Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

Small-company stocks entail additional risks, and they can fluctuate in price more than larger company stocks.

Allocations may not achieve investment objectives. The portfolios' risks are directly related to the risks of the underlying funds.

There may have been periods when the results lagged the index(es). Certain market indexes are unmanaged and, therefore, have no expenses.

Investors cannot invest directly in an index.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. Returns for one year or less are not annualized, but calculated as cumulative total returns.

When applicable, investment results reflect fee waivers and/or expense reimbursements, without which results would have been lower and net expenses higher. This information is provided in detail in the shareholder reports. For more information on fee waivers and expense reimbursements, visit [capitalgroup.com](http://capitalgroup.com).
