

Franklin Mutual Global Discovery Fund

Deep Value
March 31, 2021

Fund Fact Sheet | Share Class: Z

Fund Description

The fund seeks capital appreciation. Its strategy is focused on undervalued mid- and large-cap equity securities, with a significant portion of its assets in foreign securities and, to a lesser extent, distressed securities and merger arbitrage.

What Are the Risks?

All investments involve risks, including possible loss of principal. Value securities may not increase in price as anticipated or may decline further in value. Special risks are associated with foreign investing, including currency fluctuations, economic instability and political developments. To the extent that the fund focuses on particular countries, regions, industries, sectors or types of investment from time to time, the fund may be subject to greater risks of adverse developments in such areas of focus than a fund that invests in a wider variety of countries, regions, industries, sectors or investments. Because the fund may invest its assets in companies in a specific region, including Europe, it is subject to greater risks of adverse developments in that region and/or the surrounding regions than a fund that is more broadly diversified geographically. Current political uncertainty concerning the economic consequences of the departure of the United Kingdom from the European Union may increase market volatility. Smaller-company stocks have exhibited greater price volatility than larger-company stocks, particularly over the short term. The fund's investments in companies engaged in mergers, reorganizations or liquidations also involve special risks as pending deals may not be completed on time or on favorable terms. The fund may invest in lower-rated bonds, which entail higher credit risk. Please consult the prospectus for a more detailed description of the fund's risks.

Glossary

Beta: A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Investors should carefully consider a fund's investment goals, risks, charges and expenses before investing. To obtain a summary prospectus and/or prospectus, which contains this and other information, talk to your financial professional, call us at (800) DIAL BEN/342-5236 or visit franklintempleton.com. Please carefully read a prospectus before you invest or send money.

Information is historical and may not reflect current or future portfolio characteristics. All portfolio holdings are subject to change.

Net Returns (NR) include income net of tax withholding when dividends are paid.
