Each of the funds listed above is hereinafter referred to as a “Fund” or, collectively, the “Funds”.

Supplement dated March 19, 2021 to the following Prospectuses, as amended:

Prospectus	Date
Bernstein Funds	January 28, 2021
Bond Funds	January 29, 2021
EMMA	July 31, 2020
Equity Funds	October 30, 2020
Government Money Market	August 31, 2020
Inflation Strategies	January 29, 2021
Municipal Portfolios	September 30, 2020
Value Funds	February 26, 2021
Wealth Strategies	December 31, 2020

Currently, Class C shares automatically convert to Class A shares after ten years. The following changes are effective as of May 31, 2021:

The following information replaces the footnote (b) with respect to Bernstein Funds, Bond Funds, EMMA, Equity Funds, Inflation Strategies, Value Funds and Wealth Strategies or footnote (c) with respect to Government Money Market in the section “Fees and Expenses of the [Fund/Portfolio] — Annual [Fund/Portfolio] Operating Expenses” in each Fund’s Prospectus.

[(b)/(c)] For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

For the Municipal Portfolios, the following information replaces the footnote (a) in the section “Fees and Expenses of the Portfolio — Annual Portfolio Operating Expenses” in each Fund’s Prospectus.

(a) For Class C shares, the contingent deferred sales charge, or CDSC, is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

The following sentence replaces the third sentence in the paragraph under the chart in the section “Investing in the [Funds/Fund/Portfolios/Portfolio] — The Different Share Class Expenses — Asset-Based Sales Charges or Distribution and/or Service (Rule 12b-1) Fees” in each Fund’s Prospectus:

Class C shares are subject to these higher fees for a period of eight years, after which they convert to Class A shares.

The following sentence replaces the first sentence in the second paragraph in the section “Investing in the [Funds/Fund/Portfolios/Portfolio] — The Different Share Class Expenses — Sales Charges — Class C Shares [-Asset-Based Sales Charge Alternative]” in each Fund’s Prospectus:

Class C shares purchased for cash automatically convert to Class A shares eight years after the end of the month of your purchase.

The following sentence replaces the second sentence of the second paragraph in the section “Investing in the [Funds/Fund/Portfolios/Portfolio] — Choosing A Share Class” in each Fund’s Prospectus:

Class C shares should not be considered as a long-term investment because they are subject to a higher distribution fee for eight years.

Each Statement of Additional Information is revised, as applicable, to incorporate changes conforming to this Supplement.

* * * * *

This Supplement should be read in conjunction with the Prospectuses for the Funds.

You should retain this Supplement with your Prospectus(es) for future reference.

As of January 1, 2021, as permitted by new regulations adopted by the Securities and Exchange Commission, each Fund's annual and semi-annual shareholder reports are no longer sent by mail, unless you have specifically requested paper copies of the reports. Instead, the reports are made available on a website, and you will be notified by mail each time a report is posted and provided with a website address to access the report.

You may elect to receive all future reports in paper form free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports; if you invest directly with a Fund, you can call the Fund at (800) 221-5672. Your election to receive reports in paper form will apply to all funds held in your account with your financial intermediary or, if you invest directly, to all AB Mutual Funds you hold.

The Securities and Exchange Commission and the Commodity Futures Trading Commission have not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

SUMMARY INFORMATION

AB Value Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, and I Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I
Management Fees	.55%	.55%	.55%	.55%	.55%	.55%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None
Other Expenses:						
Transfer Agent	.06%	.06%	.06%	.26%	.20%	.02%
Other Expenses	.13%	.14%	.13%	.13%	.14%	.14%
Total Other Expenses	.19%	.20%	.19%	.39%	.34%	.16%
Total Annual Fund Operating Expenses	.99%	1.75%	.74%	1.44%	1.14%	.71%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the Fund's operating expenses stay the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I
After 1 Year	\$ 522	\$ 278*	\$ 76	\$ 147	\$ 116	\$ 73
After 3 Years	\$ 727	\$ 551	\$237	\$ 456	\$ 362	\$227
After 5 Years	\$ 949	\$ 949	\$411	\$ 787	\$ 628	\$395
After 10 Years	\$1,586	\$2,062	\$918	\$1,724	\$1,386	\$883

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 61% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in a diversified portfolio of equity securities of U.S. companies with relatively large market capitalizations that the Adviser believes are undervalued. The Fund invests in companies that are determined by the Adviser to be undervalued using the fundamental value approach of the Adviser. The fundamental value approach seeks to identify a universe of securities that are considered to be undervalued because they are attractively priced relative to their future earnings power and dividend-paying capability.

In selecting securities for the Fund’s portfolio, the Adviser uses its fundamental and quantitative research to identify companies whose long-term earnings power and dividend-paying capability are not reflected in the current market price of their securities.

The Adviser’s fundamental analysis depends heavily upon its internal research staff. The research staff of company and industry analysts covers a research universe that includes the majority of the capitalization of the Russell 1000® Value Index. The Adviser typically projects a company’s financial performance over a full economic cycle, including a trough and a peak, within the context of forecasts for real economic growth, inflation and interest rate changes. The research staff focuses on the valuation implied by the current price, relative to the earnings the company will be generating five years from now, or “normalized” earnings, assuming average mid-economic cycle growth for the fifth year.

The Fund’s management team and other senior investment professionals work in close collaboration to weigh each investment opportunity identified by the research staff relative to the entire portfolio and determine the timing and position size for purchases and sales. Analysts remain responsible for monitoring new developments that would affect the securities they cover.

The team will generally sell a security when it no longer meets appropriate valuation criteria, although sales may be delayed when positive return trends are favorable.

The Fund may enter into derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds (“ETFs”). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund’s portfolio from a decline in value, sometimes within certain ranges.

The Fund may, at times, invest in shares of ETFs in lieu of making direct investments in equity securities. ETFs may provide more efficient and economical exposure to the type of companies and geographic locations in which the Fund seeks to invest than direct investments.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund’s investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund’s value approach, may be underperforming the market generally.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund’s investments or reduce its returns.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its

techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over ten years; and
- how the Fund's average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 17.23%, 4th quarter, 2020; and Worst Quarter was down -28.11%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	-3.37%	4.36%	6.68%
	Return After Taxes on Distributions	-3.63%	3.86%	6.28%
	Return After Taxes on Distributions and Sale of Fund Shares	-1.81%	3.35%	5.36%
Class C	Return Before Taxes	-0.86%	4.48%	6.36%
Advisor Class	Return Before Taxes	1.14%	5.51%	7.43%
Class R	Return Before Taxes	0.49%	4.79%	6.71%
Class K	Return Before Taxes	0.76%	5.11%	7.04%
Class I	Return Before Taxes	1.18%	5.57%	7.50%
Russell 1000® Value Index (reflects no deduction for fees, expenses or taxes)		2.80%	9.74%	10.50%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGER

The following table lists the person responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
Cem Inal	Since 2016	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 in this Prospectus.

AB Discovery Value Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, I, and Z Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
Management Fees	.75%	.75%	.75%	.75%	.75%	.75%	.75%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None	None
Other Expenses:							
Transfer Agent	.11%	.11%	.11%	.26%	.20%	.11%	.02%
Other Expenses	.04%	.04%	.04%	.04%	.04%	.04%	.04%
Total Other Expenses	.15%	.15%	.15%	.30%	.24%	.15%	.06%
Total Annual Fund Operating Expenses	1.15%	1.90%	.90%	1.55%	1.24%	.90%	.81%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the Fund's operating expenses stay the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
After 1 Year	\$ 537	\$ 293*	\$ 92	\$ 158	\$ 126	\$ 92	\$ 83
After 3 Years	\$ 775	\$ 597	\$ 287	\$ 490	\$ 393	\$ 287	\$ 259
After 5 Years	\$1,031	\$1,026	\$ 498	\$ 845	\$ 681	\$ 498	\$ 450
After 10 Years	\$1,763	\$2,222	\$1,108	\$1,845	\$1,500	\$1,108	\$1,002

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 52% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in a diversified portfolio of equity securities of small- to mid-capitalization U.S. companies. Under normal circumstances, the Fund invests at least 80% of its net assets in securities of small- to mid-capitalization companies. For purposes of this policy, small- to mid-capitalization companies are those that, at the time of investment, fall within the capitalization range between the smallest company in the Russell 2500® Value Index and the greater of \$5 billion or the market capitalization of the largest company in the Russell 2500® Value Index.

Because the Fund’s definition of small- to mid-capitalization companies is dynamic, the lower and upper limits on market capitalization will change with the markets. As of December 31, 2020, the capitalization ranges of companies in the Russell 2500® Value Index ranged from approximately \$43 million to \$30.6 billion.

The Fund invests in companies that are determined by the Adviser to be undervalued, using the Adviser’s fundamental value approach. In selecting securities for the Fund’s portfolio, the Adviser uses its fundamental and quantitative research to identify companies whose long-term earnings power is not reflected in the current market price of their securities.

In selecting securities for the Fund’s portfolio, the Adviser looks for companies with attractive valuation (for example, with low price to book ratios) and compelling success factors (for example, momentum and return on equity). The Adviser then uses this information to calculate an expected return. Returns and rankings are updated on a daily basis. The rankings are used to determine prospective candidates for further fundamental research and, subsequently, possible addition to the portfolio. Typically, the Adviser’s fundamental research analysts focus their research on the most attractive 20% of the universe.

The Adviser typically projects a company’s financial performance over a full economic cycle, including a trough and a peak, within the context of forecasts for real economic growth, inflation and interest rate changes. The Adviser focuses on the valuation implied by the current price, relative to the earnings the company will be generating five years from now, or “normalized” earnings, assuming average mid-economic cycle growth for the fifth year.

The Fund’s management team and other senior investment professionals work in close collaboration to weigh each investment opportunity identified by the research staff relative to the entire portfolio and determine the timing and position size for purchases and sales. Analysts remain responsible for monitoring new developments that would affect the securities they cover. The team will generally sell a security when it no longer meets appropriate valuation criteria, although sales may be delayed when positive return trends are favorable. Typically, growth in the size of a company’s market capitalization relative to other domestically traded companies will not cause the Fund to dispose of the security.

The Adviser seeks to manage overall portfolio volatility relative to the universe of companies that comprise the lowest 20% of the total U.S. market capitalization by favoring promising securities that offer the best balance between return and targeted risk. At times, the Fund may favor or disfavor a particular sector compared to that universe of companies. The Fund may invest significantly in companies involved in certain sectors that constitute a material portion of the universe of small- and mid-capitalization companies, such as financial services and consumer services.

The Fund may enter into derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds (“ETFs”). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund’s portfolio from a decline in value, sometimes within certain ranges.

The Fund may, at times, invest in shares of ETFs in lieu of making direct investments in equity securities. ETFs may provide more efficient and economical exposure to the type of companies and geographic locations in which the Fund seeks to invest than direct investments.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund’s investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund’s value approach, may be underperforming the market generally.

- **Capitalization Risk:** Investments in small- and mid-capitalization companies may be more volatile than investments in large-capitalization companies. Investments in small-capitalization companies may have additional risks because these companies have limited product lines, markets or financial resources.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over ten years; and
- how the Fund's average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 29.04%, 4th quarter, 2020; and Worst Quarter was down -36.61%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	-1.25%	7.03%	7.86%
	Return After Taxes on Distributions	-1.38%	5.77%	6.26%
	Return After Taxes on Distributions and Sale of Fund Shares	-0.65%	5.41%	6.06%
Class C	Return Before Taxes	1.28%	7.15%	7.54%
Advisor Class	Return Before Taxes	3.34%	8.23%	8.63%
Class R	Return Before Taxes	2.67%	7.54%	7.95%
Class K	Return Before Taxes	2.99%	7.87%	8.28%
Class I	Return Before Taxes	3.35%	8.25%	8.64%
Class Z**	Return Before Taxes	3.45%	8.32%	8.74%
Russell 2500® Value Index (reflects no deduction for fees, expenses or taxes)		4.88%	9.43%	9.33%
Russell 2500™ Index# (reflects no deduction for fees, expenses or taxes)		19.99%	13.64%	11.97%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** Inception date for Class Z shares is 10/15/13. Performance information for periods prior to the inception of Class Z shares is the performance of the Fund's Class A shares adjusted to reflect the expense ratio of Class Z shares.

The information for the Russell 2500™ Index is presented to show how the Fund's performance compares with the returns of an index of securities similar to those in which the Fund invests.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
James W. MacGregor	Since 2005	Senior Vice President of the Adviser
Erik A. Turenchalk	Since 2020	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

AB Relative Value Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, I, and Z Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
Management Fees	.55%	.55%	.55%	.55%	.55%	.55%	.55%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None	None
Other Expenses:							
Transfer Agent	.13%	.13%	.13%	.25%	.17%	.12%	.02%
Other Expenses	.05%	.05%	.05%	.05%	.06%	.05%	.05%
Total Other Expenses	.18%	.18%	.18%	.30%	.23%	.17%	.07%
Acquired Fund Fees and Expenses	.01%	.01%	.01%	.01%	.01%	.01%	.01%
Total Annual Fund Operating Expenses	.99%	1.74%	.74%	1.36%	1.04%	.73%	.63%
Fee Waiver and/or Expense Reimbursement(c)	(.09)%	(.09)%	(.09)%	(.21)%	(.14)%	(.08)%	(.01)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	.90%	1.65%	.65%	1.15%	.90%	.65%	.62%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

(c) The Adviser has contractually agreed to waive its management fees and/or to bear certain expenses of the Fund. In addition to that agreement, in connection with the Fund's investments in AB Government Money Market Portfolio (the "Money Market Portfolio") (except for the investment of any cash collateral from securities lending), the Adviser has contractually agreed to waive its management fee from the Fund and/or reimburse other expenses of the Fund in an amount equal to the Fund's pro rata share of the Money Market Portfolio's effective management fee, as included in "Acquired Fund Fees and Expenses". Each of the agreements will remain in effect until February 28, 2022 and may only be terminated or changed with the consent of the Fund's Board of Directors. In addition, each of the agreements will be automatically extended for one-year terms unless the Adviser provides notice of termination to the Fund at least 60 days prior to the end of the period.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year, that the Fund's operating expenses stay the same and that any fee waiver and/or expense limitation is in effect for only the first year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
After 1 Year	\$ 513	\$ 268*	\$ 66	\$ 117	\$ 92	\$ 66	\$ 63
After 3 Years	\$ 718	\$ 539	\$228	\$ 410	\$ 317	\$225	\$201
After 5 Years	\$ 940	\$ 935	\$403	\$ 725	\$ 560	\$398	\$350
After 10 Years	\$1,579	\$2,044	\$910	\$1,617	\$1,258	\$899	\$785

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 55% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in the equity securities of U.S. companies that the Adviser believes are trading at attractive valuations that have strong or improving business models. The Adviser monitors the fundamental performance of the Fund's investments for signs of future financial success. The Adviser relies heavily upon the fundamental analysis and research of its dedicated investment team for the Fund in conducting research and making investment decisions. The team initially screens a primary research universe of largely U.S. companies for attractive security valuation and business model characteristics. Once appropriate candidates have been identified for further analysis, the team conducts fundamental research to better understand the company's business model. In evaluating a company for potential inclusion in the Fund, the Adviser takes into account many factors that it believes bear on the company's ability to perform in the future, including attractive free cash flow valuations, high levels of profitability, stable-to-improving balance sheets, and management teams that are good stewards of shareholder capital.

The Adviser recognizes that the perception of "value" is relative and often defined by the future economic performance of the company. As a result of how individual companies are valued in the market, the Fund may be attracted to investments in companies with different market capitalizations (*i.e.*, large-, mid- or small-capitalization) or companies engaged in particular types of businesses, although the Fund does not intend to concentrate in any particular sectors or industries. At any period in time, the Fund's portfolio emphasis upon particular industries or sectors will be a by-product of the stock selection process rather than the result of assigned targets or ranges.

The Fund may enter into derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds ("ETFs"). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund's portfolio from a decline in value, sometimes within certain ranges.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund's investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund's value approach, may be underperforming the market generally.
- **Capitalization Risk:** Investments in small- and mid-capitalization companies may be more volatile than investments in large-capitalization companies. Investments in small- and mid-capitalization companies may have additional risks because these companies may have limited product lines, markets or financial resources.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.

- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over ten years; and
- how the Fund's average annual return for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 18.13%, 4th quarter, 2020; and Worst Quarter was down -26.47%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	-1.56%	8.53%	10.69%
	Return After Taxes on Distributions	-1.84%	6.49%	9.34%
	Return After Taxes on Distributions and Sale of Fund Shares	-0.73%	6.31%	8.55%
Class C	Return Before Taxes	1.04%	8.68%	10.40%
Advisor Class	Return Before Taxes	3.03%	9.73%	11.50%
Class R	Return Before Taxes	2.54%	9.18%	10.92%
Class K	Return Before Taxes	2.82%	9.50%	11.22%
Class I	Return Before Taxes	3.02%	9.75%	11.55%
Class Z**	Return Before Taxes	3.09%	9.81%	11.59%
Russell 1000® Value Index (reflects no deductions for fees, expenses or taxes)		2.80%	9.74%	10.50%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** Inception date for Class Z shares is 10/15/13. Performance information for periods prior to the inception of Class Z shares is the performance of the Fund's Class A shares adjusted to reflect the expense ratio of Class Z shares.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
Frank V. Caruso	Since 2004	Senior Vice President of the Adviser
John H. Fogarty	Since 2018	Senior Vice President of the Adviser
Vinay Thapar	Since 2018	Senior Vice President of the Adviser

AB Equity Income Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is current income and long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, I, and Z Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
Management Fees	.55%	.55%	.55%	.55%	.55%	.55%	.55%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None	None
Other Expenses:							
Transfer Agent	.09%	.09%	.09%	.26%	.20%	.12%	.02%
Other Expenses	.11%	.11%	.11%	.11%	.11%	.12%	.12%
Total Other Expenses	.20%	.20%	.20%	.37%	.31%	.24%	.14%
Total Annual Fund Operating Expenses	1.00%	1.75%	.75%	1.42%	1.11%	.79%	.69%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the Fund's operating expenses stay the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
After 1 Year	\$ 523	\$ 278*	\$ 77	\$ 145	\$ 113	\$ 81	\$ 70
After 3 Years	\$ 730	\$ 551	\$240	\$ 449	\$ 353	\$252	\$221
After 5 Years	\$ 954	\$ 949	\$417	\$ 776	\$ 612	\$439	\$384
After 10 Years	\$1,598	\$2,062	\$930	\$1,702	\$1,352	\$978	\$859

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 37% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in a diversified portfolio of equity securities of U.S. companies. Under normal circumstances, the Fund invests at least 80% of its net assets in equity securities. The Fund invests primarily in income-producing securities, targeting an investment in such securities of at least 65% of its total assets. The Fund seeks current income and capital growth from investments in a wide range of industries.

The Fund invests in companies that the Adviser determines to be undervalued, using the fundamental value approach of the Adviser. The fundamental value approach seeks to identify a universe of securities that are considered to be undervalued because they are attractively priced relative to their future earnings power and dividend-paying capability. In selecting securities for the Fund’s portfolio, the Adviser uses fundamental and quantitative research to identify and invest in those companies whose long-term earnings power and dividend-paying capability are not reflected in the current market price of these securities.

The Adviser’s fundamental analysis depends heavily upon its large internal research staff. The research staff of company and industry analysts covers a research universe drawn primarily from the S&P 500 Index. The Adviser typically projects a company’s financial performance over a full economic cycle, including a trough and a peak, within the context of forecasts for real economic growth, inflation and interest rate changes. The Adviser’s research staff focuses on the valuations implied by the current price, relative to the earnings the company will be generating five years from now, or “normalized” earnings, assuming average mid-economic cycle growth for the fifth year.

The Fund’s management team and other senior investment professionals work in close collaboration to weigh each investment opportunity identified by the research staff relative to the entire portfolio and determine the timing and position size for purchases and sales. Analysts remain responsible for monitoring new developments that would affect the securities they cover. The team will generally sell a security when it no longer meets appropriate valuation criteria, although sales may be delayed when positive return trends are favorable.

The Fund may invest in securities of non-U.S. companies, but will limit its investments in any one non-U.S. country to no more than 15% of its net assets.

The Fund may enter into derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds (“ETFs”). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund’s portfolio from a decline in value, sometimes within certain ranges.

The Fund may, at times, invest in shares of ETFs in lieu of making direct investments in equity securities. ETFs may provide more efficient and economical exposure to the type of companies and geographic locations in which the Fund seeks to invest than direct investments.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund’s investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund’s investments or reduce its returns.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.

- **Industry/Sector Risk:** Investments in a particular industry or group of related industries may have more risk because market or economic factors affecting that industry could have a significant effect on the value of the Fund's investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over ten years; and
- how the Fund's average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 14.65%, 2nd quarter, 2020; and Worst Quarter was down -23.68%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	-0.22%	8.59%	9.13%
	Return After Taxes on Distributions	-0.89%	7.10%	7.53%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year and that the Fund's operating expenses stay the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I
After 1 Year	\$ 565	\$ 323*	\$ 121	\$ 177	\$ 146	\$ 106
After 3 Years	\$ 861	\$ 688	\$ 378	\$ 548	\$ 452	\$ 331
After 5 Years	\$1,178	\$1,180	\$ 654	\$ 944	\$ 782	\$ 574
After 10 Years	\$2,076	\$2,534	\$1,443	\$2,052	\$1,713	\$1,271

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 50% of the average value of its portfolio.

PRINCIPAL STRATEGIES

Under normal circumstances, the Fund invests at least 80% of its net assets in the equity securities of real estate investment trusts, or REITs, and other real estate industry companies, such as real estate operating companies, or REOCs. The Fund invests in real estate companies that the Adviser believes have strong property fundamentals and management teams. The Fund seeks to invest in real estate companies whose underlying portfolios are diversified geographically and by property type.

The Fund invests in U.S. and non-U.S. issuers. Under normal circumstances, the Fund invests significantly (at least 40%—unless market conditions are not deemed favorable by the Adviser) in securities of non-U.S. companies. In addition, the Fund invests, under normal circumstances, in the equity securities of companies located in at least three countries. Equity securities include common stock, shares of beneficial interest of REITs, and securities with common stock characteristics, such as preferred stock or convertible securities (“real estate equity securities”).

The Fund’s investment policies emphasize investments in companies determined by the Adviser to be undervalued relative to their peers, using a fundamental value approach. In selecting real estate equity securities, the Adviser’s research and investment process seeks to identify globally those companies where the magnitude and growth of cash flow streams have not been appropriately reflected in the price of the security. These securities may trade at a more attractive valuation than others that may have similar overall fundamentals. The Adviser’s fundamental research efforts are focused on forecasting the short and long-term normalized cash generation capability of real estate companies by isolating supply and demand for property types in local markets, determining the replacement value of properties, assessing future development opportunities, and normalizing capital structures of real estate companies.

Currencies can have a dramatic impact on equity return, significantly adding to returns in some years and greatly diminishing them in others. The Adviser evaluates currency and equity positions separately and may seek to hedge the currency exposure resulting from securities positions when it finds the currency exposure unattractive. To hedge a portion of its currency risk, the Fund may from time to time invest in currency-related derivatives, including forward currency exchange contracts, futures contracts, options on futures contracts, swaps and options. The Adviser also may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives.

The Fund may enter into forward commitments and standby commitment agreements. The Fund may enter into other derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds (“ETFs”). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund’s portfolio from a decline in value, sometimes within certain ranges.

The Fund may, at times, invest in shares of ETFs in lieu of making direct investments in equity securities. ETFs may provide more efficient and economical exposure to the type of companies and geographic locations in which the Fund seeks to invest than direct investments.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund’s investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market.
- **Interest Rate Risk:** Changes in interest rates will affect the value of investments in fixed-income securities. When interest rates rise, the value of existing investments in fixed-income securities tends to fall and this decrease in value may not be offset by higher income from new investments. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations. Very low or negative interest rates would likely magnify the risks associated with changes in interest rates. During periods of very low or negative rates, the Fund’s returns would likely be adversely affected.
- **Credit Risk:** An issuer or guarantor of a fixed-income security, or the counterparty to a derivatives or other contract, may be unable or unwilling to make timely payments of interest or principal, or to otherwise honor its obligations. The issuer or guarantor may default, causing a loss of the full principal amount of a security and accrued interest. The degree of risk for a particular security may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security. Investments in fixed-income securities with lower ratings tend to have a higher probability that an issuer will default or fail to meet its payment obligations.

- **Real Estate Risk:** The Fund's investments in the real estate market have many of the same risks as direct ownership of real estate, including the risk that the value of real estate could decline due to a variety of factors that affect the real estate market generally. Investments in REITs may have additional risks. REITs are dependent on the capability of their managers, may have limited diversification, and could be significantly affected by changes in tax laws.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.
- **Mortgage-Related and/or Other Asset-Backed Securities Risk:** Investments in mortgage-related and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include "extension risk", which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and "prepayment risk", which is the risk that in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by nongovernmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Leverage Risk:** When the Fund borrows money or otherwise leverages its portfolio, it may be more volatile because leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund's investments. The Fund may create leverage through the use of reverse repurchase agreements, forward commitments, or by borrowing money.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over ten years; and
- how the Fund's average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 14.93%, 1st quarter, 2019; and Worst Quarter was down -27.03%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	-9.51%	4.21%	5.74%
	Return After Taxes on Distributions	-9.72%	2.68%	4.23%
	Return After Taxes on Distributions and Sale of Fund Shares	-5.58%	2.66%	3.91%
Class C	Return Before Taxes	-7.13%	4.33%	5.42%
Advisor Class	Return Before Taxes	-5.28%	5.39%	6.48%
Class R	Return Before Taxes	-5.79%	4.79%	5.89%
Class K	Return Before Taxes	-5.48%	5.10%	6.21%
Class I	Return Before Taxes	-5.10%	5.50%	6.59%
MSCI World Index (net)**				
(reflects no deduction for fees, expenses or taxes except the reinvestment of dividends net of non-U.S. withholding taxes)		15.90%	12.19%	9.87%
FTSE NAREIT Equity REIT Index**				
(reflects no deduction for fees, expenses or taxes)		-5.12%	6.70%	9.27%
FTSE EPRA/NAREIT Developed Real Estate Index (net)***				
(reflects no deduction for fees, expenses or taxes except the reinvestment of dividends net of non-U.S. withholding taxes)		-9.04%	3.74%	5.44%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** The MSCI World Index (net) provides broad-based information about the performance of global markets. The FTSE NAREIT Equity REIT Index provides more information about the performance of REITs in the U.S.

*** The FTSE EPRA/NAREIT Developed Real Estate Index provides more information about the performance of REITs in global markets. Performance returns for the FTSE EPRA/NAREIT Developed Real Estate Index (net) are calculated applying dividend withholding tax rates applicable to non-resident persons who do not benefit from double taxation treaties.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
Eric J. Franco	Since 2012	Senior Vice President of the Adviser
Ajit D. Ketkar	Since 2017	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 of this Prospectus.

AB International Value Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, and I Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I
Management Fees	.75%	.75%	.75%	.75%	.75%	.75%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None
Other Expenses:						
Transfer Agent	.28%	.31%	.28%	.26%	.20%	.02%
Other Expenses	.37%	.37%	.37%	.37%	.37%	.37%
Total Other Expenses	.65%	.68%	.65%	.63%	.57%	.39%
Total Annual Fund Operating Expenses	1.65%	2.43%	1.40%	1.88%	1.57%	1.14%
Fee Waiver and/or Expense Reimbursement(c)	(.40)%	(.43)%	(.40)%	(.38)%	(.32)%	(.14)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	1.25%	2.00%	1.00%	1.50%	1.25%	1.00%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

(c) The Adviser has contractually agreed to waive its management fees and/or to bear certain expenses of the Fund. The agreement will remain in effect until February 28, 2022 and may only be terminated or changed with the consent of the Fund's Board of Trustees. In addition, the agreement will be automatically extended for one-year terms unless the Adviser provides notice of termination to the Fund at least 60 days prior to the end of the period.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year, that the Fund's operating expenses stay the same and that any fee waiver and/or expense limitation is in effect for only the first year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I
After 1 Year	\$ 547	\$ 303*	\$ 102	\$ 153	\$ 127	\$ 102
After 3 Years	\$ 886	\$ 717	\$ 404	\$ 554	\$ 464	\$ 348
After 5 Years	\$1,248	\$1,257	\$ 728	\$ 981	\$ 825	\$ 614
After 10 Years	\$2,264	\$2,734	\$1,645	\$2,170	\$1,840	\$1,374

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 48% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in a diversified portfolio of equity securities of established companies selected from more than 40 industries and more than 40 developed and emerging market countries. These countries currently include the developed nations in Europe and the Far East, Canada, Australia and emerging market countries worldwide. Under normal market conditions, the Fund invests significantly (at least 40%—unless market conditions are not deemed favorable by the Adviser) in securities of non-U.S. companies. In addition, the Fund invests, under normal circumstances, in the equity securities of companies located in at least three countries.

The Fund invests in companies that are determined by the Adviser to be undervalued, using a fundamental value approach. In selecting securities for the Fund's portfolio, the Adviser uses its fundamental and quantitative research to identify companies whose stocks are priced low in relation to their perceived long-term earnings power.

The Adviser's fundamental analysis depends heavily upon its large internal research staff. The research staff begins with a global research universe of international and emerging market companies. Teams within the research staff cover a given industry worldwide to better understand each company's competitive position in a global context. The Adviser typically projects a company's financial performance over a full economic cycle, including a trough and a peak, within the context of forecasts for real economic growth, inflation and interest rate changes. The Adviser focuses on the valuation implied by the current price, relative to the earnings the company will be generating five years from now, or "normalized" earnings, assuming average mid-economic cycle growth for the fifth year.

The Fund's management team and other senior investment professionals work in close collaboration to weigh each investment opportunity identified by the research staff relative to the entire portfolio and determine the timing and position size for purchases and sales. Analysts remain responsible for monitoring new developments that would affect the securities they cover. The team will generally sell a security when it no longer meets appropriate valuation criteria, although sales may be delayed when positive return trends are favorable.

Currencies can have a dramatic impact on equity returns, significantly adding to returns in some years and greatly diminishing them in others. The Adviser evaluates currency and equity positions separately and may seek to hedge the currency exposure resulting from securities positions when it finds the currency exposure unattractive. To hedge a portion of its currency risk, the Fund may from time to time invest in currency-related derivatives, including forward currency exchange contracts, futures contracts, options on futures contracts, swaps and options. The Adviser may also seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives.

The Fund may enter into other derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds ("ETFs"). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund's portfolio from a decline in value, sometimes within certain ranges.

The Fund may, at times, invest in shares of ETFs in lieu of making direct investments in equity securities. ETFs may provide more efficient and economical exposure to the type of companies and geographic locations in which the Fund seeks to invest than direct

investments. The Fund may invest in depositary receipts, instruments of supranational entities denominated in the currency of any country, securities of multinational companies and “semi-governmental securities”, and enter into forward commitments.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund’s investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund’s value approach, may be underperforming the market generally.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Emerging Market Risk:** Investments in emerging market countries may have more risk because the markets are less developed and less liquid as well as being subject to increased economic, political, regulatory or other uncertainties.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund’s investments or reduce its returns.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Leverage Risk:** When the Fund borrows money or otherwise leverages its portfolio, it may be more volatile because leverage tends to exaggerate the effect of any increase or decrease in the value of the Fund’s investments. The Fund may create leverage through the use of reverse repurchase agreements, forward commitments, or by borrowing money.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund’s performance changed from year to year over ten years; and
- how the Fund’s average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund’s website at www.abfunds.com (click on “Investments—Mutual Funds”).

The Fund’s past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund’s Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund’s:

Best Quarter was up 20.48%, 4th quarter, 2020; and Worst Quarter was down -30.64%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	-2.30%	1.57%	1.42%
	Return After Taxes on Distributions	-2.37%	1.55%	1.09%
	Return After Taxes on Distributions and Sale of Fund Shares	-1.15%	1.39%	1.20%
Class C	Return Before Taxes	0.17%	1.66%	1.10%
Advisor Class	Return Before Taxes	2.22%	2.70%	2.13%

AB Core Opportunities Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, I, and Z Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
Management Fees	.55%	.55%	.55%	.55%	.55%	.55%	.55%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None	None
Other Expenses:							
Transfer Agent	.11%	.11%	.11%	.24%	.20%	.05%	.02%
Other Expenses	.20%	.20%	.20%	.20%	.20%	.20%	.20%
Total Other Expenses	.31%	.31%	.31%	.44%	.40%	.25%	.22%
Acquired Fund Fees and Expenses	.01%	.01%	.01%	.01%	.01%	.01%	.01%
Total Annual Fund Operating Expenses	1.12%	1.87%	.87%	1.50%	1.21%	.81%	.78%
Fee Waiver and/or Expense Reimbursement(c)	(.01)%	(.01)%	(.01)%	(.10)%	(.06)%	(.01)%	(.01)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	1.11%	1.86%	.86%	1.40%	1.15%	.80%	.77%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

(c) The Adviser has contractually agreed to waive its management fees and/or to bear certain expenses of the Fund. In addition to that agreement, in connection with the Fund's investments in AB Government Money Market Portfolio (the "Money Market Portfolio") (except for the investment of any cash collateral from securities lending), the Adviser has contractually agreed to waive its management fee from the Fund and/or reimburse other expenses of the Fund in an amount equal to the Fund's pro rata share of the Money Market Portfolio's effective management fee, as included in "Acquired Fund Fees and Expenses". Each of the agreements will remain in effect until February 28, 2022 and may only be terminated or changed with the consent of the Fund's Board of Directors. In addition, each of the agreements will be automatically extended for one-year terms unless the Adviser provides notice of termination to the Fund at least 60 days prior to the end of the period.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year, that the Fund's operating expenses stay the same and that any fee waiver and/or expense limitation is in effect for only the first year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I	Class Z
After 1 Year	\$ 533	\$ 289*	\$ 88	\$ 143	\$ 117	\$ 82	\$ 79
After 3 Years	\$ 765	\$ 587	\$ 277	\$ 464	\$ 378	\$ 258	\$248
After 5 Years	\$1,015	\$1,010	\$ 481	\$ 809	\$ 659	\$ 449	\$432
After 10 Years	\$1,729	\$2,190	\$1,072	\$1,782	\$1,461	\$1,001	\$965

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 65% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in the equity securities of U.S. companies that the Adviser believes are attractively valued. The Adviser relies primarily upon the fundamental analysis and research of its dedicated investment team for the Fund in conducting research and making investment decisions. The team initially screens a primary research universe of largely U.S. companies for attractive security valuation and business models. Once appropriate candidates have been identified for further analysis, the team conducts fundamental research to better understand the economics of the company's business model. In evaluating a company for potential inclusion in the Fund, the Adviser takes into account many factors that it believes bear on the company's ability to perform in the future, including competitive advantages and fundamentals such as strong cash-flow generation, sustainable growth and strong balance sheets.

At different times, and as a result of how individual companies are valued in the market, the Fund may be attracted to investments in companies with different market capitalizations (*i.e.*, large-, mid- or small-capitalization) or companies engaged in particular types of business (*e.g.*, banks and other financial institutions), although the Fund does not intend to concentrate in any particular industries or businesses. The Fund's portfolio emphasis upon particular industries or sectors will be a by-product of the stock selection process rather than the result of assigned targets or ranges. In managing the Fund, the Adviser will not seek to have a bias either towards securities typically considered growth stocks or securities typically considered value stocks.

The Fund may enter into derivatives transactions, such as options, futures contracts, forwards, and swaps. The Fund may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, including on individual securities and stock indices, futures contracts (including futures contracts on individual securities and stock indices) or shares of exchange-traded funds ("ETFs"). These transactions may be used, for example, in an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of the Fund's portfolio from a decline in value, sometimes within certain ranges.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund's investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund's value approach, may be underperforming the market generally.
- **Capitalization Risk:** Investments in small-capitalization companies may be more volatile than investments in large-capitalization companies. Investments in small-capitalization companies may have additional risks because these companies have limited product lines, markets or financial resources.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.

- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over ten years; and
- how the Fund's average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 18.58%, 2nd quarter, 2020; and Worst Quarter was down -19.63%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	8.17%	12.03%	12.97%
	Return After Taxes on Distributions	7.10%	9.73%	11.26%
	Return After Taxes on Distributions and Sale of Fund Shares	5.57%	8.97%	10.34%
Class C	Return Before Taxes	11.16%	12.17%	12.64%
Advisor Class**	Return Before Taxes	13.29%	13.30%	13.77%
Class R	Return Before Taxes	12.68%	12.69%	13.19%
Class K	Return Before Taxes	12.97%	12.98%	13.48%
Class I	Return Before Taxes	13.38%	13.33%	13.81%
Class Z**	Return Before Taxes	13.40%	13.40%	13.84%
S&P 500 Index (reflects no deduction for fees, expenses or taxes)		18.40%	15.22%	13.88%
Russell 1000® Value Index# (reflects no deduction for fees, expenses or taxes)		2.80%	9.74%	10.50%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** Inception dates: 3/31/10 for Advisor Class shares and 10/15/13 for Class Z shares. Performance information for periods prior to the inception of Advisor Class and Class Z shares is the performance of the Fund's Class A shares adjusted to reflect the expense ratios of Advisor Class and Class Z shares, respectively.

The information for the Russell 1000® Value Index is presented to show how the Fund's performance compares with the returns of an index of securities similar to those in which the Fund invests.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
Frank V. Caruso	Since 1999	Senior Vice President of the Adviser
John H. Fogarty	Since 2018	Senior Vice President of the Adviser
Vinay Thapar	Since 2018	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 of this Prospectus.

AB Global Risk Allocation Fund

INVESTMENT OBJECTIVE

The Fund's investment objective is total return consistent with reasonable risks through a combination of income and long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares	Class R, K, and I Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None	None
Exchange Fee	None	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class	Class R	Class K	Class I
Management Fees	.60%	.60%	.60%	.60%	.60%	.60%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None	.50%	.25%	None
Other Expenses:						
Transfer Agent	.18%	.19%	.18%	.27%	.21%	.13%
Other Expenses	.34%	.34%	.34%	.34%	.34%	.34%
Total Other Expenses	.52%	.53%	.52%	.61%	.55%	.47%
Acquired Fund Fees and Expenses	.01%	.01%	.01%	.01%	.01%	.01%
Total Annual Fund Operating Expenses	1.38%	2.14%	1.13%	1.72%	1.41%	1.08%
Fee Waiver and/or Expense Reimbursement(c)	(.01)%	(.01)%	(.00)%	(.01)%	(.00)%	(.01)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	1.37%	2.13%	1.13%	1.71%	1.41%	1.07%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

(c) In connection with the Fund's investments in AB Government Money Market Portfolio (the "Money Market Portfolio") (except for the investment of any cash collateral from securities lending), the Adviser has contractually agreed to waive its management fee from the Fund and/or reimburse other expenses of the Fund in an amount equal to the Fund's pro rata share of the Money Market Portfolio's effective management fee, as included in "Acquired Fund Fees and Expenses". The agreement will remain in effect until February 28, 2022 and may only be terminated or changed with the consent of the Fund's Board of Directors. In addition, the agreement will be automatically extended for one-year terms unless the Adviser provides notice of termination to the Fund at least 60 days prior to the end of the period.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year, that the Fund's operating expenses stay the same and that any fee waiver and/or expense limitation is in effect for only the first year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class	Class R	Class K	Class I
After 1 Year	\$ 559	\$ 316*	\$ 115	\$ 174	\$ 144	\$ 109
After 3 Years	\$ 842	\$ 669	\$ 359	\$ 541	\$ 446	\$ 342
After 5 Years	\$1,147	\$1,148	\$ 622	\$ 932	\$ 771	\$ 595
After 10 Years	\$2,011	\$2,472	\$1,375	\$2,029	\$1,691	\$1,316

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 20% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests dynamically in a number of global asset classes, including equity/credit, fixed-income, and inflation-sensitive instruments. In making decisions on the allocation of assets among asset classes, the Adviser will use a risk-balanced approach. This strategy attempts to provide investors with favorable long-term total return while minimizing exposure to material downside ("tail") events. To execute this strategy, the Adviser assesses the volatility, tail loss and return potential of each asset. Fund assets are then allocated among asset classes so that no asset class dominates the expected tail loss of the Fund. This will generally result in the Fund having greater exposures to lower risk asset classes (such as fixed-income) than to higher risk asset classes. The Adviser will make frequent adjustments to the Fund's asset class exposures based on its determinations of volatility, tail loss and return potential.

The asset classes in which the Fund may invest include:

- equity/credit—equity securities of all types and corporate fixed-income securities (regardless of credit quality, but subject to the limitations on high-yield securities set forth below);
- fixed-income—fixed-income securities of the U.S. and foreign governments and their agencies and instrumentalities; and
- inflation-sensitive—global inflation-indexed securities (including Treasury Inflation Protected Securities) and commodity-related instruments and derivatives (including commodity futures).

The Fund's investments within each asset class are generally index-based—typically, portfolios of individual securities, derivatives or exchange-traded funds ("ETFs") intended to track the performance of segments within each particular asset class. The inflation-sensitive asset class consists of instruments, the prices of which are affected directly or indirectly by the level and change in the rate of inflation, such as commodity derivatives.

Equity securities will comprise no more than 75% of the Fund's investments. The Fund may invest in fixed-income securities with a range of maturities from short- to long-term. The Fund may invest up to 20% of its assets in high-yield securities (securities rated below BBB- by S&P Global Ratings ("S&P"), Moody's Investors Service, Inc. ("Moody's"), or Fitch Ratings ("Fitch"), which are commonly known as "junk bonds"). As an operating policy, the Fund will invest no more than 5% of its assets in securities rated CCC- or below.

The Fund's investments will generally be global in nature, and will generally include investments in both developed and emerging markets. The Fund typically invests at least 40% of its assets in securities of non-U.S. companies and/or foreign countries and their agencies and instrumentalities unless conditions are not deemed favorable by the Adviser, in which case the Fund will invest at least 30% of its assets in such foreign securities.

Derivatives, particularly futures contracts and swaps, often provide more efficient and economical exposure to market segments than direct investments, and the Fund's exposure to certain types of assets may at times be achieved partially or substantially through investment in derivatives. Derivatives transactions may also be a quicker and more efficient way to alter the Fund's exposure than buying and selling direct investments. In determining when and to what extent to enter into derivatives transactions, the Adviser considers factors such as the risk and returns of these investments relative to direct investments and the cost of such transactions.

Because derivatives transactions frequently require cash outlays that are only a small portion of the amount of exposure obtained through the derivative, a portion of the Fund's assets may be held in cash or invested in cash equivalents to cover the Fund's derivatives obligations, such as short-term U.S. Government and agency securities, repurchase agreements and money market funds. At times, a combination of direct securities investments and derivatives will be used to gain asset class exposure so that the Fund's aggregate exposure will substantially exceed its net assets (*i.e.*, so that the Fund is effectively leveraged). In addition, the Fund may at times invest in shares of ETFs in lieu of making direct investments in securities.

While the Fund may seek to gain exposure to physical commodities traded in the commodities markets through investments in a variety of derivative instruments, the Adviser expects that the Fund will seek to gain exposure to commodities and commodities-related instruments and derivatives primarily through investments in AllianceBernstein Global Risk Allocation (Cayman) Ltd., a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). The Subsidiary is advised by the Adviser and has the same investment objective and substantially similar investment policies and restrictions as the Fund except that the Subsidiary, unlike the Fund, may invest, without limitation, in commodities and commodities-related instruments. The Fund is subject to the risks associated with the commodities, derivatives and other instruments in which the Subsidiary invests, to the extent of its investment in the Subsidiary. The Fund limits its investment in the Subsidiary to no more than 25% of its total assets. Investment in the Subsidiary is expected to provide the Fund with commodity exposure within the limitations of federal tax requirements that apply to the Fund.

Currency exchange rate fluctuations can have a dramatic impact on returns. The Adviser may seek to hedge all or a portion of the Fund's currency exposure resulting from Fund investments or decide not to hedge this exposure. The Adviser may also cause the Fund to take on currency exposure for purposes other than hedging, relying on its fundamental and quantitative research with the goal of increasing returns or managing risk. Currency-related investments may include currencies acquired on a spot (*i.e.*, cash) basis and currency-related derivatives, including forward currency exchange contracts and options on currencies.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund's investments will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market.
- **Allocation Risk:** The allocation of investments among asset classes may have a significant effect on the Fund's net asset value, or NAV, when the asset classes in which the Fund has invested more heavily perform worse than the asset classes invested in less heavily.
- **Interest Rate Risk:** Changes in interest rates will affect the value of investments in fixed-income securities. When interest rates rise, the value of existing investments in fixed-income securities tends to fall and this decrease in value may not be offset by higher income from new investments. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations. Very low or negative interest rates would likely magnify the risks associated with changes in interest rates. During periods of very low or negative rates, the Fund's returns would likely be adversely affected.
- **Credit Risk:** An issuer or guarantor of a fixed-income security, or the counterparty to a derivatives or other contract, may be unable or unwilling to make timely payments of interest or principal, or to otherwise honor its obligations. The issuer or guarantor may default, causing a loss of the full principal amount of a security and accrued interest. The degree of risk for a particular security may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security.
- **Commodity Risk:** Investing in commodities and commodity-linked derivative instruments, either directly or through the Subsidiary, may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments.
- **Below Investment Grade Securities Risk:** Investments in fixed-income securities with ratings below investment grade, commonly known as "junk bonds", tend to have a higher probability that an issuer will default or fail to meet its payment obligations. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity and negative perceptions of the junk bond market generally and may be more difficult to trade or dispose of than other types of securities.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments or reduce its returns.

- **Emerging Market Risk:** Investments in emerging market countries may have more risk because the markets are less developed and less liquid as well as being subject to increased economic, political, regulatory or other uncertainties.
- **Subsidiary Risk:** By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary. The derivatives and other investments held by the Subsidiary are generally similar to those that are permitted to be held by the Fund and are subject to the same risks that apply to similar investments if held directly by the Fund. The Subsidiary is not registered under the Investment Company Act of 1940, as amended (the “1940 Act”), and, unless otherwise noted in this Prospectus, is not subject to all of the investor protections of the 1940 Act. However, the Fund wholly owns and controls the Subsidiary, and the Fund and the Subsidiary are managed by the Adviser, making it unlikely the Subsidiary will take actions contrary to the interests of the Fund or its shareholders. In addition, changes in federal tax laws applicable to the Fund or interpretations thereof could limit the Fund’s ability to gain exposure to commodities investments through investments in the Subsidiary.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Leverage Risk:** Because the Fund uses leveraging techniques, its NAV may be more volatile because leverage tends to exaggerate the effect of changes in interest rates and any increase or decrease in the value of the Fund’s investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund’s performance changed from year to year over ten years; and
- how the Fund’s average annual returns for one, five and ten years compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund’s website at www.abfunds.com (click on “Investments—Mutual Funds”).

The Fund’s past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Effective October 8, 2012, the Fund changed its name from AllianceBernstein Balanced Shares to AllianceBernstein Global Risk Allocation Fund (currently named AB Global Risk Allocation Fund), eliminated its non-fundamental policies that the Fund’s investments will normally consist of about 60% in stocks and about 40% in fixed-income securities and that fixed-income securities will not normally exceed 60% of the Fund’s investments, and made certain material changes to its investment strategy, including adoption of a global rather than a U.S. focus. In addition, the Fund’s portfolio management team was changed. The performance information shown below for periods prior to implementation of these changes may not be representative of performance the Fund will achieve under its current policies.

Bar Chart

The annual returns in the bar chart are for the Fund’s Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund’s:

Best Quarter was up 10.97%, 2nd quarter, 2020; and Worst Quarter was down -14.97%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	10 Years
Class A*	Return Before Taxes	5.87%	6.07%	5.51%
	Return After Taxes on Distributions	4.71%	5.04%	4.36%
	Return After Taxes on Distributions and Sale of Fund Shares	3.59%	4.30%	3.99%
Class C	Return Before Taxes	8.77%	6.19%	5.19%
Advisor Class	Return Before Taxes	10.93%	7.25%	6.26%
Class R	Return Before Taxes	10.24%	6.64%	5.64%
Class K	Return Before Taxes	10.59%	6.96%	5.96%
Class I	Return Before Taxes	10.89%	7.35%	6.38%
MSCI World Index (reflects no deduction for fees, expenses or taxes)		15.90%	12.19%	9.87%
Bloomberg Barclays Global Aggregate Bond Index** (reflects no deduction for fees, expenses or taxes)		9.20%	4.79%	2.83%
60% MSCI World Index/40% Bloomberg Barclays Global Aggregate Bond Index (reflects no deduction for fees, expenses or taxes)**		13.86%	9.45%	7.22%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** The information for the Bloomberg Barclays Global Aggregate Bond Index and for the composite index is presented to show how the Fund's performance compares with the returns of indices of securities similar to those in which the Fund invests.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
Daniel J. Loewy	Since 2016	Senior Vice President of the Adviser
Leon Zhu	Since 2012	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 of this Prospectus.

AB Small Cap Value Portfolio

INVESTMENT OBJECTIVE

The Fund's investment objective is to seek long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None
Exchange Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class
Management Fees	.80%	.80%	.80%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None
Other Expenses:			
Transfer Agent	.04%	.05%	.03%
Other Expenses	.12%	.12%	.13%
Total Other Expenses	.16%	.17%	.16%
Total Annual Fund Operating Expenses	1.21%	1.97%	.96%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of these periods. The Examples also assume that your investment has a 5% return each year and that the Fund's operating expenses stay the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class
After 1 Year	\$ 543	\$ 300*	\$ 98
After 3 Years	\$ 793	\$ 618	\$ 306
After 5 Years	\$1,062	\$1,062	\$ 531
After 10 Years	\$1,829	\$2,296	\$1,178

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 48% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Fund invests primarily in a portfolio of equity securities of small-capitalization U.S. companies. Under normal circumstances, the Fund invests at least 80% of its net assets in equity securities of small-capitalization companies. For purposes of this policy, small-capitalization companies are those that, at the time of investment, fall within the capitalization range between the smallest company in the Russell 2000® Value Index and the greater of \$2.5 billion or the largest company in the Russell 2000® Value Index. As of December 31, 2020, the market capitalization range of the Russell 2000® Value Index was between \$43 million and \$15.5 billion.

The Fund invests in companies that are determined by the Adviser to be undervalued, using the Adviser’s fundamental value approach. In selecting securities for the Fund, the Adviser uses its fundamental and quantitative research to identify companies whose long-term earnings power is not reflected in the current market price of the securities.

The Adviser looks for companies with attractive valuation (for example, with low price to book value ratios) and compelling quality factors (for example, momentum and return on equity). The Adviser then uses this information to calculate an expected return. Returns and rankings are updated on a daily basis. The rankings are used to determine prospective candidates for further fundamental research and, subsequently, possible addition to the Fund. Typically, the Adviser’s fundamental research analysts focus their research on the most attractive 20% of the companies in the small-capitalization universe as defined above.

The Adviser typically projects a company’s financial performance over a full economic cycle, including a trough and a peak, within the context of forecasts for real economic growth, inflation and interest rate changes. The Adviser focuses on the valuation implied by the current price, relative to the earnings the company is projected to generate five years from now, or “normalized” earnings, assuming average mid-economic cycle growth for the fifth year.

The Adviser generally sells a security when it no longer meets appropriate valuation criteria, although sales may be delayed when return trends are favorable. Typically, growth in the size of a company’s market capitalization relative to other domestically traded companies will not cause the Adviser to dispose of the security.

The Adviser seeks to manage the overall portfolio volatility relative to the Russell 2000® Value Index by favoring promising securities that offer the best balance between return and targeted risk.

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund’s assets will fluctuate as the stock market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund’s value approach, may underperform the market generally.
- **Capitalization Risk:** Investments in small-capitalization companies may be more volatile than investments in large-capitalization companies. Investments in small-capitalization companies may have additional risks because these companies have limited product lines, markets or financial resources.
- **Industry/Sector Risk:** Investments in a particular industry or group of related industries may have more risk because market or economic factors affecting that industry could have a significant effect on the value of the Fund’s investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund’s performance changed from year to year over the life of the Fund; and
- how the Fund’s average annual returns for one year, five years and since inception compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 34.82%, 4th quarter, 2020; and Worst Quarter was down -37.58%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	Since Inception**
Class A*	Return Before Taxes	-1.20%	7.22%	6.03%
	Return After Taxes on Distributions	-1.28%	6.42%	5.34%
	Return After Taxes on Distributions and Sale of Fund Shares	-0.65%	5.56%	4.64%
Class C	Return Before Taxes	1.43%	7.34%	5.99%
Advisor Class	Return Before Taxes	3.45%	8.44%	7.06%
Russell 2000® Value Index (reflects no deduction for fees, expenses or taxes)		4.63%	9.65%	6.88%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** Inception date for all classes is 12/3/14.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
James W. MacGregor	Since 2014	Senior Vice President of the Adviser
Erik A. Turenchalk	Since 2020	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 of this Prospectus.

AB All Market Income Portfolio

INVESTMENT OBJECTIVE

The Fund's investment objective is to seek current income with consideration of capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Class C Shares	Advisor Class Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	1.00%(b)	None
Exchange Fee	None	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Advisor Class
Management Fees	.55%	.55%	.55%
Distribution and/or Service (12b-1) Fees	.25%	1.00%	None
Other Expenses:			
Transfer Agent	.04%	.04%	.04%
Other Expenses	.53%	.53%	.53%
Total Other Expenses	.57%	.57%	.57%
Acquired Fund Fees and Expenses	.24%	.24%	.24%
Total Annual Fund Operating Expenses	1.61%	2.36%	1.36%
Fee Waiver and/or Expense Reimbursement(c)	(.61)%	(.61)%	(.61)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	1.00%	1.75%	.75%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) For Class C shares, the CDSC is 0% after the first year. Class C shares automatically convert to Class A shares after eight years.

(c) The Adviser has contractually agreed to waive its management fees and/or to bear certain expenses of the Fund until February 28, 2022 to the extent necessary to prevent total Fund operating expenses (excluding acquired fund fees and expenses, interest expense, taxes, extraordinary expenses, and brokerage commissions and other transaction costs), on an annualized basis, from exceeding .99%, 1.74% and .74% of average daily net assets, respectively, for Class A, Class C and Advisor Class shares ("expense limitations"). In addition, the Adviser has contractually agreed to waive its management fees and/or bear Fund expenses through February 28, 2022 in an amount equal to the Fund's share of all fees and expenses of any AB Mutual Funds in which the Fund invests. In connection with the Fund's investments in AB Government Money Market Portfolio (the "Money Market Portfolio") (except for the investment of any cash collateral from securities lending), the Adviser has contractually agreed to waive its management fee from the Fund and/or reimburse other expenses of the Fund in an amount equal to the Fund's pro rata share of the Money Market Portfolio's effective management fee, as included in "Acquired Fund Fees and Expenses". Each of the agreements will remain in effect until February 28, 2022 and may only be terminated or changed with the consent of the Fund's Board of Directors. In addition, each of the agreements will be automatically extended for one-year terms unless the Adviser provides notice of termination to the Fund at least 60 days prior to the end of the period.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem your shares at the end of those periods. The Examples also assume that your investment has a 5% return each year, that the Fund's operating expenses stay the same and that any fee waiver and/or expense limitation is in effect for only the first year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Class C	Advisor Class
After 1 Year	\$ 523	\$ 278*	\$ 77
After 3 Years	\$ 854	\$ 678	\$ 371
After 5 Years	\$1,209	\$1,205	\$ 686
After 10 Years	\$2,206	\$2,650	\$1,582

* If you did not redeem your shares at the end of the period, your expenses would be decreased by approximately \$100.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 105% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Adviser allocates the Fund's investments primarily among a broad range of income-producing securities, including common stock of companies that regularly pay dividends, debt securities (including high-yield debt securities, also known as "junk bonds"), preferred stocks, and derivatives related to these types of securities. In addition, the Fund may engage in certain alternative income strategies that generally utilize derivatives to diversify sources of income and manage risk. The Fund pursues a global strategy, typically investing in securities of issuers located in the United States and in other countries throughout the world, including emerging market countries.

In selecting equity securities for the Fund, the Adviser focuses on securities that have high dividend yields and are undervalued by the market relative to their long-term earnings potential. The Adviser intends to gain exposure to high-yield debt securities through investment in the AB High Income Fund and may, in the future, gain such exposure through direct investments in high-income securities. It is expected that the Fund will pursue a number of generally derivatives-based alternative investment strategies, such as taking long positions in currency derivatives on higher-yielding currencies and/or short positions in currency derivatives on lower-yielding currencies.

The Adviser adjusts the Fund's investment exposure utilizing the Adviser's Dynamic Asset Allocation ("DAA") approach. DAA comprises a series of analytical and forecasting tools employed by the Adviser to gauge fluctuations in the risk/return profile of various asset classes. DAA seeks to adjust the Fund's investment exposure in changing market conditions and thereby reduce overall portfolio volatility by mitigating the effects of market fluctuations, while preserving consistent long-term return potential. For example, the Adviser may seek to reduce the Fund's risk exposure to one or more asset classes when DAA suggests that market risks relevant to those asset classes are rising but return opportunities are declining. In addition to directly increasing or decreasing asset class exposure by buying or selling securities in that asset class, the Adviser may pursue DAA implementation for the Fund by investing in derivatives and exchange-traded funds ("ETFs").

The Adviser intends to utilize a variety of derivatives in its management of the Fund. The Adviser may use derivatives to gain exposure to an asset class, such as using interest rate derivatives to gain exposure to sovereign bonds. As noted above, the Adviser may separately pursue certain alternative investment strategies that utilize derivatives, and may enter into derivatives in making the adjustments called for by DAA. As a result of the use of derivatives and short sales of securities, the Fund may be leveraged, with net investment exposure in excess of its net assets.

Currency exchange rate fluctuations can have a dramatic impact on returns. The Fund's foreign currency exposures will come both from investments in equity and debt securities priced or denominated in foreign currencies and from direct holdings of foreign currencies and currency-related derivatives. The Adviser may seek to hedge all or a portion of the currency exposure resulting from Fund investments or decide not to hedge this exposure. The Adviser may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives.

PRINCIPAL RISKS

- **Credit Risk:** An issuer or guarantor of a fixed-income security, or the counterparty to a derivatives or other contract, may be unable or unwilling to make timely payments of interest or principal, or to otherwise honor its obligations. The issuer or guarantor may default, causing a loss of the full principal amount of a security and accrued interest. The degree of risk for a particular security may be reflected in its credit rating. There is the possibility that the credit rating of a fixed-income security may be downgraded after purchase, which may adversely affect the value of the security. Investments in fixed-income securities with lower ratings tend to have a higher probability that an issuer will default or fail to meet its payment obligations.
- **High Yield Debt Securities Risk:** Investments in fixed-income securities with lower ratings (commonly known as “junk bonds”) tend to have a higher probability that an issuer will default or fail to meet its payment obligations. These securities may be subject to greater price volatility due to such factors as specific corporate developments, interest rate sensitivity, negative perceptions of the junk bond market generally and less secondary market liquidity.
- **Interest Rate Risk:** Changes in interest rates will affect the value of investments in fixed-income securities. When interest rates rise, the value of existing investments in fixed-income securities tends to fall and this decrease in value may not be offset by higher income from new investments. Interest rate risk is generally greater for fixed-income securities with longer maturities or durations. Very low or negative interest rates would likely magnify the risks associated with changes in interest rates. During periods of very low or negative rates, the Fund’s returns would likely be adversely affected.
- **Inflation Risk:** This is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund’s assets can decline as can the value of the Fund’s distributions. This risk is significantly greater for fixed-income securities with longer maturities.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors.
- **Emerging Market Risk:** Investments in emerging market countries may have more risk because the markets are less developed and less liquid as well as being subject to increased economic, political, regulatory or other uncertainties.
- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund’s investments or reduce its returns.
- **Derivatives Risk:** Derivatives may be difficult to price or unwind and leveraged so that small changes may produce disproportionate losses for the Fund. Derivatives, especially over-the-counter derivatives, are also subject to counterparty risk to a greater degree than more traditional investments.
- **Short Sale Risk:** Short sales involve the risk that the Fund will incur a loss by subsequently buying a security at a higher price than the price at which it sold the security. The amount of such loss is theoretically unlimited, as it will be based on the increase in value of the security sold short. In contrast, the risk of loss from a long position is limited to the Fund’s investment in the security, because the price of the security cannot fall below zero. The Fund may not always be able to close out a short position on favorable terms.
- **Leverage Risk:** To the extent the Fund uses leveraging techniques, its net asset value, or NAV, may be more volatile because leverage tends to exaggerate the effect of changes in interest rates and any increase or decrease in the value of the Fund’s investments.
- **Market Risk:** The value of the Fund’s assets will fluctuate as the stock or bond market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market.
- **Illiquid Investments Risk:** Illiquid investments risk exists when certain investments are or become difficult to purchase or sell. Difficulty in selling such investments may result in sales at disadvantageous prices affecting the value of your investment in the Fund. Causes of illiquid investments risk may include low trading volumes and large positions. Foreign fixed-income securities may have more illiquid investments risk because secondary trading markets for these securities may be smaller and less well-developed and the securities may trade less frequently. Illiquid investments risk may be higher in a rising interest rate environment, when the value and liquidity of fixed-income securities generally go down.
- **Investment in Other Investment Companies Risk:** As with other investments, investments in other investment companies are subject to market and selection risk. In addition, shareholders of the Fund bear both their proportionate share of expenses in the Fund (including management fees) and, indirectly, the expenses of the investment companies in which the Fund invests (to the extent these expenses are not waived or reimbursed by the Adviser).
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its tech-

niques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over the life of the Fund; and
- how the Fund's average annual returns for one year, five years and since inception compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 9.83%, 2nd quarter, 2020; and Worst Quarter was down -22.67%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	5 Years	Since Inception**
Class A*	Return Before Taxes	-7.74%	4.26%	3.48%
	Return After Taxes on Distributions	-9.21%	2.32%	1.59%
	Return After Taxes on Distributions and Sale of Fund Shares	-4.55%	2.58%	2.00%

Advisor Class	Return Before Taxes	-3.47%	5.43%	4.48%
MSCI ACWI (net) (reflects no deduction for fees, expenses or taxes)		16.25%	12.26%	9.69%
Bloomberg Barclays Global Aggregate Bond Index (USD Hedged)*** (reflects no deduction for fees, expenses or taxes)		5.58%	4.49%	3.94%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** Inception date for all Classes is 12/18/14.

*** The information for the Bloomberg Barclays Global Aggregate Bond Index (USD Hedged) is presented to show how the Fund's performance compares with the returns of an index of securities that reflect market sectors in which the Fund invests.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
Morgan C. Harting	Since 2015	Senior Vice President of the Adviser
Daniel J. Loewy	Since 2014	Senior Vice President of the Adviser
Karen Watkin	Since February 2021	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 of this Prospectus.

AB All China Equity Portfolio

INVESTMENT OBJECTIVE

The Fund's investment objective is to seek long-term growth of capital.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge reductions if you and members of your family invest, or agree to invest in the future, at least \$100,000 in AB Mutual Funds. More information about these and other discounts is available from your financial intermediary and in Investing in the Funds—Sales Charge Reduction Programs for Class A Shares on page 69 of this Prospectus, in Appendix B—Financial Intermediary Waivers of this Prospectus and in Purchase of Shares—Sales Charge Reduction Programs for Class A Shares on page 131 of the Fund's Statement of Additional Information ("SAI").

You may be required to pay commissions and/or other forms of compensation to a broker for transactions in Advisor Class shares, which are not reflected in the tables or the examples below.

Shareholder Fees (fees paid directly from your investment)

	Class A Shares	Advisor Class Shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.25%	None
Maximum Deferred Sales Charge (Load) (as a percentage of offering price or redemption proceeds, whichever is lower)	None(a)	None
Exchange Fee	None	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class A	Advisor Class
Management Fees	.95%	.95%
Distribution and/or Service (12b-1) Fees	.25%	None
Other Expenses:		
Transfer Agent	.02%	.02%
Other Expenses	.34%	.34%
Total Other Expenses	.36%	.36%
Total Annual Fund Operating Expenses	1.56%	1.31%
Fee Waiver and/or Expense Reimbursement(b)	(.06)%	(.06)%
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	1.50%	1.25%

(a) Purchases of Class A shares in amounts of \$1,000,000 or more, or by certain group retirement plans, may be subject to a 1%, 1-year contingent deferred sales charge, or CDSC, which may be subject to waiver in certain circumstances.

(b) The Adviser has contractually agreed to waive its management fee and/or to bear certain expenses of the Fund until February 28, 2022 to the extent necessary to prevent total Fund operating expenses (excluding acquired fund fees and expenses other than the advisory fees of any AB Mutual Funds in which the Fund may invest, interest expense, taxes, extraordinary expenses, and brokerage commissions and other transaction costs), on an annualized basis, from exceeding 1.50% and 1.25% of average daily net assets, respectively, for Class A and Advisor Class shares ("expense limitations"). Any fees waived and expenses borne by the Adviser may be reimbursed by the Fund until the end of the third fiscal year after the fiscal period in which the fee was waived or the expense was borne, provided that no reimbursement payment will be made that would cause the Fund's covered operating expenses to exceed the applicable expense limitations. In connection with the Fund's investments in AB Government Money Market Portfolio (the "Money Market Portfolio") (except for the investment of any cash collateral from securities lending), the Adviser has contractually agreed to waive its management fee from the Fund and/or reimburse other expenses of the Fund in an amount equal to the Fund's pro rata share of the Money Market Portfolio's effective management fee. Each of the agreements will remain in effect until February 28, 2022 and may only be terminated or changed with the consent of the Fund's Board of Directors. In addition, each of the agreements will be automatically extended for one-year terms unless the Adviser provides notice of termination to the Fund at least 60 days prior to the end of the period.

Examples

The Examples are intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Examples assume that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of the periods. The Examples also assume that your investment has a 5% return each year, that the Fund's operating expenses stay the same and that any fee waiver and/or expense limitation is in effect for only the first year. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	Class A	Advisor Class
After 1 Year	\$ 571	\$ 127
After 3 Years	\$ 891	\$ 409
After 5 Years	\$1,233	\$ 712
After 10 Years	\$2,198	\$1,574

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys or sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when shares are held in a taxable account. These transaction costs, which are not reflected in the Annual Fund Operating Expenses or in the Examples, affect the Fund's performance. During the most recent fiscal period, the Fund's portfolio turnover rate was 74% of the average value of its portfolio.

PRINCIPAL STRATEGIES

The Adviser seeks to achieve the Fund's investment objective by investing, under normal circumstances, at least 80% of the Fund's net assets in a portfolio of equity securities of companies economically tied to the People's Republic of China ("China") (including Hong Kong). A company is considered to be economically tied to China if it: (i) is domiciled or organized in China; (ii) has securities that are traded principally in China; or (iii) conducts a substantial part of its economic activities in China. Equity securities may include common stocks, preferred stocks, the equity securities of real estate investment trusts, or REITs, depositary receipts and derivative instruments related to equity securities. The Adviser expects to invest Fund assets both in shares of companies that trade on the Shanghai Stock Exchange or the Shenzhen Stock Exchange ("China A shares") and shares of companies economically tied to China that trade in Hong Kong or outside of China.

The Adviser believes that, over time, securities that are undervalued by the market relative to their long-term earnings power can provide high returns. The Adviser utilizes fundamental analysis and its quantitative models to attempt to identify these securities for investment by the Fund, attempting to balance factors relating to valuation, company quality and investor sentiment, and will seek to build a portfolio that delivers attractive risk-adjusted returns.

The Adviser may, but frequently will not, hedge the foreign currency exposure resulting from the Fund's security positions through the use of currency-related derivatives. The Fund is "non-diversified".

PRINCIPAL RISKS

- **Market Risk:** The value of the Fund's assets will fluctuate as the stock market fluctuates. The value of its investments may decline, sometimes rapidly and unpredictably, simply because of economic changes or other events, including public health crises (including the occurrence of a contagious disease or illness), that affect large portions of the market. It includes the risk that a particular style of investing, such as the Fund's value approach, may underperform the market generally.
- **Foreign (Non-U.S.) Risk:** Investments in securities of non-U.S. issuers may involve more risk than those of U.S. issuers. These securities may fluctuate more widely in price and may be more difficult to trade due to adverse market, economic, political, regulatory or other factors. Investments in emerging market countries such as China may involve more risk than investments in developed countries because the markets in emerging market countries are less developed and less liquid and are subject to increased economic, political, regulatory, or other uncertainties. In addition, the value of the Fund's investments may decline because of factors such as unfavorable or unsuccessful government actions and reduction in government or central bank support.
- **China/Single Country Risk:** Investments in issuers located in a particular country or geographic region may have more risk because of particular market factors affecting that country or region, including political instability, geopolitical risks or unpredictable economic conditions. Risks of investments in securities of companies in China include the volatility of the Chinese stock market, heavy dependence on exports, which may be affected adversely by trade barriers or disputes or may decrease, sometimes significantly, when the world economy weakens, and the continuing importance of the role of the Chinese Government, which may take actions that affect economic and market practices. While the Chinese economy has grown at a rapid rate in recent years, the rate of growth has been declining, and there can be no assurance that China's economy will continue to grow in the future. Investments in China A shares are subject to quotas that may restrict daily trading and to additional risks that could affect liquidity compared to investments in companies in developed markets. Risks of investments in companies based in

Hong Kong include heavy reliance on the U.S. economy and regional economies, particularly the Chinese economy, which makes these investments vulnerable to changes in these economies.

- **Currency Risk:** Fluctuations in currency exchange rates may negatively affect the value of the Fund's investments in equity securities denominated in foreign currencies or reduce the Fund's returns. Emerging market currencies may be more volatile and less liquid, and subject to significantly greater risk of currency controls and convertibility restrictions, than currencies of developed countries.
- **Depository Receipts Risk:** Investing in depository receipts involves risks that are similar to the risks of direct investments in foreign securities. For example, investing in depository receipts may involve risks relating to political, economic or regulatory conditions in foreign countries. In addition, the issuers of the securities underlying certain depository receipts are under no obligation to distribute shareholder communications or pass through any voting rights with respect to the deposited securities to the holders of such receipts.
- **Illiquid Investments Risk:** Illiquid investments risk exists when certain investments are or become difficult to purchase or sell. Difficulty in selling such investments may result in sales at disadvantageous prices affecting the value of your investment in the Fund. Causes of illiquid investments risk may include low trading volumes and large positions. Foreign fixed-income securities may have more illiquid investments risk because secondary trading markets for these securities may be smaller and less well-developed and the securities may trade less frequently. Illiquid investments risk may be higher in a rising interest rate environment, when the value and liquidity of fixed-income securities generally go down.
- **Non-Diversification Risk:** The Fund may have more risk because it is "non-diversified", meaning that it can invest more of its assets in a smaller number of issuers. Accordingly, changes in the value of a single security may have a more significant effect, either negative or positive, on the Fund's net asset value, or NAV.
- **Industry/Sector Risk:** Investments in a particular industry or group of related industries may have more risk because market or economic factors affecting that industry could have a significant effect on the value of the Fund's investments.
- **Management Risk:** The Fund is subject to management risk because it is an actively-managed investment fund. The Adviser will apply its investment techniques and risk analyses in making investment decisions, but there is no guarantee that its techniques will produce the intended results. Some of these techniques may incorporate, or rely upon, quantitative models, but there is no guarantee that these models will generate accurate forecasts, reduce risk or otherwise perform as expected.

As with all investments, you may lose money by investing in the Fund.

BAR CHART AND PERFORMANCE INFORMATION

The bar chart and performance information provide an indication of the historical risk of an investment in the Fund by showing:

- how the Fund's performance changed from year to year over the life of the Fund; and
- how the Fund's average annual returns for one year and since inception compare to those of a broad-based securities market index.

You may obtain updated performance information on the Fund's website at www.abfunds.com (click on "Investments—Mutual Funds").

The Fund's past performance before and after taxes, of course, does not necessarily indicate how it will perform in the future.

Bar Chart

The annual returns in the bar chart are for the Fund's Class A shares and do not reflect sales loads. If sales loads were reflected, returns would be less than those shown.

During the period shown in the bar chart, the Fund's:

Best Quarter was up 27.93%, 1st quarter, 2019; and Worst Quarter was down -11.64%, 1st quarter, 2020.

Performance Table

Average Annual Total Returns

(For the periods ended December 31, 2020)

		1 Year	Since Inception**
Class A*	Return Before Taxes	19.79%	10.95%
	Return After Taxes on Distributions	19.82%	10.85%
	Return After Taxes on Distributions and Sale of Fund Shares	11.86%	8.50%
Advisor Class	Return Before Taxes	25.39%	13.23%
MSCI China All Shares Index (reflects no deduction for fees, expenses or taxes)		33.41%	14.90%

* After-tax returns:

- Are shown for Class A shares only and will vary for the other Classes of shares because these Classes have different expense ratios;
- Are estimates based on the highest historical individual federal marginal income tax rates, and do not reflect the impact of state and local taxes; actual after-tax returns depend on an individual investor's tax situation and are likely to differ from those shown; and
- Are not relevant to investors who hold fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

** Inception date for all Classes is 7/25/18.

INVESTMENT ADVISER

AllianceBernstein L.P. is the investment adviser for the Fund.

PORTFOLIO MANAGERS

The following table lists the persons responsible for day-to-day management of the Fund's portfolio:

Employee	Length of Service	Title
John Lin	Since 2018	Senior Vice President of the Adviser
Stuart Rae	Since 2018	Senior Vice President of the Adviser

ADDITIONAL INFORMATION

For important information about the purchase and sale of Fund shares, tax information and financial intermediary compensation, please turn to ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES, page 50 of this Prospectus.

ADDITIONAL INFORMATION ABOUT PURCHASE AND SALE OF FUND SHARES, TAXES AND FINANCIAL INTERMEDIARIES

- **PURCHASE AND SALE OF FUND SHARES**

Purchase Minimums

The following table describes the initial and subsequent minimum purchase amounts for each class of shares, which are subject to waiver in certain circumstances.

	Initial	Subsequent
Class A/Class C shares, including traditional IRAs and Roth IRAs	\$2,500	\$50
Automatic Investment Program	None	\$50 If initial minimum investment is less than \$2,500, then \$200 monthly until account balance reaches \$2,500
Advisor Class shares (only available to fee-based programs or through other limited arrangements and certain commission-based brokerage arrangements)	None	None
Class A, Class R, Class K, Class I and Class Z shares are available at NAV, without an initial sales charge, to 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit-sharing and money purchase pension plans, defined benefit plans, and non-qualified deferred compensation plans and, for Class Z shares, to persons participating in certain fee-based programs sponsored by a financial intermediary, where in each case plan level or omnibus accounts are held on the books of a Fund.	None	None

You may sell (redeem) your shares each day the New York Stock Exchange (the “Exchange”) is open. You may sell your shares through your financial intermediary or by mail (AllianceBernstein Investor Services, Inc., P.O. Box 786003, San Antonio, TX 78278-6003) or telephone ((800) 221-5672).

- **TAX INFORMATION**

Each Fund may pay income dividends or make capital gains distributions, which may be subject to federal income taxes and taxable as ordinary income or capital gains, and may also be subject to state and local taxes.

- **PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES**

If you purchase shares of a Fund through a broker-dealer or other financial intermediary (such as a bank or a group retirement plan), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUNDS' STRATEGIES, RISKS AND INVESTMENTS

This section of the Prospectus provides additional information about the Funds' investment strategies, practices and related risks, including principal and non-principal strategies and risks. This Prospectus does not describe all of a Fund's investment practices; additional information about each Fund's risks and investments can be found in the Funds' SAI.

ESG Integration

The Adviser integrates environmental, social and governance ("ESG") considerations into its research and investments analysis with the goal of maximizing return and considering risk within the Fund's investment objective and strategies. Combining third-party ESG data with its own views and research, the Adviser analyzes the ESG practices of companies and issuers to identify potentially material ESG factors that can vary across companies and issuers. ESG considerations may include but are not limited to environmental impact, corporate governance and ethical business practices. ESG considerations may not be applicable to all types of instruments or investments.

Market Risk

The market value of a security may move up or down, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than the price originally paid for it, or less than it was worth at an earlier time. Market risk may affect a single issuer, industry, sector of the economy or the market as a whole. Global economies and financial markets are increasingly interconnected, which increases the probabilities that conditions in one country or region might adversely impact issuers in a different country or region. Conditions affecting the general economy, including political, social, or economic instability at the local, regional, or global level may also affect the market value of a security. Health crises, such as pandemic and epidemic diseases, as well as other incidents that interrupt the expected course of events, such as natural disasters, including fires, earthquakes and flooding, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, and the public response to or fear of such diseases or events, have had, and may in the future have, an adverse effect on a Fund's investments and net asset value and can lead to increased market volatility. For example, the diseases or events themselves or any preventative or protective actions that governments may take in respect of such diseases or events may result in periods of business disruption, inability to obtain raw materials, supplies and component parts, and reduced or disrupted operations for a Fund's portfolio companies. The occurrence and pendency of such diseases or events could adversely affect the economies and financial markets either in specific countries or worldwide.

Derivatives

Each Fund may, but is not required to, use derivatives for hedging or other risk management purposes or as part of its investment strategies. Derivatives are financial contracts whose value depends on, or is derived from, the value of an underlying asset, reference rate or index. A Fund may use derivatives to earn

income and enhance returns, to hedge or adjust the risk profile of its investments, to replace more traditional direct investments and to obtain exposure to otherwise inaccessible markets.

There are four principal types of derivatives—options, futures contracts, forwards and swaps—each of which is described below. Derivatives include listed and cleared transactions where a Fund's derivative trade counterparty is an exchange or clearinghouse and non-cleared bilateral "over-the-counter" transactions that are privately negotiated and where a Fund's derivative trade counterparty is a financial institution. Exchange-traded or cleared derivatives transactions tend to be subject to less counterparty credit risk than those that are bilateral and privately negotiated.

A Fund's use of derivatives may involve risks that are different from, or possibly greater than, the risks associated with investing directly in securities or other more traditional instruments. These risks include the risk that the value of a derivative instrument may not correlate perfectly, or at all, with the value of the assets, reference rates, or indices that they are designed to track. Other risks include: the possible absence of a liquid secondary market for a particular instrument and possible exchange-imposed price fluctuation limits, either of which may make it difficult or impossible to close out an unfavorable position; and the risk that the counterparty will not perform its obligations. Certain derivatives may have a leverage component and involve leverage risk. Adverse changes in the value or level of the underlying asset, note or index can result in a loss substantially greater than the Fund's investment (in some cases, the potential loss is unlimited).

The Funds' investments in derivatives may include, but are not limited to, the following:

- **Forward Contracts.** A forward contract is an agreement that obligates one party to buy, and the other party to sell, a specific quantity of an underlying commodity or other tangible asset for an agreed-upon price at a future date. A forward contract generally is settled by physical delivery of the commodity or tangible asset to an agreed-upon location (rather than settled by cash), or is rolled forward into a new forward contract or, in the case of a non-deliverable forward, by a cash payment at maturity. The Funds' investments in forward contracts may include the following:
 - **Forward Currency Exchange Contracts.** A Fund may purchase or sell forward currency exchange contracts for hedging purposes to minimize the risk from adverse changes in the relationship between the U.S. Dollar and other currencies or for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under "Other Derivatives and Strategies—Currency Transactions". A Fund, for example, may enter into a forward contract as a transaction hedge (to "lock in" the U.S. Dollar price of a non-U.S. Dollar security),

as a position hedge (to protect the value of securities the Fund owns that are denominated in a foreign currency against substantial changes in the value of the foreign currency) or as a cross-hedge (to protect the value of securities the Fund owns that are denominated in a foreign currency against substantial changes in the value of that foreign currency by entering into a forward contract for a different foreign currency that is expected to change in the same direction as the currency in which the securities are denominated).

- **Futures Contracts and Options on Futures Contracts.**

A futures contract is a standardized, exchange-traded agreement that obligates the buyer to buy and the seller to sell a specified quantity of an underlying asset (or settle for cash the value of a contract based on an underlying asset, rate or index) at a specific price on the contract maturity date. Options on futures contracts are options that call for the delivery of futures contracts upon exercise. A Fund may purchase or sell futures contracts and options thereon to hedge against changes in interest rates, securities (through index futures or options) or currencies. A Fund may also purchase or sell futures contracts for foreign currencies or options thereon for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under “Other Derivatives and Strategies—Currency Transactions”.

- **Options.** An option is an agreement that, for a premium payment or fee, gives the option holder (the buyer) the right but not the obligation to buy (a “call option”) or sell (a “put option”) the underlying asset (or settle for cash an amount based on an underlying asset, rate or index) at a specified price (the exercise price) during a period of time or on a specified date. Investments in options are considered speculative. A Fund may lose the premium paid for them if the price of the underlying security or other asset decreased or remained the same (in the case of a call option) or increased or remained the same (in the case of a put option). If a put or call option purchased by a Fund were permitted to expire without being sold or exercised, its premium would represent a loss to the Fund. The Funds’ investments in options may include the following:

- Options on Foreign Currencies. A Fund may invest in options on foreign currencies that are privately negotiated or traded on U.S. or foreign exchanges for hedging purposes to protect against declines in the U.S. Dollar value of foreign currency-denominated securities held by a Fund and against increases in the U.S. Dollar cost of securities to be acquired. The purchase of an option on a foreign currency may constitute an effective hedge against fluctuations in exchange rates, although if rates move adversely, a Fund may forfeit the entire amount of the premium plus related transaction costs. A Fund may also invest in options on foreign currencies for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under “Other Derivatives and Strategies—Currency Transactions”.

- Options on Securities. A Fund may purchase or write a put or call option on securities. A Fund may write covered options, which means writing an option for securities the Fund owns, and uncovered options.
- Options on Securities Indices. An option on a securities index is similar to an option on a security except that, rather than taking or making delivery of a security at a specified price, an option on a securities index gives the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the chosen index is greater than (in the case of a call) or less than (in the case of a put) the exercise price of the option.
- Options on Foreign Currencies. **AB All China Equity Portfolio** may invest in options on foreign currencies that are privately negotiated or traded on U.S. or foreign exchanges for hedging purposes to protect against declines in the U.S. Dollar value of foreign currency denominated securities held by the Fund and against increases in the U.S. Dollar cost of securities to be acquired. The purchase of an option on a foreign currency may constitute an effective hedge against fluctuations in exchange rates, although if rates move adversely, the Fund may forfeit the entire amount of the premium plus related transaction costs. The Fund may also invest in options on foreign currencies for non-hedging purposes as a means of making investments in foreign currencies, as described below under “Other Derivatives and Strategies—Currency Transactions”.
- Other Option Strategies. In an effort to earn extra income, to adjust exposure to individual securities or markets, or to protect all or a portion of its portfolio from a decline in value, sometimes within certain ranges, a Fund may use option strategies such as the concurrent purchase of a call or put option, including on individual securities, stock indices, futures contracts (including on individual securities and stock indices) or shares of exchange-traded funds (“ETFs”) at one strike price and the writing of a call or put option on the same individual security, stock index, futures contract or ETF at a higher strike price in the case of a call option or at a lower strike price in the case of a put option. The maximum profit from this strategy would result for the call options from an increase in the value of the individual security, stock index, futures contract or ETF above the higher strike price or, for the put options, from the decline in the value of the individual security, stock index, futures contract or ETF below the lower strike price. If the price of the individual security, stock index, futures contract or ETF declines in the case of the call option or increases in the case of the put option, the Fund has the risk of losing the entire amount paid for the call or put options.
- **Swap Transactions.** A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals (payment dates) based upon or calculated by reference to changes in specified prices or rates (e.g., interest rates in the case of interest rate swaps or currency exchange rates

in the case of currency swaps) for a specified amount of an underlying asset (the “notional” principal amount). Generally, as described below, the notional principal amount is used solely to calculate the payment stream, but is not exchanged. Rather, most swaps are entered into on a net basis (*i.e.*, the two payment streams are netted out, with a Fund receiving or paying, as the case may be, only the net amount of the two payments). Certain standardized swaps, including certain interest rate swaps and credit default swaps, are subject to mandatory central clearing and are required to be executed through a regulated swap execution facility. Cleared swaps are transacted through futures commission merchants (“FCMs”) that are members of central clearinghouses with the clearinghouse serving as central counterparty, similar to transactions in futures contracts. Funds post initial and variation margin to support their obligations under cleared swaps by making payments to their clearing member FCMs. Central clearing is intended to reduce counterparty credit risks and increase liquidity, but central clearing does not make swap transactions risk free. The Securities and Exchange Commission (“SEC”) may adopt similar clearing and execution requirements in respect of certain security-based swaps under its jurisdiction. Privately negotiated swap agreements are two-party contracts entered into primarily by institutional investors and are not cleared through a third party, nor are these required to be executed on a regulated swap execution facility. The Funds’ investments in swap transactions include the following:

- Interest Rate Swaps, Swaptions, Caps and Floors. Interest rate swaps involve the exchange by a Fund with another party of payments calculated by reference to specified interest rates (*e.g.*, an exchange of floating-rate payments for fixed-rate payments). Unless there is a counterparty default, the risk of loss to a Fund from interest rate swap transactions is limited to the net amount of interest payments that the Fund is contractually obligated to make. If the counterparty to an interest rate transaction defaults, the Fund’s risk of loss consists of the net amount of interest payments that the Fund is contractually entitled to receive.

An option on a swap agreement, also called a “swaption”, is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based “premium”. A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest on a contractually-based principal amount from the party selling the interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a speci-

fied index falls below a predetermined interest rate, to receive payments of interest on an agreed principal amount from the party selling the interest rate floor. It may be more difficult for a Fund to trade or close out interest rate caps and floors in comparison to other types of swaps.

The value of these transactions will fluctuate based on changes in interest rates.

Interest rate swap, swaption, cap and floor transactions may, for example, be used in an effort to preserve a return or spread on a particular investment or a portion of a Fund’s portfolio or to protect against an increase in the price of securities the Fund anticipates purchasing at a later date.

- Currency Swaps. A Fund may invest in currency swaps for hedging purposes to protect against adverse changes in exchange rates between the U.S. Dollar and other currencies or for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under “Other Derivatives and Strategies—Currency Transactions”. Currency swaps involve the exchange by a Fund with another party of a series of payments in specified currencies. Currency swaps may be bilateral and privately negotiated with the Fund expecting to achieve an acceptable degree of correlation between its portfolio investments and its currency swaps position. Currency swaps may involve the exchange of actual principal amounts of currencies by the counterparties at the initiation, and again upon the termination, of the transaction.
- Credit Default Swaps. The “buyer” in a credit default swap contract is obligated to pay the “seller” a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation. Generally, a credit event means bankruptcy, failure to pay, obligation acceleration or restructuring. A Fund may be either the buyer or seller in the transaction. If a Fund is a seller, the Fund receives a fixed rate of income throughout the term of the contract, which typically is between one month and ten years, provided that no credit event occurs. If a credit event occurs, a Fund, as seller, typically must pay the contingent payment to the buyer, which will be either (i) the “par value” (face amount) of the reference obligation, in which case the Fund will receive the reference obligation in return or (ii) an amount equal to the difference between the face amount and the current market value of the reference obligation. As a buyer, if a credit event occurs, the Fund would be the receiver of such contingent payments, either delivering the reference obligation in exchange for the full notional (face) value of a reference obligation that may have little or no value, or receiving a payment equal to the difference between the face amount and the current market value of the obligation. The current market value of the reference obligation is typically determined via an auction process sponsored

by the International Swaps and Derivatives Association, Inc. The periodic payments previously received by the Fund, coupled with the value of any reference obligation received, may be less than the full amount it pays to the buyer, resulting in a loss to the Fund. If a Fund is a buyer and no credit event occurs, the Fund will lose its periodic stream of payments over the term of the contract. However, if a credit event occurs, the buyer typically receives full notional value for a reference obligation that may have little or no value.

Credit default swaps may involve greater risks than if a Fund had invested in the reference obligation directly. Credit default swaps are subject to general market risk and credit risk, and may be illiquid.

- Total Return Swaps. A Fund may enter into total return swaps in order to take a “long” or “short” position with respect to an underlying asset. A total return swap involves commitments to pay interest in exchange for a market-linked return based on a notional amount of the underlying asset. Therefore, when a Fund enters into a total return swap, it is subject to the market price volatility of the underlying asset. To the extent that the total return of the security, group of securities or index underlying the swap exceeds or falls short of the offsetting interest obligation, a Fund will receive or make a payment to the counterparty. Total return swaps may reflect a leveraged investment and incorporate borrowing costs which are borne by the Fund. There is no guarantee that the Fund’s investment via a total return swap will deliver returns in excess of the embedded borrowing costs and, accordingly, the Fund’s performance may be less than would be achieved by a direct investment in the underlying reference asset.

• Other Derivatives and Strategies

- Commodity-Linked Derivative Instruments. The **AB Global Risk Allocation Fund** may invest in commodity-linked derivative instruments, including swaps, commodity options, futures contracts and options on futures contracts. The value of a commodity-linked derivative investment generally is based upon the price movements of a physical commodity (such as energy, mineral, or agricultural products), a commodity futures contract, a subset of commodities, a subset of commodity futures contracts or commodity index, or other economic variable based upon changes in the value of commodities or the commodities markets.

As described below under “Investments in Wholly-Owned Subsidiary”, the **AB Global Risk Allocation Fund** may gain exposure to commodity markets by investing in AllianceBernstein Global Risk Allocation (Cayman) Ltd., a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the “Subsidiary”). The Subsidiary enters into commodity-linked derivative instruments, including swaps, commodity options, futures contracts and options on futures

contracts. The Subsidiary may also invest directly in commodities.

The Internal Revenue Service (the “IRS”) has issued a revenue ruling that limits the extent to which the Fund may invest directly in commodity-linked swaps or certain other commodity-linked derivatives. The Subsidiary, on the other hand, may invest in these commodity-linked derivatives without limitation. See “Dividends, Distributions and Taxes” below for further information.

- Currency Transactions. A Fund may invest in non-U.S. Dollar-denominated securities on a currency hedged or un-hedged basis. The Adviser may actively manage the Funds’ currency exposures and may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures contracts and options on futures contracts, swaps and options. The Adviser may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by a Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Funds may also conduct currency exchange contracts on a spot basis (*i.e.*, for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).
- Synthetic Foreign Equity Securities. A Fund may invest in different types of derivatives generally referred to as synthetic foreign equity securities. These securities may include international warrants or local access products. International warrants are financial instruments issued by banks or other financial institutions, which may or may not be traded on a foreign exchange. International warrants are a form of derivative security that may give holders the right to buy or sell an underlying security or a basket of securities representing an index from or to the issuer of the warrant for a particular price or may entitle holders to receive a cash payment relating to the value of the underlying security or index, in each case upon exercise by the Fund. Local access products are similar to options in that they are exercisable by the holder for an underlying security or a cash payment based upon the value of that security, but are generally exercisable over a longer term than typical options. These types of instruments may be American style, which means that they can be exercised at any time on or before the expiration date of the international warrant, or European style, which means that they may be exercised only on the expiration date.

Other types of synthetic foreign equity securities in which a Fund may invest include covered warrants and low exercise price warrants. Covered warrants entitle the holder to purchase from the issuer, typically a financial institution, upon exercise, common stock of an interna-

tional company or receive a cash payment (generally in U.S. Dollars). The issuer of the covered warrants usually owns the underlying security or has a mechanism, such as owning equity warrants on the underlying securities, through which it can obtain the underlying securities. The cash payment is calculated according to a pre-determined formula, which is generally based on the difference between the value of the underlying security on the date of exercise and the strike price. Low exercise price warrants are warrants with an exercise price that is very low relative to the market price of the underlying instrument at the time of issue (e.g., one cent or less). The buyer of a low exercise price warrant effectively pays the full value of the underlying common stock at the outset. In the case of any exercise of warrants, there may be a time delay between the time a holder of warrants gives instructions to exercise and the time the price of the common stock relating to exercise or the settlement date is determined, during which time the price of the underlying security could change significantly. In addition, the exercise or settlement date of the warrants may be affected by certain market disruption events, such as difficulties relating to the exchange of a local currency into U.S. Dollars, the imposition of capital controls by a local jurisdiction or changes in the laws relating to foreign investments. These events could lead to a change in the exercise date or settlement currency of the warrants, or postponement of the settlement date. In some cases, if the market disruption events continue for a certain period of time, the warrants may become worthless, resulting in a total loss of the purchase price of the warrants.

The Funds will only acquire synthetic foreign equity securities issued by entities deemed to be creditworthy by the Adviser, which will monitor the creditworthiness of the issuers on an ongoing basis. Investments in these instruments involve the risk that the issuer of the instrument may default on its obligation to deliver the underlying security or cash in lieu thereof. These instruments may also be subject to illiquid investments risk because there may be a limited secondary market for trading the warrants. They are also subject, like other investments in foreign securities, to foreign (non-U.S.) risk and currency risk.

Convertible Securities

Prior to conversion, convertible securities have the same general characteristics as non-convertible debt securities, which generally provide a stable stream of income with generally higher yields than those of equity securities of the same or similar issuers. The price of a convertible security will normally vary with changes in the price of the underlying equity security, although the higher yield tends to make the convertible security less volatile than the underlying equity security. As with debt securities, the market value of convertible securities tends to decrease as interest rates rise and increase as interest rates decline. While convertible securities generally offer lower interest or dividend yields than non-convertible debt securities of similar quality, they offer investors the potential to benefit

from increases in the market prices of the underlying common stock. Convertible debt securities that are rated Baa3 or lower by Moody's or BBB- or lower by S&P or Fitch and comparable unrated securities may share some or all of the risks of debt securities with those ratings.

Depository Receipts and Securities of Supranational Entities

A Fund may invest in depository receipts. American Depository Receipts, or ADRs, are depository receipts typically issued by a U.S. bank or trust company that evidence ownership of underlying securities issued by a foreign corporation. Global Depository Receipts, or GDRs, European Depository Receipts, or EDRs, and other types of depository receipts are typically issued by non-U.S. banks or trust companies and evidence ownership of underlying securities issued by either a U.S. or a non-U.S. company. Depository receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. In addition, the issuers of the stock underlying unsponsored depository receipts are not obligated to disclose material information in the United States. Generally, depository receipts in registered form are designed for use in the U.S. securities markets, and depository receipts in bearer form are designed for use in securities markets outside of the United States. For purposes of determining the country of issuance, investments in depository receipts of either type are deemed to be investments in the underlying securities.

Chinese Depository Receipts, or CDRs, are depository receipts traded on Chinese exchanges that evidence ownership of underlying securities of Chinese companies traded in Hong Kong or outside of China. Depending on the relative prices of a CDR and its underlying security and the Adviser's assessment of price movements in the respective markets, the Adviser may at times choose to invest **AB All China Equity Portfolio's** assets in a CDR rather than its underlying security. It is not known whether an active market for CDRs will develop, or how the value and trading activity for particular CDRs will relate to those of the underlying securities.

A supranational entity is an entity designated or supported by the national government of one or more countries to promote economic reconstruction or development. Examples of supranational entities include the World Bank (International Bank for Reconstruction and Development) and the European Investment Bank. "Semi-governmental securities" are securities issued by entities owned by either a national, state or equivalent government or are obligations of one of such government jurisdictions that are not backed by its full faith and credit and general taxing powers.

Foreign (Non-U.S.) Securities

Investing in foreign securities involves special risks and considerations not typically associated with investing in U.S. securities. The securities markets of many foreign countries are relatively small, with the majority of market capitalization and trading volume concentrated in a limited number of companies representing a small number of industries. A Fund that invests in foreign securities may experience greater price volatility and significantly lower liquidity than a portfolio invested solely in securities of U.S. companies. These markets may be subject to

greater influence by adverse events generally affecting the market, and by large investors trading significant blocks of securities, than is usual in the United States. Sanctions imposed by the U.S. or a foreign country may restrict a Fund's ability to purchase or sell foreign securities or may require a Fund to divest its holdings in foreign securities, which could adversely affect the value or liquidity of such holdings. In addition, the securities markets of some foreign countries may be closed on certain days (e.g., local holidays) when the Funds are open for business. On such days, a Fund may be unable to add to or exit its positions in foreign securities traded in such markets even though it may otherwise be attractive to do so.

Securities registration, custody, and settlement may in some instances be subject to delays and legal and administrative uncertainties. Foreign investment in the securities markets of certain foreign countries is restricted or controlled to varying degrees. These restrictions or controls may at times limit or preclude investment in certain securities and may increase the costs and expenses of a Fund. In addition, the repatriation of investment income, capital or the proceeds of sales of securities from certain of the countries is controlled under regulations, including in some cases the need for certain advance government notification or authority, and if a deterioration occurs in a country's balance of payments, the country could impose temporary restrictions on foreign capital remittances. Income from certain investments held by a Fund could be reduced by foreign income taxes, including withholding taxes.

A Fund also could be adversely affected by delays in, or a refusal to grant, any required governmental approval for repatriation, as well as by the application to it of other restrictions on investment. Investing in local markets may require a Fund to adopt special procedures or seek local governmental approvals or other actions, any of which may involve additional costs to a Fund. These factors may affect the liquidity of a Fund's investments in any country and the Adviser will monitor the effect of any such factor or factors on a Fund's investments. Transaction costs, including brokerage commissions for transactions both on and off the securities exchanges, in many foreign countries are generally higher than in the United States.

Issuers of securities in foreign jurisdictions are generally not subject to the same degree of regulation as are U.S. issuers with respect to such matters as insider trading rules, restrictions on market manipulation, shareholder proxy requirements, and timely disclosure of information. The reporting, accounting, and auditing standards of foreign countries may differ, in some cases significantly, from U.S. standards in important respects, and less information may be available to investors in foreign securities than to investors in U.S. securities. Substantially less information is publicly available about certain non-U.S. issuers than is available about most U.S. issuers.

The economies of individual foreign countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, and balance of payments position. Nationalization, expropriation or confiscatory taxation, currency blockage, political

changes, government regulation, political or social instability, public health crises (including the occurrence of a contagious disease or illness), revolutions, wars or diplomatic developments could affect adversely the economy of a foreign country. In the event of nationalization, expropriation, or other confiscation, a Fund could lose its entire investment in securities in the country involved. In addition, laws in foreign countries governing business organizations, bankruptcy and insolvency may provide less protection to security holders such as the Funds than that provided by U.S. laws.

The United Kingdom (the "U.K.") formally withdrew from the European Union (the "EU") on January 31, 2020, and was in a transition period through December 31, 2020, during which the U.K. and the EU negotiated an agreement governing their future trading and security relationships. The U.K. Parliament has ratified the agreement and the EU member states have given their support to have the agreement "provisionally applied" from January 1, 2021 through April 30, 2021. The European Parliament is expected to consider ratification of the agreement before April 30, 2021. The impact on the U.K. and European economies and the broader global economy of the uncertainties associated with ratifying and implementing the agreement are significant and could have an adverse effect on the value of a Fund's investments and its net asset value. These uncertainties include an increase in the regulatory and customs requirements imposed on cross-border trade between the U.K. and the EU, the negotiation of additional arrangements between the U.K. and the EU affecting important parts of the economy (such as financial services) that are not covered by the agreement, volatility and illiquidity in markets, currency fluctuations, the renegotiation of other existing trading and cross-border cooperation arrangements (whether economic, tax, fiscal, legal, regulatory or otherwise) of the U.K. and the EU, and potentially lower growth for companies in the U.K., Europe and globally.

Investments in securities of companies in emerging markets involve special risks. There are approximately 100 countries identified by the World Bank as Low Income, Lower Middle Income and Upper Middle Income countries that are generally regarded as emerging markets. Emerging market countries that the Adviser currently considers for investment include:

Argentina	Hungary	Philippines
Bangladesh	India	Poland
Belarus	Indonesia	Qatar
Belize	Iraq	Russia
Brazil	Ivory Coast	Saudi Arabia
Bulgaria	Jamaica	Senegal
Chile	Jordan	Serbia
China	Kazakhstan	South Africa
Colombia	Kenya	South Korea
Croatia	Lebanon	Sri Lanka
Czech Republic	Lithuania	Taiwan
Dominican Republic	Malaysia	Thailand
Ecuador	Mexico	Turkey
Egypt	Mongolia	Ukraine
El Salvador	Nigeria	United Arab Emirates
Gabon	Pakistan	Uruguay
Georgia	Panama	Venezuela
Ghana	Peru	Vietnam
Greece		

Countries may be added to or removed from this list at any time.

Investing in emerging market securities imposes risks different from, and greater than, risks of investing in domestic securities or in securities of issuers domiciled in developed, foreign countries. These risks include: smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible repatriation of investment income and capital. In addition, foreign investors may be required to register the proceeds of sales and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. Dollar, and devaluation may occur subsequent to investments in these currencies by a Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging market securities may include: greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in the nature and quality of financial information, including (i) auditing and financial reporting standards, which may result in unavailability or unreliability of material information about issuers and (ii) the risk that the Public Company Accounting Oversight Board (“PCAOB”) may not be able to inspect audit practices and work conducted by PCAOB-registered audit firms in emerging market countries – such as China – and thus there can be no assurance that the quality of financial reporting or the audits conducted by such audit firms of U.S.-listed emerging market companies meet PCAOB standards; less developed legal systems with fewer security holder rights and practical remedies to pursue claims, including class actions or fraud claims; and the limited ability of U.S. authorities to bring and enforce actions against non-U.S. companies and non-U.S. persons. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may cause a Fund to miss attractive investment opportunities, hold a portion of its assets in cash pending investment, or be delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security.

Frontier market countries generally have smaller, less diverse economies and even less developed capital markets and legal, regulatory, and political systems than traditional emerging markets. As a result, the risks of investing in emerging market countries are magnified in frontier market countries. Frontier market risks include the potential for extreme price volatility and illiquidity—economic or political instability may cause

larger price changes in frontier market securities than in securities of issuers located in more developed markets. The risks of investing in frontier market countries may also be magnified by: government ownership or control of parts of the private sector and of certain companies; trade barriers, exchange controls, managed adjustments in relative currency values, impaired or limited access to issuer information and other protectionist measures imposed or negotiated by the countries with which frontier market countries trade; and the relatively new and unsettled securities laws in many frontier market countries. The actions of a relatively few major investors in these markets are more likely to result in significant changes in local stock prices and the value of fund shares. The risk also exists that an emergency situation may arise in one or more frontier market countries as a result of which trading of securities may cease or may be substantially curtailed and prices for investments in such markets may not be readily available. All of these factors can make investing in frontier markets riskier than investing in more developed emerging markets or other foreign markets.

*Investments in China (applicable to **AB All China Equity Portfolio**).* Risks of investments in securities of companies in China include the volatility of the Chinese stock market, heavy dependence on exports, which may decrease, sometimes significantly, when the world economy weakens, and the continuing importance of the role of the Chinese Government, which may take actions that affect economic and market practices. While the Chinese economy has grown at a rapid rate in recent years, the rate of growth has generally been declining, and there can be no assurance that China’s economy will continue to grow in the future. In addition, trade disputes between China and its trading counterparties, including the United States, have arisen and may continue to arise. Such disputes have resulted in trade tariffs and may potentially result in future trade tariffs, as well as embargoes, trade limitations, trade wars and other negative consequences. These consequences could trigger, among other things, a substantial reduction in international trade and adverse effects on, and potential failure of, individual companies and/or large segments of China’s export industry, which could have potentially significant negative effects on the Chinese economy as well as the global economy. Sanctions imposed by the U.S. and other regulatory authorities on the Chinese Government or Chinese companies may impact the Chinese economy and Chinese issuers of securities in which the Fund invests and limit or preclude the Fund’s investments in securities of certain companies. Risks of investments in companies based in Hong Kong, a special administrative region of China, include heavy reliance on the U.S. economy and regional economies, particularly the Chinese economy, which makes these investments vulnerable to changes in these economies. These and related factors may result in adverse effects on investments in China and Hong Kong and have a negative impact on **AB All China Equity Portfolio**’s performance.

China A shares are shares of companies incorporated in China and listed on the Shanghai Stock Exchange (“SSE”) or the Shenzhen Stock Exchange (“SZSE”). **AB All China Equity**

Portfolio may invest in China A shares of certain Chinese companies listed and traded through the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect programs (“Stock Connect”). Stock Connect is a securities trading and clearing program established by Hong Kong Exchanges and Clearing Limited, the SSE, the SZSE and China Securities Depository and Clearing Corporation Limited, which seeks to provide mutual stock market access between Mainland China and Hong Kong.

Trading through Stock Connect is subject to a number of restrictions and risks that could impair **AB All China Equity Portfolio’s** ability to invest in or sell China A shares and affect investment returns, including quotas that limit aggregate daily net purchases on an exchange on a particular day; the possible imposition of trading suspensions; differences in trading days between China and Stock Connect; Chinese securities regulations and stock exchange listing rules; uncertainties in China’s tax rules related to the taxation of income and gains from investments in China A shares; and clearance and settlement procedures associated with Stock Connect, a relatively new program.

Foreign (Non-U.S.) Currencies

Investing in and exposure to foreign currencies involve special risks and considerations. A Fund will be adversely affected by reductions in the value of those currencies relative to the U.S. Dollar. Foreign currency exchange rates may fluctuate significantly. They are determined by supply and demand in the foreign exchange markets, the relative merits of investments in different countries, actual or perceived changes in interest rates, and other complex factors. Currency exchange rates also can be affected unpredictably by intervention (or the failure to intervene) by U.S. or foreign governments or central banks or by currency controls or political developments. In light of these risks, a Fund may engage in certain currency hedging transactions, as described above, which involve certain special risks.

A Fund may also invest directly in foreign currencies for non-hedging purposes on a spot basis (*i.e.*, cash) or through derivative transactions, such as forward currency exchange contracts, futures contracts and options thereon, swaps and options as described above. These investments will be subject to the same risks. In addition, currency exchange rates may fluctuate significantly over short periods of time, causing a Fund’s NAV to fluctuate.

Forward Commitments

Forward commitments for the purchase or sale of securities may include purchases on a when-issued basis or purchases or sales on a delayed delivery basis. In some cases, a forward commitment may be conditioned upon the occurrence of a subsequent event, such as approval and consummation of a merger, corporate reorganization or debt restructuring or approval of a proposed financing by appropriate authorities (*i.e.*, a “when, as and if issued” trade).

A Fund may invest in TBA—mortgaged-backed securities. A TBA, or “To Be Announced”, trade represents a contract for

the purchase or sale of mortgage-backed securities to be delivered at a future agreed-upon date; however, the specific mortgage pool numbers or the number of pools that will be delivered to fulfill the trade obligation or terms of the contract are unknown at the time of the trade. Mortgage pools (including fixed-rate or variable-rate mortgages) guaranteed by the Government National Mortgage Association, or GNMA, the Federal National Mortgage Association, or FNMA, or the Federal Home Loan Mortgage Corporation, or FHLMC, are subsequently allocated to the TBA transactions.

When forward commitments with respect to fixed-income securities are negotiated, the price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but payment for and delivery of the securities take place at a later date. Securities purchased or sold under a forward commitment are subject to market fluctuation and no interest or dividends accrue to the purchaser prior to the settlement date. There is the risk of loss if the value of either a purchased security declines before the settlement date or the security sold increases before the settlement date. The use of forward commitments helps a Fund to protect against anticipated changes in interest rates and prices.

Equity-Linked Debt Securities

Equity-linked debt securities are securities on which the issuer is obligated to pay interest and/or principal that is linked to the performance of a specified index of equity securities. The interest or principal payments may be significantly greater or less than payment obligations for other types of debt securities. Adverse changes in equity securities indices and other adverse changes in the securities markets may reduce payments made under, and/or the principal of, equity-linked debt securities held by a Fund. As with any debt securities, the values of equity-linked debt securities will generally vary inversely with changes in interest rates. A Fund’s ability to dispose of equity-linked debt securities will depend on the availability of liquid markets for such securities. Investments in equity-linked debt securities may be considered to be speculative.

Illiquid Securities

Each Fund limits its investments in illiquid securities to 15% of its net assets. Under Rule 22e-4 under the Investment Company Act of 1940, as amended (the “1940 Act”), the term “illiquid securities” means any security or investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

A Fund that invests in illiquid securities may not be able to sell such securities and may not be able to realize their full value upon sale. Restricted securities (securities subject to legal or contractual restrictions on resale) may be illiquid. Some restricted securities (such as securities issued pursuant to Rule 144A under the Securities Act of 1933 (“Rule 144A Securities”) or certain commercial paper) may be more difficult to trade than other types of securities.

Inflation-Indexed Securities

Inflation-indexed securities are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation. If the index measuring inflation falls, the principal value of these securities will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced.

The value of inflation-indexed securities tends to react to change in response to changes in real interest rates. In general, the price of these securities can fall when real interest rates rise, and can rise when real interest rates fall. In addition, the value of these securities can fluctuate based on fluctuations in expectations of inflation. Interest payments on inflation-indexed securities can be unpredictable and will vary as the principal and/or interest is adjusted for inflation.

Treasury Inflation Protected Securities, or TIPS, which are issued by the U.S. Treasury, use the Consumer Price Index for Urban Consumers, or the CPI, as the inflation measure. The principal of a TIPS increases with inflation and decreases with deflation, as measured by the CPI. When a TIPS matures, the holder is paid the adjusted principal or original principal, whichever is greater. TIPS pay interest twice a year, at a fixed rate, which is determined by auction at the time the TIPS are issued. The rate is applied to the adjusted principal; so, like the principal, interest payments rise with inflation and fall with deflation. TIPS are issued in terms of 5, 10, and 30 years.

Investment in Exchange-Traded Funds and Other Investment Companies

A Fund may invest, sometimes significantly, in shares of ETFs, subject to the restrictions and limitations of the 1940 Act, or any applicable rules, exemptive orders or regulatory guidance thereunder. ETFs are pooled investment vehicles that seek to track the performance of a specific index or implement actively-managed investment strategies. Index ETFs will not track their underlying indices precisely since the ETFs have expenses and may need to hold a portion of their assets in cash, unlike the underlying indices, and the ETFs may not invest in all of the securities in the underlying indices in the same proportion as the indices for varying reasons. A Fund will incur transaction costs when buying and selling ETF shares, and indirectly bear the expenses of the ETFs. In addition, the market value of an ETF's shares, which is based on supply and demand in the market for the ETF's shares, may differ from its NAV. Accordingly, there may be times when an ETF's shares trade at a discount or premium to its NAV.

A Fund may also invest in investment companies other than ETFs, as permitted by the 1940 Act or the rules and regulations or exemptive orders thereunder. As with ETF investments, if the Fund acquires shares in other investment companies, shareholders would bear, indirectly, the expenses of such investment companies (which may include management and advisory fees), which to the extent not waived or reimbursed, would be in addition to the Fund's expenses. The Funds intend to invest uninvested cash balances in an affiliated money market fund as permitted by Rule 12d1-1 under the 1940 Act. A Fund's investment in other investment companies, including

ETFs, subjects the Fund indirectly to the underlying risks of those investment companies.

AB All Market Income Portfolio has invested in another AB Mutual Fund, the AB High Income Fund, and expects to continue to do so for some time. A brief description of the AB High Income Fund follows. Additional details are available in the AB High Income Fund's prospectus and SAI. You may request a free copy of the prospectus and/or SAI of the AB High Income Fund by contacting the Adviser:

By Mail:	c/o AllianceBernstein Investor Services, Inc. P.O. Box 786003 San Antonio, TX 78278-6003
By Phone:	For Information: (800) 221-5672 For Literature: (800) 227-4618

The **AB High Income Fund** has an investment objective of seeking to maximize total returns from price appreciation and income. The Fund pursues income opportunities from government, corporate, emerging market and high yield sources. The Adviser selects securities for purchase or sale by the Fund based on its assessment of the securities' risk and return characteristics as well as the securities' impact on the overall risk and return characteristics of the Fund. The Fund may invest in debt securities with a range of maturities from short- to long-term. Substantially all of the Fund's assets may be invested in lower-rated debt securities and unrated securities of equivalent investment quality.

Investments in Pre-IPO Securities

A Fund may invest in pre-IPO (initial public offering) securities. Pre-IPO securities, or venture capital investments, are investments in new and early stage companies, often funded by venture capital and referred to as "venture capital companies", whose securities have not been offered to the public and that are not publicly traded. These investments may present significant opportunities for capital appreciation but involve a high degree of risk that may result in significant decreases in the value of these investments. Venture capital companies may not have established products, experienced management or earnings history. A Fund may not be able to sell such investments when the portfolio managers and/or investment personnel deem it appropriate to do so because they are not publicly traded. As such, these investments are generally considered to be illiquid until a company's public offering (which may never occur) and are often subject to additional contractual restrictions on resale following any public offering that may prevent a Fund from selling its shares of these companies for a period of time. Market conditions, developments within a company, investor perception or regulatory decisions may adversely affect a venture capital company and delay or prevent a venture capital company from ultimately offering its securities to the public.

Investments in Wholly-Owned Subsidiary

Investments in the Subsidiary are expected to provide the **AB Global Risk Allocation Fund** with exposure to the commodity markets within the limitations of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended (the

“Code”) and recent IRS revenue rulings. Federal tax requirements limit the extent to which the Fund may invest directly in commodities and commodity-linked derivatives. The Subsidiary, on the other hand, may invest in these instruments without limitations. See “Dividends, Distributions and Taxes” below for further information.

The Subsidiary enters into commodity-linked derivative instruments, including swaps, commodity options, futures contracts and options on futures contracts. Although the **AB Global Risk Allocation Fund** may enter into these commodity-linked derivative instruments directly, the Fund will likely gain exposure to these derivative instruments indirectly by investing in the Subsidiary. The Subsidiary will also invest in inflation-indexed securities and other fixed-income instruments, which are intended to serve as margin or collateral for the Subsidiary’s derivatives position. To the extent that the Fund invests in the Subsidiary, it may be subject to the risks associated with those derivative instruments and other securities, which are discussed elsewhere in this Prospectus.

While the Subsidiary may be considered similar to an investment company, it is not registered under the 1940 Act and, unless otherwise noted in this Prospectus, is not subject to all of the investor protections of the 1940 Act. The Subsidiary has the same investment objective as the Fund and is subject to the same investment policies and restrictions as the Fund, including those related to leverage and liquidity, except that the Subsidiary may invest without limitation in commodities, either directly or through commodity pools, and commodity-linked instruments. The Subsidiary will also be subject to the same valuation, brokerage, and compliance policies and procedures as the Fund. The Fund and the Subsidiary will, however, test compliance with certain restrictions on a consolidated basis. In addition, the Fund wholly owns and controls the Subsidiary and the Adviser acts as investment adviser to the Fund and the Subsidiary. The Subsidiary’s financial statements will be consolidated with the Fund’s financial statements that are included in the Fund’s annual and semi-annual reports to shareholders. Changes in the laws of the United States and/or the Cayman Islands or regulations thereunder could result in the inability of the Fund and/or the Subsidiary to operate as described in this Prospectus and the SAI and could adversely affect the Fund.

Borrowings and Leverage

The Funds may use borrowings or other leverage for investment purposes subject to its investment policies and to applicable statutory or regulatory requirements. Borrowings by a Fund result in leveraging of the Fund’s shares. Likewise, a Fund’s investments in certain derivatives may effectively leverage the Fund’s portfolio. A Fund may use leverage for investment purposes by entering into transactions such as reverse repurchase agreements, forward contracts, dollar rolls or certain derivatives. This means that the Fund uses cash made available during the term of these transactions to make investments in other securities.

Utilization of leverage, which is usually considered speculative, involves certain risks to a Fund’s shareholders. These include a higher volatility of the NAV of a Fund’s shares of common

stock and the relatively greater effect of changes in the value of the Fund’s portfolio on the NAV of the shares caused by favorable or adverse changes in market conditions or interest rates. In the case of borrowings for investment purposes, so long as a Fund is able to realize a net return on the leveraged portion of its investment portfolio that is higher than the interest expense paid on borrowings, the effect of leverage will be to cause the Fund’s shareholders to realize a higher net return than if the Fund were not leveraged. With respect to certain investments in derivatives that result in leverage of a Fund’s shares, if the Fund is able to realize a net return on its investments that is higher than the costs of the leveraged transaction, the effect of such leverage will be to cause the Fund to realize a higher net return than if the Fund were not leveraged. If the interest expense on borrowings or other costs of leverage approach the net return on a Fund’s investment portfolio or investments made through leverage, as applicable, the benefit of leverage to the Fund’s shareholders will be reduced. If the interest expense on borrowings or other costs of leverage were to exceed the net return to the Fund, the Fund’s use of leverage could result in a lower rate of net return than if the Fund were not leveraged. Similarly, the effect of leverage in a declining market could normally be a greater decrease in NAV than if the Fund were not leveraged.

LIBOR Transition and Associated Risk

A Fund may invest in debt securities, derivatives or other financial instruments that utilize the London Interbank Offered Rate, or “LIBOR,” as a “benchmark” or “reference rate” for various interest rate calculations. In July 2017, the United Kingdom Financial Conduct Authority, which regulates LIBOR, announced a desire to phase out the use of LIBOR by the end of 2021. Although widely used LIBOR rates are intended to be published until June 2023, banks are strongly encouraged to cease entering into agreements with counterparties referencing LIBOR by the end of 2021. Although financial regulators and industry working groups have suggested alternative reference rates, such as the European Interbank Offer Rate, the Sterling Overnight Interbank Average Rate and the Secured Overnight Financing Rate, global consensus on alternative rates is lacking and the process for amending existing contracts or instruments to transition away from LIBOR is underway but remains incomplete. The elimination of LIBOR or changes to other reference rates or any other changes or reforms to the determination or supervision of reference rates could have an adverse impact on the market for, or value of, any securities or payments linked to those reference rates, which may adversely affect a Fund’s performance and/or net asset value. Uncertainty and risk also remain regarding the willingness and ability of issuers and lenders to include revised provisions in new and existing contracts or instruments. Consequently, the transition away from LIBOR to other reference rates may lead to increased volatility and illiquidity in markets that are tied to LIBOR, fluctuations in values of LIBOR-related investments or investments in issuers that utilize LIBOR, increased difficulty in borrowing or refinancing and diminished effectiveness of hedging strategies, potentially adversely affecting a Fund’s performance. Furthermore, the

risks associated with the expected discontinuation of LIBOR and transition may be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. Because the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the end of 2021.

Loans of Portfolio Securities

For the purpose of achieving income, a Fund may make secured loans of portfolio securities to brokers, dealers and financial institutions (“borrowers”) to the extent permitted under the 1940 Act or the rules and regulations thereunder (as such statute, rules or regulations may be amended from time to time) or by guidance regarding interpretations of or exemptive orders under the 1940 Act. Under a Fund’s securities lending program, all securities loans will be secured continuously by cash collateral and/or non-cash collateral. Non-cash collateral will include only securities issued or guaranteed by the U.S. Government or one of its agencies or instrumentalities. The loans will be made only to borrowers deemed by the Adviser to be creditworthy, and when, in the judgment of the Adviser, the consideration that can be earned at that time from securities loans justifies the attendant risk. If a loan is collateralized by cash, the Fund will be compensated for the loan from a portion of the net return from the interest earned on the collateral after a rebate paid to the borrower (in some cases this rebate may be a “negative rebate”, or fee paid by the borrower to the Fund in connection with the loan). If the Fund receives non-cash collateral, the Fund will receive a fee from the borrower generally equal to a negotiated percentage of the market value of the loaned securities. For its services, the securities lending agent receives a fee from the Fund.

A Fund will have the right to call a loan and obtain the securities loaned at any time on notice to the borrower within the normal and customary settlement time for the securities. While the securities are on loan, the borrower is obligated to pay the Fund amounts equal to any income or other distributions from the securities. The Fund will not have the right to vote any securities during the existence of a loan, but will have the right to recall loaned securities in order to exercise voting or other ownership rights. When the Fund lends its securities, its investment performance will continue to reflect changes in the value of securities loaned.

A Fund will invest any cash collateral in shares of a money market fund approved by the Fund’s Board of Directors or Trustees (the “Board”) and expected to be managed by the Adviser. Any such investment will be at the Fund’s risk. A Fund may pay reasonable finders’, administrative, and custodial fees in connection with a loan.

Principal risks of lending portfolio securities include that the borrower will fail to return the loaned securities upon termination of the loan and that the value of the collateral will not be sufficient to replace the loaned securities.

Mortgage-Backed Securities and Associated Risks

Mortgage-backed securities may be issued by the U.S. Government or one of its sponsored entities, or may be issued by

private organizations. Interest and principal payments (including prepayments) on the mortgages underlying mortgage-backed securities are passed through to the holders of the securities. As a result of the pass-through of prepayments of principal on the underlying securities, mortgage-backed securities are often subject to more rapid prepayment of principal than their stated maturity would indicate.

Prepayments occur when the mortgagor on a mortgage prepays the remaining principal before the mortgage’s scheduled maturity date. Because the prepayment characteristics of the underlying mortgages vary, it is impossible to predict accurately the realized yield or average life of a particular issue of pass-through certificates. Prepayments are important because of their effect on the yield and price of the mortgage-backed securities. During periods of declining interest rates, prepayments can be expected to accelerate and a Fund that invests in these securities would be required to reinvest the proceeds at the lower interest rates then available. Conversely, during periods of rising interest rates, a reduction in prepayments may increase the effective maturity of the securities, subjecting them to a greater risk of decline in market value in response to rising interest rates. In addition, prepayments of mortgages underlying securities purchased at a premium could result in capital losses.

Mortgage-backed securities include mortgage pass-through certificates and multiple-class pass-through securities, such as real estate mortgage investment conduit certificates, or REMICs, pass-through certificates, collateralized mortgage obligations, or CMOs, government sponsored enterprise (“GSE”) risk-sharing bonds, and stripped mortgage-backed securities, or SMBS, and other types of mortgage-backed securities that may be available in the future.

Guaranteed Mortgage Pass-Through Securities. **AB Global Real Estate Investment Fund** may invest in guaranteed mortgage pass-through securities, which represent participation interests in pools of residential mortgage loans and are issued by U.S. governmental or private lenders and guaranteed by the U.S. Government or one of its agencies or instrumentalities, including but not limited to GNMA, FNMA and FHLMC.

Multiple-Class Pass-Through Securities and Collateralized Mortgage Obligations. Mortgage-backed securities also include CMOs and REMIC pass-through or participation certificates that may be issued by, among others, U.S. Government agencies and instrumentalities as well as private lenders. CMOs and REMICs are issued in multiple classes and the principal of and interest on the mortgage assets may be allocated among the several classes of CMOs or REMICs in various ways. Each class of CMOs or REMICs, often referred to as a “tranche”, is issued at a specific adjustable or fixed interest rate and must be fully retired no later than its final distribution date. Generally, interest is paid or accrued on all classes of CMOs or REMICs on a monthly basis. **AB Global Real Estate Investment Fund** will not invest in the lowest tranche of CMOs and REMICs.

Typically, CMOs are collateralized by GNMA or FHLMC certificates but also may be collateralized by other mortgage

assets such as whole loans or private mortgage pass-through securities. Debt service on CMOs is provided from payments of principal and interest on collateral of mortgage assets and any reinvestment income.

A REMIC is a CMO that qualifies for special tax treatment under the Code and invests in certain mortgages primarily secured by interests in real property and other permitted investments. Investors may purchase “regular” and “residual” interest shares of beneficial interest in REMIC trusts, although **AB Global Real Estate Investment Fund** does not intend to invest in residual interests.

GSE Risk-Sharing Bonds. **AB All Market Income Portfolio**, **AB Global Real Estate Investment Fund** and **AB Global Risk Allocation Fund** may each invest in mortgage-backed securities known as GSE Risk-Sharing Bonds or Credit Risk Transfer Securities (“CRTs”), which are issued by GSEs (and sometimes banks or mortgage insurers) and structured without any government or GSE guarantee in respect of borrower defaults or underlying collateral. The risks associated with an investment in CRTs differ from the risks associated with an investment in mortgage-backed securities issued by GSEs because, in CRTs, some or all of the credit risk associated with the underlying mortgage loans is transferred to the end-investor.

Participatory Notes

AB All China Equity Portfolio may enter into participatory notes (commonly known as “P-Notes”) to gain exposure to foreign securities markets or foreign securities that might otherwise be difficult or costly to access or purchase because of foreign regulatory restrictions or foreign tax laws. Securities brokerages in the country buy the securities, then issue to foreign investors P-Notes that derive their value from the underlying securities. P-Notes involve transaction costs, which may be higher than those applicable to the equity securities. Any dividends or capital gains collected from the underlying securities are passed through to the foreign investors; however, the holder of a P-Note is not entitled to the same rights (e.g., dividends, voting rights) as an owner of the underlying security. The Fund must rely on the creditworthiness of a counterparty and would have no rights against the issuer of an underlying security. Use of P-Notes involves various risks. These include the risks that the P-Notes may be illiquid and that the Fund may not be able to terminate or offset its positions at the time it wishes to do so or at a favorable price and that, as a result of the failure of a counterparty or legal or operational issues, the Fund may not receive payments required to be made to them under the terms of a P-Note.

Preferred Stock

A Fund may invest in preferred stock. Preferred stock is a class of capital stock that typically pays dividends at a specified rate. Preferred stock is generally senior to common stock but is subordinated to any debt the issuer has outstanding. Accordingly, preferred stock dividends are not paid until all debt obligations are first met. Preferred stock may be subject to more fluctuations in market value, due to changes in market participants’ perceptions of the issuer’s ability to continue to pay

dividends, than debt of the same issuer. These investments include convertible preferred stock, which includes an option for the holder to convert the preferred stock into the issuer’s common stock under certain conditions, among which may be the specification of a future date when the conversion must begin, a certain number of shares of common stock per share of preferred stock, or a certain price per share for the common stock. Convertible preferred stock tends to be more volatile than non-convertible preferred stock, because its value is related to the price of the issuer’s common stock as well as the dividends payable on the preferred stock.

Real Estate Investment Trusts (REITs)

REITs are pooled investment vehicles that invest primarily in income-producing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest and principal payments. Similar to investment companies such as the Funds, REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Code. A Fund will indirectly bear its proportionate share of expenses incurred by REITs in which the Fund invests in addition to the expenses incurred directly by the Fund.

Repurchase Agreements and Buy/Sell Back Transactions

Each Fund may enter into repurchase agreements. In a repurchase agreement transaction, the Fund buys a security and simultaneously agrees to sell it back to the counterparty at a specified price in the future. However, a repurchase agreement is economically similar to a secured loan, in that the Fund lends cash to a counterparty for a specific term, normally a day or a few days, and is given acceptable collateral (the purchased securities) to hold in case the counterparty does not repay the loan. The difference between the purchase price and the repurchase price of the securities reflects an agreed-upon “interest rate”. Given that the price at which a Fund will sell the collateral back is specified in advance, a Fund is not exposed to price movements on the collateral unless the counterparty defaults. If the counterparty defaults on its obligation to buy back the securities at the maturity date and the liquidation value of the collateral is less than the outstanding loan amount, a Fund would suffer a loss. In order to further mitigate any potential credit exposure to the counterparty, if the value of the securities falls below a specified level that is linked to the loan amount during the life of the agreement, the counterparty must provide additional collateral to support the loan.

Each Fund may enter into buy/sell back transactions, which are similar to repurchase agreements. In this type of transaction, a Fund enters a trade to buy securities at one price and simultaneously enters a trade to sell the same securities at another price on a specified date. Similar to a repurchase agreement, the repurchase price is higher than the sale price

and reflects current interest rates. Unlike a repurchase agreement, however, the buy/sell back transaction is considered two separate transactions.

Reverse Repurchase Agreements and Dollar Rolls

A reverse repurchase agreement or dollar roll involves the sale of a security by a Fund and its agreement to repurchase the instrument at a specified time and price, and may be considered a form of borrowing for some purposes. Reverse repurchase agreements are subject to a Fund's limitations on borrowings and create leverage risk for the Fund. In addition, reverse repurchase agreements involve the risk that the market value of the securities a Fund is obligated to repurchase may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement or dollar roll files for bankruptcy or becomes insolvent, a Fund's use of the proceeds of the agreement may be restricted pending a determination by the other party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities.

Rights and Warrants

Rights and warrants are option securities permitting their holders to subscribe for other securities. Rights are similar to warrants except that they have a substantially shorter duration. Rights and warrants do not carry with them dividend or voting rights with respect to the underlying securities, or any rights in the assets of the issuer. As a result, an investment in rights and warrants may be considered more speculative than certain other types of investments. In addition, the value of a right or a warrant does not necessarily change with the value of the underlying securities, and a right or a warrant ceases to have value if it is not exercised prior to its expiration date.

Short Sales

A Fund may make short sales as a part of overall portfolio management or to offset a potential decline in the value of a security. A short sale involves the sale of a security that a Fund does not own, or if the Fund owns the security, is not to be delivered upon consummation of the sale. When the Fund makes a short sale of a security that it does not own, it must borrow from a broker-dealer the security sold short and deliver the security to the broker-dealer upon conclusion of the short sale.

If the price of the security sold short increases between the time of the short sale and the time a Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a gain. Although a Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited because there is a theoretically unlimited potential for the price of a security sold short to increase.

Standby Commitment Agreements

Standby commitment agreements are similar to put options that commit a Fund, for a stated period of time, to purchase a stated amount of a security that may be issued and sold to the Fund at the option of the issuer. The price and coupon of the security are fixed at the time of the commitment. At the time of entering into the agreement, the Fund is paid a commitment fee, regardless of whether the security ultimately is issued. A

Fund will enter into such agreements only for the purpose of investing in the security underlying the commitment at a yield and price considered advantageous to the Fund and unavailable on a firm commitment basis.

There is no guarantee that a security subject to a standby commitment will be issued. In addition, the value of the security, if issued, on the delivery date may be more or less than its purchase price. Since the issuance of the security is at the option of the issuer, a Fund will bear the risk of capital loss in the event the value of the security declines and may not benefit from an appreciation in the value of the security during the commitment period if the issuer decides not to issue and sell the security to the Fund.

Structured Products

A Fund may invest in certain hybrid derivatives-type instruments that combine features of a traditional stock or bond with those of, for example, a futures contract or an option. These instruments include structured notes and indexed securities, commodity-linked notes and commodity index-linked notes and credit-linked securities. The performance of the structured product, which is generally a fixed-income security, is tied (positively or negatively) to the price or prices of an unrelated reference indicator such as a security or basket of securities, currencies, commodities, a securities or commodities index or a credit default swap or other kinds of swaps. The structured product may not pay interest or protect the principal invested. The structured product or its interest rate may be a multiple of the reference indicator and, as a result, may be leveraged and move (up or down) more rapidly than the reference indicator. Investments in structured products may provide a more efficient and less expensive means of investing in underlying securities, commodities or other derivatives, but may potentially be more volatile and carry greater trading and market risk than investments in traditional securities. The purchase of a structured product also exposes a Fund to the credit risk of the issuer of the structured product.

Structured notes are derivative debt instruments. The interest rate or principal of these notes is determined by reference to an unrelated indicator (for example, a currency, security, or index thereof) unlike a typical note where the borrower agrees to make fixed or floating interest payments and to pay a fixed sum at maturity. Indexed securities may include structured notes as well as securities other than debt securities, the interest or principal of which is determined by an unrelated indicator.

Commodity-linked notes and commodity index-linked notes provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options, commodity indices or similar instruments. Commodity-linked products may be either equity or debt securities, leveraged or unleveraged, and have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract, index or other economic variable.

A Fund may also invest in certain hybrid derivatives-type investments that combine features of a traditional bond with those of certain derivatives such as a credit default swap, an interest rate swap or other securities. These investments include credit-linked securities. The issuers of these securities frequently are limited purpose trusts or other special purpose vehicles that invest in a derivative instrument or a basket of derivative instruments in order to provide exposure to certain fixed-income markets. For instance, a Fund may invest in credit-linked securities as a cash management tool to gain exposure to a certain market or to remain fully invested when more traditional income-producing securities are not available. The performance of the structured product, which is generally a fixed-income security, is linked to the receipt of payments from the counterparties to the derivative instruments or other securities. A Fund's investments in credit-linked securities are indirectly subject to the risks associated with derivative instruments, including, among others, credit risk, default risk, counterparty risk, interest rate risk and leverage risk. These securities are generally structured as Rule 144A Securities so that they may be freely traded among institutional buyers. However, changes in the market for credit-linked securities or the availability of willing buyers may result in reduced liquidity for the securities.

Variable, Floating and Inverse Floating-Rate Instruments

AB All China Equity Portfolio may invest in variable, floating and inverse floating-rate instruments. Variable and floating-rate securities pay interest at rates that are adjusted periodically, according to a specified formula. A "variable" interest rate adjusts at predetermined intervals (e.g., daily, weekly or monthly), while a "floating" interest rate adjusts whenever a specified benchmark rate (such as the bank prime lending rate) changes.

AB All China Equity Portfolio may also invest in inverse floating-rate debt instruments ("inverse floaters"). The interest rate on an inverse floater resets in the opposite direction from the market rate of interest to which the inverse floater is indexed. An inverse floater may have greater volatility in market value, in that, during periods of rising interest rates, the market values of inverse floaters will tend to decrease more rapidly than those of fixed-rate securities.

ADDITIONAL RISKS AND OTHER CONSIDERATIONS

Investments in the Funds involve the risk considerations described below.

Real Estate Investments

Although the Funds do not invest directly in real estate, they may invest in securities of real estate companies including, in particular, **AB Global Real Estate Investment Fund**. An investment in the Fund is subject to certain risks associated with the direct ownership of real estate and with the real estate industry in general. These risks include, among others: possible declines in the value of real estate; risks related to general and local economic conditions, including increases in the rate of inflation; possible lack of availability of mortgage funds; overbuilding; extended vacancies of properties; increases in competition, property taxes and operating expenses; changes in

zoning laws; costs resulting from the clean-up of, and liability to third parties for damages resulting from, environmental problems; casualty or condemnation losses; uninsured damages from floods, fires, earthquakes or other natural disasters; limitations on and variations in rents; and changes in interest rates. In addition, real estate companies may be adversely impacted by the recent novel coronavirus (COVID-19) pandemic; the potential impacts of the pandemic on the real estate industry include, among other things, reduced demand for real estate, lower occupancy rates, decreased lease payments and increased foreclosures and defaults. To the extent that assets underlying a Fund's investments are concentrated geographically, by property type or in certain other respects, the Fund may be subject to certain of the foregoing risks to a greater extent. These risks may be greater for investments in non-U.S. real estate companies.

Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation.

Investing in REITs involves risks similar to those associated with investing in small capitalization companies. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities. Historically, small capitalization stocks, such as REITs, have had more price volatility than larger capitalization stocks.

Credit Ratings

Credit ratings of fixed-income securities measure an issuer's expected ability to pay principal and interest over time. Credit ratings are determined by ratings organizations, such as S&P, Moody's or Fitch. A lower rating means there is a greater chance that an issuer will fail to meet its payment obligation or default. The following terms are generally used to describe the credit quality of debt securities depending on the security's credit rating or, if unrated, credit quality as determined by the Funds' Adviser:

- investment grade; or
- below investment grade ("high-yield securities" or "junk bonds").

The credit rating organizations may modify their ratings of securities to show relative standing within a rating category, with the addition of numerical modifiers (1, 2 or 3) in the case of Moody's, with the addition of a plus (+) or minus (-) sign in the case of S&P and Fitch, and with the addition of "high" or "low" in the case of DBRS Morningstar. A Fund may purchase a security, regardless of any rating modification, provided the security is rated at or above the Fund's minimum rating category. For example, a Fund may purchase a security rated B1 by Moody's, or B- by S&P, provided the Fund may purchase securities rated B. Any reference to ratings by S&P or Moody's includes equivalent ratings by other rating agencies.

Investment in Below Investment-Grade Fixed-Income Securities

Investments in securities rated below investment grade (commonly known as “junk bonds”) may be subject to greater risk of loss of principal and interest than higher-rated securities. These securities are also generally considered to be subject to greater market risk than higher-rated securities. The capacity of issuers of these securities to pay interest and repay principal is more likely to weaken than is that of issuers of higher-rated securities in times of deteriorating economic conditions or rising interest rates. In addition, below investment-grade securities may be more susceptible to real or perceived adverse economic conditions than investment-grade securities.

The market for these securities may be thinner and less active than that for higher-rated securities, which can adversely affect the prices at which these securities can be sold. To the extent that there is no established secondary market for these securities, a Fund may experience difficulty in valuing such securities and, in turn, the Fund’s assets.

Investment in Smaller, Less-Seasoned Companies

Investment in smaller, less-seasoned companies involves greater risks than are customarily associated with securities of more established companies. Companies in the earlier stages of their development often have products and management personnel that have not been thoroughly tested by time or the marketplace; their financial resources may not be as substantial as those of more established companies. The securities of smaller, less-seasoned companies may have relatively limited marketability and may be subject to more abrupt or erratic market movements than securities of larger, more established companies or broad market indices. The revenue flow of such companies may be erratic and their results of operations may fluctuate widely and may also contribute to stock price volatility.

Management Risk – Quantitative Models

The Adviser may use investment techniques that incorporate, or rely upon, quantitative models. These models may not work as intended and may not enable a Fund to achieve its investment objective. In addition, certain models may be constructed using data from external providers, and these inputs may be incorrect or incomplete, thus potentially limiting the effectiveness of the models. Finally, the Adviser may change, enhance and update its models and its usage of existing models at its discretion.

Future Developments

A Fund may take advantage of other investment practices that are not currently contemplated for use by the Fund, or are not available but may yet be developed, to the extent such investment practices are consistent with the Fund’s investment objective and legally permissible for the Fund. Such investment practices, if they arise, may involve risks that exceed those involved in the activities described above.

Changes in Investment Objectives and Policies

Each Fund’s Board may change a Fund’s investment objective without shareholder approval. The Fund will provide shareholders with 60 days’ prior written notice of any change to the Fund’s investment objective. Funds that have a policy to invest at least

80% of their net assets in securities indicated by their name, such as the **AB Global Real Estate Investment Fund**, will not change their policies without 60 days’ prior written notice to shareholders. Unless otherwise noted, all other investment policies of a Fund may be changed without shareholder approval.

Temporary Defensive Position

For temporary defensive purposes in an attempt to respond to adverse market, economic, political or other conditions, each Fund may reduce its position in equity or fixed-income securities and invest in, without limit, certain types of short-term, liquid, high-grade or high-quality (depending on the Fund) debt securities. While a Fund is investing for temporary defensive purposes, it may not meet its investment objectives.

Portfolio Holdings

A description of each Fund’s policies and procedures with respect to the disclosure of each Fund’s portfolio securities is available in the Funds’ SAI.

Cyber Security Risk

As the use of the Internet and other technologies has become more prevalent in the course of business, the Funds have become more susceptible to operational and financial risks associated with cyber security. Cyber security incidents can result from deliberate attacks such as gaining unauthorized access to digital systems (*e.g.*, through “hacking” or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption, or from unintentional events, such as the inadvertent release of confidential information. Cyber security failures or breaches of a Fund or its service providers or the issuers of securities in which a Fund invests have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, the inability of Fund shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs. While measures have been developed which are designed to reduce the risks associated with cyber security, there is no guarantee that those measures will be effective, particularly since a Fund does not control the cyber security defenses or plans of its service providers, financial intermediaries and companies in which they invest or with which they do business.

Cyber security incidents, both intentional and unintentional, may allow an unauthorized party to gain access to Fund or shareholder assets, Fund or customer data (including private shareholder information), or proprietary information, or cause a Fund, the Adviser, and/or a Fund’s service providers (including, but not limited to, fund accountants, custodians, sub-custodians, transfer agents and financial intermediaries) to suffer data breaches, data corruption or lose operational functionality, or prevent Fund investors from purchasing, redeeming, or exchanging shares or receiving distributions. The Funds and the Adviser have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers. Cyber security incidents may result in financial losses to the Funds and their shareholders, and substantial costs may be incurred in order to prevent any future cyber security incidents.

INVESTING IN THE FUNDS

This section discusses how to buy, sell or redeem, or exchange different classes of shares in a Fund that are offered in this Prospectus. The Funds offer six classes of shares through this Prospectus, except for **AB Discovery Value Fund**, **AB Relative Value Fund**, **AB Core Opportunities Fund** and **AB Equity Income Fund**, which offer seven classes of shares through this Prospectus, **AB Small Cap Value Portfolio** and **AB All Market Income Portfolio**, which offer three classes of shares through this Prospectus and **AB All China Equity Portfolio** which offers two classes of shares through this Prospectus.

The NAV of each of the Funds is disclosed daily on the Fund's website or through the investor's online account information at www.abfunds.com and/or by calling (800) 221-5672.

Each share class represents an investment in the same portfolio of securities, but the classes may have different sales charges and bear different ongoing distribution expenses. For additional information on the differences between the different classes of shares and factors to consider when choosing among them, please see "The Different Share Class Expenses" and "Choosing a Share Class" below. **Only Class A shares offer Quantity Discounts on sales charges**, as described below.

HOW TO BUY SHARES

The purchase of a Fund's shares is priced at the next-determined NAV after your order is received in proper form.

Class A and Class C Shares – Shares Available to Retail Investors

You may purchase a Fund's Class A or Class C shares through financial intermediaries, such as broker-dealers or banks. You also may purchase shares directly from the Funds' principal underwriter, AllianceBernstein Investments, Inc., or ABI, if you are (i) making an initial investment and the Fund has received and accepted a completed Mutual Fund Application identifying a financial intermediary with which ABI has an agreement; (ii) an existing Fund shareholder with an account held directly with a Fund; or (iii) an employee of the Adviser or any of its affiliates. These purchases may be subject to an initial sales charge, an asset-based sales charge or CDSC as described below.

Purchase Minimums and Maximums

Minimums:*

—Initial:	\$2,500
—Subsequent:	\$ 50

* Purchase minimums may not apply to some accounts established in connection with the Automatic Investment Program and to some retirement-related investment programs. These investment minimums also do not apply to persons participating in a fee-based program or "Mutual Fund Only" brokerage program which is sponsored and maintained by a registered broker-dealer or other financial intermediary with omnibus account or "network level" account arrangements with a Fund.

Maximum Individual Purchase Amount:

—Class A shares	None
—Class C shares	\$1,000,000

Class Z Shares – Shares Available to Persons Participating in Certain Fee-Based Programs

Class Z shares are available to persons participating in certain fee-based programs sponsored and maintained by registered broker-dealers or other financial intermediaries with omnibus account arrangements with a Fund.

Other Purchase Information

Your broker or financial intermediary must receive your purchase request by the Fund Closing Time, which is the close of regular trading on any day the Exchange is open (ordinarily, 4:00 p.m., Eastern time, but sometimes earlier, as in the case of scheduled half-day trading or unscheduled suspensions of trading) and submit it to the Fund by a pre-arranged time for you to receive the next-determined NAV, less any applicable initial sales charge.

If you are an existing Fund shareholder and you have completed the appropriate section of the Mutual Fund Application, you may purchase additional shares by telephone with payment by electronic funds transfer in amounts not exceeding \$500,000. AllianceBernstein Investor Services, Inc., or ABIS, must receive and confirm telephone requests before the Fund Closing Time to receive that day's public offering price. Call (800) 221-5672 to arrange a transfer from your bank account.

Shares of the Funds are generally available for purchase in the United States, Puerto Rico, Guam, American Samoa and the U.S. Virgin Islands. Except to the extent otherwise permitted by a Fund, the Funds will only accept purchase orders directly from U.S. citizens with a U.S. address (including an APO or FPO address) or resident aliens with a U.S. address (including an APO or FPO address) and a U.S. taxpayer identification number (*i.e.*, W-9 tax status). Subject to the requirements of local law applicable to the offering of Fund shares, U.S. citizens (*i.e.*, W-9 tax status) residing in foreign countries are permitted to purchase shares of the Funds through their accounts at U.S. registered broker-dealers and other similar U.S. financial intermediaries, provided the broker-dealer or intermediary has an agreement with the Funds' distributor permitting it to accept orders for the purchase and sale of Fund shares.

The Funds will not accept purchase orders (including orders for the purchase of additional shares) from foreign persons or entities or from resident aliens who, to the knowledge of a Fund, have reverted to non-resident status (*e.g.*, a resident alien who has a non-U.S. address at time of purchase).

Tax-Deferred Accounts

Class A shares are also available to the following tax-deferred arrangements:

- Traditional and Roth IRAs (minimums listed in the table above apply);
- SEPs, SAR-SEPs, SIMPLE IRAs, and individual 403(b) plans (no investment minimum); and

- AllianceBernstein-sponsored Coverdell Education Savings Accounts (\$2,000 initial investment minimum, \$150 Automatic Investment Program monthly minimum).

Class C shares are available to AllianceBernstein Link, AllianceBernstein Individual 401(k), AllianceBernstein SIMPLE IRA plans with less than \$250,000 in plan assets and 100 employees, and to group retirement plans with plan assets of less than \$1,000,000.

Advisor Class Shares

You may purchase Advisor Class shares through your financial advisor at NAV. Advisor Class shares may be purchased and held solely:

- through accounts established under a fee-based program, sponsored and maintained by a registered broker-dealer or other financial intermediary and approved by ABI;
- through a defined contribution employee benefit plan (e.g., a 401(k) plan) that purchases shares directly without the involvement of a financial intermediary; and
- by investment advisory clients of, and certain other persons associated with, the Adviser and its affiliates or the Funds.

Advisor Class shares may also be available on brokerage platforms of firms that have agreements with ABI to offer such shares when acting solely on an agency basis for the purchase or sale of such shares. If you transact in Advisor Class shares through one of these programs, you may be required to pay a commission and/or other forms of compensation to the broker. Shares of a Fund are available in other share classes that have different fees and expenses.

The Funds' SAI has more detailed information about who may purchase and hold Advisor Class shares.

Class A, Class R, Class K, Class I and Class Z Shares – Shares Available to Group Retirement Plans

Class A, Class R, Class K, Class I and Class Z shares are available at NAV, without an initial sales charge, to 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit-sharing and money purchase pension plans, defined benefit plans, and non-qualified deferred compensation plans where plan level or omnibus accounts are held on the books of a Fund ("group retirement plans").

Class A shares are also available at NAV to the AllianceBernstein Link, AllianceBernstein Individual 401(k) and AllianceBernstein SIMPLE IRA plans but only if such plans have at least \$250,000 in plan assets or 100 employees, and to certain defined contribution retirement plans that do not have plan level or omnibus accounts on the books of a Fund.

Class R, Class K, Class I and Class Z shares generally are not available to retail non-retirement accounts, traditional and Roth IRAs, Coverdell Education Savings Accounts, SEPs, SAR-SEPs, SIMPLE IRAs and individual 403(b) plans. Class I shares are not currently available to group retirement plans in the AllianceBernstein-sponsored programs known as the "Informed Choice" programs.

Class I and Class Z shares are also available to certain institutional clients of the Adviser that invest at least \$2,000,000 in a Fund.

Required Information

A Fund is required by law to obtain, verify and record certain personal information from you or persons on your behalf in order to establish an account. Required information includes name, date of birth, physical address and taxpayer identification number (for most investors, your social security number). A Fund may also ask to see other identifying documents. If you do not provide the information, the Fund will not be able to open your account. If a Fund is unable to verify your identity, or that of another person(s) authorized to act on your behalf, or if the Fund believes it has identified potentially criminal activity, the Fund reserves the right to take action it deems appropriate or as required by law, which may include closing your account. If you are not a U.S. citizen or resident alien, your account must be affiliated with a Financial Industry Regulatory Authority, or FINRA, member firm.

A Fund is required to withhold 24% of taxable dividends, capital gains distributions, and redemptions paid to any shareholder who has not provided the Fund with his or her correct taxpayer identification number. To avoid this, you must provide your correct taxpayer identification number on your Mutual Fund Application.

General

IRA custodians, plan sponsors, plan fiduciaries, plan record-keepers, and other financial intermediaries may establish their own eligibility requirements as to the purchase, sale or exchange of Fund shares, including minimum and maximum investment requirements. A Fund is not responsible for, and has no control over, the decisions of any plan sponsor, fiduciary or other financial intermediary to impose such differing requirements.

ABI may refuse any order to purchase shares. Each Fund reserves the right to suspend the sale of its shares to the public in response to conditions in the securities markets or for other reasons.

THE DIFFERENT SHARE CLASS EXPENSES

This section describes the different expenses of investing in each class and explains factors to consider when choosing a class of shares. The expenses can include distribution and/or service (Rule 12b-1) fees, initial sales charges and/or CDSCs.

Only Class A shares offer Quantity Discounts, as described below.

Asset-Based Sales Charges or Distribution and/or Service (Rule 12b-1) Fees

WHAT IS A RULE 12b-1 FEE?

A Rule 12b-1 fee is a fee deducted from a Fund's assets that is used to pay for personal service, maintenance of shareholder accounts and distribution costs, such as advertising and compensation of financial intermediaries. Each Fund has adopted a plan under SEC Rule 12b-1 that allows the Fund to pay asset-based sales charges or distribution and/or service (Rule 12b-1) fees for the distribution and sale of its shares. The amount of each share class's Rule 12b-1 fee, if any, is disclosed below and in a Fund's fee table included in the Summary Information section above.

The amount of Rule 12b-1 and/or service fees for each class of a Fund's shares is up to:

	Distribution and/or Service (Rule 12b-1) Fee (as a Percentage of Aggregate Average Daily Net Assets)
Class A	0.25%*
Class C	1.00%
Advisor Class	None
Class R	0.50%
Class K	0.25%
Class I	None
Class Z	None

* The maximum fee allowed under the Rule 12b-1 Plan for the Class A shares of the Funds, except **AB Small Cap Value Portfolio**, **AB All Market Income Portfolio** and **AB All China Equity Portfolio**, is .30% of the aggregate average daily net assets. The Board currently limits the payments to 0.25%.

Because these fees are paid out of a Fund's assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales fees. Class C, and Class R shares are subject to higher Rule 12b-1 fees than Class A or Class K shares. Class C shares are subject to these higher fees for a period of eight years, after which they convert to Class A shares. Share classes with higher Rule 12b-1 fees will have a higher expense ratio, pay correspondingly lower dividends and may have a lower NAV (and returns). All or some of these fees are paid to financial intermediaries, which may include your financial intermediary's firm. ABI retains these fees for certain shareholder accounts, including those held directly with a Fund (with no associated financial intermediary).

Sales Charges

Class A Shares. You can purchase Class A shares at their public offering price (or cost), which is NAV plus an initial sales charge of up to 4.25% of the offering price. Any applicable sales charge will be deducted directly from your investment.

The initial sales charge you pay each time you buy Class A shares differs depending on the amount you invest and may be reduced or eliminated for larger purchases as indicated below. These discounts, which are also known as **Breakpoints** or

Quantity Discounts, can reduce or, in some cases, eliminate the initial sales charges that would otherwise apply to your investment in Class A shares.

The sales charge schedule of Class A share **Quantity Discounts** is as follows:

Amount Purchased	Initial Sales Charge	
	as % of Net Amount Invested	as % of Offering Price
Up to \$100,000	4.44%	4.25%
\$100,000 up to \$250,000	3.36	3.25
\$250,000 up to \$500,000	2.30	2.25
\$500,000 up to \$1,000,000	1.78	1.75
\$1,000,000 and above	0.00	0.00

Except as noted below, purchases of Class A shares in the amount of \$1,000,000 or more or by AllianceBernstein or non-AllianceBernstein sponsored group retirement plans are not subject to an initial sales charge, but may be subject to a 1% CDSC if redeemed or terminated within one year.

Class A share purchases not subject to sales charges.

The Funds may sell their Class A shares at NAV without an initial sales charge or CDSC to some categories of investors, including:

- persons participating in a fee-based program, sponsored and maintained by a registered broker-dealer or other financial intermediary, under which persons pay an asset-based fee for services in the nature of investment advisory or administrative services, or clients of broker-dealers or other financial intermediaries who purchase Class A shares for their own accounts through self-directed and/or non-discretionary brokerage accounts with the broker-dealers or other financial intermediaries that may or may not charge a transaction fee to its customers;
- plan participants who roll over amounts distributed from employer maintained retirement plans to AllianceBernstein-sponsored IRAs where the plan is a client of or serviced by the Adviser's Institutional Investment Management Division or Bernstein Global Wealth Management Division including subsequent contributions to those IRAs;
- certain other investors, such as investment management clients of the Adviser or its affiliates, including clients and prospective clients of the Adviser's Institutional Investment Management Division, employees of selected dealers authorized to sell a Fund's shares, and employees of the Adviser; or
- persons participating in a "Mutual Fund Only" brokerage program, sponsored and maintained by a registered broker-dealer or other financial intermediary.

The availability of certain sales charge waivers and discounts will depend on whether you purchase your shares directly from the Fund or through a financial intermediary. Intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers and

discounts or CDSC waivers. In all instances, it is the purchaser's responsibility to notify the Fund or the purchaser's financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. **For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from a Fund or through another intermediary to receive these waivers or discounts.**

Please see the Funds' SAI for more information about purchases of Class A shares without sales charges.

Certain intermediaries impose different eligibility criteria for sales load waivers and discounts, which are described in Appendix B—Financial Intermediary Waivers.

Class C Shares. You can purchase Class C shares at NAV without an initial sales charge. This means that the full amount of your purchase is invested in the Fund. Your investment is subject to a 1% CDSC if you redeem your shares within 1 year. If you exchange your shares for the Class C shares of another AB Mutual Fund, the 1% CDSC also will apply to the Class C shares received. The 1-year period for the CDSC begins with the date of your original purchase, not the date of the exchange for the other Class C shares.

Class C shares purchased for cash automatically convert to Class A shares eight years after the end of the month of your purchase. If you purchase shares by exchange for the Class C shares of another AB Mutual Fund, the conversion period runs from the date of your original purchase.

HOW IS THE CDSC CALCULATED?

The CDSC is applied to the lesser of NAV at the time of redemption or the original cost of shares being redeemed (or, as to Fund shares acquired through an exchange, the cost of the AB Mutual Fund shares originally purchased for cash). This means that no sales charge is assessed on increases in NAV above the initial purchase price. Shares obtained from dividend or distribution reinvestment are not subject to the CDSC. In determining the CDSC, it will be assumed that the redemption is, first, of any shares not subject to a CDSC and, second, of shares held the longest.

Advisor Class, Class R, Class K, Class I and Class Z Shares. These classes of shares are not subject to any initial sales charge or CDSC, although your financial advisor may charge a fee.

SALES CHARGE REDUCTION PROGRAMS FOR CLASS A SHARES

This section includes important information about sales charge reduction programs available to investors in Class A shares and describes information or records you may need to provide to a Fund or your financial intermediary in order to be eligible for sales charge reduction programs. Your financial intermediary may

have different policies and procedures regarding eligibility for sales charge reduction programs. See Appendix B—Financial Intermediary Waivers.

Information about Quantity Discounts and sales charge reduction programs also is available free of charge and in a clear and prominent format on our website at www.abfunds.com (click on "Investments—Mutual Funds", then select the Fund, then click on "Literature—Understanding Sales Charges & Expenses").

Rights of Accumulation

To determine if a new investment in Class A shares is eligible for a **Quantity Discount**, a shareholder can combine the value of the new investment in a Fund with the higher of cost or NAV of existing investments in the Fund, any other AB Mutual Fund and any AB Institutional Fund. The AB Mutual Funds use the higher of cost or current NAV of your existing investments when combining them with your new investment.

Combined Purchase Privileges

A shareholder may qualify for a **Quantity Discount** by combining purchases of shares of a Fund into a single "purchase". A "purchase" means a single purchase or concurrent purchases of shares of a Fund or any other AB Mutual Fund, including AB Institutional Funds, by:

- an individual, his or her spouse or domestic partner, or the individual's children under the age of 21 purchasing shares for his, her or their own account(s);
- a trustee or other fiduciary purchasing shares for a single trust, estate or single fiduciary account with one or more beneficiaries involved;
- the employee benefit plans of a single employer; or
- any company that has been in existence for at least six months or has a purpose other than the purchase of shares of the Fund.

Letter of Intent

An investor may not immediately invest a sufficient amount to reach a **Quantity Discount**, but may plan to make one or more additional investments over a period of time that, in the end, would qualify for a **Quantity Discount**. For these situations, the Funds offer a **Letter of Intent**, which permits new investors to express the intention, in writing, to invest at least \$100,000 in Class A shares of a Fund or any other AB Mutual Fund within 13 months. The Fund will then apply the **Quantity Discount** to each of the investor's purchases of Class A shares that would apply to the total amount stated in the **Letter of Intent**. In the event an existing investor chooses to initiate a **Letter of Intent**, the AB Mutual Funds will use the higher of cost or current NAV of the investor's existing investments and of those accounts with which investments are combined via **Combined Purchase Privileges** toward the fulfillment of the **Letter of Intent**. For example, if the combined cost of purchases totaled \$80,000 and the current NAV of all applicable accounts is \$85,000 at the time a \$100,000 **Letter of Intent** is initiated, the subsequent investment of an additional \$15,000 would fulfill the **Letter of Intent**. If an

investor fails to invest the total amount stated in the **Letter of Intent**, the Funds will retroactively collect the sales charge otherwise applicable by redeeming shares in the investor's account at their then current NAV. Investors qualifying for **Combined Purchase Privileges** may purchase shares under a single **Letter of Intent**.

Required Shareholder Information and Records

In order for shareholders to take advantage of sales charge reductions, a shareholder or his or her financial intermediary must notify the Fund that the shareholder qualifies for a reduction. Without notification, the Fund is unable to ensure that the reduction is applied to the shareholder's account. A shareholder may have to provide information or records to his or her financial intermediary or a Fund to verify eligibility for breakpoint privileges or other sales charge waivers. This may include information or records, including account statements, regarding shares of the Fund or other AB Mutual Funds held in:

- all of the shareholder's accounts at the Funds or a financial intermediary; and
- accounts of related parties of the shareholder, such as members of the same family, at any financial intermediary.

CDSC WAIVERS AND OTHER PROGRAMS

Here Are Some Ways To Avoid Or Minimize Charges On Redemption.

CDSC Waivers

The Funds will waive the CDSCs on redemptions of shares in the following circumstances, among others:

- permitted exchanges of shares;
- following the death or disability of a shareholder;
- if the redemption represents a minimum required distribution from an IRA or other retirement plan to a shareholder who has attained the age of 72; or
- if the redemption is necessary to meet a plan participant's or beneficiary's request for a distribution or loan from a group retirement plan or to accommodate a plan participant's or beneficiary's direction to reallocate his or her plan account among other investment alternatives available under a group retirement plan.

Please see the Funds' SAI for a list of additional circumstances under which a Fund will waive the CDSCs on redemptions of shares.

Your financial intermediary may have different policies and procedures regarding eligibility for CDSC Waivers. See Appendix B—Financial Intermediary Waivers.

Other Programs

Dividend Reinvestment Program

Unless you specifically have elected to receive dividends or distributions in cash, they will automatically be reinvested,

without an initial sales charge or CDSC, in the same class of additional shares of a Fund. If you elect to receive distributions in cash, you will only receive a check if the amount of the distribution is equal to or exceeds \$25.00. Distributions of less than \$25.00 will automatically be reinvested in shares of the Fund. To receive distributions of less than \$25.00 in cash, you must have bank instructions associated to your account so that distributions can be delivered to you electronically via Electronic Funds Transfer using the Automated Clearing House or "ACH". In addition, the Fund may reinvest your distribution check (and future checks) in additional shares of the Fund if your check (i) is returned as undeliverable or (ii) remains uncashed for nine months.

Dividend Direction Plan

A shareholder who already maintains accounts in more than one AB Mutual Fund may direct the automatic investment of income dividends and/or capital gains by one Fund, in any amount, without the payment of any sales charges, in shares of any eligible class of one or more other AB Mutual Fund(s) in which the shareholder maintains an account.

Automatic Investment Program

The Automatic Investment Program allows investors to purchase shares of a Fund through pre-authorized transfers of funds from the investor's bank account. Under the Automatic Investment Program, an investor may (i) make an initial purchase of at least \$2,500 and invest at least \$50 monthly or (ii) make an initial purchase of less than \$2,500 and commit to a monthly investment of \$200 or more until the investor's account balance is \$2,500 or more. Please see the Funds' SAI for more details.

Reinstatement Privilege

A shareholder who has redeemed all or any portion of his or her Class A shares may reinvest all or any portion of the proceeds from the redemption in Class A shares of any AB Mutual Fund at NAV without any sales charge, if the reinvestment is made within 120 calendar days after the redemption date.

Systematic Withdrawal Plan

The Funds offer a systematic withdrawal plan that permits the redemption of Class A or Class C shares without payment of a CDSC. Under this plan, redemptions equal to 1% a month, 2% every two months or 3% a quarter of the value of a Fund account would be free of a CDSC. For Class A and Class C shares, shares held the longest would be redeemed first.

CHOOSING A SHARE CLASS

Each share class represents an interest in the same portfolio of securities, but each class has its own sales charge and expense structure, allowing you to choose the class that best fits your situation. In choosing a class of shares, you should consider:

- the amount you intend to invest;
- how long you expect to own shares;
- expenses associated with owning a particular class of shares;

- whether you qualify for any reduction or waiver of sales charges (for example, if you are making a large investment that qualifies for a **Quantity Discount**, you might consider purchasing Class A shares); and
- whether a share class is available for purchase (Class R, Class K and Class I shares are only offered to group retirement plans, not individuals).

Among other things, Class A shares, with their lower Rule 12b-1 fees, are designed for investors with a long-term investing time frame. Class C shares should not be considered as a long-term investment because they are subject to a higher distribution fee for eight years. Class C shares do not, however, have an initial sales charge or a CDSC so long as the shares are held for one year or more. Class C shares are designed for investors with a short-term investing time frame.

A transaction, service, administrative or other similar fee may be charged by your broker-dealer, agent or other financial intermediary, with respect to the purchase, sale or exchange of Class A, Class C, Advisor Class or Class Z shares made through your financial advisor, or in connection with participation on the intermediary's platform. Financial intermediaries, a fee-based program, or, for group retirement plans, a plan sponsor or plan fiduciary, also may impose requirements on the purchase, sale or exchange of shares that are different from, or in addition to, those described in this Prospectus and the Funds' SAI, including requirements as to the minimum initial and subsequent investment amounts. In addition, group retirement plans may not offer all classes of shares of a Fund. A Fund is not responsible for, and has no control over, the decision of any financial intermediary, plan sponsor or fiduciary to impose such differing requirements.

You should consult your financial advisor for assistance in choosing a class of Fund shares.

PAYMENTS TO FINANCIAL ADVISORS AND THEIR FIRMS

Financial intermediaries market and sell shares of the Funds. These financial intermediaries employ financial advisors and receive compensation for selling shares of the Funds. This compensation is paid from various sources, including any sales charge, CDSC and/or Rule 12b-1 fee that you or the Funds may pay. Your individual financial advisor may receive some or all of the amounts paid to the financial intermediary that employs him or her.

WHAT IS A FINANCIAL INTERMEDIARY?

A financial intermediary is a firm that receives compensation for selling shares of the Funds offered in this Prospectus and/or provides services to the Funds' shareholders. Financial intermediaries may include, among others, your broker, your financial planner or advisors, banks and insurance companies. Financial intermediaries may employ financial advisors who deal with you and other investors on an individual basis.

All or a portion of the initial sales charge that you pay is paid by ABI to financial intermediaries selling Class A shares. ABI may also pay financial intermediaries a fee of up to 1% on purchases of Class A shares that are sold without an initial sales charge.

ABI pays, at the time of your purchase, a commission to financial intermediaries selling Class C shares in an amount equal to 1% of your investment for sales of Class C shares.

For Class A, Class C, Class R and Class K shares, up to 100% of the Rule 12b-1 fees applicable to these classes of shares each year may be paid to financial intermediaries.

Your financial advisor's firm receives compensation from the Funds, ABI and/or the Adviser in several ways from various sources, which include some or all of the following:

- upfront sales commissions;
- Rule 12b-1 fees;
- additional distribution support;
- defrayal of costs for educational seminars and training; and
- payments related to providing shareholder record-keeping and/or transfer agency services.

Please read this Prospectus carefully for information on this compensation.

Other Payments for Distribution Services and Educational Support

In addition to the commissions paid to or charged by financial intermediaries at the time of sale and Rule 12b-1 fees, some or all of which are paid to financial intermediaries (and, in turn, may be paid to your financial advisor), ABI, at its expense, currently provides additional payments to firms that sell shares of the AB Mutual Funds. Although the individual components may be higher and the total amount of payments made to each qualifying firm in any given year may vary, the total amount paid to a financial intermediary in connection with the sale of shares of the AB Mutual Funds will generally not exceed the sum of (a) 0.25% of the current year's fund sales by that firm and (b) 0.10% of average daily net assets attributable to that firm over the year. These sums include payments for distribution analytical data regarding AB Mutual Fund sales by financial advisors of these firms and to reimburse directly or indirectly the costs incurred by these firms and their employees in connection with educational seminars and training efforts about the AB Mutual Funds for the firms' employees and/or their clients and potential clients. The costs and expenses associated with these efforts may include travel, lodging, entertainment and meals. ABI may pay a portion of "ticket" or other transactional charges.

For 2021, ABI's additional payments to these firms for distribution services and educational support related to the AB Mutual Funds are expected to be approximately 0.05% of the average monthly assets of the AB Mutual Funds, or approximately \$23 million. For 2020, ABI estimates that it will have paid approximately 0.05% of the average monthly assets of the

AB Mutual Funds or approximately \$22 million for distribution services and educational support related to the AB Mutual Funds.

A number of factors are considered in determining the additional payments, including each firm's AB Mutual Fund sales, assets and redemption rates, and the willingness and ability of the firm to give ABI access to its financial advisors for educational and marketing purposes. In some cases, firms will include the AB Mutual Funds on a "preferred list". ABI's goal is to make the financial advisors who interact with current and prospective investors and shareholders more knowledgeable about the AB Mutual Funds so that they can provide suitable information and advice about the funds and related investor services.

The Funds and ABI also make payments for recordkeeping and other transfer agency services to financial intermediaries that sell AB Mutual Fund shares. Please see "Management of the Funds—Transfer Agency and Retirement Plan Services" below. These expenses paid by the Funds are included in "Other Expenses" under "Fees and Expenses of the Fund—Annual Fund Operating Expenses" in the Summary Information at the beginning of this Prospectus.

If one mutual fund sponsor makes greater distribution assistance payments than another, your financial advisor and his or her firm may have an incentive to recommend one fund complex over another. Similarly, if your financial advisor or his or her firm receives more distribution assistance for one share class versus another, then they may have an incentive to recommend that class.

Please speak with your financial advisor to learn more about the total amounts paid to your financial advisor and his or her firm by the Funds, the Adviser, ABI and by sponsors of other mutual funds he or she may recommend to you. You should also consult disclosures made by your financial advisor at the time of purchase.

As of the date of this Prospectus, ABI anticipates that the firms that will receive additional payments for distribution services and/or educational support include:

Advisor Group
American Enterprise Investment Services
Cadaret, Grant & Co.
Citigroup Global Markets
Citizens Securities
Commonwealth Financial Network
Equitable Advisors
FIS Brokerage Services
Great-West Life & Annuity Insurance Co.
Institutional Cash Distributors (ICD)
John Hancock Retirement Plan Services
JP Morgan Securities
Lincoln Financial Advisors Corp.

Lincoln Financial Securities Corp.
LPL Financial
Merrill Lynch
Morgan Stanley
Northwestern Mutual Investment Services
PNC Investments
Raymond James
RBC Wealth Management
Robert W. Baird
SunTrust Bank
UBS Financial Services
US Bancorp Investments
Waddell & Reed, Inc.
Wells Fargo Advisors

Although the Funds may use brokers and dealers that sell shares of the Funds to effect portfolio transactions, the Funds do not consider the sale of AB Mutual Fund shares as a factor when selecting brokers or dealers to effect portfolio transactions.

HOW TO EXCHANGE SHARES

You may exchange your Fund shares for shares of the same class of other AB Mutual Funds provided that the other fund offers the same class of shares and, in the case of retirement plans, is an investment option under the plan. Exchanges of shares are made at the next-determined NAV, without sales or service charges, after your order is received in proper form. All exchanges are subject to the minimum investment restrictions set forth in the prospectus for the AB Mutual Fund whose shares are being acquired. You may request an exchange either directly or through your financial intermediary or, in the case of retirement plan participants, by following the procedures specified by your plan sponsor or plan recordkeeper. In order to receive a day's NAV, ABIS must receive and confirm your telephone exchange request by the Fund Closing Time, on that day. The Funds may modify, restrict or terminate the exchange privilege on 60 days' written notice.

HOW TO SELL OR REDEEM SHARES

You may "redeem" your shares (*i.e.*, sell your shares to a Fund) on any day the Exchange is open, either directly or through your financial intermediary or, in the case of retirement plan participants, by following the procedures specified by your plan sponsor or plan recordkeeper. For Advisor Class and Class Z shares, if you are in doubt about what procedures or documents are required by your fee-based program or employee benefit plan to sell your shares, you should contact your financial advisor. Your sale price will be the next-determined NAV, less any applicable CDSC, after the Fund receives your redemption request in proper form. Each Fund expects that it will typically take one to three business days following the receipt of your redemption request in proper form to pay out redemption proceeds. However, while not expected, payment of redemption proceeds may take up to seven days from the day your request is received in proper form by the Fund by the Fund Closing Time. If you recently purchased your shares by check or electronic funds transfer, your redemption payment may be delayed until the Fund is reasonably

satisfied that the check or electronic funds transfer has been collected (which may take up to 10 days).

Each Fund expects, under normal circumstances, to use cash or cash equivalents held by the Fund to satisfy redemption requests. The Fund may also determine to sell portfolio assets to meet such requests. Under certain circumstances, including stressed market conditions, the Fund may determine to pay a redemption request by accessing a bank line of credit or by distributing wholly or partly in kind securities from its portfolio, instead of cash.

Sale In-Kind. Each Fund normally pays proceeds of a sale of Fund shares in cash. However, each Fund has reserved the right to pay the sale price in whole or in part by a distribution in-kind of securities in lieu of cash. If the redemption payment is made in-kind, the securities received will be subject to market risk and may decline in value. In addition, you may incur brokerage commissions if you elect to sell the securities for cash.

Selling Shares Through Your Financial Intermediary or Retirement Plan

Your financial intermediary or plan recordkeeper must receive your sales request by the Fund Closing Time and submit it to the Fund by a pre-arranged time for you to receive that day's NAV, less any applicable CDSC. Your financial intermediary, plan sponsor or plan recordkeeper is responsible for submitting all necessary documentation to the Fund and may charge you a fee for this service.

Selling Shares Directly to the Fund

By Mail:

- Send a signed letter of instruction or stock power, along with certificates, to:

AllianceBernstein Investor Services, Inc.
P.O. Box 786003
San Antonio, TX 78278-6003

- For certified or overnight deliveries, send to:

AllianceBernstein Investor Services, Inc.
8000 IH 10 W, 13th floor
San Antonio, TX 78230

- For your protection, a bank, a member firm of a national stock exchange or another eligible guarantor institution must guarantee signatures. Stock power forms are available from your financial intermediary, ABIS and many commercial banks. Additional documentation is required for the sale of shares by corporations, intermediaries, fiduciaries and surviving joint owners. If you have any questions about these procedures, contact ABIS.

By Telephone:

- You may redeem your shares for which no stock certificates have been issued by telephone request. Call ABIS at (800) 221-5672 with instructions on how you wish to receive your sale proceeds.

- ABIS must receive and confirm a telephone redemption request by the Fund Closing Time for you to receive that day's NAV, less any applicable CDSC.
- For your protection, ABIS will request personal or other information from you to verify your identity and will generally record the calls. Neither the Fund nor the Adviser, ABIS, ABI or other Fund agent will be liable for any loss, injury, damage or expense as a result of acting upon telephone instructions purporting to be on your behalf that ABIS reasonably believes to be genuine.
- If you have selected electronic funds transfer in your Mutual Fund Application, the redemption proceeds will be sent directly to your bank. Otherwise, the proceeds will be mailed to you.
- Redemption requests by electronic funds transfer or check may not exceed \$100,000 per Fund account per day.
- Telephone redemption is not available for shares held in nominee or "street name" accounts, retirement plan accounts, or shares held by a shareholder who has changed his or her address of record within the previous 30 calendar days.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Each Fund's Board has adopted policies and procedures designed to detect and deter frequent purchases and redemptions of Fund shares or excessive or short-term trading that may disadvantage long-term Fund shareholders. These policies are described below. There is no guarantee that the Funds will be able to detect excessive or short-term trading or to identify shareholders engaged in such practices, particularly with respect to transactions in omnibus accounts. Shareholders should be aware that application of these policies may have adverse consequences, as described below, and avoid frequent trading in Fund shares through purchases, sales and exchanges of shares. Each Fund reserves the right to restrict, reject or cancel, without any prior notice, any purchase or exchange order for any reason, including any purchase or exchange order accepted by any shareholder's financial intermediary.

Risks Associated With Excessive or Short-Term Trading Generally. While the Funds will try to prevent market timing by utilizing the procedures described below, these procedures may not be successful in identifying or stopping excessive or short-term trading in all circumstances. By realizing profits through short-term trading, shareholders that engage in rapid purchases and sales or exchanges of a Fund's shares dilute the value of shares held by long-term shareholders. Volatility resulting from excessive purchases and sales or exchanges of Fund shares, especially involving large dollar amounts, may disrupt efficient portfolio management and cause a Fund to sell shares at inopportune times to raise cash to accommodate redemptions relating to short-term trading activity. In particular, a Fund may have difficulty implementing its long-term investment strategies if it is forced to maintain a higher level of its assets in cash to accommodate significant short-term trading

activity. In addition, a Fund may incur increased administrative and other expenses due to excessive or short-term trading, including increased brokerage costs and realization of taxable capital gains.

Funds that may invest significantly in securities of foreign issuers may be particularly susceptible to short-term trading strategies. This is because securities of foreign issuers are typically traded on markets that close well before the time a Fund ordinarily calculates its NAV at 4:00 p.m., Eastern time, which gives rise to the possibility that developments may have occurred in the interim that would affect the value of these securities. The time zone differences among international stock markets can allow a shareholder engaging in a short-term trading strategy to exploit differences in Fund share prices that are based on closing prices of securities of foreign issuers established some time before the Fund calculates its own share price (referred to as “time zone arbitrage”). Each Fund has procedures, referred to as fair value pricing, designed to adjust closing market prices of securities of foreign issuers to reflect what is believed to be the fair value of those securities at the time a Fund calculates its NAV. While there is no assurance, the Funds expect that the use of fair value pricing, in addition to the short-term trading policies discussed below, will significantly reduce a shareholder’s ability to engage in time zone arbitrage to the detriment of other Fund shareholders.

A shareholder engaging in a short-term trading strategy may also target a Fund irrespective of its investments in securities of foreign issuers. Any Fund that invests in securities that are, among other things, thinly traded or traded infrequently, or that have a limited public float, has the risk that the current market price for the securities may not accurately reflect current market values. A shareholder may seek to engage in short-term trading to take advantage of these pricing differences (referred to as “price arbitrage”). All Funds may be adversely affected by price arbitrage.

Policy Regarding Short-Term Trading. Purchases and exchanges of shares of the Funds should be made for investment purposes only. The Funds seek to prevent patterns of excessive purchases and sales of Fund shares to the extent they are detected by the procedures described below, subject to each Fund’s ability to monitor purchase, sale and exchange activity. The Funds reserve the right to modify this policy, including any surveillance or account blocking procedures established from time to time to effectuate this policy, at any time without notice.

- **Transaction Surveillance Procedures.** The Funds, through their agents, ABI and ABIS, maintain surveillance procedures to detect excessive or short-term trading in Fund shares. This surveillance process involves several factors, which include scrutinizing transactions in Fund shares that exceed certain monetary thresholds or numerical limits within a specified period of time. Generally, more than two exchanges of Fund shares during any 60-day period or purchases of shares followed by a sale within 60 days will be identified by these surveillance procedures. For purposes of these transaction surveillance procedures, the Funds may

consider trading activity in multiple accounts under common ownership, control or influence. Trading activity identified by either, or a combination, of these factors, or as a result of any other information available at the time, will be evaluated to determine whether such activity might constitute excessive or short-term trading. With respect to managed or discretionary accounts for which the account owner gives his/her broker, investment adviser or other third-party authority to buy and sell Fund shares, the Funds may consider trades initiated by the account owner, such as trades initiated in connection with bona fide cash management purposes, separately in their analysis. These surveillance procedures may be modified from time to time, as necessary or appropriate to improve the detection of excessive or short-term trading or to address specific circumstances.

- **Account Blocking Procedures.** If the Funds determine, in their sole discretion, that a particular transaction or pattern of transactions identified by the transaction surveillance procedures described above is excessive or short-term trading in nature, the Funds will take remedial action that may include issuing a warning, revoking certain account-related privileges (such as the ability to place purchase, sale and exchange orders over the internet or by phone) or prohibiting or “blocking” future purchase or exchange activity. However, sales of Fund shares back to a Fund or redemptions will continue to be permitted in accordance with the terms of the Fund’s current Prospectus. As a result, unless the shareholder redeems his or her shares, which may have consequences if the shares have declined in value, a CDSC is applicable or adverse tax consequences may result, the shareholder may be “locked” into an unsuitable investment. A blocked account will generally remain blocked for 90 days. Subsequent detections of excessive or short-term trading may result in an indefinite account block or an account block until the account holder or the associated broker, dealer or other financial intermediary provides evidence or assurance acceptable to the Fund that the account holder did not or will not in the future engage in excessive or short-term trading.
- **Applications of Surveillance Procedures and Restrictions to Omnibus Accounts.** Omnibus account arrangements are common forms of holding shares of the Funds, particularly among certain brokers, dealers and other financial intermediaries, including sponsors of retirement plans. The Funds apply their surveillance procedures to these omnibus account arrangements. As required by SEC rules, the Funds have entered into agreements with all of their financial intermediaries that require the financial intermediaries to provide the Funds, upon the request of the Funds or their agents, with individual account level information about their transactions. If the Funds detect excessive trading through their monitoring of omnibus accounts, including trading at the individual account level, the financial intermediaries will also execute instructions from the Funds to take actions to curtail the activity, which may include applying blocks to accounts to prohibit future purchases and exchanges of Fund shares. For certain retire-

ment plan accounts, the Funds may request that the retirement plan or other intermediary revoke the relevant participant's privilege to effect transactions in Fund shares via the internet or telephone, in which case the relevant participant must submit future transaction orders via the U.S. Postal Service (*i.e.*, regular mail).

HOW THE FUNDS VALUE THEIR SHARES

Each Fund's NAV is calculated on any day the Exchange is open at the close of regular trading (ordinarily, 4:00 p.m., Eastern time, but sometimes earlier, as in the case of scheduled half-day trading or unscheduled suspensions of trading). To calculate NAV, a Fund's assets are valued and totaled, liabilities are subtracted, and the balance, called net assets, is divided by the number of shares outstanding. If a Fund invests in securities that are primarily traded on foreign exchanges that trade on weekends or other days when the Fund does not price its shares, the NAV of the Fund's shares may change on days when shareholders will not be able to purchase or redeem their shares in the Fund.

The Funds value their securities at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are unreliable, at "fair value" as determined in accordance with procedures established by and under the general supervision of each Board. When a Fund uses fair value pricing, it may take into account any factors it deems appropriate. A Fund may determine fair value based upon developments related to a specific security, current valuations of foreign stock indices (as reflected in U.S. futures markets) and/or U.S. sector or broader stock market indices. The prices of securities used by the Fund to calculate its NAV may differ from quoted or published prices for the same securities. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security is materially different than the value that could be realized upon the sale of that security.

Each Fund expects to use fair value pricing for securities primarily traded on U.S. exchanges only under very limited circumstances, such as the early closing of the exchange on which a security is traded or suspension of trading in the security. A Fund may use fair value pricing more frequently for securities primarily traded in non-U.S. markets because, among other things, most foreign markets close well before the Fund ordinarily values its securities at 4:00 p.m., Eastern time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim. For example, the Funds believe that foreign security values may be affected by events that occur after the close of foreign securities markets. To account for this, the Funds may frequently value many of their foreign equity securities using fair value prices based on third-party vendor modeling tools to the extent available.

The **AB Global Risk Allocation Fund** may invest up to 25% of its total assets in shares of the Subsidiary. The Subsidiary offers to redeem all or a portion of its shares at the current NAV per share every regular business day. The value of the Subsidiary's shares fluctuates with the value of its portfolio investments. The Subsidiary prices its portfolio investments pursuant to the same pricing and valuation methodologies and procedures used by the **AB Global Risk Allocation Fund**, which require, among other things, that each of the Subsidiary's investments be marked-to-market each business day to reflect changes in the market value of each investment.

Subject to its oversight, each Fund's Board has delegated responsibility for valuing a Fund's assets to the Adviser. The Adviser has established a Valuation Committee, which operates under the policies and procedures approved by the Board, to value the Fund's assets on behalf of the Fund. The Valuation Committee values Fund assets as described above. More information about the valuation of the Funds' assets is available in the Funds' SAI.

MANAGEMENT OF THE FUNDS

INVESTMENT ADVISER

Each Fund's Adviser is AllianceBernstein L.P., 1345 Avenue of the Americas, New York, NY 10105. The Adviser is a leading global investment adviser supervising client accounts with assets as of December 31, 2020 totaling approximately \$686 billion (of which over \$135 billion represented assets of registered investment companies sponsored by the Adviser). As of December 31, 2020, the Adviser managed retirement assets for many of the largest public and private employee benefit plans (including 18 of the nation's FORTUNE 100 companies), for public employee retirement funds in 29 of the 50 states, for investment companies, and for foundations, endowments, banks and insurance companies worldwide. The 27 registered investment companies managed by the Adviser, comprising approximately 91 separate investment portfolios, had as of December 31, 2020 approximately 2.5 million shareholder accounts.

During the second quarter of 2018, AXA S.A. ("AXA"), a French holding company for the AXA Group completed the sale of a minority stake in its subsidiary, Equitable Holdings, Inc. (formerly AXA Equitable Holdings, Inc.) ("Equitable"), through an initial public offering. Equitable is the holding company for a diverse group of financial services companies, including an approximately 65.3% economic interest in the Adviser and a 100% interest in AllianceBernstein Corporation, the general partner of the Adviser. Since the initial sale, AXA has completed additional offerings, most recently during the fourth quarter of 2019. As a result, AXA no longer owns a controlling interest in Equitable and, as of December 1, 2020, owns less than 10% of the outstanding shares of common stock of Equitable. AXA previously announced its intention to sell its entire interest in Equitable over time, subject to market conditions and other factors (the "Plan"). Most of AXA's remaining Equitable shares are to be delivered on redemption of AXA bonds mandatorily exchangeable into Equitable shares and maturing in May 2021. AXA retains sole discretion to determine the timing of any future sales of its remaining shares of Equitable common stock.

Sales under the Plan that were completed on November 13, 2019 may be deemed to have resulted in an "assignment" of each Fund's investment advisory agreement. In order to ensure that the investment advisory services could continue uninterrupted in such event, the Boards previously approved new investment advisory agreements with the Adviser, and shareholders of the Funds subsequently approved the new investment advisory agreements. These agreements became effective on November 13, 2019.

The Adviser provides investment advisory services and order placement facilities for the Funds. For these advisory services,

each of the Funds paid the Adviser during its most recent fiscal year, a percentage of average daily net assets as follows:

Fund	Fee as a Percentage of Average Daily Net Assets*	Fiscal Year Ended
AB Value Fund	.55%	11/30/20
AB Discovery Value Fund	.75%	11/30/20

* Fees are stated net of any fee waivers and/or expense reimbursements. See "Fees and Expenses of the Funds" in the Summary Information at the beginning of this Prospectus for more information about waivers.

The Subsidiary has entered into a separate advisory agreement with the Adviser, which is the investment adviser for both the Subsidiary and the **AB Global Risk Allocation Fund**, under which the Adviser provides investment advisory services and order placement facilities for the Subsidiary. The Subsidiary pays no separate advisory or other fees for these services, which are included in the advisory fee paid by the Fund.

A discussion regarding the basis for the Board's approval of a Fund's investment advisory agreement is available in the Fund's annual report to shareholders for the period ended October 31, 2020 for **AB Relative Value Fund** and the period ended November 30, 2020 for **AB All Market Income Portfolio**, **AB Value Fund**, **AB Discovery Value Fund**, **AB Equity Income Fund**, **AB Small Cap Value Portfolio**, **AB Global Real Estate Investment Fund**, **AB International Value Fund**, **AB Core Opportunities Fund**, **AB Global Risk Allocation Fund** and **AB All China Equity Portfolio**.

The Adviser acts as an investment adviser to other persons, firms or corporations, including investment companies, hedge funds, pension funds and other institutional investors. The Adviser may receive management fees, including performance fees, that may be higher or lower than the advisory fees it receives from the Funds. Certain other clients of the Adviser have investment objectives and policies similar to those of a Fund. The Adviser may, from time to time, make recommendations that result in the purchase or sale of a particular security by its other clients simultaneously with a Fund. If transactions on behalf of more than one client during the same period increase the demand for securities being purchased or the supply of securities being sold, there may be an adverse effect on price or quantity. It is the policy of the Adviser to allocate advisory recommendations and the placing of orders in a manner that is deemed equitable by the Adviser to the accounts involved, including the Funds. When two or more of the clients of the Adviser (including a Fund) are purchasing or selling the same security on a given day through the same broker or dealer, such transactions may be averaged as to price.

PORTFOLIO MANAGERS

The management of, and investment decisions for, **AB Relative Value Fund** and **AB Core Opportunities Fund** are made by the Adviser's Relative Value Investment Team.

The following table lists the persons within the Relative Value Investment Team with the most significant responsibility for the day-to-day management of each Fund's portfolio, the length of time that each person has been jointly and primarily responsible for the Fund's portfolio and each person's principal occupation during the past five years:

Employee; Length of Service; Title	Principal Occupation(s) During the Past Five (5) Years
Frank V. Caruso; since 2004 for the AB Relative Value Fund and since 1999 for the AB Core Opportunities Fund; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
John H. Fogarty; since 2018; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
Vinay Thapar; since 2018; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.

The management of, and investment decisions for, **AB Global Risk Allocation Fund** are made by the Adviser's Quantitative Investment Team.

The following table lists the persons within the Quantitative Investment Team with the most significant responsibility for the day-to-day management of the Fund's portfolio, the length of time that each person has been jointly and primarily responsible for the Fund's portfolio and each person's principal occupation during the past five years:

Employee; Length of Service; Title	Principal Occupation(s) During the Past Five (5) Years
Daniel J. Loewy; since 2016; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016. He is also Chief Investment Officer and Head of Multi-Asset Solutions and Chief Investment Officer of Dynamic Asset Allocation.
Leon Zhu; since 2012; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.

Fund and Responsible Group	Employee; Length of Service; Title	Principal Occupation(s) During the Past Five (5) Years
AB Value Fund <i>U.S. Value Senior Investment Management Team</i>	Cem Inal; since 2016; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
AB Discovery Value Fund <i>Small/Mid Cap Value Senior Investment Management Team</i>	James W. MacGregor; since 2005; Senior Vice President of the Adviser Erik A. Turenchalk; since 2020; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016. Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.

The management of, and investment decisions for, **AB All China Equity Portfolio** are made by the Adviser's China Equity Team. The China Equity Team relies heavily on the fundamental analysis and research of the Adviser's internal research staff. No one person is principally responsible for coordinating the Fund's investments.

The following table lists the persons within the China Equity Team with the most significant responsibility for the day-to-day management of the Fund's portfolio, the length of time that each person has been jointly and primarily responsible for the Fund's portfolio and each person's principal occupation during the past five years:

Employee; Length of Service; Title	Principal Occupation(s) During the Past Five (5) Years
John Lin; since 2018; Senior Vice President of the Adviser	Senior Vice President of the Adviser, Senior Research Analyst and Portfolio Manager of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
Stuart Rae; since 2018; Senior Vice President of the Adviser	Senior Vice President and Chief Investment Officer of Asia-Pacific Value Equities of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.

The management of, and investment decisions for, each of the other Funds' portfolios are made by the Senior Investment Management Teams. Each Senior Investment Management Team relies heavily on the fundamental analysis and research of the Adviser's large internal research staff. No one person is principally responsible for making recommendations for each Fund's portfolio.

The following table lists the Senior Investment Management Teams, the persons within each Team with the most significant responsibility for the day-to-day management of the Fund's portfolio, the length of time that each person has been jointly and primarily responsible for the Fund's portfolio and each person's principal occupation during the past five years:

Fund and Responsible Group	Employee; Length of Service; Title	Principal Occupation(s) During the Past Five (5) Years
AB Equity Income Fund <i>U.S. Equity Income Senior Investment Management Team</i>	Cem Inal; since 2018; Senior Vice President of the Adviser	(see above)
AB Global Real Estate Investment Fund <i>Global Real Estate Senior Investment Management Team</i>	Eric J. Franco; since 2012; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
	Ajit D. Ketkar; since 2017; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
AB International Value Fund <i>International Value Senior Investment Management Team</i>	Tawhid Ali; since 2016; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
	Avi Lavi; since 2012; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
AB Small Cap Value Portfolio <i>Small/Mid Cap Value Senior Investment Management Team</i>	James W. MacGregor; since 2014; Senior Vice President of the Adviser	(see above)
	Erik A. Turenchalk; since 2020; Senior Vice President of the Adviser	(see above)
AB All Market Income Portfolio <i>Multi-Asset Solutions Team</i>	Morgan C. Harting; since 2015; Senior Vice President of the Adviser	Senior Vice President of the Adviser, with which he has been associated in a substantially similar capacity to his current position since prior to 2016.
	Daniel J. Loewy; since 2014; Senior Vice President of the Adviser	(see above)
	Karen Watkin; since February 2021; Senior Vice President of the Adviser	Portfolio Manager for the Multi-Asset Solutions business in EMEA and Senior Vice President of the Adviser, with which she has been associated in a substantially similar capacity to her current position since prior to 2016.

The Funds' SAI provides additional information about each portfolio manager's compensation, other accounts managed by the portfolio manager, and the portfolio manager's ownership of securities in the Funds.

TRANSFER AGENCY AND RETIREMENT PLAN SERVICES

ABIS acts as the transfer agent for the Funds. ABIS, an indirect wholly-owned subsidiary of the Adviser, registers the transfer, issuance and redemption of Fund shares and disburses dividends and other distributions to Fund shareholders.

Many Fund shares are owned by financial intermediaries for the benefit of their customers. Retirement plans may also hold Fund shares in the name of the plan, rather than the participant. In those cases, the Funds often do not maintain an account for you. Thus, some or all of the transfer agency functions for these and certain other accounts are performed by the financial intermediaries and plan recordkeepers. Financial intermediaries and recordkeepers, which may have affiliated financial intermediaries that sell shares of the AB Mutual Funds, may be paid by a Fund, the Adviser, ABI and ABIS (i) account fees in amounts up to \$19 per account per annum,

(ii) asset-based fees of up to 0.25% (except in respect of a limited number of intermediaries) per annum of the average daily assets held through the intermediary, or (iii) a combination of both. These amounts include fees for shareholder servicing, sub-transfer agency, sub-accounting and recordkeeping services. These amounts do not include fees for shareholder servicing that may be paid separately by a Fund pursuant to its Rule 12b-1 plan. Amounts paid by a Fund for these services are included in "Other Expenses" under "Fees and Expenses of the Fund" in the Summary Information section of the Prospectus. In addition, financial intermediaries may be affiliates of entities that receive compensation from the Adviser or ABI for maintaining retirement plan "platforms" that facilitate trading by affiliated and non-affiliated financial intermediaries and recordkeeping for retirement plans.

Because financial intermediaries and plan recordkeepers may be paid varying amounts per class for sub-transfer agency and recordkeeping services, the service requirements of which may also vary by class, this may create an additional incentive for financial intermediaries and their financial advisors to favor one fund complex over another or one class of shares over another.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Income dividends and capital gains distributions, if any, declared by a Fund on its outstanding shares will, at the election of each shareholder, be paid in cash or in additional shares of the same class of shares of that Fund. If paid in additional shares, the shares will have an aggregate NAV as of the close of business on the declaration date of the dividend or distribution equal to the cash amount of the dividend or distribution. You may make an election to receive dividends and distributions in cash or in shares at the time you purchase shares. Your election can be changed at any time prior to a record date for a dividend. There is no sales or other charge in connection with the reinvestment of dividends or capital gains distributions. Cash dividends may be paid by check, or, at your election, electronically via the ACH network.

Income dividends generally are declared and paid annually, except with respect to **AB Global Real Estate Investment Fund** which generally declares and pays quarterly, and **AB All Market Income Portfolio**, which generally declares and pays monthly; capital gains distributions for the Funds generally occur annually in December.

If you receive an income dividend or capital gains distribution in cash you may, within 120 days following the date of its payment, reinvest the dividend or distribution in additional shares of that Fund without charge by returning to the Adviser, with appropriate instructions, the check representing the dividend or distribution. Thereafter, unless you otherwise specify, you will be deemed to have elected to reinvest all subsequent dividends and distributions in shares of that Fund.

While it is the intention of each Fund to distribute to its shareholders substantially all of each fiscal year's net income and net realized capital gains, if any, the amount and timing of any dividend or distribution will depend on the realization by a Fund of income and capital gains from investments. There is no fixed dividend rate and there can be no assurance that a Fund will pay any dividends or realize any capital gains. The final determination of the amount of a Fund's return of capital distributions for the period will be made after the end of each calendar year. Investments made through a 401(k) plan, 457 plan, employer sponsored 403(b) plan, profit sharing and money purchase plan, defined benefit plan or a nonqualified deferred compensation plan are subject to special United States federal income tax rules. Therefore, the federal income tax consequences described below apply only to investments made other than by such plans.

You will normally have to pay federal income tax, and any state or local income taxes, on the distributions you receive from a Fund, whether you take the distributions in cash or reinvest them in additional shares. Distributions of net capital gains from the sale of investments that a Fund owned for more than one year and that are properly designated as capital gains distributions are taxable as long-term capital gains. Distributions of dividends to a Fund's non-corporate shareholders may be treated as "qualified dividend income", which is taxed

at the same preferential tax rates applicable to long-term capital gains, if such distributions are derived from, and designated by a Fund as, "qualified dividend income" and provided that holding period and other requirements are met by both the shareholder and the Fund. "Qualified dividend income" generally is income derived from dividends from U.S. corporations and "qualified foreign corporations". Other distributions by a Fund are generally taxable to you as ordinary income. A Fund will notify you as to how much of the Fund's distributions, if any, qualify for these reduced tax rates. Dividends declared in October, November, or December and paid in January of the following year are taxable as if they had been paid the previous December.

Since REITs pay distributions based on cash flow, without regard to depreciation and amortization, it is likely that a portion of the distributions paid to **AB Global Real Estate Investment Fund** and subsequently distributed to shareholders may be a nontaxable return of capital. The final determination of the amount of the Fund's return of capital distributions for the period will be made after the end of each calendar year.

Investment income received by a Fund from sources within foreign countries may be subject to foreign income taxes withheld at the source. To the extent that any Fund is liable for foreign income taxes withheld at the source, the Fund intends, if possible, to operate so as to meet the requirements of the Code to "pass through" to the Fund's shareholders credits for foreign income taxes paid (or to permit shareholders to claim a deduction for such foreign taxes), but there can be no assurance that any Fund will be able to do so. Furthermore, a shareholder's ability to claim a foreign tax credit or deduction for foreign taxes paid by a Fund may be subject to certain limitations imposed by the Code, as a result of which a shareholder may not be permitted to claim a credit or deduction for all or a portion of the amount of such taxes.

Under certain circumstances, if a Fund realizes losses (e.g., from fluctuations in currency exchange rates) after paying a dividend, all or a portion of the dividend may subsequently be characterized as a return of capital. Returns of capital are generally nontaxable, but will reduce a shareholder's basis in shares of the Fund. If that basis is reduced to zero (which could happen if the shareholder does not reinvest distributions and returns of capital are significant), any further returns of capital will be taxable as capital gain. If you buy shares just before a Fund deducts a distribution from its NAV, you will pay the full price for the shares and then receive a portion of the price back as a taxable distribution.

The sale or exchange of Fund shares is a taxable transaction for federal income tax purposes.

Each year shortly after December 31, each Fund will send you tax information stating the amount and type of all its distributions for the year. You are encouraged to consult your tax adviser about the federal, state, and local tax consequences in

your particular circumstances, as well as about any possible foreign tax consequences.

One of the requirements for favorable tax treatment as a regulated investment company under the Code is that a Fund derive at least 90% of its gross income from certain qualifying sources of income. The IRS has issued a revenue ruling which holds that income derived from commodity-linked derivatives is not qualifying income under Subchapter M of the Code. As such, the **AB Global Risk Allocation Fund's** ability to utilize commodity-linked derivatives as part of its investment portfolio is limited to a maximum of 10% of its gross income.

The **AB Global Risk Allocation Fund** intends to seek exposure to the commodities markets primarily through investments in the Subsidiary. The Fund has received an opinion of counsel that such income should constitute qualifying income for purposes of Subchapter M. The IRS has issued numerous private letter rulings to other regulated investment companies

holding that income derived from an investment in a subsidiary that invests in commodity-linked derivatives constitutes qualifying income for purposes of Subchapter M. These rulings can only be relied upon by the taxpayer to whom they were issued and therefore the Fund cannot rely upon them. In August 2011, the IRS suspended the issuance of private letter rulings in this area while it considers certain issues raised by the private letter rulings. In 2019, Treasury Regulations were promulgated which treat income derived by the Fund from the Subsidiary as qualifying income regardless of whether such income is currently distributed.

Non-U.S. Shareholders

If you are a nonresident alien individual or a foreign corporation for federal income tax purposes, please see the Funds' SAI for information on how you will be taxed as a result of holding shares in the Funds.

GENERAL INFORMATION

Under unusual circumstances, a Fund may suspend redemptions or postpone payment for up to seven days or longer, as permitted by federal securities law. The Funds reserve the right to close an account that has remained below \$1,000 for 90 days.

During drastic economic or market developments, you might have difficulty in reaching ABIS by telephone, in which event you should issue written instructions to ABIS. ABIS is not responsible for the authenticity of telephone requests to purchase, sell, or exchange shares. ABIS will employ reasonable procedures to verify that telephone requests are genuine, and could be liable for losses resulting from unauthorized transactions if it failed to do so. Dealers and agents may charge a commission for handling telephone requests. The telephone service may be suspended or terminated at any time without notice.

Shareholder Services. ABIS offers a variety of shareholder services. For more information about these services or your account,

call ABIS's toll-free number, (800) 221-5672. Some services are described in the Mutual Fund Application.

Householding. Many shareholders of the AB Mutual Funds have family members living in the same home who also own shares of the same Funds. In order to reduce the amount of duplicative mail that is sent to homes with more than one Fund account and to reduce expenses of the Funds, all AB Mutual Funds will, until notified otherwise, send only one copy of each prospectus, shareholder report and proxy statement to each household address. This process, known as "householding", does not apply to account statements, confirmations, or personal tax information. If you do not wish to participate in householding, or wish to discontinue householding at any time, call ABIS at (800) 221-5672. We will resume separate mailings for your account within 30 days of your request.

Equity securities are (i) common stocks, partnership interests, business trust shares, and other equity ownership interests in business enterprises, and (ii) securities convertible into, and rights and warrants to subscribe for the purchase of, such stocks, shares, and interests.

Fixed-income securities are debt securities and dividend-paying preferred stocks, including floating-rate and variable-rate instruments.

Bloomberg Barclays Global Aggregate Bond Index is a macro index of global government and corporate bond markets, and is composed of various indices calculated by Bloomberg, including the U.S. Aggregate Index, the Pan-European Aggregate Index, the Global Treasury Index, the Asian-Pacific Aggregate Index, the Eurodollar Index and the U.S. Investment-Grade 144A Index.

FTSE EPRA/NAREIT Developed Real Estate Index is designed to represent general trends in eligible real estate equities worldwide. Relevant real estate activities are defined as the ownership, disposure and development of income-producing real estate.

FTSE NAREIT EQUITY REIT Index is designed to present investors with a comprehensive family of REIT performance indices that span the commercial real estate space across the U.S. economy, offering exposure to all investment and property sectors. In addition, the more narrowly focused property sector and sub-sector indices provide the facility to concentrate commercial real estate exposure in more selected markets.

MSCI AC World Index is a free-float adjusted-market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. As of December 2020, the MSCI AC World Index consisted of 49 country indices comprising 23 developed and 27 emerging market country indices. The developed market country indices included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indices included are: Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

MSCI China All Shares Index captures large and mid-cap representation across China A-shares, B-shares, H-shares, Red-chips (issued by entities owned by national or local governments in China), and P-chips (issued by companies controlled by individuals in China and deriving substantial revenues in China) and foreign listings (*e.g.*, ADRs). The index aims to reflect the opportunity set of China share classes listed in Hong Kong, Shanghai, Shenzhen and outside of China. It is based on the concept of the integrated MSCI China equity universe with China A-shares included.

MSCI EAFE Index is a stock market index of foreign stocks, from the perspective of a North American investor. The index is market capitalization weighted (meaning that the weight of securities is determined based on their respective market capitalizations). The index targets coverage of 85% of the market capitalization of the equity markets of all countries that are a part of the index. The EAFE acronym stands for “**Europe, Australasia, and Far East**”.

MSCI World Index is a free float-adjusted market capitalization index designed to measure developed-market equity performance throughout the world.

Russell 1000® Value Index measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000® companies with lower price-to-book ratios and lower expected growth values.

Russell 2000® Value Index measures the performance of those Russell 2000® companies with lower price-to-book ratios and lower forecasted growth values.

Russell 2500™ Index measures the performance of the small- to mid-cap segment of the U.S. equity universe, commonly referred to as “smid” cap. The Russell 2500™ Index is a subset of the Russell 3000® Index. It includes approximately 2,500 of the smallest companies based on a combination of their market cap and current index membership.

Russell 2500® Value Index measures the performance of the small- to mid-cap value segment of the U.S. equity universe. It includes those Russell 2500™ companies with lower price-to-book ratios and lower forecasted growth values.

S&P 500 Index is a stock market index containing the stocks of 500 U.S. large-cap corporations. Widely regarded as the best single gauge of the U.S. equities market, the S&P 500 Index includes a representative sample of 500 leading companies in leading industries of the U.S. economy.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand each Fund's financial performance for the past five years (or, if shorter, the period of the Fund's operations). Certain information reflects financial results for a single share of a class of each Fund. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). Each Fund's financial statements have been audited by Ernst & Young LLP, the Funds' independent registered public accounting firm, whose report, along with each Fund's financial statements, are included in each Fund's annual report, which is available upon request.

Portfolio turnover rate	61%	45%	40%	41%	74%

(a) Based on average shares outstanding.

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

† For the year ended November 30, 2017, the amount includes a refund for overbilling of prior years' custody out-of-pocket fees as follows:

Net Investment Income Per Share	Net Investment Income Ratio	Total Return
\$.002	.01%	.01%

* Includes the impact of proceeds received and credited to the Fund resulting from class action settlements, which enhanced the Fund's performance for the years ended November 30, 2019, November 30, 2018, November 30, 2017 and November 30, 2016 by .04%, .06%, .07% and .21%, respectively.

(a) Based on average shares outstanding.

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Amount is less than \$.005.

(d) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

(e) In connection with the Fund's investments in affiliated underlying portfolios, the Fund incurs no direct expenses, but bears proportionate shares of the fees and expenses (i.e., operating, administrative and investment advisory fees) of the affiliated underlying portfolios. The Adviser has contractually agreed to waive its fees from the Fund in an amount equal to the Fund's pro rata share of certain acquired fund fees and expenses, and for the years ended November 30, 2018, November 30, 2017 and November 30, 2016, such waiver amounted to .01%, .01% and .01%, respectively.

* Includes the impact of proceeds received and credited to the Fund resulting from class action settlements, which enhanced the Fund's performance for the years ended November 30, 2019, November 30, 2018 and November 30, 2017 by .05%, .04% and .09%, respectively.

‡ Expense ratios exclude the estimated acquired fund fees of the affiliated/unaffiliated underlying portfolios	.01%	.01%	.02%	.03%	.01%

(a) Based on average shares outstanding.

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Amount is less than \$.005.

(d) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

(e) In connection with the Fund's investments in affiliated underlying portfolios, the Fund incurs no direct expenses, but bears proportionate shares of the fees and expenses (i.e., operating, administrative and investment advisory fees) of the affiliated underlying portfolios. The Adviser has contractually agreed to waive its fees from the Fund in an amount equal to the Fund's pro rata share of certain acquired fund fees and expenses, and for the year ended October 31, 2020, October 31, 2019, October 31, 2018, October 31, 2017 and October 31, 2016, such waiver amounted to .01%, .01%, .02%, .02% and .01%, respectively.

† For the year ended October 31, 2017, the amount includes a refund for overbilling of prior years' custody out-of-pocket fees as follows:

Net Investment Income Per Share	Net Investment Income Ratio	Total Return
\$.001	.01%	.01%

†† Due to timing of sales and repurchase of capital shares, the net realized and unrealized gain (loss) per share is not in accordance with the Trust's change in net realized and unrealized gain (loss) on investment transactions for the period.

* Includes the impact of proceeds received and credited to the Fund resulting from class action settlements, which enhanced the Fund's performance for the years ended October 31, 2019, October 31, 2018, October 31, 2017 and October 31, 2016 by .15%, .03%, .64% and .01%, respectively.

Includes the impact of proceeds recorded and credited to the Fund resulting from regulatory settlements, which enhanced the Fund's performance for the years ended October 31, 2018 and October 31, 2016 by .12% and .18%, respectively.

Portfolio turnover rate	37%	43%	68%	58%	81%

(a) Based on average shares outstanding.

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

(d) In connection with the Fund's investments in affiliated underlying portfolios, the Fund incurs no direct expenses, but bears proportionate shares of the fees and expenses (i.e., operating, administrative and investment advisory fees) of the affiliated underlying portfolios. The Adviser has contractually agreed to waive its fees from the Fund in an amount equal to the Fund's pro rata share of certain acquired fund fees and expenses, and for the year ended November 30, 2017, such waiver amounted to .01%.

† For the year ended November 30, 2017, the amount includes a refund for overbilling of prior years' custody out-of-pocket fees as follows:

Net Investment Income Per Share	Net Investment Income Ratio	Total Return
\$.003	.01%	.01%

* Includes the impact of proceeds received and credited to the Fund resulting from class action settlements, which enhanced the Fund's performance for the year ended November 30, 2018 by .01%.

Net investment income(b)	1.30%	1.97%	1.61%	1.79%†	2.07%
Portfolio turnover rate	48%	47%	34%	50%	58%

(a) Based on average shares outstanding.

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

(d) In connection with the Fund's investments in affiliated underlying portfolios, the Fund incurs no direct expenses, but bears proportionate shares of the fees and expenses (i.e., operating, administrative and investment advisory fees) of the affiliated underlying portfolios. The Adviser has contractually agreed to waive its fees from the Fund in an amount equal to the Fund's pro rata share of certain acquired fund fees and expenses, and for the year ended November 30, 2017, such waiver amounted to .01%.

(e) Amount is less than \$.005.

† For the year ended November 30, 2017, the amount includes a refund for overbilling of prior years' custody out-of-pocket fees as follows:

Net Investment Income Per Share	Net Investment Income Ratio	Total Return
\$.002	.01%	.01%

* Includes the impact of proceeds received and credited to the Fund resulting from class action settlements, which enhanced the Fund's performance for the years ended November 30, 2020 and November 30, 2019 by .04% and .19%, respectively.

(a) Based on average shares outstanding

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Amount is less than \$.005.

(d) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

(e) The net asset value and total return include adjustments in accordance with accounting principles generally accepted in the United States of America for financial reporting purposes. As such, the net asset value and total return for shareholder transactions may differ from financial statements.

(f) In connection with the Fund's investments in affiliated underlying portfolios, the Fund incurs no direct expenses, but bears proportionate shares of the fees and expenses (i.e., operating, administrative and investment advisory fees) of the affiliated underlying portfolios. The Adviser has contractually agreed to waive its fees from the Fund in an amount

equal to the Fund's pro rata share of certain acquired fund fees and expenses, and for the years ended November 30, 2020, ended November 30, 2018, November 30, 2017 and November 30, 2016, such waiver amounted to .01%, .01%, .01% and .02%, respectively.

(g) The expense ratios presented below exclude interest/bank overdraft expense, if any:

Expenses, net of waivers/reimbursements(e)‡	.51%	.53%	.49%	.52%	.53%
Expenses, before waivers/reimbursements(e)‡	1.12%	1.15%	1.12%	1.61%	3.40%
Net investment income(b)	3.12%	3.77%	5.09%	4.64%	5.08%
Portfolio turnover rate	105%	77%	74%	69%	94%
‡ Expense ratios exclude the estimated acquired fund fees of the affiliated/unaffiliated underlying portfolios	.24%	.24%	.26%	.23%	.22%

(a) Based on average shares outstanding.

(b) Net of expenses waived/reimbursed by the Adviser.

(c) Amount is less than \$.005.

(d) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charges or contingent deferred sales charges are not reflected in the calculation of total investment return. Total return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return calculated for a period of less than one year is not annualized.

(e) In connection with the Fund's investments in affiliated underlying portfolios, the Fund incurs no direct expenses, but bears proportionate shares of the fees and expenses (i.e., operating, administrative and investment advisory fees) of the affiliated underlying portfolios. The Adviser has contractually agreed to waive its fees from the Fund in an amount equal to the Fund's pro rata share of certain acquired fund fees and expenses, and for the period shown below, such waiver amounted to:

	Year Ended November 30,				
	2020	2019	2018	2017	2016
Class A	.23%	.21%	.25%	.22%	.21%
Class C	.23%	.21%	.25%	.22%	.20%
Advisor Class	.23%	.21%	.25%	.22%	.21%

(f) The net asset value and total return include adjustments in accordance with accounting principles generally accepted in the United States of America for financial reporting purposes. As such, the net asset value and total return for shareholder transactions may differ from financial statements.

(d) Total investment return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption on the last day of the period. Initial sales charge or contingent deferred sales charge is not reflected in the calculation of total investment return. Total investment return does not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Total investment return for a period of less than one year is not annualized.

(e) Annualized.

APPENDIX A

Hypothetical Investment and Expense Information

The following supplemental hypothetical investment information provides additional information calculated and presented in a manner different from expense information found under “Fees and Expenses of the Funds” in the Summary Information at the beginning of this Prospectus about the effect of a Fund’s expenses, including investment advisory fees and other Fund costs, on each Fund’s returns over a 10-year period. The chart shows the estimated expenses that would be charged on a hypothetical investment of \$10,000 in Class A shares of each Fund assuming a 5% return each year, including an initial sales charge of 4.25%. Except as otherwise indicated, the chart also assumes that the current annual expense ratio stays the same throughout the ten-year period. The current annual expense ratio for each Fund is the same as stated under “Fees and Expenses”. Additional information concerning the fees and expenses incurred by the Funds may be found at FINRA’s Fund Analyzer web page (available at https://tools.finra.org/fund_analyzer/). Your actual expenses may be higher or lower.

NOTE: Terms used by a financial intermediary in this Appendix do not necessarily have the same legal meaning as the same or similar terms used elsewhere in the Prospectus.

Waivers Specific to Merrill Lynch

Shareholders purchasing Fund shares through a Merrill Lynch platform or account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in the Fund's Prospectus or SAI:

Front-end Sales Load Waivers on Class A Shares available at Merrill Lynch

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by a 529 Plan (does not include 529 Plan units or 529-specific share classes or equivalents)
- Shares purchased through a Merrill Lynch affiliated investment advisory program
- Shares exchanged due to the holdings moving from a Merrill Lynch affiliated investment advisory program to a Merrill Lynch brokerage (non-advisory) account pursuant to Merrill Lynch's policies relating to sales load discounts and waivers
- Shares purchased by third-party investment advisors on behalf of their advisory clients through Merrill Lynch's platform
- Shares of funds purchased through the Merrill Edge Self-Directed platform (if applicable)
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund pursuant to Merrill Lynch's policies relating to sales load discounts and waivers
- Shares exchanged from Class C (*i.e.* level-load) shares of the same fund in the month of or following the 10-year anniversary of the purchase date
- Employees and registered representatives of Merrill Lynch or its affiliates and their family members
- Directors or Trustees of the Fund, and employees of the Fund's investment adviser or any of its affiliates, as described in the Prospectus
- Eligible shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement). Automated transactions (*i.e.*, systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill Lynch's account maintenance fees are not eligible for reinstatement

CDSC Waivers on Classes A and C Shares available at Merrill Lynch

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code
- Shares sold to pay Merrill Lynch fees but only if the transaction is initiated by Merrill Lynch
- Shares acquired through a right of reinstatement
- Shares held in retirement brokerage accounts that are exchanged for a lower cost share class due to transfer to a fee-based account or platforms
- Shares received through an exchange due to the holdings moving from a Merrill Lynch affiliated investment advisory program to a Merrill Lynch brokerage (non-advisory) account pursuant to Merrill Lynch's policies relating to sales load discounts and waivers

Front-end Load Discounts Available at Merrill Lynch: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in the Prospectus
- Rights of Accumulation (“ROA”) which entitle shareholders to breakpoint discounts as described in the Fund’s Prospectus will be automatically calculated based on the aggregated holding of fund family assets held by accounts (including 529 program holdings, where applicable) within the purchaser’s household at Merrill Lynch. Eligible fund family assets not held at Merrill Lynch may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (“LOI”) which allow for breakpoint discounts based on anticipated purchases within a fund family, through Merrill Lynch, over a 13-month period of time (if applicable)

Waivers Specific to Morgan Stanley

Effective July 1, 2018, shareholders purchasing Fund shares through a Morgan Stanley Wealth Management transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from and may be more limited than those disclosed elsewhere in the Fund’s Prospectus or SAI.

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley’s account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account
- Class C (i.e., level-load) shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management’s share class conversion program
- Shares purchased from the proceeds of redemptions within the same fund family, provided that (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge

Class A Shares Front-End Sales Charge Waivers Available at Ameriprise Financial

The following information applies to Class A shares purchases if you have an account with or otherwise purchase Fund shares through Ameriprise Financial:

Shareholders purchasing Fund shares through an Ameriprise Financial brokerage account are eligible for the following front-end sales charge waivers, which may differ from those disclosed elsewhere in the Fund’s Prospectus or SAI:

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the same fund family)
- Shares exchanged from Class C shares of the same fund in the month of or following the 7-year anniversary of the purchase date. To the extent that this Prospectus elsewhere provides for a waiver with respect to exchanges of Class C shares or conversion of Class C shares following a shorter holding period, that waiver will apply
- Employees and registered representatives of Ameriprise Financial or its affiliates and their immediate family members
- Shares purchased by or through qualified accounts (including IRAs, Coverdell Education Savings Accounts, 401(k)s, 403(b) TSCAs subject to ERISA and defined benefit plans) that are held by a covered family member, defined as an Ameriprise financial advisor and/or the advisor’s spouse, advisor’s lineal ascendant (mother, father, grandmother, grandfather, great grandmother, great grandfather), advisor’s lineal descendant (son, step-son, daughter, step-daughter, grandson, granddaughter, great grandson, great granddaughter) or any spouse of a covered family member who is a lineal descendant
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e. Rights of Reinstatement)

In addition, shareholders purchasing Fund shares that are available through an Ameriprise Financial Advisory account are eligible for front-end sales charge waivers, which may differ from those disclosed elsewhere in the Fund’s Prospectus or SAI.

Waivers Specific to Raymond James & Associates, Inc., Raymond James Financial Services, Inc. and each Entity's Affiliates ("Raymond James")

Effective March 1, 2019, shareholders purchasing Fund shares through a Raymond James platform or account, or through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in the Fund's Prospectus or SAI.

Front-end Sales Load Waivers on Class A Shares Available at Raymond James

- Shares purchased in an investment advisory program
- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James
- Shares purchased from the proceeds of redemptions within the same fund family, provided that (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement)
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James

CDSC Waivers on Classes A and C Shares Available at Raymond James

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the Fund's Prospectus
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James
- Shares acquired through a right of reinstatement

Front-end Load Discounts Available at Raymond James: Breakpoints, Rights of Accumulation, and/or Letters of Intent

- Breakpoints as described in the Prospectus
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets

Waivers Specific to Janney Montgomery Scott LLC ("Janney")

Effective May 1, 2020, if you purchase Fund shares through a Janney brokerage account, you will be eligible for the following load waivers (front-end sales charge waivers and contingent deferred sales charge ("CDSC"), or back-end sales charge, waivers) and discounts, which may differ from those disclosed elsewhere in the Fund's Prospectus or SAI.

Front-end sales charge* waivers on Class A shares available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family)
- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney

- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (*i.e.*, right of reinstatement)
- Employer-sponsored retirement plans (*e.g.*, 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Shares acquired through a right of reinstatement
- Class C shares that are no longer subject to a CDSC and are converted to Class A shares of the same fund pursuant to Janney's policies and procedures

CDSC waivers on Classes A and C shares available at Janney

- Shares sold upon the death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Shares purchased in connection with a return of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and other retirement accounts due to the shareholder reaching the required age based on applicable rules
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney
- Shares acquired through a right of reinstatement
- Shares exchanged into the same share class of a different fund

Front-end sales charge* discounts available at Janney: breakpoints, rights of accumulation, and/or letters of intent

- Breakpoints as described in the Fund's Prospectus
- Rights of accumulation ("ROA"), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Janney. Eligible fund family assets not held at Janney may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Janney may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets

★ Also, referred to as an "initial sales charge"

Waivers Specific to Oppenheimer & Co. Inc. ("OPCO")

Effective May 1, 2020, shareholders purchasing Fund shares through an OPCO platform or account are eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in the Fund's Prospectus or SAI.

Front-end Sales Load Waivers on Class A Shares Available at OPCO

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by or through a 529 Plan
- Shares purchased through an OPCO affiliated investment advisory program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family)
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement)

- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of OPCO
- Employees and registered representatives of OPCO or its affiliates and their family members
- Directors or Trustees of the Fund, and employees of the Fund's investment adviser or any of its affiliates, as described in the Prospectus

CDSC Waivers on Classes A and C Shares Available at OPCO

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the Prospectus
- Shares sold to pay OPCO fees but only if the transaction is initiated by OPCO
- Shares acquired through a right of reinstatement

Front-end load Discounts Available at OPCO: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in the Prospectus
- Rights of Accumulation ("ROA") which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at OPCO. Eligible fund family assets not held at OPCO may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets

Waivers Specific to Edward D. Jones & Co. ("Edward Jones")

Effective on or after May 1, 2020, clients of Edward Jones (also referred to as "shareholders") purchasing Fund shares on the Edward Jones commission and fee-based platforms are eligible only for the following sales charge discounts (also referred to as "breakpoints") and waivers, which can differ from breakpoints and waivers described elsewhere in the Fund's Prospectus or SAI or through another broker-dealer. In all instances, it is the shareholder's responsibility to inform Edward Jones at the time of purchase of any relationship, holdings of AB Mutual Funds or other facts qualifying the purchaser for breakpoints or waivers. Edward Jones can ask for documentation of such circumstance.

Breakpoints

Rights of Accumulation ("ROA")

- The applicable sales charge on a purchase of Class A shares is determined by taking into account all share classes (except any money market funds and retirement plan share classes) of AB Mutual Funds held by the shareholder or in an account grouped by Edward Jones with other accounts for the purpose of providing certain pricing considerations ("pricing groups"). This includes all share classes held on the Edward Jones platform and/or held on another platform. The inclusion of eligible fund family assets in the rights of accumulation calculation is dependent on the shareholder notifying his or her financial advisor of such assets at the time of calculation
- ROA is determined by calculating the higher of cost or market value (current shares x NAV)

Letter of Intent ("LOI")

- Through a LOI, shareholders can receive the sales charge and breakpoint discounts for purchases shareholders intend to make over a 13-month period from the date Edward Jones receives the LOI. The LOI is determined by calculating the higher of cost or market value of qualifying holdings at LOI initiation in combination with the value that the shareholder intends to buy over a 13-month period to calculate the front-end sales charge and any breakpoint discounts. Each purchase the shareholder makes during that 13-month period will receive the sales charge and breakpoint discount that applies to the total amount. The inclusion of eligible fund family assets in the LOI calculation is dependent on the shareholder notifying his or her financial advisor of such assets at the time of calculation. Purchases made before the LOI is received by Edward Jones are not covered under the LOI and will not reduce the sales charge previously paid. Sales charges will be adjusted if the LOI is not met

Sales Charge Waivers

Sales charges are waived for the following shareholders and in the following situations:

- Associates of Edward Jones and its affiliates and their family members who are in the same pricing group (as determined by Edward Jones under its policies and procedures) as the associate. This waiver will continue for the remainder of the associate's life if the associate retires from Edward Jones in good-standing
- Shares purchased in an Edward Jones fee-based program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment
- Shares purchased from the proceeds of redeemed shares of the same fund family so long as the following conditions are met: 1) the proceeds are from the sale of shares within 60 days of the purchase, and 2) the sale and purchase are made in the same share class and the same account or the purchase is made in an individual retirement account with proceeds from the liquidations in a non-retirement account
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the discretion of Edward Jones. Edward Jones is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in the Prospectus
- Exchanges from Class C shares to Class A shares of the same fund, generally, in the 84th month following the anniversary of the purchase date or earlier at the discretion of Edward Jones

Contingent Deferred Sales Charge (CDSC) Waivers

If the shareholder purchases shares that are subject to a CDSC and those shares are redeemed before the CDSC is expired, the shareholder is responsible to pay the CDSC except in the following conditions:

- The death or disability of the shareholder
- Systematic withdrawals with up to 10% per year of the account value
- Return of excess contributions from an Individual Retirement Account (IRA)
- Shares sold as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches the qualified age based on applicable IRS regulations
- Shares sold to pay Edward Jones fees or costs in such cases where the transaction is initiated by Edward Jones
- Shares exchanged in an Edwards Jones fee-based program
- Share acquired through NAV reinstatement

Other Important Information

1.1 Minimum Purchase Amounts

- \$250 initial purchase minimum
- \$50 subsequent purchases minimum

1.2 Minimum Balances

- Edward Jones has the right to redeem at its discretion fund holdings with a balance of \$250 or less. The following are examples of accounts that are not included in this policy:
 - A fee-based account held on an Edward Jones platform
 - A 529 account held on an Edward Jones platform
 - An account with an active systematic investment plan or letter of intent (LOI)

1.3 Changing Share Classes

- At any time it deems necessary, Edward Jones has the authority to exchange at NAV a shareholder's holdings in a fund to Class A shares

Waivers Specific to Baird

Effective June 15, 2020, shareholders purchasing Fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in the Prospectus or the SAI.

Front-End Sales Charge Waivers on Class A shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund
- Shares purchased by employees and registered representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchased from the proceeds of redemptions from another AB Mutual Fund, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Classes A and C shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Shares bought due to returns of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the required age based on applicable rules
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulations

- Breakpoints as described in the Prospectus
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of AB Mutual Fund assets held by accounts within the purchaser's household at Baird. Eligible AB Mutual Fund assets not held at Baird may be included in the rights of accumulation calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases of AB Mutual Funds through Baird, over a 13-month period of time

Waivers Specific to Stifel, Nicolaus & Company, Incorporated ("Stifel")

Effective July 31, 2020, shareholders purchasing Fund shares through a Stifel platform or account or who own shares for which Stifel or an affiliate is the broker-dealer of record are eligible for the following additional sales charge waiver:

Front-end Sales Load Waiver on Class A Shares

- Class C shares that have been held for more than seven (7) years will be converted to Class A shares of the same Fund pursuant to Stifel's policies and procedures

For more information about the Funds, the following documents are available upon request:

• **ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS**

The Funds' annual and semi-annual reports to shareholders contain additional information on the Funds' investments. In the annual report, you will find a discussion of the market conditions and investment strategies that significantly affected a Fund's performance during its last fiscal year.

• **STATEMENT OF ADDITIONAL INFORMATION (SAI)**

The Funds have an SAI, which contains more detailed information about the Funds, including their operations and investment policies. The Funds' SAI and the independent registered public accounting firms' reports and financial statements in each Fund's most recent annual report to shareholders are incorporated by reference into (and are legally part of) this Prospectus.

You may request a free copy of the current annual/semi-annual report or the SAI, or make inquiries concerning the Funds, by contacting your broker or other financial intermediary, or by contacting the Adviser:
