

NORTHERN ENGAGE360™ FUND

MUTUAL FUND

AS OF 1Q21

Investment Objective

The investment objective is to achieve long-term capital appreciation through a diversified portfolio of global equities.

Investment Approach

The Fund utilizes a multi-manager approach to allocate to sub-advisers based on their investment expertise and a demonstrated commitment to advancing and promoting diversity. The fund will invest at least 80% of its net assets in equity securities of companies listed on a domestic or foreign exchange. Under normal circumstances, the Fund will invest at least 40%, and may invest up to 100%, of its net assets in equity securities of companies economically tied to a non-U.S. country, including emerging and frontier market countries.

Performance quoted represents past performance and does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown here. Performance data current to the most recent month end is available by calling 800-595-9111.

Northern Trust Investments, Inc. ("NTI" or the "Investment Adviser") has contractually agreed to reimburse a portion of the operating expenses of the Fund (other than Acquired Fund Fees and Expenses and extraordinary expenses) to the extent the "Total Annual Fund Operating Expenses" exceed 0.70%. This contractual limitation may not be terminated before July 31, 2021 without the approval of the Fund's Board of Trustees. The Total Annual Fund Operating Expenses After Expense Reimbursement may be higher than the contractual expense reimbursement rate below due to excepted expenses, including Acquired Fund Fees and Expenses, that are not reimbursed. In the absence of contractual expense reimbursements, yield, total return, growth since inception and dividends would have been reduced. Total return is based on net change in NAV assuming reinvestment of distributions.

DISCLOSURE AND RISKS

All data is as of date indicated and subject to change.

Emerging and Frontier Markets Risk: Emerging and frontier market investing may be subject to additional economic, political, liquidity and currency risks not associated with more developed countries. Additionally, frontier countries generally have smaller economies or less developed capital markets than traditional emerging markets and, as a result, the risks of investing in emerging market countries are magnified in frontier countries.

Equity Risk: Equity securities (stocks) are more volatile and carry more risk than other forms of investments, including investments in high-grade fixed-income securities. The net asset value per share of this Fund will fluctuate as the value of the securities in the portfolio changes.

Foreign (Non-U.S.) Securities Risk: Investing in foreign (non-U.S.) securities may result in the Fund experiencing more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies, due to less liquid markets, foreign government intervention and adverse economic, political, diplomatic, financial and regulatory factors.

Multi-Manager Risk: is the risk that the sub-advisers' investment styles will not always be complementary, which could affect the performance of the Fund.

DEFINITIONS

¹ MSCI All Country World Index (MSCI ACWI): A free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indices comprising 23 developed and 23 emerging market country indices. The index is calculated net of foreign tax withholdings. It is not possible to invest directly in an index.

Beta: Beta represents the systematic risk of a portfolio and measures its sensitivity to a benchmark.

Down Market Capture: A measure of a managers performance in down markets relative to the market.

Information Ratio: A measure of risk-adjusted relative return.

Price-to-Book Ratio: A ratio used to compare a stocks market value to its book value. It is calculated by dividing the current price of the stock by the latest quarters book value per share.

Return on Equity: Amount of net income returned as a percentage of shareholders equity.

Trailing 12-month Price-to-Earnings Ratio: The sum of a companys price-to-earnings. Calculated by taking the current stock price and dividing it by the current earnings per share for the past 12 months.

Up Market Capture: A measure of a managers performance in up markets relative to the market.
