INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital growth by investing primarily in stocks of small companies.

The fund seeks to temper the generally higher risk of small-company stocks by investing in both growth- and value-oriented securities.

Reliance on T. Rowe Price's intensive in-house small-cap research to help uncover opportunities missed by others.

Invests in a broad range of stocks to help reduce the volatility inherent with small-company investing.

BENEFITS AND RISKS

- Offer greater capital appreciation potential than large-company stocks
- Have the flexibility to respond more quickly to changes in the marketplace—provides an edge to potentially increase earnings faster

Small companies tend to be riskier than large companies.

INVEST WITH CONFIDENCE®

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.
