EQUITY & DEBT MARKET OUTLOOK

Equity Markets Round Up: April 2021

For the third month in a row, Developed Market equity outperformed EM equity during the month of April. The MSCI World index (USD) was up 4.52% while MSCI EM index (USD) was up only 2.37%. EM equity was impacted by the second wave of Coronavirus and rising partial lockdowns, while economic data in developed economies showed significant improvement. While data has been particularly strong in the US, data from Europe has shown improvement as well. The US GDP is estimated to have grown at 6.4% annualised rate in Q1, CY 2021 (advance estimates). In other data points, the US consumer spending is back to pre-pandemic levels, likely supported by the stimulus package provided by the Biden administration. The global composite PMI is at a 6-year high (HSBC data), with manufacturing showing strength in almost all markets. Separately, the Chinese central bank asked banks to curtail loan growth for the rest of the year after a surge in the first two months stoked bubble risks.

Flows into EM equity remained positive during the month but were much lesser at USD 8.4 BN (vs USD 21.9 BN in March, JPM data). YTD, in 2021, flows in EM equity stand at USD 79.5 BN (JPM data). FPI flows into Indian equity were negative after a period of six months at Rs. 9,659 crores (USD 1.3 BN). Mutual Funds however, were buyers of equity at Rs. 5,926 crores.

Commodities continued to rally. Iron ore was up 20% during the month, while cotton was up nearly 9% and copper was up 12%. Crude (Brent) was up 6% during the month. The LME (London Metals index of six industrial metals) was up 10.6% during the month. It is up 75% YoY at the end of April. Likewise, the S&P index of Agricultural commodities is up 70% during the year to April.

The Indian equity markets were impacted by the very sharp rise in CoVID cases in the second wave. The number of fresh cases in the last week almost reached a level of 400,000 per day (from about 100,000 cases / day at the beginning of April). Unlike the situation in the first wave when COVID cases were predominantly there in urban areas, news reports (and commentary from select corporates) suggest that rural India has also been impacted by the virus this time around. This, combined with partial lockdowns in many states, will impact economic activity in the current quarter. Railway freight traffic has shown some moderation in the second half of April. However, the supply side has not been substantially impacted yet as there is no hard lockdown in the country. Sell side economists have cut their GDP growth estimates for FY 22 by about 200 bps. Credit growth for the system at the end of March was somewhat tepid at 4.9%.

In terms of market performance, as the attached table shows, sectoral performance was sharply polarised. While the Nifty was virtually flat during the month, the BSE metals index was up 24%. The only other index which showed double digit growth was the healthcare index. In terms of results declared so far, metals, staples and industrials have done well. In IT, deal wins for companies have surprised positively while revenue numbers were largely in line. Financials were a mixed bag, with large banks showing good performance while some NBFCs, which were exposed to rural areas, having greater provisions.

In macroeconomic data, CPI inflation for March came in at 5.52%. Food prices and base effect contributed to this rise. However, core inflation remains sticky. Going forward, economists expect inflation to come off as base effect comes into play. Higher input costs will pressure companies to take price hikes. The RBI will have to be vigilant in this regard.

Outlook

We have seen the sharp surge in Coronavirus cases of late. The situation is dynamic and it is difficult for us to say how the events will pan out in the next few months. It is quite likely that with greater focus on improved medical care and with greater number of vaccinations, the number of cases should decline. Once the pandemic subsides the economic activity should recover as we saw in the second half last year. However, given that a larger group of people have been impacted in the second wave, the consumer demand might take time to recover. As such, we think the markets will be in a sideways zone in the near term as while growth in sales and profit of companies is likely to be good, markets will watch for the slowdown of COVID cases, movement in inflation and bond yields and global risk appetite. If bond yields rise in the developed markets, it is possible that flows to EMs may be impacted in the near term, leading to increased volatility. Global central banks will have to handle messaging going forward, and they will have to be watchful for potential rise in asset prices raising fears of a bubble. Investors should continue to focus on having a diversified portfolio and investing in companies with quality businesses, having moderate levels of debt and visibility of growth as these generally should do well over the medium to long term.

Fixed Income Market Update: April 2021

- During the month money market rates remained benign and mostly range bound and medium to long end corporate bond and gilt yields fell. Ample banking system liquidity, RBI's Open Market operations and dovish stance were the main reasons.
- At its review held on 7th April, RBI MPC kept key rates unchanged and stance accommodative. RBI MPC announced a more structured and predictable mechanism of doing Open Market operations called GSap 1.0 (Government Securities Acquisition Programme) whereby they have now announced upfront Rs 1 lakh cr of OMO purchases for the qtr April to June 2021. Of this, Rs 25000 cr worth of OMOs were conducted in April. Besides this as per data available RBI also conducted about 16000 cr of creeping secondary market purchases in April 2021.
- RBI also kept up a large surprise element in the weekly primary Gsec auctions whereby they rejected all bids in 5 yr gilt benchmark and 10 y gilt benchmark and also devolved 5 yr benchmark on PDs in successive auctions. This led to yields falling and short sellers covering their positions.
- RBI also conducted conversion of government securities by selling 2022 to 2024 securities and issuing 2035 and 2061 securities. While the announced amount was Rs 20,000 cr, issued was Rs 7093 cr.
- The ten yr gilt benchmark ended the month at 6.03%, 14 bps lower than previous month.
- Corporate bonds yields also fell. The 3 yr AAA benchmark and the 10 yr AAA benchmark ended the month at 4.82% and 6.72% respectively compared to 5.48% and 7.19% in the previous month.
- 1 year CD rates closed at 3.90%, 48 bps lower than previous month. 3 month CD rates closed at 3.30, marginally higher than previous month.
- Brent Crude Oil prices rose further to end the month at USD 66.53 per barrel from USD 62.41 per barrel in previous month. INR depreciated to 74.08 during the month from 73.11 in previous month. For the month of April, FPIs were net sellers in the debt market to the tune of Rs 1124 cr. 10 yr US treasury yields softened during the month to end at 1.63% compared to 1.74% at previous month end.
- CPI inflation for March came in at 5.52% compared to 5.03% in previous month reflecting continued inflationary pressures.
- February Industrial production (IIP) growth came at -3.60% compared to -0.90% for previous month reflecting some loss in momentum.
- Banking System Liquidity remains ample. For the month of April the monthly average surplus was Rs 5.48 lakh cr.
- During the month, RBI released the calendar for States Borrowing for the quarter April to June 2021 which is pegged at Rs 1.78 lakh cr. Of which States were scheduled to raise Rs 48,650 cr in April however they ended up raising only Rs 9150 cr. Thus 10 yr SDL spreads remained in a range of 65 to 75 bps.

Outlook:

- We expect Banking System liquidity to remain comfortable in the range of Rs 5 to 6.5 lakh crores for the month of May. Short term CD and CP rates and Overnight rates may remain stable and low given the ample banking system liquidity.
- We expect RBI to continue to conduct Gilt OMOs in the range of Rs 40-45000 cr and this would help in supporting gilt prices.
- Slowdown in economic activity due to second wave of COVID may yet again put pressure on government finances especially tax revenues in the coming months.

How to Read Factsheet

Fund Manager - An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount For Fresh Subscription - This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount - This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield To Maturity - The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP - SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV - The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark - A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year G-sec.

Entry Load - A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load - Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is ₹ 100 and the exit load is 1%, the redemption price would be ₹ 99 per unit.

Modified Duration - Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation - Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio - The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta - Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM - AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings - The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature Of Scheme - The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile - Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

MAAUM - Monthly Average Asset Under Management

IDCW - IDCW stands for 'Income Distribution cum Capital Withdrawal option'. The amounts can be distributed out of investors' capital (Equalization Reserve), which is part of the sale price that represents realized gains, as may be declared by the Trustees at its discretion from time to time (subject to the availability of distributable surplus as calculated in accordance with the Regulations).

Cash & Cash Equivalents includes Net Current Assets of the Scheme

Scheme Yield - Weighted Average valuation yield of the Assets including the Cash & Cash Equivalents

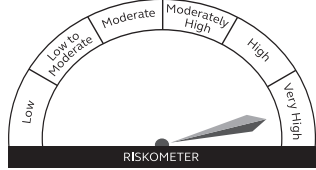

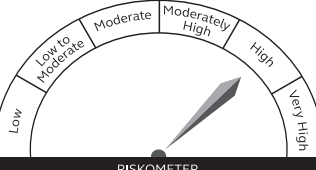

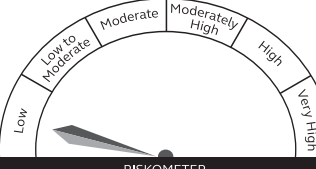

++ ICRA has assigned credit risk rating of [ICRA]A1+mfs to Principal Cash Management Fund. Rating methodology used by ICRA is based on evaluating the inherent credit quality of the mutual funds portfolio. As a measure of the credit quality of a debt fund's assets, ICRA uses the concept of "credit scores", based on ICRA's assessment of credit risk associated with each exposure of the portfolio taking into account its maturity. To quantify the credit risk scores, ICRA uses its database of historical default rates for various rating categories for various maturity buckets. The credit risk ratings incorporate ICRA's assessment of a debt fund's published investment objectives and policies, its management characteristics, and the creditworthiness of its investment portfolio. ICRA reviews relevant fund information on an ongoing basis to support its published rating opinions. If the portfolio credit score meets the benchmark of the assigned rating during the review, the rating is retained. In an event that the benchmark credit score is breached, ICRA gives a month's time to the debt fund manager to bring the portfolio credit score within the benchmark credit score. If the debt fund manager is able to reduce the portfolio credit score within the benchmark credit score, the rating is retained. If the portfolio still continues to breach the benchmark credit score, the rating is revised to reflect the change in credit quality. The ratings should, however, not be construed as an indication of the prospective performance of the Mutual fund scheme or of volatility in its returns. ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance which may lead to a revision in ratings. **Source: ICRA Ltd.**

Inception Date - Dec 30, 2019

Different plans shall have a different expense structure. Returns shown above are for Regular Plan - Growth option. **Past performance may or may not be sustained in the future.**

The returns shown above are calculated using XIRR approach (CAGR Returns) assuming investment of ₹10,000/- on the 1st business day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. Load is not taken into consideration for computation of performance.

For performance of all schemes, Investors are advised to refer 'Returns' section on page 30.

Disclaimer: The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or guarantee protection against a loss in a declining market.

Mr. Ravi Gopalakrishnan manages Principal Emerging Bluechip Fund, Principal Focused Multicap Fund and Principal Dividend Yield Fund (w.e.f. October 2019).

Mr. Ravi Gopalakrishnan manages Principal Multi Cap Growth Fund, Equity portion of Principal Balanced Advantage Fund and Mr. Siddarth Mohta has been appointed as a Associate Fund Manager of Principal Multi Cap Growth Fund, (w.e.f. August 2018).

Mr. Ravi Gopalakrishnan & Mr. Siddarth Mohta manages Principal Small Cap Fund (w.e.f. May 2019).

Mr. Ravi Gopalakrishnan & Mr. Sudhir Kedia manages Principal Midcap Fund (w.e.f. Dec 2019).

Mr. Sudhir Kedia manages Principal Tax Savings Fund, Principal Tax Saver Fund and Equity portion of Principal Equity Savings Fund (w.e.f. October 2019).

*Since performance data for Nifty Dividend Opportunities 50 Index is not available, SIP performance since inception period is not provided.

Since Inception SIP	30,00,000	16.73	3,65,79,402	Not Available			

Inception Date - March 31, 1996

Different plans shall have a different expense structure. Returns shown above are for Regular Plan - Growth option. **Past performance may or may not be sustained in the future.**

The returns shown above are calculated using XIRR approach (CAGR Returns) assuming investment of ₹10,000/- on the 1st business day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. Load is not taken into consideration for computation of performance.

For performance of all schemes, Investors are advised to refer 'Returns' section on page 30.

Disclaimer: The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or guarantee protection against a loss in a declining market.

Mr. Sudhir Kedia manages Principal Tax Savings Fund, Principal Tax Saver Fund and Equity portion of Principal Equity Savings Fund (w.e.f. October 2019).

[†]Since TRI data is not available for the period 31-03-1996 to 30-06-1999 for Nifty 50 Index, SIP performance for since inception period is not provided.

**Since TRI data is not available for the period 31-03-1996 to 26-11-1998 for Nifty 500 Index, SIP performance for since inception period is not provided.

Principal Large cap Fund has completed 6 months but has not completed 1 year
