quarter ended March 31, 2019 and the lowest return for a quarter was -20.66% during the quarter ended September 30, 2011.

Average Annual Total Returns for Periods Ended December 31, 2019

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

AVE MARIA WORLD EQUITY FUND	<u>ONE YEAR</u>	<u>FIVE YEARS</u>	<u>SINCE INCEPTION (APRIL 30, 2010)</u>
Return Before Taxes	27.66%	7.26%	7.64%
Return After Taxes on Distributions	26.39%	6.52%	7.05%
Return After Taxes on Distributions and Sale of Fund Shares	17.39%	5.67%	6.14%
STANDARD & POOR’S GLOBAL 1200 INDEX (reflects no deduction for fees, expenses, or taxes)	28.23%	9.50%	10.00%
MSCI WORLD INDEX (reflects no deduction for fees, expenses or taxes)	27.67%	8.74%	9.35%

MANAGEMENT OF THE FUND

Investment Adviser

Schwartz Investment Counsel, Inc.

Portfolio Managers

Joseph W. Skornicka, CFA, is the lead portfolio manager and Robert C. Schwartz, CFP, is co-portfolio manager of the Ave Maria World Equity Fund.

- Joseph W. Skornicka, CFA, Senior Vice President of the Adviser, has acted as co-portfolio manager of the Fund since January 2013 and lead portfolio manager since January 2016.
- Robert C. Schwartz, CFP, Executive Vice President and Secretary of the Adviser, has acted as co-portfolio manager of the Fund since January 2016.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to “Information Relevant to All Funds” on page 44 of this Prospectus.

AVE MARIA FOCUSED FUND

WHAT IS THE FUND'S INVESTMENT OBJECTIVE?

The investment objective of the Fund is to seek long-term capital appreciation.

WHAT ARE THE FUND'S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and fees to intermediaries, which are not reflected in the table and example below.

Shareholder Fees (fees paid directly from your investment): None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.85%
Other Expenses	1.86% ⁽¹⁾
Acquired Fund Fees and Expenses	<u>0.01%⁽¹⁾</u>
Total Annual Fund Operating Expenses	2.72%
Fee Waiver and/or Expense Reimbursement	<u>1.46%⁽²⁾</u>
Total Annual Fund Operating Expenses after Fee Waiver and/or Expense Reimbursement	<u>1.26%</u>

- ⁽¹⁾ Based on estimated amounts for the current fiscal year.
- ⁽²⁾ The Adviser has contractually agreed to reduce Management Fees and reimburse Other Expenses so that "Total Annual Fund Operating Expenses" (excluding Acquired Fund Fees and Expenses, interest, taxes, brokerage costs and extraordinary expenses) do not exceed 1.25%. Any management fee waivers and/or expense reimbursements by the Adviser are subject to repayment by the Fund for a period of three years from the date such fees and expenses were waived or reimbursed, provided the repayment to the Adviser does not cause "Total Annual Fund Operating Expenses" (excluding Acquired Fund Fees and Expenses, interest, taxes, brokerage costs and extraordinary expenses) of the Fund to exceed the net expense ratio at the time such amount was waived or repaid. This expense limitation is in effect until May 1, 2023 and may be terminated by the Fund or the Adviser upon not less than 60 days' prior written notice, provided, however, that (i) the Adviser may not terminate the agreement without the approval of the Board of Trustees, and (ii) the agreement terminates automatically if the Adviser ceases to serve as the Fund's investment adviser.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 YEAR</u>	<u>3 YEARS</u>
\$ 128	\$ 400

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. Because the Fund had not commenced operations as of the date of the Fund’s prospectus, there is no portfolio turnover to report.

WHAT ARE THE FUND’S PRINCIPAL INVESTMENT STRATEGIES?

Under normal market conditions, the Ave Maria Focused Fund will invest primarily in equity securities that the Adviser believes have high earnings growth potential. Equity securities include, but are not limited to, common stocks, preferred stocks, convertible stocks, special situation companies and foreign stocks. Under normal circumstances, all of the Fund’s equity investments and at least 80% of the Fund’s net assets (plus the amount of borrowings for investment purposes) will be invested in companies believed to offer products or services or engage in practices that are not contrary to core values and teachings of the Roman Catholic Church. The Fund may invest in the securities of companies of any size, regardless of market capitalization. At times, depending on market and other conditions, the Fund may invest a substantial portion of its assets in a small number of issuers, industries or business sectors. The Fund is classified as non-diversified.

The moral screening process for the Fund uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute pornographic material; (iii) those that contribute corporate funds to Planned

Parenthood; and (iv) those that support embryonic stem cell research. The Fund is not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. The Adviser may sell (but is not required to sell) a stock based upon the Catholic Advisory Board's determination that such company operates in a way that is inconsistent with the core values and teachings of the Roman Catholic Church. A stock will automatically be sold, if necessary, to ensure that the Fund meets its policy of investing at least 80% of its net assets in morally responsible investments. For more information about the Catholic Advisory Board, please turn to page 68 of this Prospectus.

The Fund may invest in special situation companies that have fallen out of favor with the market, but are expected to appreciate over time due to company-specific developments, rather than general business conditions or movements in the markets as a whole. Special situations may include significant changes in a company's allocation of its existing capital (companies undergoing turnarounds or spin-offs) or a restructuring of assets. Special situations may also result from significant changes to an industry through regulatory developments or shifts in competition, new product introductions, changes in senior management or significant changes in a company's cost structure.

The Fund may invest in the securities of foreign issuers. The Fund will primarily invest indirectly in foreign issuers in the form of depositary receipts. Depositary receipts are stocks issued by a U.S. bank or broker that trade in the U.S. but represent ownership of securities issued by foreign companies. The Fund may also invest directly in foreign securities.

In selecting investments, the Adviser uses fundamental security analyses to identify and purchase shares of companies that the Adviser believes are selling below their intrinsic value. The Adviser looks for companies whose market prices are below what a corporate or entrepreneurial buyer would be willing to pay for the entire business. The price of stocks in relation to their free cash flow and earnings, both historical and prospective, are key determinants in the security selection process. Emphasis is also placed on identifying companies that are believed to redeploy excess capital at high rates of return. Generally, stocks are purchased with the intent to hold them for an average of five years. However, when a company no longer meets the Adviser's investment standards or a more attractive opportunity becomes available, it is sold regardless of the time held by the Fund. A stock may also be sold when there is an adverse change in a company's economic outlook or competitive advantage, a fundamental change has occurred in a company's management, the company fails to redeploy its capital at the return threshold anticipated by the Adviser, or the anticipated return threshold is no longer probable.

WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE AVE MARIA FOCUSED FUND?

As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The Fund is not intended to be a complete investment program and there is no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

General Market Risks. The return on and value of an investment in the Fund will fluctuate in response to stock market movements. Stocks and other equity securities are subject to market risks, such as rapid fluctuations in price or liquidity due to earnings and other developments affecting a particular company or industry, stock market trends and general economic conditions, investor perceptions, interest rates and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world have become interconnected, which increases the possibility that economic, financial or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Moral Investing Risks. The Adviser invests in equity securities only if they meet both the Fund's investment and religious criteria, and as such, the Fund's return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

Non-Diversification Risks. The Fund is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund

may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time. If the Fund holds significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector. This may increase the risk of loss in the Fund and its share price volatility.

Security Selection and Investment Style Risks. Like any mutual fund, the Fund's method of security selection may not be successful, and the Fund may underperform the stock market as a whole. There is no guarantee that the securities selected by the Fund will redeploy excess capital at high rates of return or achieve the price appreciation anticipated by the Adviser. The Fund's investments may be more volatile than other types of investments because their market prices may reflect future expectations. If the Adviser's opinion about the value of a company is not recognized by the market, a stock might not achieve the price appreciation anticipated by the Adviser. The Fund's style of investing may go out of favor with investors.

Market Capitalization Risks. The Fund may emphasize investment in a particular market capitalization, which may cause its share price to be more susceptible to the financial, market or economic events affecting issuers within that market capitalization. Larger capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology developments and consumer tastes, have fewer opportunities to expand the market for their products or services, and may not be able to attain the high growth rate of successful smaller companies. Small and mid-capitalization companies may lack the management experience, financial resources, product diversification and other competitive strengths usually present in larger companies. Micro-cap companies may have limited product lines, markets and access to financing, and may lack the management depth of larger companies. In many instances, the securities of micro, small, and mid-capitalization companies are traded only over-the-counter or on a regional securities exchange, and the frequency and volume of their trading is substantially less than is typical of larger companies.

Foreign Exposure Risks. Investments in foreign securities involve risks that may be different from those of U.S. securities, including the risk that foreign economies may be less stable than the U.S. economy. Foreign securities may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the United States. Foreign securities are also subject to the risk of adverse

changes in investment or exchange control regulations, tariffs, expropriation or confiscatory taxation, limitations on the removal of money or other assets, political or social instability, and nationalization of companies or industries.

Depository receipts are subject to some of the same risks as direct investment in foreign companies and certain additional risks. In a sponsored depository arrangement, the foreign issuer assumes the obligation to pay some or all of the depository's transaction fees. Under an unsponsored depository arrangement, the foreign issuer assumes no obligation and the depository's transaction fees are paid directly by the depository holders. Because unsponsored depository arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depositories and voting rights with respect to the deposited securities are not passed through to the holders.

Preferred Stock Risks. Preferred stock is subject to the risks of equity securities as well as risks associated with fixed income securities, such as interest rate risk. Because a company will generally pay dividends on preferred stock only after the company makes required payments to creditors, the value of a company's preferred stock may react strongly to actual or perceived changes in the company's financial condition or outlook. Preferred stock may be less liquid than common stock and generally has limited or no voting rights. In addition, preferred stock is subject to the risk that a company may defer or not pay dividends, may call or redeem its preferred stock, or convert it to common stock.

Convertible Security Risks. A convertible security is a bond or preferred stock that can be exchanged or converted into a specific number of shares of the issuer's common stock. When the price of the underlying stock falls, the price of a convertible security tends to decline. Because a company must generally pay interest on its nonconvertible secured debt before it can pay interest on its convertible securities, the credit rating of a company's convertible securities is generally lower than on its secured nonconvertible debt securities. A convertible security may be "callable," which means the issuer can redeem the security prior to its maturity.

Special Situation Company Risks. Investing in special situation companies carries an additional risk of loss if the expected development does not occur or produce the intended results. The availability of special situation companies that present attractive investment opportunities may be sporadic, or rare in certain instances, which may detract from the Fund's ability to pursue its investment objectives.

WHAT HAS BEEN THE FUND'S PERFORMANCE HISTORY?

The Fund is newly organized and therefore does not have a performance history for a full calendar year to report. When the Fund has returns for a full calendar year, this Prospectus will include performance information, which will give some indication of the risks and variability of investing in the Fund by comparing the Fund's performance with a broad measure of market performance. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information, current through the most recent month end, is available on the Fund's website (www.avemariafunds.com) or by calling 1-888-726-9331.

MANAGEMENT OF THE FUND

Investment Adviser

Schwartz Investment Counsel, Inc.

Portfolio Managers

Chadd M. Garcia, CFA, is the lead portfolio manager, and Adam P. Gaglio, CFA, is the co-portfolio manager of the Ave Maria Focused Fund.

- Chadd M. Garcia, CFA, Vice President and Senior Research Analyst of the Adviser, has acted as lead portfolio manager of the Fund since its inception in May 2020.
- Adam P. Gaglio, CFA, Vice President and Equity Research Analyst of the Adviser, has acted as co-portfolio manager of the Fund since its inception in May 2020.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Information Relevant to All Funds" on page 44 of this Prospectus.

AVE MARIA BOND FUND

WHAT IS THE FUND'S INVESTMENT OBJECTIVE?

The investment objective of the Ave Maria Bond Fund is to seek preservation of principal with a reasonable level of current income.

WHAT ARE THE FUND'S FEES AND EXPENSES?

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and fees to intermediaries, which are not reflected in the table and example below.

Shareholder Fees (fees paid directly from your investment) None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.30%
Other Expenses	<u>0.19%</u>
Total Annual Fund Operating Expenses	<u>0.49%</u>

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 YEAR</u>	<u>3 YEARS</u>	<u>5 YEARS</u>	<u>10 YEARS</u>
\$ 50	\$ 157	\$ 274	\$ 616

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 31% of the average value of its portfolio.

WHAT ARE THE FUND'S PRINCIPAL INVESTMENT STRATEGIES?

The Ave Maria Bond Fund invests primarily (80% or more of its net assets, including the amount of any borrowings for investment purposes) in investment-grade debt securities of domestic issuers, including the U.S. government and its agencies and instrumentalities, corporations and municipalities and money market instruments. The Fund may invest up to 20% of its net assets in equity securities (which include preferred stocks, common stocks paying dividends and securities convertible into common stock) of domestic issuers or U.S. dollar-denominated foreign issuers of any market capitalization. Under normal circumstances, all of the Fund's investments in corporate debt and equity securities will satisfy the Fund's religious criteria. This process is designed to avoid investments in companies believed to offer products or services or engage in practices that are contrary to core values and teachings of the Roman Catholic Church.

The Fund seeks to invest in securities that appear comparatively undervalued. For example, the Fund would consider a security having a yield that is higher than another security of similar credit quality and duration to be comparatively undervalued. Unlike funds investing solely for income, the Fund also seeks modest capital appreciation and growth of investment income. The Fund may purchase securities that are convertible into common stock or carry warrants or common stock purchase rights when the Adviser believes they offer higher return potential than nonconvertible securities. Convertible securities generally are debt obligations that pay income, but may convert into common or preferred stock under certain circumstances. The Fund may also seek capital appreciation by investing in fixed income securities when the Adviser believes interest rates on such investments may decline, thereby increasing the market value of the Fund's fixed income securities. The Adviser may also purchase securities it believes have a high potential for credit upgrade.

The moral screening process for the Fund uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute pornographic material; (iii) those that contribute corporate funds to Planned Parenthood; and (iv) those that support embryonic stem cell research. The Fund is not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. For more information about the Catholic Advisory Board, please turn to page 68 of this Prospectus.

The Fund will invest at least 80% of its net assets in “investment-grade” debt securities and securities issued by the U.S. government, its agencies or instrumentalities. Investment-grade debt securities are corporate bonds, debentures, notes or money market instruments rated in the top four categories at the time of purchase by a nationally recognized rating agency, or unrated securities that the Adviser considers to be of comparable quality. Securities issued by the U.S. government, its agencies or its instrumentalities include direct obligations of the U.S. Treasury (including Treasury Inflation-Protected Securities (“TIPS”)) and securities issued or guaranteed as to payment of interest and principal by agencies or instrumentalities of the U.S. government. The Fund will invest no more than 20% of its net assets in debt securities whose highest rating, at the time of purchase, is BBB by S&P Global Ratings (“S&P”) (or an equivalent rating) or lower.

The Fund may invest in debt securities of any maturity. In selecting debt securities, the Adviser will focus on the issuer’s credit strength as well as the security’s effective duration and yield. Effective duration is a measure of a debt security’s price sensitivity to interest rate changes. Effective duration takes into account a debt security’s cash flows over time including the possibility that a debt security might be prepaid by the issuer or redeemed by the holder prior to its stated maturity date. In contrast, maturity measures only the time until the final payment is due. When the Adviser expects interest rates to rise, it may purchase debt securities with shorter maturities or invest in money market instruments. When the Adviser expects interest rates to fall, it may invest in longer-term debt securities. The Adviser may sell a security when it no longer meets its criteria for investment or when there are more attractive investment opportunities available. A stock will automatically be sold, if necessary, to ensure that the Fund’s investments are in accordance with its morally responsible investment policy.

WHAT ARE THE PRINCIPAL RISKS OF INVESTING IN THE AVE MARIA BOND FUND?

As with any mutual fund investment, there is a risk that you could lose money by investing in the Fund. The Fund is not intended to be a complete investment program and there is no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Equity Market Risks. The Fund is subject to the risk that the securities markets may decrease in value. Factors affecting the securities markets include economic growth and decline, interest rate levels and political events. Stocks tend to move in cycles and may experience periods of turbulence and instability. Any equity securities held by the Fund may be subject to certain risks, such as rapid fluctuations in price or liquidity due to earnings or other developments affecting a particular company or industry, stock market trends and general economic conditions, investor perceptions, interest rates and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or

other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world have become interconnected, which increases the possibility that economic, financial or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Changes in the dividend policies or capital resources of companies in which the Fund invests may affect the Fund's ability to generate income. Investments in micro-, small- and mid-sized companies often involve higher risks because they may lack the management experience, financial resources, product diversification and competitive strengths usually present with larger corporations. Foreign securities can involve additional risks relating to political, economic or regulatory conditions in foreign countries, which can make foreign investments more volatile and potentially less liquid than U.S. investments. There is a risk the Adviser will not accurately predict the impact of these and other factors, in which case the securities owned by the Fund might decline in value.

Debt Security Risks. Any debt securities held by the Fund may be subject to certain risks, such as interest rate risks, credit risks and liquidity risks. At times there may be an imbalance of supply and demand in the markets which could result in greater price volatility, less liquidity, wider trading spreads and a lack of price transparency. Convertible securities may be subject to both debt and equity security risks described herein.

- **Interest Rate Risks.** The value of the Fund's debt securities is affected by changes in interest rates. When interest rates rise, the value of the Fund's debt securities and its share price will decline. A change in interest rates will also change the amount of income the Fund generates. Securities with longer maturities generally are more sensitive to interest rate changes than securities with shorter maturities. There is presently uncertainty as to the direction of interest rates and the pace at which interest rates may change. The current historically low interest rate environment heightens the risks associated with rising interest rates and may cause the Fund to face a greater level of interest rate risk and volatility.
- **Credit Risks.** The value of the Fund's debt securities is affected by the issuers' continued ability to make interest and principal payments, when due. The Fund could lose money if an issuer cannot meet its financial obligations or if its credit rating is downgraded. Securities rated in the lowest of the

investment-grade categories (BBB or an equivalent rating) are considered more speculative than higher-rated securities. Their issuers may not be as financially strong and they may have a weakened capacity to pay interest or principal, especially during periods of economic downturn or uncertainty.

An investment grade determination is made at the time of purchase and the Fund is not required to liquidate a security whose rating is reduced below investment grade. When a security's rating is reduced below investment grade, it may be more difficult for the Fund to receive income and achieve capital appreciation from its investment.

Government securities held by the Fund may or may not be backed by the "full faith and credit" of the U.S. government. Securities backed by the full faith and credit of the U.S. government include Treasury securities and Overseas Private Investment Corporation securities. Securities that are not backed by the "full faith and credit" of the U.S. government include securities issued by various other government agencies.

A rating by a nationally recognized statistical rating organization represents the organization's opinion as to the credit quality of a security but is not an absolute standard of quality or guarantee as to the creditworthiness of an issuer. Ratings of nationally recognized statistical rating organizations present an inherent conflict of interest because such organizations are paid by the entities whose securities they rate. The credit rating of a security does not necessarily address its market risk (that is, the risk that the value of a security will be adversely affected due to movements in the overall financial markets or changes in the level of interest rates). In addition, ratings may not be revised promptly to reflect developments in the issuer's financial condition.

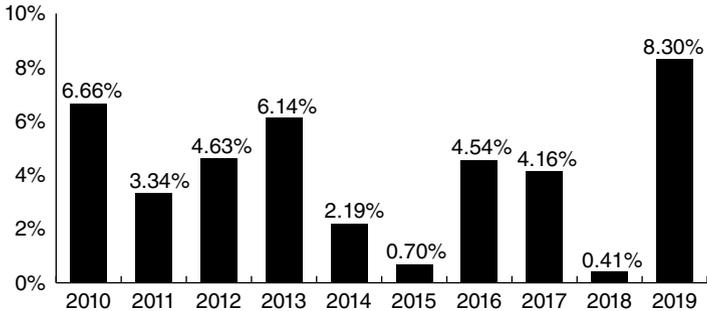

- **Liquidity Risks.** Debt securities may also be subject to liquidity risk, which is the risk that a security can not be sold at an advantageous time or price. If a debt security is downgraded or drops in price, the market demand may be limited, making that security difficult to sell. Additionally the market for certain debt securities may become illiquid under adverse market or economic conditions, independent of any specific adverse changes in the condition of a particular issuer. Liquidity risk may be magnified in a rising interest rate environment or in other circumstances where investor redemptions from fixed income mutual funds may be higher than normal. The capacity of traditional dealers to engage in fixed income trading has not kept pace with the growth of the fixed income market, causing dealer inventories to be at or near historical lows relative to market size. The reduction in dealer inventories could lead to decreased liquidity, increased volatility and wider spreads, which may become exacerbated during periods of economic or political stress. Lower rated securities may be subject to greater levels of liquidity risk.

Security Selection Risks. Like any mutual fund, the Fund's method of security selection may not be successful and the Fund might underperform the markets as a whole. The Adviser's opinion about the creditworthiness of a company, the intrinsic value of a security or the direction of interest rates may be incorrect, which may cause the Fund to underperform relative to other mutual funds that have similar investment strategies.

Moral Investing Risks. The Adviser invests in corporate debt and equity securities only if they meet both the Fund's investment and religious criteria, and as such, the Fund's return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

WHAT HAS BEEN THE FUND'S PERFORMANCE HISTORY?

The bar chart and performance table shown below provide some indication of the risks and variability of investing in the Ave Maria Bond Fund by showing the Fund's performance from year to year for each of the last ten calendar years, and by showing how the Fund's average annual total returns for the 1, 5 and 10 year periods ended December 31, 2019 compare with those of a broad measure of market performance. How the Fund has performed in the past (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Certain performance information reflects fee reductions and/or expense reimbursements by the Adviser; without such fee reductions and/or expense reimbursements, returns would be less than those shown. Updated performance information, current through the most recent month end, is available on the Fund's website (www.avemariafunds.com) or by calling 1-888-726-9331.

During the periods shown in the bar chart, the highest return for a quarter was 3.42% during the quarter ended September 30, 2010 and the lowest return for a quarter was -2.00% during the quarter ended September 30, 2011.

Average Annual Total Returns for Periods Ended December 31, 2019

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

AVE MARIA BOND FUND	<u>ONE YEAR</u>	<u>FIVE YEARS</u>	<u>TEN YEARS</u>
Return Before Taxes	8.30%	3.58%	4.08%
Return After Taxes on Distributions	7.19%	2.71%	3.21%
Return After Taxes on Distributions and Sale of Fund Shares	5.24%	2.51%	2.99%
BLOOMBERG BARCLAYS U.S. INTERMEDIATE GOVERNMENT/CREDIT INDEX (reflects no deduction for fees, expenses, or taxes)	6.80%	2.57%	3.05%

MANAGEMENT OF THE FUND

Investment Adviser

Schwartz Investment Counsel, Inc.

Portfolio Managers

Brandon S. Scheitler is the lead portfolio manager, and George P. Schwartz, CFA, is the co-portfolio manager of the Ave Maria Bond Fund.

- Brandon S. Scheitler, Vice President of the Adviser, has acted as co-portfolio manager of the Fund since September 2013 and lead portfolio manager since January 2016.
- George P. Schwartz, CFA, Chairman and Chief Executive Officer of the Adviser, has acted as co-portfolio manager of the Fund since January 2020.

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to "Information Relevant to All Funds" on page 44 of this Prospectus.

INFORMATION RELEVANT TO ALL FUNDS

PURCHASE AND SALE OF FUND SHARES

Minimum Initial Investment - \$2,500

Minimum Additional Investment - None, except that the minimum for participants in the Automatic Investment Plan is \$50.

General Information. You may purchase or redeem (sell) shares of each Fund on each day that the Funds are open for business. Transactions may be initiated by written request, by wire transfer or through your financial institution.

TAX INFORMATION

Each Fund's distributions are generally taxed as ordinary income or capital gains unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, or you are a tax-exempt investor.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Funds through a broker-dealer or other financial intermediary (such as a bank), the Funds and their related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Funds over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INVESTMENT INFORMATION

INVESTMENT OBJECTIVES

Ave Maria Value Fund:

Long-term capital appreciation

Ave Maria Growth Fund:

Long-term capital appreciation

Ave Maria Rising Dividend Fund:

Increasing dividend income over time, long-term growth of capital, and a reasonable level of current income

Ave Maria World Equity Fund:

Long-term capital appreciation

Ave Maria Focused Fund:

Long-term capital appreciation

Ave Maria Bond Fund:

Preservation of principal with a reasonable level of current income

Each Fund's investment objective is fundamental and as such may not be changed without the affirmative vote of the holders of a majority (as defined under the Investment Company Act of 1940) of a Fund's outstanding shares.

PRINCIPAL INVESTMENT STRATEGIES

Under normal circumstances, all of the equity investments held by the Ave Maria Value Fund, Ave Maria Growth Fund, Ave Maria Rising Dividend Fund, Ave Maria World Equity Fund and the Ave Maria Focused Fund and at least 80% of each Fund's net assets, including the amount of any borrowings for investment purposes, will be invested in companies meeting the Fund's religious criteria. Under normal circumstances, all of the Ave Maria Bond Fund's investments in corporate debt and equity securities will satisfy the Fund's religious criteria. These policies are fundamental and as such may not be changed without the affirmative vote of the holders of a majority (as defined under the Investment Company Act of 1940) of a Fund's outstanding shares.

The moral screening process for the Funds uses information from third-party screening providers, the Adviser, shareholders and other sources. The Catholic Advisory Board sets the criteria for screening out companies based on religious principles. In making this determination, the Catholic Advisory Board members are guided by the magisterium of the Roman Catholic Church. The magisterium of the Roman Catholic Church is the authority or office of the Roman Catholic Church to teach the authentic interpretation of the Word of God, whether in its written form or in universal faith and moral practices. This process will, in general, avoid four major categories of companies: (i) those involved in the practice of abortion; (ii) those whose policies are judged to be antifamily, such as companies that distribute pornographic material; (iii) those that contribute corporate funds to Planned Parenthood; and (iv) those that support embryonic stem cell research. The Funds are not authorized or sponsored by the Roman Catholic Church and the Catholic Advisory Board is not affiliated with the Roman Catholic Church. The Adviser may sell (but

is not required to sell) a stock based upon the Catholic Advisory Board's determination that such company operates in a way that is inconsistent with the core values and teachings of the Roman Catholic Church.

Each Fund may invest in securities of foreign issuers that are U.S. dollar-denominated and trade on a U.S. securities exchange or domestically in the over-the-counter markets. Each Fund may, with respect to its investments in foreign issuers, invest indirectly in such companies in the form of American Depositary Receipts. Each Fund may invest in companies of various market capitalizations.

The portion of a Fund's net assets invested at any given time in securities of issuers engaged in industries within a particular sector is affected by valuation considerations and other investment characteristics of that sector. As a result, a Fund's investment in various sectors generally will change over time, and a significant allocation to any particular sector does not necessarily represent a continuing investment policy or investment strategy to invest in that sector. At times, the Ave Maria Value Fund, Ave Maria Growth Fund, Ave Maria Rising Dividend Fund and the Ave Maria World Equity Fund Fund may emphasize investments in a particular issuer or issuers or hold a smaller number of portfolio securities than other diversified mutual funds. The Ave Maria Focused Fund is classified as non-diversified and may invest a substantial portion of its assets in a small number of issuers, industries or business sectors.

Ave Maria Value Fund

Under normal market conditions, the Ave Maria Value Fund invests primarily in common stocks believed to be priced at a discount to their true value according to the Adviser's criteria for value. The Adviser utilizes a comprehensive financial database and other sources with a universe of over 10,000 primarily domestic corporations to identify companies as candidates for the Fund. Using fundamental security analysis, the Adviser extensively analyzes stocks to identify those that meet the Fund's investment objective and standards. The price of stocks in relation to cash flow, earnings, dividends, book value and asset value, both historical and prospective, are key determinants in the security selection process. Emphasis is also placed on identifying companies undergoing changes that the Adviser believes will significantly enhance shareholder value in the future, including changes in operations, management, capital allocation, strategies and product offerings.

Ave Maria Growth Fund

The Ave Maria Growth Fund invests primarily in common stocks of companies believed by the Adviser to offer above-average potential for growth in revenues, profits or cash flow. Dividend and interest income are secondary considerations in investment selection. In selecting investments, the Adviser relies primarily on fundamental analysis by reviewing the issuing company's financial statements, the fundamentals of other companies in the same industry, market trends and economic conditions. The Adviser evaluates a company's earnings growth and prospects, price to cash flow and other variables to determine whether the company meets its growth criteria.

Ave Maria Rising Dividend Fund

Under normal circumstances, the Ave Maria Rising Dividend Fund will invest at least 80% of its net assets, including the amount of any borrowings for investment purposes, in the common stocks of dividend-paying companies that are expected to increase their dividends over time and to provide long-term growth of capital. The Adviser believes that a track record of dividend increases is an excellent indicator of a company's financial health and growth prospects, and that over the long term, income can contribute significantly to total return. Dividends can also help reduce the Fund's volatility during periods of market turbulence and help offset losses when stock prices are falling. The Adviser looks for stocks with sustainable, above-average growth in earnings and dividends, and the Adviser attempts to buy them when they are temporarily out-of-favor or undervalued by the market.

In pursuing the Fund's investment objective, the Adviser has the discretion to purchase securities in special situations when it perceives an unusual opportunity for gain. These special situations might arise when the Adviser believes a security could increase in value for a variety of reasons, including a change in management, an extraordinary corporate event, or a temporary imbalance in the supply of or demand for the securities.

Ave Maria World Equity Fund

Under normal market conditions, the Ave Maria World Equity Fund will invest at least 80% of its net assets, including the amount of any borrowings for investment purposes, in common stocks of U.S. and non-U.S. companies. The Fund will invest at least 60% of its net assets in common stocks issued by non-U.S. companies. For purposes of this requirement, a company is deemed to be a "non-U.S. company" if the company is headquartered outside the United States, or has at least 50% of its revenues or operations outside of the United States during its most recent fiscal year, at the time of purchase. The Fund will limit its investments in securities of issuers located in any one country (other than the United States) to less than 25% of the Fund's total assets.

The Fund invests primarily in common stocks believed to be priced at a discount to their true value according to the Adviser's criteria for value. The price of stocks in relation to cash flow, earnings, dividends, book value and asset value, both historical and prospective, are key determinants in the security selection process. Emphasis is also placed on identifying companies undergoing changes that the Adviser believes will significantly enhance shareholder value in the future, including changes in operations, management, capital allocation, strategies and product offerings.

Ave Maria Focused Fund

Under normal market conditions, the Ave Maria Focused Fund will invest primarily in equity securities that the Adviser believes have high earnings growth potential. The Fund may invest in special situation companies that have fallen out of favor with the market, but are expected to appreciate over time due to company-specific developments, rather than general business conditions or movements in the markets as a whole. The Fund is classified as non-diversified.

In selecting investments, the Adviser uses fundamental security analyses to identify and purchase shares of companies that the Adviser believes are selling below their intrinsic value. The Adviser looks for companies whose market prices are below what a corporate or entrepreneurial buyer would be willing to pay for the entire business. The price of stocks in relation to their free cash flow and earnings, both historical and prospective, are key determinants in the security selection process. Emphasis is also placed on identifying companies that are believed to redeploy excess capital at high rates of return.

Ave Maria Bond Fund

The Ave Maria Bond Fund invests primarily (80% or more of its net assets, including the amount of any borrowings for investment purposes) in investment-grade debt securities of domestic issuers, including the U.S. government and its agencies and instrumentalities, corporations and municipalities and money market instruments. The Fund may invest up to 20% of its net assets in equity securities (which include preferred stocks, common stocks paying dividends and securities convertible into common stock) of domestic issuers or U.S. dollar-denominated foreign issuers of any market capitalization.

The Fund seeks to invest in securities that appear comparatively undervalued. Unlike funds investing solely for income, the Fund also seeks modest capital appreciation and growth of investment income. The Fund may also seek capital appreciation by investing in fixed income securities when the Adviser believes interest rates on such investments may decline, thereby increasing the market value of the Fund's fixed income securities. The Adviser may also purchase securities it believes have a high potential for credit upgrade.

The Fund will invest at least 80% of its net assets in "investment-grade" debt securities and securities issued by the U.S. government, its agencies or instrumentalities. The Fund will invest no more than 20% of its net assets in debt securities whose highest rating, at the time of purchase, is BBB by S&P (or an equivalent rating) or lower. The Fund may invest up to 5% of its net assets in so-called "junk" securities whose ratings are below investment-grade.

The Fund may invest in debt securities of any maturity. In selecting debt securities, the Adviser will focus on the issuer's credit strength as well as the security's effective duration and yield. When the Adviser expects interest rates to rise, it may purchase debt securities with shorter maturities or invest in money market instruments. When the Adviser expects interest rates to fall, it may invest in longer-term debt securities.

NON-PRINCIPAL STRATEGIES

Temporary Defensive Strategies/Cash or Cash Equivalents (All Funds).

For temporary defensive purposes, each Fund may from time to time invest a significant portion, and possibly all, of its assets in U.S. Government obligations or money market instruments. A Fund may also hold U.S. Government obligations or money market instruments for liquidity purposes, as funds awaiting investment, to accumulate cash for anticipated purchases and to provide for shareholder redemptions or operational expenses. "U.S. Government obligations" include securities that are issued or guaranteed by the U.S. Treasury, by various agencies of the U.S. Government, and by various instrumentalities that have been established or sponsored by the U.S. Government. The money market instruments that a Fund may own from time to time include U.S. Government obligations having a maturity of less than one year, shares of money market mutual funds, commercial paper rated A-1 by S&P or Prime-1 by Moody's Investors Service, Inc., repurchase agreements, bank debt instruments (certificates of deposit, time deposits and bankers' acceptances), and other short-term instruments issued by domestic branches of U.S. financial institutions that are insured by the Federal Deposit Insurance Corporation and have assets exceeding \$10 billion. To the extent a Fund invests in money market mutual funds, there will be some duplication of expenses because the Fund would bear its pro-rata portion of such money market funds' advisory and operational fees. A Fund's cash level may also be a result of the Adviser's individual security selection process, and therefore may vary, depending on the Adviser's desired security weightings. When a Fund invests for temporary defensive purposes, these investments may be inconsistent with core values and teachings of the Roman Catholic Church and may conflict with or impair the Fund's ability to achieve its investment objective.

Illiquid Securities (All Funds). Each Fund will not invest more than 15% of the value of its net assets in securities or other investments that are illiquid. Illiquid securities are investments that cannot reasonably be expected to be sold or disposed of in current market conditions, within seven calendar days, without significantly impacting the market value of the investment.

Debt Securities (Ave Maria Focused Fund). The Ave Maria Focused Fund Fund may invest in debt securities of domestic and foreign issuers. These may include, but are not limited to, U.S. Government obligations, investment grade corporate debt securities, and convertible debt securities. U.S. Government obligations include securities that are issued or guaranteed by the U.S. Treasury, by various agencies of the U.S. Government, and by various instrumentalities that have been established or sponsored by the U.S. Government. U.S. Government obligations may or may not be backed by the “full faith and credit” of the U.S. Government. The Fund may also invest in debt securities rated below investment grade (high yield or junk bonds), but will not invest more than 15% of its net assets in junk bonds. The Fund may invest in debt securities of any maturity. In selecting debt securities, the Adviser will focus on the issuer’s credit strength as well as the security’s effective duration and yield. Effective duration takes into account a debt security’s cash flows over time including the possibility that a debt security might be prepaid by the issuer or redeemed by the holder prior to its stated maturity date. In contrast, maturity measures only the time until the final payment is due.

Under normal market conditions, the Ave Maria Focused Fund will limit its investment in ETFs, debt securities (including junk bonds), and cash or cash equivalents to no more than 30% of its net assets.

Emerging Market Securities (Ave Maria World Equity Fund and Ave Maria Focused Fund). Each Fund may invest in equity securities of issuers located in emerging markets. Emerging market countries include every country in the world except Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States.

Exchange-Traded Funds (All Funds). Each Fund may also invest in exchange-traded funds (“ETFs”) if the Adviser believes it is advisable to expose the Fund to the broad market or to broad market sectors or to hedge against market risk without purchasing a large number of individual securities. Such ETFs will typically hold a portfolio of securities designed to track the performance of a particular index or sector. ETFs differ from traditional mutual funds in that their shares are listed on a securities exchange and can be traded intraday. When a Fund invests in an ETF, the Fund’s shareholders will indirectly pay a proportionate share of the management fee and operating expenses of the ETF.

RISKS OF INVESTING IN THE FUNDS

As with any mutual fund investment, there is a risk that you could lose money by investing in the Funds. The Funds are not intended to be a complete investment program and there is no assurance that a Fund will achieve its investment objective. An investment in the Funds is not a deposit of a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Risks Applicable to All Funds

General Market Risks. The Funds are subject to the risk that the securities markets may decrease in value. Factors affecting the securities markets include economic growth and decline, interest rate levels and political events. There is a risk the Adviser will not accurately predict the impact of these and other factors, in which case the securities owned by a Fund might decline in value. Any debt securities held by a Fund may be subject to certain risks, such as credit risks, interest rate risks and liquidity risks. Potential changes in government policy affecting interest rates may result in periods of volatility and increased redemptions for debt securities. Any equity securities held by a Fund may be subject to certain risks, such as rapid fluctuations in price or liquidity due to earnings and other developments affecting a particular company or industry, stock market trends and general economic conditions, investor perceptions and other factors beyond the control of the Adviser. The value of an investment in the Fund may decline in tandem with a drop in the overall value of the markets in which the Fund invests and/or other markets based on negative developments in the U.S. and global economies. Economic, political and financial conditions, or industry or economic trends and developments, may, from time to time, and for varying periods of time, cause volatility, illiquidity or other potentially adverse effects in the financial markets. Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes and tsunamis, and widespread disease, including pandemics and epidemics, have been and can be highly disruptive to the economies and the markets. For example, the outbreak of an infectious respiratory illness caused by a novel coronavirus, known as COVID-19, has resulted in significant disruptions in global business activities and has adversely affected the economies of many countries, including the U.S. Economies and financial markets throughout the world are interconnected, which increases the possibility that economic, financial or political events in one country could have a profound impact on global economies or markets. U.S. companies with significant non-U.S. operations can be impacted by political, economic and regulatory developments in foreign markets. Stocks tend to move in cycles and may experience periods of turbulence and instability.

Moral Investing Risks. The Adviser invests in corporate debt and equity securities only if they meet both the Fund's investment and religious criteria, and as such, the return may be lower than if the Adviser made decisions based solely on investment considerations. If the Fund holds a security of a company that has violated the teachings and core values of the Roman Catholic Church, it could result in the Fund selling the security at an inopportune time from a purely financial point of view. The process of screening out companies based on religious principles relies in part upon information or data from third parties that may be inaccurate or unavailable, which could cause the Fund to inadvertently hold securities that do not meet its religious criteria.

Market Capitalization Risks. A Fund may emphasize investment in a particular market capitalization, which may cause its share price to be more susceptible to the financial, market or economic events affecting issuers within that market capitalization. Larger capitalization companies may be unable to respond quickly to new competitive challenges, such as changes in technology developments and consumer tastes, have fewer opportunities to expand the market for their products or services, and may not be able to attain the high growth rate of successful smaller companies. Small and mid-capitalization companies may lack the management experience, financial resources, product diversification and other competitive strengths usually present in larger companies. Micro-cap companies may have limited product lines, markets and access to financing, and may lack the management depth of larger companies. In many instances, the securities of micro, small and mid-capitalization companies are traded only over-the-counter or on a regional securities exchange, and the frequency and volume of their trading is substantially less than is typical of larger companies.

Foreign Exposure Risks. Investments in foreign securities involve risks that may be different from those of U.S. securities, including the risk that foreign economies may be less stable than the U.S. economy. Foreign securities may not be subject to uniform audit, financial reporting or disclosure standards, practices or requirements comparable to those found in the United States. Foreign securities are also subject to the risk of adverse changes in investment or exchange control regulations, tariffs, expropriation or confiscatory taxation, limitations on the removal of money or other assets, political or social instability, and nationalization of companies or industries.

Depository receipts are subject to some of the same risks as direct investment in foreign companies and certain additional risks. In a sponsored depository arrangement, the foreign issuer assumes the obligation to pay some or all of the depository's transaction fees. Under an unsponsored depository arrangement, the foreign issuer assumes no obligation and the depository's transaction fees are paid directly by the depository holders. Because unsponsored depository arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored depositories and voting rights with respect to the deposited securities are not passed through to the holders.

Preferred Stock Risks. Preferred stock is subject to the risks of equity securities as well as risks associated with fixed income securities, such as interest rate risk. Because a company will generally pay dividends on preferred stock only after the company makes required payments to creditors, the value of a company's preferred stock may react strongly to actual or perceived changes in the company's financial condition or outlook. Preferred stock may be less liquid than common stock and generally has limited or no voting rights. In addition, preferred stock is subject to the risk that a company may defer or not pay dividends, may call or redeem its preferred stock, or convert it to common stock.

Convertible Security Risks. A convertible security is a bond or preferred stock that can be exchanged or converted into a specific number of shares of the issuer's common stock. When the price of the underlying stock falls, the price of a convertible security tends to decline. Because a company must generally pay interest on its nonconvertible secured debt before it can pay interest on its convertible securities, the credit rating of a company's convertible securities is generally lower than on its secured nonconvertible debt securities. A convertible security may be "callable," which means the issuer can redeem the security prior to its maturity.

Sector Risks. If a Fund holds significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector. This may increase the risk of loss in the Fund and its share price volatility. As of December 31, 2019, approximately 29% and 25% of the net assets of the Ave Maria Value Fund and the Ave Maria Growth Fund, respectively, were invested in stocks within the industrials sector. Companies in the industrials sector may be impacted by factors such as general economic conditions, interest rates, insurance costs, technical progress, capital-spending levels, commodity prices, labor relations and government regulation.

Security Selection and Investment Style Risks. Like any mutual fund, a Fund's method of security selection may not be successful and the Fund might underperform the markets as a whole.

With respect to Ave Maria Value Fund and Ave Maria World Equity Fund, a stock may never achieve the price appreciation the Adviser anticipates and the Fund's value style may go out of favor with investors.

With respect to Ave Maria Growth Fund, growth securities may be more sensitive to changes in current or expected earnings than other securities and may be more volatile. A company may never achieve the earnings growth the Adviser anticipates and the Fund's growth style may go out of favor with investors.

With respect to Ave Maria Rising Dividend Fund, there is no guarantee that the securities selected by the Fund will provide increasing dividend income or earnings growth. Changes in the dividend policies or capital resources of companies in which the Fund invests may affect the Fund's ability to generate income. The investment style utilized for the Fund could fall out of favor with investors, which may cause the Fund to underperform relative to other mutual funds that do not emphasize dividend paying stocks.

With respect to Ave Maria Focused Fund, there is no guarantee that the securities selected by the Fund will redeploy excess capital at high rates of return or achieve the price appreciation anticipated by the Adviser. The Fund's investments may be more volatile than other types of investments

because their market prices may reflect future expectations. If the Adviser's opinion about the value of a company is not recognized by the market, a stock might not achieve the price appreciation anticipated by the Adviser. The Fund's style of investing may go out of favor with investors.

With respect to Ave Maria Bond Fund, the Adviser's opinion about the creditworthiness of a company, the intrinsic value of a security or the direction of interest rates may be incorrect, which may cause the Fund to underperform relative to other mutual funds that have similar investment strategies.

Holdings Risks. If a Fund emphasizes investments in a particular issuer or issuers or holds a smaller number of portfolio securities than other diversified mutual funds, the Fund's portfolio will be more susceptible to the depreciation of any one security than a fund that invests in a larger number of stocks.

Risks Applicable to Specific Funds

Non-Diversification Risks (Ave Maria Focused Fund). The Ave Maria Focused Fund is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time. If the Fund holds significant investments in the securities of issuers in industries within a particular sector, any development affecting that sector will have a greater impact on the value of the net assets of the Fund than would be the case if the Fund did not have significant investments in that sector. For instance, economic or market factors, regulation or deregulation, and technological or other developments may negatively impact all companies in a particular sector. This may increase the risk of loss in the Fund and its share price volatility.

Special Situation Company Risks (Ave Maria Rising Dividend Fund and Ave Maria Focused Fund). Investing in special situation companies carries an additional risk of loss if the expected development does not occur or produce the intended results. The availability of special situation companies that present attractive investment opportunities may be sporadic, or rare in certain instances, which may detract from the Fund's ability to pursue its investment objectives.

Emerging Market Securities (Ave Maria World Equity Fund and Ave Maria Focused Fund). The risks of foreign securities are more pronounced in the case of investments in securities of issuers that are located in or have substantial operations in emerging market countries. Emerging market countries may have less diverse and mature economies and their political systems may be less stable than those of developed countries. Emerging market securities may present issuer, market, currency, liquidity, volatility, valuation, legal, political and other risks different from, and potentially greater than, the risk of investing in securities of issuers in more developed markets.

Debt Security Risks (Ave Maria Bond Fund and Ave Maria Focused Fund). Any debt securities held by a Fund may be subject to certain risks, such as interest rate risks, credit risks and liquidity risks. At times there may be an imbalance of supply and demand in the markets which could result in greater price volatility, less liquidity, wider trading spreads and a lack of price transparency. Credit risk is the risk that the issuer of the security cannot meet its financial obligations. Issuers of junk bonds may not be as financially strong and may have a weakened capacity to pay interest or principal, especially during periods of economic downturn or uncertainty. Interest rate risk is the risk that a Fund's share price will be affected by changes in interest rates. When interest rates rise, the value of a Fund's debt securities and share price generally will decline. Securities with longer maturities generally are more sensitive to interest rate changes than securities with shorter maturities. Potential changes in government policy affecting interest rates may cause debt securities to experience a heightened level of interest rate risk. Liquidity risk is the risk that a security cannot be sold at an advantageous time or price. Liquidity risk may be magnified in a rising interest rate environment, if there is a reduction in the inventories of traditional dealers, or in other circumstances. Lower rated securities may be subject to greater levels of liquidity risk.

Non-Principal Risks

ETF Risks. Investments in ETFs generally present the same primary risks as investments in conventional investment companies, including the risk that the general level of security prices owned by the ETF may decline, thereby affecting the value of the shares of the ETF. In addition, ETFs are subject to certain risks that do not apply to mutual funds, including the risk that the market price of an ETF's shares may trade at a discount to its net asset value, or that an active trading market for an ETF's shares may not be developed or maintained. ETFs are also subject to the risks of the underlying securities or sectors that the ETF is designed to track.

Cash or Cash Equivalents. U.S. Government obligations may or may not be backed by the "full faith and credit" of the U.S. Government. There is a risk that the U.S. Government will not provide financial support to U.S. government agencies or instrumentalities that are not backed by the "full faith and credit" of the U.S. Government if it is not obligated to do so by law. A low interest rate environment may prevent U.S. Government obligations or money market instruments from keeping pace with inflation.

Liquidity Risks. Liquidity risk is the risk that a security cannot be sold at an advantageous time and/or price in the secondary market, which could prevent a Fund from selling an investment at the approximate price that it is valued or the time it desires to sell.

HOW TO PURCHASE SHARES

Your initial investment in a Fund ordinarily must be at least \$2,500. The Funds may, in the Adviser's sole discretion, accept certain accounts with less than the stated minimum initial investment. The minimum investment requirement may also be waived for certain financial intermediaries and organizations (including omnibus accounts) that have lower minimum investment amounts. Shares of each Fund are sold on a continuous basis at the net asset value next determined after receipt of a purchase order by the Funds. Purchase orders received by the Funds' transfer agent, Ultimus Fund Solutions, LLC (the "Transfer Agent") by 4:00 p.m., Eastern time, are priced at that day's net asset value. Purchase orders received by the Transfer Agent after 4:00 p.m., Eastern time, are priced at the net asset value next determined on the following business day.

OPENING A NEW ACCOUNT

You may open an account and make an initial investment in the Funds by sending a check and a completed account application to Ultimus Fund Solutions, LLC, P.O. Box 46707, Cincinnati, Ohio 45246-0707. Checks should be made payable to the applicable Fund.

All purchase checks must be written in U.S. dollars and drawn on a U.S. bank. The Funds do not accept cash, drafts, "starter" checks, travelers checks, credit card checks, post-dated checks, cashier's checks under \$10,000, or money orders. In addition, to protect the Funds from check fraud, the Funds do not accept checks made payable to third parties.

Through Your Broker or Financial Institution. Shares of the Funds may be purchased through brokerage firms or financial institutions or sub-agents of such brokerage firms or financial institutions that are authorized to accept purchase orders on behalf of the Funds. Your order will be considered to have been received by the Funds when the authorized brokerage firm, financial institution, or its authorized designee, accepts the purchase order. Your purchase will be made at the net asset value next determined after your order is received by such organization in the manner set forth below before 4:00 p.m., Eastern time, or such earlier time as may be required by such organization. These organizations may charge you transaction fees on purchases of Fund shares and may impose other charges or restrictions or account options that differ from those applicable to shareholders who purchase shares directly through the Transfer Agent. These organizations may be the shareholders of record of your shares. The Funds are not responsible for ensuring that these organizations carry out their obligations to their customers. Shareholders investing in this manner should look to the organization through which they invest for specific instructions on how to purchase and redeem shares. The Adviser (from its own revenues) may pay such organizations for administrative, shareholder subaccounting and other services, including sales-related services, based on the number of

accounts and/or the amount of customer assets maintained in any Fund by such organizations. The payment of such compensation by the Adviser will not affect the expense ratio of any Fund. Contact your brokerage firm or financial institution to determine whether it is authorized to accept orders on behalf of the Funds.

By Wire. Provided the Transfer Agent has received a completed account application, you may also purchase shares of the Funds by bank wire. Please telephone the Transfer Agent at 888-726-9331 for instructions. You should be prepared to give the name in which the account is to be established, the address, telephone number and taxpayer identification number for the account, the name of the Fund(s) in which you are investing, and the name of the bank that will wire the money. Your investment will be made at the next determined net asset value after your wire is received together with the account information indicated above. If the Transfer Agent does not receive timely and complete account information, there may be a delay in the investment of your money and any accrual of dividends. To make your initial wire purchase, you must mail or fax (513-587-3438) a completed account application to the Transfer Agent. Your bank may impose a charge for sending your wire. There is presently no fee for receipt of wired funds, but the Transfer Agent reserves the right to charge shareholders for this service upon 30 days' prior notice to shareholders.

ADDING TO YOUR ACCOUNT

You may purchase and add shares to your account by mail, by bank wire transfer or through your brokerage firm or other financial institution. Checks should be sent to Ultimus Fund Solutions, LLC, P.O. Box 46707, Cincinnati, Ohio 45246-0707. Checks should be made payable to the applicable Fund. In order to purchase additional shares of the Funds by bank wire, please telephone the Transfer Agent at 888-726-9331 for instructions. Each additional purchase request must contain the name of your account and your account number to permit proper crediting to your account. While there is no minimum amount required for subsequent investments, the Funds reserve the right to impose this requirement. All purchases are made at the net asset value next determined after receipt of a purchase order by the Funds.

AUTOMATIC INVESTMENT PLAN (“AIP”) AND DIRECT DEPOSIT PLAN

You may make automatic monthly investments in the Funds from your bank, savings and loan or other depository institution account. Under the AIP, investments in a Fund must be at least \$50. The Transfer Agent pays the costs of your transfers, but reserves the right, upon 30 days' written notice, to make reasonable charges for this service.

Your employer may offer a direct deposit plan which will allow you to have all or a portion of your paycheck transferred automatically to purchase shares of the Funds. Please call 888-726-9331 for more information.

CUSTOMER IDENTIFICATION AND VERIFICATION

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify and record information that identifies each person that opens a new account, and to determine whether such person's name appears on government lists of known or suspected terrorists and terrorist organizations. As a result, the Funds must obtain the following information for each person that opens a new account:

- Name;
- Date of birth (for individuals);
- Residential or business street address (although post office boxes are still permitted for mailing); and
- Social security number, taxpayer identification number, or other identifying number.

You may also be asked for a copy of your driver's license, passport, or other identifying document in order to verify your identity. In addition, it may be necessary to verify your identity by cross-referencing your identification information with a consumer report or other electronic database. Additional information may be required to open accounts for corporations and other entities. *Federal law prohibits the Funds and other financial institutions from opening a new account unless they receive the minimum identifying information listed above.*

After an account is opened, the Funds may restrict your ability to purchase additional shares until your identity is verified. The Funds also may close your account or take other appropriate action if they are unable to verify your identity within a reasonable time. If your account is closed for this reason, your shares will be redeemed at the net asset value next calculated after the account is closed.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

In general, the Funds are designed for long-term investment and not as frequent or short-term trading ("market timing") vehicles. The Funds discourage and do not accommodate frequent purchases and redemptions of Fund shares. Accordingly, the Board of Trustees has adopted policies and procedures in an effort to detect and prevent market timing in the Funds. The Funds, through their service providers, will monitor shareholder trading activity in order to ensure it complies with the Funds' policies. The Funds will also prepare reports illustrating purchase and redemption activity to detect market timing activity. The Funds believe that market timing activity is not in the best interest of shareholders. Market timing can be disruptive to the portfolio management process and may adversely impact the ability of the Adviser to implement a Fund's investment strategies. In addition to being disruptive, the risks to the Funds presented by market timing are higher expenses through increased trading and transaction costs; forced and unplanned portfolio turnover; large asset swings that decrease a

Fund's ability to provide maximum investment return to all shareholders; and potentially diluting the value of Fund shares. These risks can have an adverse effect on a Fund's performance. The Funds reserve the right at any time to reject any purchase or exchange request that they believe to be market timing; modify any terms or conditions of purchase of shares of any Fund; or withdraw all or any part of the offering made by this Prospectus. If a purchase order is rejected, shareholders will be responsible for any resulting losses or fees imposed by their financial institution. Financial intermediaries may establish omnibus accounts in the Funds for their clients. The Funds rely on intermediaries to help enforce their market timing policies. Although the Funds have taken steps to discourage frequent purchases and redemptions of their shares, the Funds cannot guarantee that such trading will not occur. Each of the restrictions on frequent purchases and redemptions of Fund shares described above applies uniformly in all cases.

ADDITIONAL INFORMATION

The Funds will mail you confirmations of all purchases or redemptions of Fund shares. Certificates representing shares are not issued. The Funds and their distributor reserve the right to limit the amount of investments and to refuse to sell to any person.

The Funds' account application contains provisions in favor of the Funds, the Adviser, the Transfer Agent, the Funds' distributor and certain of their affiliates, excluding such entities from liability in connection with the performance of any acts instructed by the shareholder; provided, however, that such entities will be excluded from liability only if such entities have acted within applicable standards of reasonable care. If reasonable procedures are not followed by such entities, they will not be excluded from liability.

By sending your check to the Funds or the Transfer Agent, please be aware that you are authorizing the Transfer Agent to make a one-time electronic debit from your account at the financial institution indicated on your check. Your bank account will be debited as early as the same day the Transfer Agent receives your payment in the amount of your check; no additional amount will be added to the total. The transaction will appear on your bank statement. Your original check will be destroyed once processed, and you will not receive your canceled check back. If the Transfer Agent cannot post the transaction electronically, you authorize the Transfer Agent to present an image copy of your check for payment.

If an order to purchase shares is cancelled because your check does not clear, you will be responsible for any resulting losses or fees incurred by the Funds or the Transfer Agent in the transaction.

HOW TO EXCHANGE SHARES

Shares of one Fund may be exchanged for shares of another Fund. The exchange of shares of one Fund for shares of another Fund is treated, for federal income tax purposes, as a sale on which you may realize a taxable gain or loss.

Shares of a Fund acquired by means of an exchange will be purchased at the net asset value next determined after receipt of the exchange request by the Transfer Agent in the form described below. Exchange requests must be received prior to the close of regular trading on the New York Stock Exchange (generally 4:00 p.m., Eastern time) in order to receive the net asset value calculated on that day. Exchanges may be made by sending a written request to the Transfer Agent, or by calling 888-726-9331. Please provide the following information:

- Your name and telephone number
- The exact name of your account and your account number
- Taxpayer identification number (usually your Social Security number)
- Dollar value or number of shares to be exchanged
- The name of the Fund from which the exchange is to be made
- The name of the Fund into which the exchange is being made

The registration and taxpayer identification numbers of the two accounts involved in the exchange must be identical. To prevent the abuse of the exchange privilege to the disadvantage of other shareholders, the Funds reserve the right to terminate or modify the exchange privilege upon 60 days' notice to shareholders.

The Transfer Agent requires personal identification before accepting any exchange request by telephone, and telephone exchange instructions may be recorded. If reasonable procedures are followed by the Transfer Agent, neither the Transfer Agent nor the Funds will be liable for losses due to unauthorized or fraudulent telephone instructions. In the event of drastic economic or market changes, a shareholder may experience difficulty in exchanging shares by telephone. If such a case should occur, sending exchange instructions by mail should be considered.

HOW TO REDEEM SHARES

You may redeem shares of the Funds on each day that the Funds are open for business by sending a written request to the Transfer Agent. The request must state the number of shares or the dollar amount to be redeemed and your account number. The request must be signed exactly as your name appears on the Funds' account records. Redemption requests must be received prior to the close of regular trading on the New York Stock Exchange (generally 4:00 p.m., Eastern time) in order to receive the net asset value calculated on that day.

Signature Guarantees. If the shares to be redeemed have a value of more than \$50,000, your signature must be guaranteed. If the name(s) or the address on your account has been changed within the previous 15 days of your redemption request, the request must be made in writing with your signature guaranteed, regardless of the value of the shares being redeemed. The Transfer Agent will accept signatures guaranteed by a domestic bank or trust company, broker, dealer, clearing agency, savings association or other financial institution that participates in the STAMP Medallion Program sponsored by the Securities Transfer Association. Signature guarantees from financial institutions that do not participate in the STAMP Medallion Program will not be accepted. A notary public cannot provide a signature guarantee. The Transfer Agent has adopted standards for accepting signature guarantees from the above institutions. The Funds and the Transfer Agent reserve the right to amend these standards at any time without notice.

By Wire. Redemption requests may direct that the proceeds be wired directly to your existing account in any commercial banking institution or brokerage firm in the United States as designated on your application. There is currently no charge for processing wire redemptions. However, the Transfer Agent reserves the right, upon 30 days' written notice, to make reasonable charges for wire redemptions. All charges will be deducted from your account by redemption of shares in your account. Your bank or brokerage firm may also impose a charge for processing the wire. In the event that wire transfer of funds is impossible or impractical, the redemption proceeds will be sent by mail to the designated account.

Receiving Payment. Whether you request payment by check, wire or ACH, your redemption proceeds will be sent to you within 3 business days after receipt of your redemption request in the form described above. However, payment in redemption of shares purchased by check will be effected only after the check has been collected, which may take up to fifteen days from the purchase date. The payment for your redemption will be based on the next calculated share price on the date of your redemption request, even if the payment is delayed due to a recent purchase. To eliminate this delay, you may purchase shares of the Funds by certified check or wire transfer. Each Fund typically expects to meet redemption requests from the sale of its cash holdings (money market instruments) or from the sale of other portfolio assets. These methods will typically be used during both regular and stressed market conditions.

Through Your Broker or Financial Institution. You may also redeem your shares through a brokerage firm or financial institution that has been authorized to accept orders on behalf of the Funds. Your request will be considered to have been received by the Funds when the authorized brokerage firm, financial institution, or its authorized designee, accepts the redemption order. Your redemption will be made at the net asset value next determined after your order is received by such organization in proper form before 4:00 p.m., Eastern time, or such earlier time as may be required by such organization. These organizations may be authorized to designate other intermediaries to act in this capacity. Such an organization may charge you transaction fees on redemptions of Fund shares and may impose other charges or restrictions or account options that differ from those applicable to shareholders who redeem shares directly through the Transfer Agent. Contact your brokerage firm or financial institution to determine whether it is authorized to accept orders on behalf of the Funds.

Automatic Withdrawal Plan

If the shares in your account have a value of at least \$5,000, you (or another person you have designated) may receive monthly, quarterly or semi-annual payments in a specified amount of not less than \$50 each by authorizing the Funds to redeem the necessary number of shares periodically. There is currently no charge for this service, but the Transfer Agent reserves the right, upon 30 days' written notice, to make reasonable charges or to terminate the plan upon 60 days' written notice. Telephone the Transfer Agent toll-free at 888-726-9331 for additional information.

Additional Information

At the discretion of the Funds or the Transfer Agent, corporate investors and other associations may be required to furnish an appropriate certification authorizing redemptions to ensure proper authorization.

The Funds reserve the right to require you to close your account if at any time the value of your shares is less than \$2,500 (based on actual amounts invested, unaffected by market fluctuations), or such other minimum amount as the Funds may determine from time to time. After notification to you of the Funds' intention to close your account, you will be given 60 days to increase the value of your account to the minimum amount.

The Funds reserve the right to suspend the right of redemption or to postpone the date of payment for more than five business days under unusual circumstances as determined by the Securities and Exchange Commission.

Each Fund, when it is deemed to be in the best interest of the Fund's shareholders, may make payment for shares redeemed in whole or in part in securities of the Fund taken at current value. Should payment be made in securities, the redeeming shareholder will generally incur brokerage costs in converting such securities to cash and will bear market risk until the securities received are converted into cash. Portfolio securities that are issued in an in-kind redemption will be readily marketable.

DIVIDENDS AND DISTRIBUTIONS

The Ave Maria Value Fund, the Ave Maria Growth Fund, the Ave Maria World Equity Fund and the Ave Maria Focused Fund expect to distribute substantially all of their net investment income, if any, on an annual basis. The Ave Maria Rising Dividend Fund expects to distribute substantially all of its net investment income on a quarterly basis. The Ave Maria Bond Fund expects to distribute substantially all of its net investment income on a monthly basis. Each Fund expects to distribute any net realized capital gains annually.

Distributions are paid according to one of the following options:

- Share Option — income distributions and capital gains distributions reinvested in additional shares
- Income Option — income distributions paid in cash; capital gains distributions reinvested in additional shares
- Cash Option — income distributions and capital gains distributions paid in cash

You should indicate your choice of option on your application. If no option is specified on your application, distributions will automatically be reinvested in additional shares. All distributions will be based on the net asset value in effect on the payable date.

If you select the Income Option or the Cash Option and the U.S. Postal Service cannot deliver your checks or if your checks remain uncashed for six months, your dividends may be reinvested in your account at the then-current net asset value and your account will be converted to the Share Option. No interest will accrue on amounts represented by uncashed distribution checks.

TAXES

The Funds have qualified in all prior years and intend to continue to qualify for the special tax treatment afforded a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986, as amended by annually distributing substantially all of their net investment income and any net realized capital gains to their shareholders and by satisfying certain other requirements related to the sources of their income and the diversification of their assets. By so qualifying, each Fund will not be subject to federal income tax on that part of its net investment income and net realized capital gains that it distributes to shareholders. Each Fund (except the Ave Maria Bond Fund) expects most of its distributions to be in the form of capital gains. The Ave Maria Bond Fund expects most of its distributions to be in the form of net investment income; however, the nature of each Fund’s distributions could vary in any given year.

Dividends and distributions paid to shareholders are generally subject to federal income tax and may be subject to state and local income tax. Distributions attributable to net investment income and net realized short-term capital gains, if any, are generally taxed as ordinary income, although certain income dividends may be taxed to non-corporate shareholders at long-term capital gains rates. Dividends distributed by the Funds from net investment income may be eligible, in whole or in part, for the dividends received deduction available to corporations.

Distributions of net capital gains (the excess of net long-term capital gains over net short-term capital losses) by the Funds are taxable to you as capital gains, without regard to the length of time you have held your Fund shares. Capital gains distributions may be taxable at different rates depending on the length of time a Fund holds its assets and depending upon a shareholder’s annual taxable income. Redemptions of shares of the Funds are taxable events on which you may realize a gain or loss.

If you buy shares of a Fund shortly before the record date of a distribution, you will pay taxes on money earned by the Fund before you were a shareholder. You will pay the full pre-distribution price for the shares, then receive a portion of your investment back as a distribution, which is taxable.

Individuals, trusts, and estates whose income exceeds certain threshold amounts are subject to a 3.8% Medicare contribution tax on “net investment income.” Net investment income includes dividends paid by the Fund and capital gains from any sale or exchange of Fund shares.

The Funds will annually mail a statement to you indicating the amount and federal income tax status of all distributions made during the year. In addition to federal taxes, you may be subject to state and local taxes on distributions.

You should consult your tax advisor about the tax consequences of distributions from the Funds, redemptions and exchanges of Fund shares, and the use of the Automatic Withdrawal Plan. The tax consequences described in this section apply whether distributions are taken in cash or reinvested in additional shares. See “Taxes” in the Statement of Additional Information (“SAI”) for further information.

OPERATION OF THE FUNDS

Each Fund is a diversified series of Schwartz Investment Trust (the "Trust"), except the Ave Maria Focused Fund is a non-diversified series. The Trust is an open-end management investment company organized as an Ohio business trust. The Board of Trustees supervises the business activities of the Funds. Like other mutual funds, the Trust retains various organizations to perform specialized services for the Funds.

INVESTMENT ADVISER

The Trust retains Schwartz Investment Counsel, Inc., 801 W. Ann Arbor Trail, Suite 244, Plymouth, Michigan 48170, to manage the Funds' investments. The Adviser has been registered as an investment adviser since 1988 and had approximately \$2.6 billion of assets under management as of December 31, 2019. The controlling shareholder of the Adviser is George P. Schwartz, who is Chairman and President of the Trust and Chief Executive Officer of the Adviser.

Each Fund pays the Adviser an investment advisory fee at an annual rate expressed as a percentage of the average value of its daily net assets. The Adviser has contractually agreed to reduce its investment advisory fees and reimburse other expenses so that aggregate ordinary operating expenses (excluding interest on borrowings, taxes, brokerage costs, acquired fund fees and expenses, litigation and other extraordinary expenses) do not exceed an annual rate, expressed as a percentage of a Fund's average daily net assets. Any advisory fee reductions and/or expense reimbursements by the Adviser are subject to repayment by the applicable Fund for a period of three years from the date such fees and expenses were incurred, provided the repayment to the Adviser does not cause a Fund's aggregate ordinary operating expenses to exceed the contractual expense limitation. The Board of Trustees has authorized in advance these repayments to the Adviser.

The following table shows the contractual advisory fee rates and expense limitation amounts during the most recent fiscal year, expressed as a percentage of average daily net assets.

<u>FISCAL YEAR DECEMBER 31, 2019</u>	<u>ADVISORY FEE RATE</u>	<u>EXPENSE LIMITATION</u>	<u>ADVISORY FEES PAID</u>
Ave Maria Value Fund	0.85%*	1.25%	0.88%
Ave Maria Growth Fund	0.75%	1.25%	0.75%
Ave Maria Rising Dividend Fund	0.75%	1.25%	0.75%
Ave Maria World Equity Fund	0.95%	1.25%	0.86%
Ave Maria Bond Fund	0.30%	0.60%	0.30%

* Effective May 1, 2019, the contractual advisory fee rate was reduced to 0.85%.

The Ave Maria Focused Fund pays the Adviser an investment advisory fee computed at the annual rate of 0.85% of the Fund's average daily net assets. The Adviser has contractually agreed to reduce its investment advisory fee and reimburse other expenses until May 1, 2023 so that the aggregate ordinary operating expenses of the Fund do not exceed an annual rate of 1.25% of its average daily net assets.

A discussion of the factors considered by the Board of Trustees in its most recent approval of the Funds' investment advisory agreements, including its conclusions with respect thereto, will be in the Funds' semi-annual report for the period ending June 30, 2020.

PORTFOLIO MANAGERS

The portfolio managers of each Fund are responsible for the day-to-day execution of investment policy, portfolio management and investment research for such Fund. The business experience of each portfolio manager is described below. The SAI provides additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and their ownership of shares of the Funds.

George P. Schwartz, CFA, co-portfolio manager of the Ave Maria Rising Dividend Fund and Ave Maria Bond Fund, has been the Chairman and Chief Executive Officer of the Adviser for more than 30 years.

Timothy S. Schwartz, CFA, lead portfolio manager of the Ave Maria Value Fund, joined the Adviser in 1998 and currently serves as President.

Joseph W. Skornicka, CFA, co-portfolio manager of the Ave Maria Value Fund and lead portfolio manager of the Ave Maria Rising Dividend Fund and Ave Maria World Equity Fund, joined the Adviser in 2012 and currently serves as Senior Vice President.

Brandon S. Scheitler, lead portfolio manager of the Ave Maria Bond Fund, joined the Adviser in 2007 and currently serves as Vice President.

Robert C. Schwartz, CFP, co-portfolio manager of the Ave Maria World Equity Fund, joined the Adviser in 2001 and currently serves as Executive Vice President and Secretary.

Chadd M. Garcia, CFA, lead portfolio manager of the Ave Maria Focused Fund and co-portfolio manager of the Ave Maria Growth Fund, joined the Adviser in 2014 and currently serves as Vice President and Senior Research Analyst.

Adam P. Gaglio, CFA, lead portfolio manager of the Ave Maria Growth Fund and co-portfolio manager of the Ave Maria Focused Fund, joined the Adviser in 2013 and currently serves as Vice President and Equity Research Analyst.

ADDITIONAL INFORMATION

The Funds enter into contractual arrangements with various parties, including, among others, the Adviser, who provide services to the Funds. Shareholders are not parties to, or intended (or “third-party”) beneficiaries of, those contractual arrangements.

This Prospectus and the SAI provide information concerning the Funds that you should consider in determining whether to purchase shares of a Fund. A Fund may make changes to this information from time to time. Neither this Prospectus nor the SAI is intended to give rise to any contract rights or other rights in any shareholder, other than the rights conferred explicitly by federal or state securities laws that may not be waived.

DISTRIBUTOR

Ultimus Fund Distributors, LLC (the “Distributor”) serves as the distributor of shares of the Funds. The Distributor, located at 225 Pictoria Drive, Suite 450, Cincinnati, Ohio 45246, is a wholly-owned subsidiary of the Transfer Agent. The Funds may be distributed through other broker-dealers as well.

PORTFOLIO HOLDINGS AND DISCLOSURE POLICY

A description of the Funds’ policies and procedures with respect to the disclosure of the Funds’ portfolio securities is available in the SAI.

THE CATHOLIC ADVISORY BOARD

The Catholic Advisory Board consists of prominent lay members of the Roman Catholic Church and one or more Ecclesiastical Advisors, whose purpose is to set the criteria for screening companies based upon the morally responsible investment practices of the Ave Maria Mutual Funds. The screening criteria that is currently in place seeks to avoid investments in companies that are involved in the practice of abortion, have policies that are judged to be antifamily, contribute funds to Planned Parenthood, or support embryonic stem cell research. The Catholic Advisory Board meets with the Adviser twice a year, or more often if necessary, to review the criteria that is utilized in the screening process and to determine if it is appropriate to maintain the existing criteria. The Catholic Advisory Board may determine to make a change to the screening criteria, but does so infrequently. The criteria for screening companies is based upon the teaching authority of the Roman Catholic Church that is vested in the Pope and exercised by a council of bishops approved by the Pope. The role of the Ecclesiastical Advisor is to provide the Catholic Advisory Board with access to the council of bishops.

The Catholic Advisory Board acts in an advisory capacity only and has no discretionary authority to make investment decisions for the Funds. The Catholic Advisory Board will make its best determination as to whether a particular screen is consistent with core values and teachings of the Roman Catholic Church; however, the members of the Board do not represent the Roman Catholic Church and there is no guarantee that the Catholic Advisory Board will be successful in its mission.

The members of the Catholic Advisory Board are:

PAUL R. RONEY, CHAIRMAN

Executive Director of the Ave Maria Foundation and President of Domino's Farms Corporation

THOMAS S. MONAGHAN

Chairman of the Ave Maria Foundation and Chancellor of Ave Maria University

SCOTT HAHN, PH.D

Author and Theology Professor at Franciscan University of Steubenville

LOU HOLTZ, EMERITUS

Former football coach and ESPN college football analyst. Author and motivational speaker

LARRY KUDLOW, EMERITUS

Assistant to the President for Economic Policy and Director of the National Economic Council

ROBERT P. GEORGE

Legal scholar, political philosopher and public intellectual who serves as the McCormick Professor of Jurisprudence at Princeton University

MELISSA MOSCHELLA, PH.D

Assistant Professor of Medical Ethics at Columbia University

GLORIA PURVIS

Creator and host of Eternal World Television Network (“EWTN”) series “Authentically Free at Last” and host of “Morning Glory” on EWTN Global Catholic Radio

LILA ROSE

Founder and President of “Live Action,” a nonprofit dedicated to inspiring a culture that respects all human life and host of “The Lila Rose Show” podcast

FATHER JOHN RICCARDO, STL, EMERITUS

Priest of Archdiocese of Detroit and Executive Director of ACTS XXIX, an organization committed to helping parishes create a road map for evangelization and discipleship

His Eminence Adam Cardinal Maida and Archbishop Allen Henry Vigneron serve as episcopal advisors to the Catholic Advisory Board, but are not connected to the Funds in any way.

CALCULATION OF SHARE PRICE

On each day that the Funds are open for business, the price (net asset value) of each Fund's shares is determined as of the close of the regular session of trading on the New York Stock Exchange (normally 4:00 p.m., Eastern time). The Funds are open for business on each day the New York Stock Exchange is open for business. Currently, the New York Stock Exchange is open for trading every day except Saturdays, Sundays and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas. The net asset value of each Fund is calculated by dividing the sum of the value of the securities held by the Fund plus cash or other assets minus all liabilities (including estimated accrued expenses) by the total number of shares outstanding of the Fund, rounded to the nearest cent. The price at which a purchase or redemption of Fund shares is effected is based on the next calculation of net asset value after the order is received in proper form. The net asset value of each Fund will fluctuate with the value of the securities it holds.

The Funds' portfolio securities are valued as follows: (1) securities that are traded on stock exchanges, other than NASDAQ, are valued at the closing sales price as of the close of the regular session of trading on the New York Stock Exchange on the day the securities are being valued, or, if not traded on a particular day, at the closing bid price, (2) securities that are quoted by NASDAQ are valued at the NASDAQ Official Closing Price, or, if an Official Closing Price is not available, at the most recently quoted bid price, (3) securities traded in the over-the-counter market are valued at the last reported sales price or, if there is no reported sale on the valuation date, at the most recently quoted bid price, (4) securities that are traded both in the over-the-counter market and on a stock exchange are valued according to the broadest and most representative market, (5) fixed income securities are generally valued using prices provided by an independent pricing service, and (6) securities and other assets for which market quotations are not readily available or are considered to be unreliable due to significant market or other events are valued at their fair value as determined in good faith by the Adviser in accordance with consistently applied procedures adopted by and under the general supervision of the Board of Trustees. When fair value pricing is employed, the prices used by the Funds to calculate their net asset value may differ from quoted or published prices for the same securities.

To the extent any assets of a Fund are invested in other open-end investment companies that are registered under the Investment Company Act of 1940, the Fund's net asset value with respect to those assets is calculated based upon the net asset values reported by such registered open-end

investment companies, and the prospectuses for these companies explain the circumstances under which they will use fair value pricing and the effects of using fair value pricing.

To the extent a Fund invests in foreign securities that may be traded in foreign markets on days when the Fund does not calculate its net asset value, the value of the Fund's assets may be affected on days when shares of the Fund cannot be purchased or sold. Conversely, trading in some of a Fund's foreign securities may not occur on days when the Fund is open for business. In view of these circumstances, and because the value of foreign securities may be materially affected by events occurring before a Fund's pricing time but after the close of the primary markets or exchanges on which such securities are traded, portfolio securities of a Fund that trade in foreign markets will frequently be priced at their fair value.

FINANCIAL HIGHLIGHTS

The financial highlights tables are intended to help you understand each Fund's financial performance for the past five years. Certain information reflects financial results for a single Fund share. The total returns in the tables represent the rate that an investor would have earned or lost on an investment in the Funds (assuming reinvestment of all dividends and distributions). This information has been audited by Deloitte & Touche LLP, whose report, along with the Funds' financial statements, is included in the annual report, which is available upon request. Information is not provided for the Ave Maria Focused Fund because the Fund did not begin operating prior to the date of this Prospectus.

AVE MARIA VALUE FUND

PER SHARE DATA FOR A SHARE OUTSTANDING THROUGHOUT EACH YEAR

	Year Ended December 31, 2019	Year Ended December 31, 2018	Year Ended December 31, 2017	Year Ended December 31, 2016	Year Ended December 31, 2015

AVE MARIA MUTUAL FUNDS

Additional information about the Funds is included in the Statement of Additional Information (SAI), which is incorporated by reference in its entirety. Additional information about the Funds' investments is available in the Funds' annual and semi-annual reports to shareholders. In the Funds' annual report, you will find a discussion of the market conditions and strategies that significantly affected the Funds' performance during their last fiscal year.

To obtain a free copy of the SAI, the annual and semi-annual reports or other information about the Funds, or to make inquiries about the Funds, please call toll-free:

888-726-9331

The Prospectus, the SAI, and the most recent shareholder reports are also available on the Funds' website at www.avemariafunds.com.

Only one copy of a Prospectus or an annual or semi-annual report will be sent to each household address. This process, known as "Householding," is used for most required shareholder mailings. (It does not apply to confirmations of transactions and account statements, however). You may, of course, request an additional copy of a Prospectus or an annual or semi-annual report at any time by calling or writing the Funds. You may also request that Householding be eliminated from all your required mailings.

Reports and other information about the Funds are available on the Securities and Exchange Commission's Internet site at <http://www.sec.gov>. Copies of information on the EDGAR Database on the Commission's Internet site may be obtained, upon payment of a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.

For information or assistance in opening an account, please contact your financial adviser, call toll-free 866-AVE-MARIA (866-283-6274) or visit www.avemariafunds.com.
