

Supplement to Summary Prospectus dated 02/12/2021

Prudential Investment Portfolios 2
PGIM QMA US Broad Market Index Fund
PGIM QMA International Developed Markets Index Fund

(each a Fund, and collectively, the Funds)

Supplement dated February 12, 2021 to each
Currently Effective Summary Prospectus, Prospectus
and Statement of Additional Information (SAI)

John W. Moschberger, CFA has announced is his intention to retire in the 4th quarter of 2021. Effective immediately, Stacie Mintz, CFA, will be added as a portfolio manager for the Funds. Edward Lithgow, CFA, and Edward Louie will continue to serve as portfolio managers for the Funds.

To reflect this change, each Fund's Summary Prospectus, Prospectus and SAI are hereby revised as follows:

1. The tables in the sections of each Fund's Summary Prospectus entitled "Management of the Fund," and the Prospectus for PGIM QMA International Developed Markets Index Fund entitled "Summary: PGIM QMA International Developed Markets Index Fund – Management of the Fund," and the Prospectus for and PGIM QMA US Broad Index Fund entitled "Summary: PGIM QMA US Broad Index Fund – Management of the Fund", are hereby revised by adding the information set forth below with respect to Ms. Mintz and the footnote set forth below with respect to Mr. Moschberger:

Investment Managers	Subadviser	Portfolio Managers	Title	Service Date
PGIM Investments LLC	QMA LLC	John W. Moschberger, CFA*	Managing Director, Head of Equity Indexing	November 2016
		Stacie Mintz, CFA	Managing Director, Co-Head of the Quantitative Equity team & Portfolio Manager	February 2021

*Mr. Moschberger has announced his intention to retire in the 4th quarter of 2021.

2. The sections of the Prospectus for PGIM QMA International Developed Markets Index Fund entitled "How the Fund is Managed – Portfolio Managers – PGIM QMA International Developed Markets Index Fund" and the Prospectus for and PGIM QMA US Broad Index Fund entitled "How the Fund is Managed – Portfolio Managers – PGIM QMA US Broad Market Index Fund", are revised by adding the following professional biography for Ms. Mintz:

Stacie L. Mintz, CFA, is a Managing Director, Co-Head of the Quantitative Equity team and Portfolio Manager for QMA. In this capacity, she leads the portfolio managers on the Quantitative Equity team. She is responsible for enhancements to the Quantitative Equity models and portfolio analytic tools. Prior to her current role, she served as the Head of Equity Portfolio Management for QMA. Previously, Stacie was a member of the former Asset Allocation team where she was responsible for several retail and institutional portfolios. During that time, she was also responsible for managing the overall asset allocation for the Prudential Pension Plan. She earned a BA in economics from Rutgers University and an MBA in finance from the New York University Stern School of Business.

3. The table in the section of the **PGIM QMA US Broad Market Index Fund** SAI entitled "Management & Advisory Arrangements - The Fund's Portfolio Managers: Information About Other Accounts Managed" is hereby revised by adding the information pertaining to Ms. Mintz set forth below:

Fund	Subadviser	Portfolio Managers	Registered Investment Companies/Total Assets	Other Pooled Investment Vehicles/ Total Assets	Other Accounts/ Total Assets
PGIM QMA US Broad Market Index Fund	QMA LLC	Stacie Mintz, CFA*	21/\$10,813,930,694	28/\$16,140,898,391	33/\$5,105,508,696 11/\$2,723,136,237

*Information is as of December 31, 2020.

4. The table in the section of the **PGIM QMA International Developed Markets Index Fund** SAI entitled "Management & Advisory Arrangements - The Fund's Portfolio Managers: Information About Other Accounts Managed" is hereby revised by adding the information pertaining to Ms. Mintz set forth below:

Fund	Subadviser	Portfolio Managers	Registered Investment Companies/Total Assets	Other Pooled Investment Vehicles/ Total Assets	Other Accounts/ Total Assets
PGIM QMA International Developed Markets Index Fund	QMA LLC	Stacie Mintz, CFA*	21/\$10,809,933,613	28/\$16,140,898,391	33/\$5,105,508,696 11/\$2,723,136,237

*Information is as of December 31, 2020.

5. The table in the section of the **PGIM QMA US Broad Market Index Fund** SAI entitled "Management & Advisory Arrangements - The Fund's Portfolio Managers: Personal Investments and Financial Interests" is hereby revised by adding the information pertaining to Ms. Mintz set forth below:

Personal Investments and Financial Interests of the Portfolio Managers		
Subadviser	Portfolio Managers	Investments and Other Financial Interests in the Funds and Similar Strategies*
QMA	Stacie Mintz, CFA**	None

***Investments and Other Financial Interests in the Fund and Similar Strategies*" include the Funds and all other investment accounts which are managed by the same portfolio manager that utilize investment strategies, investment objectives and policies that are similar to those of the Funds. "Other Investment Accounts" in similar strategies include other Prudential mutual funds, insurance company separate accounts, and collective and commingled trusts. "Investments" include holdings in the Fund and in investment accounts in similar strategies, including shares or units that may be held through a 401(k) plan and/or deferred compensation plan. "Other Financial Interests" include interests in the Fund and in investment accounts in similar strategies resulting from awards under an investment professional's long-term compensation plan, where such awards track the performance of certain strategies and are subject to increase or decrease based on the annual performance of such strategies.

The dollar range for Stacie Mintz' investment in the Fund is as follows:

None.

**Information is as of December 31, 2020.

6. The table in the section of the **PGIM QMA International Developed Markets Index Fund** SAI entitled "Management & Advisory Arrangements - The Fund's Portfolio Managers: Personal Investments and Financial Interests" is hereby revised by adding the information pertaining to Ms. Mintz set forth below:

Personal Investments and Financial Interests of the Portfolio Managers		
Subadviser	Portfolio Managers	Investments and Other Financial Interests in the Funds and Similar Strategies*
QMA	Stacie Mintz, CFA**	None

***Investments and Other Financial Interests in the Fund and Similar Strategies*" include the Funds and all other investment accounts which are managed by the same portfolio manager that utilize investment strategies, investment objectives and policies that are similar to those of the Funds. "Other Investment Accounts" in similar strategies include other Prudential mutual funds, insurance company separate accounts, and collective and commingled trusts. "Investments" include holdings in the Fund and in investment accounts in similar strategies, including shares or units that may be held through a 401(k) plan and/or deferred compensation plan. "Other Financial Interests" include interests in the Fund and in investment accounts in similar strategies resulting from awards under an investment professional's long-term compensation plan, where such awards track the performance of certain strategies and are subject to increase or decrease based on the annual performance of such strategies.

The dollar range for Stacie Mintz' investment in the Fund is as follows:

None.

**Information is as of December 31, 2020.

PQDMX

SUMMARY PROSPECTUS | FEBRUARY 5, 2021

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information (SAI), Annual Report and other information about the Fund online at pgim.com/investments. You can also get this information at no cost by calling 1-800-225-1852 or by sending an e-mail to: prospectus@pgim.com. The Fund's Prospectus and SAI, both dated February 5, 2021, as supplemented and amended from time to time, [and the Fund's Annual Report, dated](#) October 31, 2020 are all incorporated by reference into (legally made a part of) this Summary Prospectus.

IMPORTANT INFORMATION

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website (www.pgim.com/investments), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically anytime by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by calling 1-800-225-1852 or by sending an e-mail request to PGIM Investments at shareholderreports@pgim.com.

You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to elect to continue to receive paper copies of your shareholder reports. If you invest directly with the Fund, you can call 1-800-225-1852 or send an email request to shareholderreports@pgim.com to let the Fund know you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account if you invest through your financial intermediary or all funds held with the fund complex if you invest directly with the Fund.

INVESTMENT OBJECTIVE

The Fund's investment objective is to provide investment results that approximate the performance of the FTSE Developed Markets Ex-North America Net Index.

FUND FEES AND EXPENSES

The tables below describe the sales charges, fees and expenses that you may pay if you buy, hold and sell shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	
	Class R6
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of the lower of the original purchase price or the net asset value at redemption)	None
Maximum sales charge (load) imposed on reinvested dividends and other distributions	None
Redemption fee	None
Exchange fee	None
Maximum account fee	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
	Class R6
Management fee	0.25%
Distribution and service (12b-1) fees	None
Other expenses	0.70%
Acquired Fund fees and expenses	0.01%

To enroll in e-delivery, go to
pgim.com/investments/resource/edelivery

MF243A

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
	Class R6
Total annual Fund operating expenses	0.96%
Fee waiver and/or expense reimbursement	(0.65)%
Total annual Fund operating expenses after fee waiver and/or expense reimbursement⁽¹⁾	0.31%

⁽¹⁾ PGIM Investments LLC (PGIM Investments) has contractually agreed, through February 28, 2022, to limit Total Annual Fund Operating Expenses after fee waivers and/or expense reimbursements to 0.30% of average daily net assets for Class R6 shares. This contractual waiver excludes interest, brokerage, taxes (such as income and foreign withholding taxes, stamp duty and deferred tax expenses), acquired fund fees and expenses, extraordinary expenses, and certain other Fund expenses such as dividend and interest expense and broker charges on short sales. Fees and/or expenses waived and/or reimbursed by PGIM Investments may be recouped by PGIM Investments within the same fiscal year during which such waiver and/or reimbursement is made if such recoupment can be realized without exceeding the expense limit in effect at the time of the recoupment for that fiscal year. This waiver may not be terminated prior to February 28, 2022 without the prior approval of the Fund's Board of Trustees.

Example. The following hypothetical example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. It assumes that you invest \$10,000 in the Fund for the time periods indicated and then, except as indicated, redeem all your shares at the end of those periods. It assumes a 5% return on your investment each year, that the Fund's operating expenses remain the same (except that fee waivers or reimbursements, if any, are only reflected in the 1-Year figures) and that all dividends and distributions are reinvested. Your actual costs may be higher or lower.

Share Class	If Shares Are Redeemed				If Shares Are Not Redeemed			
	1 Year	3 Years	5 Years	10 Years	1 Year	3 Years	5 Years	10 Years
Class R6	\$32	\$241	\$467	\$1,119	\$32	\$241	\$467	\$1,119

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the Fund's most recent fiscal year, the Fund's portfolio turnover rate was 13% of the average value of its portfolio.

INVESTMENTS, RISKS AND PERFORMANCE

Principal Investment Strategies. The Fund intends to invest, under normal market conditions, over 80% of its investable assets in securities included in the FTSE Developed Markets Ex-North America Net Index (the "Index") in approximately the same proportions as those of the Index.

FTSE International Limited (FTSE) determines whether a country is "developed" through its own methodology of macroeconomic and market-based criteria, including relative income, development status, and individual country risk, as well as market structure. Weighing within the index is free float adjusted. As of December 31, 2020, the companies included in the Index had market capitalizations ranging from \$90 million to \$350.1 billion. The Fund is not sponsored by or affiliated with FTSE.

The principal type of equity and equity-related securities in which the Fund invests is common stock. In addition to common stock, the Fund may invest in a combination of cash-equivalent instruments and stock index futures, with the amount committed at any time as initial margin on open futures positions not to exceed 5% of the Fund's total assets, and in exchange-traded funds (ETFs) which replicate the Index up to a maximum of 5% of the total assets of the Fund at time of purchase.

Replication and Sampling Methods. The Fund seeks to replicate the Index to the extent possible, taking into account asset levels, capital flows and trade size, by investing substantially all of its assets in the stocks that make up the Index, holding each stock in approximately the same proportion as its weighting in the Index. Where it may not be possible or practicable to purchase all of the securities of the Index, the subadviser may use a sampling strategy based on market capitalization and industry weightings. The subadviser may also use stock index futures and/or ETFs to achieve the investment objective. The relative portfolio holdings of the Fund at any time may not be precisely identical to the proportions of holdings of the Index.

Although the Fund invests over 80% of its investable assets in securities that comprise the Index, the Fund may at times hold securities that are either to be added to or have been removed from the Index. When a security is removed from the Index, the Fund will sell it within a reasonable time. In addition, the Fund's holdings may change for other reasons, such as when the Fund receives securities of companies spun off from companies included in the Index.

The subadviser tries to minimize the difference between the investment results of the Fund and those of the Index. Tracking of the Index is monitored regularly. In addition to potential tracking differences, brokerage, transaction costs and other Fund expenses will cause the Fund's return to be lower than the return of the Index.

Although index funds, by their nature, tend to be tax-efficient vehicles, the Fund is managed without regard to tax consequences.

As an index fund, the Fund is not actively managed by portfolio managers who buy and sell securities based on research and analysis.

Derivative Strategies

Derivatives are financial instruments whose value depends upon, or is derived from, the value of something else, such as one or more underlying investments, indexes or currencies. A derivative contract will obligate or entitle the Fund to deliver or receive an asset or cash payment based on the change in value of one or more investments, indexes or currencies. The subadviser may use various derivative strategies to try to improve the Fund's return. Derivatives may be traded on organized exchanges, or in individually negotiated transactions with other parties (these are known as "over-the-counter" derivatives). The Fund may be limited in its use of derivatives by rules adopted by the SEC governing derivatives transactions. Although the Fund has the flexibility to make use of derivatives, it may choose not to for a variety of reasons, even under very volatile market conditions.

Futures Contracts and Related Options. The Fund may purchase and sell stock index futures contracts. A futures contract is an agreement to buy or sell a set quantity of an underlying asset at a future date, or to make or receive a cash payment based on the value of a securities index, or some other asset, at a stipulated future date. The terms of futures contracts are standardized. In the case of a financial futures contract based upon a broad index, there is no delivery of the securities comprising the underlying index, margin is

uniform, a clearing corporation or an exchange is the counterparty and the Fund makes daily margin payments based on price movements in the index. An option on a futures contract gives the purchaser the right to buy or sell a futures contract in exchange for a premium.

Futures Contracts and Related Options. The Fund may purchase and sell stock index futures contracts. A futures contract is an agreement to buy or sell a set quantity of an underlying asset at a future date, or to make or receive a cash payment based on the value of a securities index, or some other asset, at a stipulated future date. The terms of futures contracts are standardized. In the case of a financial futures contract based upon a broad index, there is no delivery of the securities comprising the underlying index, margin is uniform, a clearing corporation or an exchange is the counterparty and the Fund makes daily margin payments based on price movements in the index. An option on a futures contract gives the purchaser the right to buy or sell a futures contract in exchange for a premium.

Exchange-Traded Funds

The Fund may invest in securities of ETFs, subject to certain limits on investment in securities of non-affiliated investment companies. Securities of ETFs represent shares of ownership in either open-end investment management companies or unit investment trusts (UITs). ETFs may be index-based and hold a portfolio of common stocks or bonds designed to generally correspond to the price and yield performance of a specific securities index or may be actively managed. The underlying portfolio may have a broad market, sector or international orientation. ETFs give investors the opportunity to buy or sell an entire portfolio of stocks in a single security transaction in a manner similar to buying or selling a share of stock.

Principal Risks

All investments have risks to some degree. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly from day to day and over time.

You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments.

An investment in the Fund is not guaranteed to achieve its investment objective; is not a deposit with a bank; and is not insured, endorsed or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The following is a summary description of principal risks of investing in the Fund. The order of the below risk factors does not indicate the significance of any particular risk factor.

Country Risk. Changes in the business environment may adversely affect operating profits or the value of assets in a specific country. For example, financial factors such as currency controls, devaluation or regulatory changes or stability factors such as mass riots, civil war and other potential events may contribute to companies' operational risks.

Currency Risk. The Fund's net asset value could decline as a result of changes in exchange rates, which could adversely affect the Fund's investments in currencies, or in securities that trade in, and receive revenues related to, currencies, or in derivatives that provide exposure to currencies. Certain foreign countries may impose restrictions on the ability of issuers of foreign securities to make payment of principal and interest or dividends to investors located outside the country, due to blockage of foreign currency exchanges or otherwise.

Derivatives Risk. Derivatives involve special risks and costs and may result in losses to the Fund. The successful use of derivatives requires sophisticated management, and, to the extent that derivatives are used, the Fund will depend on the subadviser's ability to analyze and manage derivatives transactions. The prices of derivatives may move in unexpected ways, especially in abnormal market conditions. Some derivatives are "leveraged" and therefore may magnify or otherwise increase investment losses to the Fund. The Fund's use of derivatives may also increase the amount of taxes payable by shareholders. Other risks arise from the potential inability to terminate or sell derivatives positions. A liquid secondary market may not always exist for the Fund's derivatives positions. In fact, many over-the-counter derivative instruments will not have liquidity beyond the counterparty to the instrument. Over-the-counter derivative instruments also involve the risk that the other party will not meet its obligations to the Fund.

The US Government and foreign governments have adopted (and may adopt further) regulations governing derivatives markets, including mandatory clearing of certain derivatives, margin and reporting requirements and risk exposure limitations. The ultimate impact of the regulations remains unclear. Additional regulation of derivatives may make derivatives more costly, limit their availability or utility, or otherwise adversely affect their performance or disrupt markets.

Economic and Market Events Risk. Events in the US and global financial markets, including actions taken by the US Federal Reserve or foreign central banks to stimulate or stabilize economic growth or the functioning of the securities markets, may at times result in unusually high market volatility, which could negatively impact performance. Relatively reduced liquidity in credit and fixed income markets could adversely affect issuers worldwide.

Equity and Equity-Related Securities Risk. Equity and equity-related securities may be subject to changes in value, and their values may be more volatile than those of other asset classes. In addition to an individual security losing value, the value of the equity markets or a sector in which the Fund invests could go down. Different parts of a market can react differently to adverse issuer, market, regulatory, political and economic developments.

Exchange-Traded Funds (ETFs) Risk. Investing in securities issued by ETFs involves risks similar to those of investing directly in the securities and other assets held by the investment company. Unlike shares of typical mutual funds, shares of ETFs are generally traded on an exchange throughout a trading day and bought and sold based on market values and not at net asset value. For this reason, shares could trade at either a premium or discount to net asset value. The trading price of an index-based ETF is expected to (but may not) closely track the net asset value of the ETF, and the Fund will generally gain or lose value consistent with the performance of the ETF's portfolio securities. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs. In addition, the Fund will indirectly bear its pro rata share of the fees and expenses incurred by an ETF in which it invests, including advisory fees. These expenses are in addition to the advisory and other expenses that the Fund bears directly in connection with its own operations. An index-based ETF may not replicate exactly the performance of the benchmark index it seeks to track for a number of reasons, including transaction costs incurred by the ETF, the temporary unavailability of certain index securities in the secondary market

or discrepancies between the ETF and the index with respect to the weighting of securities or the number of securities held. Investments in ETFs are subject to the risk that the listing exchange may halt trading of an ETF's shares, in which case the Fund would be unable to sell its ETF shares unless and until trading is resumed.

Foreign Securities Risk. The Fund's investments in securities of foreign issuers or issuers with significant exposure to foreign markets involve additional risk. The securities of such issuers may trade in markets that are less liquid, less regulated and more volatile than US markets. The value of the Fund's investments may decline because of factors affecting the particular issuer as well as foreign markets and issuers generally, such as unfavorable government actions, and political or financial instability. Lack of information may also affect the value of these securities.

Fund of Funds Risk. The Fund is an investment option for other PGIM Investments-advised mutual funds that are managed as "funds of funds." As a result, from time to time, the Fund may experience relatively large redemptions and could be required to liquidate its assets at inopportune times or at a loss or depressed value, which could cause the value of your investment to decline.

Geographic Concentration Risk. The Fund's performance may be closely tied to the market, economic, political, regulatory or other conditions in the countries or regions in which the Fund invests. This can result in more pronounced risks based upon conditions that impact one or more countries or regions more or less than other countries or regions.

Increase in Expenses Risk. Your actual cost of investing in the Fund may be higher than the expenses shown in the expense table for a variety of reasons. For example, expense ratios may be higher than those shown if average net assets decrease. Net assets are more likely to decrease and Fund expense ratios are more likely to increase when markets are volatile. Active and frequent trading of Fund securities can increase expenses.

Index Investment Approach Risk. Since the Fund is passively managed, assets are not allocated from one stock or group of stocks to another based on their prospects, or from stocks into bonds or cash equivalents in an attempt to cushion the impact of a market decline. As a result, the Fund's performance may be less favorable than that of a portfolio using an active investment strategy.

Large Capitalization Company Risk. Companies with large market capitalizations go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the Fund's value may not rise or fall as much as the value of funds that emphasize companies with smaller market capitalizations.

Large Shareholder and Large Scale Redemption Risk. Certain individuals, accounts, funds (including funds affiliated with the Manager) or institutions, including the Manager and its affiliates, may from time to time own or control a substantial amount of the Fund's shares. There is no requirement that these entities maintain their investment in the Fund. There is a risk that such large shareholders or that the Fund's shareholders generally may redeem all or a substantial portion of their investments in the Fund in a short period of time, which could have a significant negative impact on the Fund's NAV, liquidity, and brokerage costs. Large redemptions could also result in tax consequences to shareholders and impact the

Fund's ability to implement its investment strategy. The Fund's ability to pursue its investment objective after one or more large scale redemptions may be impaired and, as a result, the Fund may invest a larger portion of its assets in cash or cash equivalents.

Market Disruption and Geopolitical Risks. International wars or conflicts and geopolitical developments in foreign countries, along with instability in regions such as Asia, Eastern Europe, and the Middle East, possible terrorist attacks in the United States or around the world, public health epidemics such as the outbreak of infectious diseases like the recent outbreak of coronavirus globally or the 2014–2016 outbreak in West Africa of the Ebola virus, and other similar events could adversely affect the U.S. and foreign financial markets, including increases in market volatility, reduced liquidity in the securities markets and government intervention, and may cause further long-term economic uncertainties in the United States and worldwide generally. The coronavirus pandemic and the related governmental and public responses have had and may continue to have an impact on the Fund's investments and net asset value and have led and may continue to lead to increased market volatility and the potential for illiquidity in certain classes of securities and sectors of the market. Preventative or protective actions that governments may take in respect of pandemic or epidemic diseases may result in periods of business disruption, business closures, inability to obtain raw materials, supplies and component parts, and reduced or disrupted operations for the issuers in which the Fund invests. Government intervention in markets may impact interest rates, market volatility and security pricing. The occurrence, reoccurrence and pendency of such diseases could adversely affect the economies (including through changes in business activity and increased unemployment) and financial markets either in specific countries or worldwide.

Market Risk. Securities markets may be volatile and the market prices of the Fund's securities may decline. Securities fluctuate in price based on changes in an issuer's financial condition and overall market and economic conditions. If the market prices of the securities owned by the Fund fall, the value of your investment in the Fund will decline.

Small and Medium Sized Companies Risk. Small and medium sized companies usually offer a smaller range of products and services than larger companies. Smaller companies may also have limited financial resources and may lack management depth. As a result, their prices may fluctuate more than the stocks of larger, more established companies. Historically, small and medium sized companies have sometimes gone through extended periods when they did not perform as well as larger companies. Small and medium sized companies generally are more illiquid than larger companies, which may make such investments more difficult to sell at the time and price that the Fund would like.

Tracking Error Risk. Tracking error is the divergence of the Fund's performance from that of the Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund's portfolio and those included in the Index, pricing differences, transaction costs, the Fund's holding of uninvested cash, differences in timing of the accrual of distributions, tax gains or losses, changes to the Index or the need to meet various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Index does not.

Value Style Risk. Since the Fund may invest significantly in value stocks or use a value investment style, there is the risk that value stocks or the value style may be out of favor for a period of time, that the market will not recognize a security's intrinsic value for a long time or at all or that a stock judged to be undervalued may actually be appropriately priced or overvalued. Issuers of value stocks may

have experienced adverse business developments or may be subject to special risks that have caused the stock to be out of favor. In addition, the Fund's value investment style may go out of favor with investors, negatively affecting the Fund's performance.

Performance. The following bar chart shows the Fund's performance for Class R6 shares for each full calendar year of operations or for the last 10 calendar years, whichever is shorter. The following table shows the Fund's average annual returns and also compares the Fund's performance with the average annual total returns of an index or other benchmark. The bar chart and table demonstrate the risk of investing in the Fund by showing how returns can change from year to year.

Past performance (before and after taxes) does not mean that the Fund will achieve similar results in the future. Updated Fund performance information, including current net asset value is available online at www.pgim.com/investments.

Best Quarter:		Worst Quarter:	
17.33%	4th Quarter 2020	-22.72%	1st Quarter 2020

¹ Without the contractual expense limitation, the annual total returns would have been lower.

Average Annual Total Returns — Class R6 Shares % (as of 12-31-20)		
	One Year	Since Inception
Return Before Taxes	10.24%	9.95% (11-17-16)
Return After Taxes on Distributions	9.82%	9.32% (11-17-16)
Return After Taxes on Distributions and Sale of Fund Shares	6.33%	7.72% (11-17-16)

* After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Index % (reflects no deduction for fees, expenses or taxes) (as of 12-31-20)		
FTSE Developed Markets Ex-North America Net Index	10.07%	10.35%*

*Since Inception return for the Index is determined from the closest month-end to the Fund's inception date.

MANAGEMENT OF THE FUND

Investment Manager	Subadviser	Portfolio Managers	Title	Service Date
PGIM Investments LLC	QMA LLC	John W. Moschberger, CFA	Managing Director and Head of Equity Indexing	November 2016
		Edward Lithgow, CFA	Vice President and Portfolio Manager	November 2016
		Edward Louie	Vice President and Portfolio Manager	November 2016

BUYING AND SELLING FUND SHARES

	Class R6
Minimum initial investment	None
Minimum subsequent investment	None

Class R6 shares are available for purchase by certain group retirement plans, institutional investors, and certain other eligible investors but are generally not available for purchase by individuals. Please see "How to Buy, Sell and Exchange Fund Shares —How to Buy Fund Shares —Qualifying for Class R6 Shares" in the Prospectus for purchase eligibility requirements.

TAX INFORMATION

Dividends, Capital Gains and Taxes. The Fund's dividends and distributions are taxable and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Such tax-deferred arrangements may be taxed later upon withdrawal of monies from those arrangements.

PAYMENTS TO FINANCIAL INTERMEDIARIES

If you purchase Fund shares through a financial intermediary such as a broker-dealer, bank, retirement recordkeeper or other financial services firm, the Fund or its affiliates may pay the financial intermediary for the sale of Fund shares and/or for services to shareholders. This may create a conflict of interest by influencing the financial intermediary or its representatives to recommend the Fund over another investment. Ask your financial intermediary or representative or visit your financial intermediary's website for more information.
