The performance data quoted represents past performance and does not guarantee future results. Current performance may be higher or lower. The investment return and principal of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Visit mfamfunds.com for returns current to the most recent month end.

*The inception date for the Institutional Class is 6/17/2014 and the Investor Class is 6/16/2009.

Based on total return. *The Fund's net expense ratios reflect fee waivers and expense reimbursements by the investment advisor. The Adviser has contractually agreed to pay, waive or absorb a portion of the Global Opportunities Fund's expenses through the end of December 2021, or such later date as may be determined by the Global Opportunities Fund and the Adviser.

Market Capitalization

Investors should consider the investment objectives, risks, charges, and expenses of a fund carefully before investing. For a prospectus or summary prospectus containing this and other information for MFAM Funds call your financial advisor or visit us online at mfamfunds.com. Please read the prospectus or summary prospectus before investing.

Mutual fund investing involves risk, including possible loss of principal. "Value" stocks can continue to be undervalued by the market for long periods of time. Small-cap company stocks tend to be more volatile and less liquid than large-company stocks. Adverse fluctuations in currency exchange rates can cause losses or reduced gains on foreign investments. Emerging market countries present risks in addition to and greater than those of developed foreign markets, such as lax regulation, less liquid markets, and political and economic instability.

MFAM Funds are distributed by Foreside Funds Distributors LLC, Berwyn, Pa., a registered broker dealer not affiliated with The Motley Fool.

As of 3/31/2021, the Institutional Class of the MFAM Global Opportunities Fund was rated among 762 and 645 of World Large Stock funds of World Large Stock funds in the last three and five years and received 4 and 5 stars rating respectively. As of 3/31/2021, the Investor Class of the MFAM Global Opportunities Fund was rated among 762, 645 and 395 of World Large Stock funds in the last three, five and ten years and received 4, 4 and 4 stars rating respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Ratings are for the share class shown only; other classes may vary. Past performance is no guarantee of future results.
