

**American Beacon Balanced Fund
American Beacon International Equity Fund
American Beacon Large Cap Value Fund**

**Supplement dated May 14, 2021 to the
Prospectus, Summary Prospectuses, and Statement of Additional Information, each dated February 28, 2021**

Effective May 6, 2021, Mark M. Michel of American Beacon Advisors, Inc. no longer serves as an associate portfolio manager for the American Beacon Balanced Fund, American Beacon International Equity Fund, and American Beacon Large Cap Value Fund (the "Funds"). Accordingly, effective as of May 6, 2021, all references to Mr. Michel in the Funds' Prospectus, Summary Prospectuses, and Statement of Additional Information are deleted.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE

* Formerly known as the Institutional Class.

As of January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of a Fund's shareholder reports are no longer sent by mail, unless you specifically request paper copies of the reports from a Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports are made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from a Fund or your financial intermediary electronically by going to www.americanbeaconfunds.com and clicking on "Quick Links" and then "Register for E-Delivery."

You may elect to receive all future reports in paper free of charge. You can inform a Fund that you wish to continue receiving paper copies of your shareholder reports by calling 1-800-658-5811, option 1, or you may directly inform your financial intermediary of your wish. A notice that will be mailed to you each time a report is posted will also include instructions for informing a Fund that you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held with the American Beacon Funds Complex or your financial intermediary, as applicable.

This Prospectus contains important information you should know about investing, including information about risks. Please read it before you invest and keep it for future reference.

As with all mutual funds, the Securities and Exchange Commission has not approved or disapproved these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Investment Objective

The Fund's investment objective is income and capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales discounts if you and your eligible family members invest, or agree to invest in the future, at least \$50,000 in all classes of the American Beacon Funds on an aggregated basis. More information about these and other discounts is available from your financial professional and in "Choosing Your Share Class" on page 67 of the Prospectus and "Additional Purchase and Sale Information for A Class Shares" on page 66 of the statement of additional information ("SAI"). With respect to purchases of shares through specific intermediaries, you may find additional information regarding sales charge discounts and waivers in Appendix A to the Fund's Prospectus entitled "Intermediary Sales Charge Discounts and Waivers and Other Information." Although the Fund does not impose any sales charge on Y Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder Fees (fees paid directly from your investment)

Share Class	A	C	Y	Advisor	R5	Investor
Maximum sales charge imposed on purchases (as a percentage of offering price)	5.75%	None	None	None	None	None
Maximum deferred sales charge (as a percentage of the lower of original offering price or redemption proceeds)	0.50% ¹	1.00%	None	None	None	None

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

Share Class	A	C	Y	Advisor	R5	Investor
Management Fees ²	0.52%	0.52%	0.52%	0.52%	0.52%	0.52%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.00%	0.25%	0.00%	0.00%
Other Expenses ³	0.25%	0.24%	0.25%	0.40%	0.17%	0.49%
Total Annual Fund Operating Expenses⁴	1.02%	1.76%	0.77%	1.17%	0.69%	1.01%

- 1 A contingent deferred sales charge ("CDSC") of 0.50% will be charged on certain purchases of \$1,000,000 or more of A Class shares that are redeemed in whole or part within 18 months of purchase.
- 2 Management Fees have been restated to reflect the current fees.
- 3 Other Expenses exclude extraordinary expenses incurred during the fiscal year ended October 31, 2020. If the extraordinary expenses had been included, Other Expenses would have been 0.28% for A Class shares, 0.27% for C Class shares, 0.28% for Y Class shares, 0.43% for Advisor Class shares, 0.20% for R5 Class shares, and 0.52% for Investor Class shares.
- 4 Due to the restatement of management fees and the exclusion of extraordinary expenses from Other Expenses, the Total Annual Fund Operating Expenses do not correlate to the ratio of expenses to average net assets provided in the Financial Highlights table.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
A	\$ 673	\$ 881	\$ 1,106	\$ 1,751
C	\$ 279	\$ 554	\$ 954	\$ 2,073
Y	\$ 79	\$ 246	\$ 428	\$ 954
Advisor	\$ 119	\$ 372	\$ 644	\$ 1,420
R5	\$ 70	\$ 221	\$ 384	\$ 859
Investor	\$ 103	\$ 322	\$ 558	\$ 1,236

Assuming no redemption of shares:

Share Class	1 Year	3 Years	5 Years	10 Years
C	\$ 179	\$ 554	\$ 954	\$ 2,073

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 82% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, between 50% and 70% of the Fund's total assets are invested in equity securities and between 30% and 50% of the Fund's total assets are invested in debt securities.

The Fund's equity investments may include common stocks, convertible securities, real estate investment trusts ("REITs"), American Depositary Receipts ("ADRs") and U.S. dollar-denominated foreign stocks traded on U.S. exchanges (collectively referred to as "stocks"). The Fund may invest in companies of all market capitalizations. The Manager allocates the assets of the Fund among different sub-advisors.

The Manager believes that this strategy may help the Fund outperform other investment styles over the longer term while reducing volatility and downside risk.

The Fund's sub-advisors select stocks that, in their opinion, have most or all of the following characteristics (relative to the S&P 500® Index):

- above-average earnings growth potential,
- below-average price to earnings ratio,
- below-average price to book value ratio, and
- above-average dividend yields.

Each of the Fund's sub-advisors determines the earnings growth prospects of companies based upon a combination of internal and external research using fundamental analysis and considering changing economic trends. The sub-advisors typically seek to invest in companies that they believe to be undervalued at the time of purchase. The decision to sell a stock is typically based on the belief that the company is no longer considered undervalued or shows deteriorating fundamentals, or that better investment opportunities exist in other stocks.

The Fund's debt securities may include: obligations of the U.S. Government, its agencies and instrumentalities, including U.S. Government-sponsored enterprises (some of which are not backed by the full faith and credit of the U.S. Government); U.S. and U.S. dollar-denominated foreign corporate debt securities, such as notes and bonds, mortgage-backed securities; asset-backed securities; and variable and floating rate securities.

The Fund will only buy debt securities that are deemed by the Manager or sub-advisors, as applicable, to be investment grade at the time of the purchase. If an investment held by the Fund is downgraded below investment grade, the Manager or sub-advisors, as applicable will take action that they believe to be advantageous to the Fund. The Fund has no limitations regarding the duration of the debt securities it can buy. The Fund may have significant exposure to the Financials sector. However, as the sector composition of the Fund's portfolio changes over time, the Fund's exposure to the Financials sector may be lower at a future date, and the Fund's exposure to other market sectors may be higher.

In determining which debt securities to buy and sell, the Manager and the sub-advisors generally use a "top-down" or "bottom-up" investment strategy, or a combination of both strategies. The top-down fixed income investment strategy is implemented as follows:

- Develop an overall investment strategy, including a portfolio duration target, by examining the current trends in the U.S. economy.
- Set desired portfolio duration structure by comparing the differences between corporate and U.S. Government securities of similar duration to judge their potential for optimal return in accordance with the target duration benchmark.
- Determine the weightings of each security type by analyzing the difference in yield spreads between corporate and U.S. Government securities.
- Select specific debt securities within each security type.
- Review and monitor portfolio composition for changes in credit, risk-return profile and comparisons with benchmarks.

The bottom-up fixed income investment strategy is implemented as follows:

- Search for eligible securities with a yield to maturity advantage versus a U.S. Government security with a similar duration.
- Evaluate credit quality of the securities.
- Perform an analysis of the expected price volatility of the securities to changes in interest rates by examining actual price volatility between U.S. Government and non-U.S. Government securities.

The Fund may invest cash balances in other investment companies, including money market funds, and may purchase and sell futures contracts to gain market exposure on cash balances or reduce market exposure in anticipation of liquidity needs. The Fund may seek to earn additional income by lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis.

Principal Risks

There is no assurance that the Fund will achieve its investment objective and you could lose part or all of your investment in the Fund. The Fund is not designed for investors who need an assured level of current income and is intended to be a long-term investment. The Fund is not a complete investment program and may not be appropriate for all investors. Investors should carefully consider their own investment goals and risk tolerance before investing in the Fund. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Allocation Risk

The Manager's and a sub-advisor's judgments about, and allocations among, strategies, asset classes and market exposures may adversely affect the Fund's performance. There can be no assurance, particularly during periods of market disruption and stress, that the Manager's and a sub-advisor's judgments about asset allocation will be correct.

Asset-Backed and Mortgage-Related Securities Risk

Investments in asset-backed and mortgage-related securities are influenced by the factors affecting the assets underlying the securities or the housing market. Investments in asset-backed and mortgage-related securities also are subject to market risks for fixed-income securities, which include, but are not limited to, credit risk, interest rate risk, prepayment and extension risk, callable securities risk, valuation risk, and liquidity risk. A decline in the credit quality of the issuers of asset-backed and mortgage-related securities or instability in the markets for such securities may affect the value and liquidity of such securities, which could result in losses to the Fund. These securities are also subject to the risk of default on the underlying assets or mortgages, particularly during periods of market downturn, and an unexpectedly high rate of defaults on the underlying assets will adversely affect the security's value. Additionally, certain mortgage-related securities may include securities backed by pools of loans made to "subprime" borrowers or borrowers with blemished credit histories; the risk of defaults is generally higher in the case of mortgage pools that include such subprime mortgages.

Asset Selection Risk

Assets selected by a sub-advisor or the Manager for the Fund may not perform to expectations. The investment models used to manage the Fund may rely in part on data derived from third parties and may not perform as intended. This could result in the Fund's underperformance compared to other funds with similar investment objectives.

Callable Securities Risk

The Fund may invest in fixed-income securities with call features. A call feature allows the issuer of the security to redeem or call the security prior to its stated maturity date. In periods of falling interest rates, issuers may be more likely to call in securities that are paying higher coupon rates than prevailing interest rates. In the event of a call, the Fund would lose the income that would have been earned to maturity on that security, and the proceeds received by the Fund may be invested in securities paying lower coupon rates and may not benefit from any increase in value that might otherwise result from declining interest rates.

Credit Risk

The Fund is subject to the risk that the issuer or guarantor of a debt security, or the counterparty to a derivatives contract, may fail, or become less able, to make timely payment of interest or principal or otherwise honor its obligations or default completely. Changes in the actual or perceived creditworthiness of an issuer, or a downgrade or default affecting any of the Fund's securities, could affect the Fund's performance.

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Fund and its service providers as well as the ability of shareholders to transact with the Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund or its service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Dividend Risk

An issuer of stock held by the Fund may choose not to declare a dividend or the dividend rate might not remain at current levels or increase over time. Dividend paying stocks might not experience the same level of earnings growth or capital appreciation as non-dividend paying stocks.

Equity Investments Risk

Equity securities are subject to investment risk and market risk. The Fund may invest in the following equity securities, which may expose the Fund to the following additional risks:

- **Common Stock Risk.** The value of a company's common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.
- **Convertible Securities Risk.** Convertible securities are subject to the risk that the credit standing of the issuer may have an effect on the convertible securities' investment value. Convertible securities are also sensitive to movements in interest rates. Generally, a convertible security is subject to the market risks of stocks when the underlying stock's price is high relative to the conversion price, and is subject to the market risks of debt securities when the underlying stock's price is low relative to the conversion price.
- **Depository Receipts and U.S. Dollar-Denominated Foreign Stocks Traded on U.S. Exchanges Risk.** Depository receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depository receipt or foreign stock, less liquidity, more volatility, less government regulation and supervision and delays in transaction settlement.
- **Real Estate Investment Trusts ("REITs") Risk.** Investments in REITs are subject to the risks associated with investing in the real estate industry, including, among other risks: adverse developments affecting the real estate industry; declines in real property values; changes in interest rates; defaults by mortgagors or other borrowers and tenants; lack of availability of mortgage funds or financing; extended vacancies of properties, especially during economic downturns; casualty or condemnation losses; and governmental actions, such as changes to tax laws, zoning regulations or environmental regulations. REITs also are dependent upon the skills of their managers and are subject to heavy cash flow dependency or self-liquidation. Regardless of where a REIT is organized or traded, its performance may be affected significantly by events in the region where its properties are located. Domestic REITs could be adversely affected by failure to qualify for tax-free "pass-through" of distributed net income and net realized gains under the Internal Revenue Code of 1986, as amended ("Internal Revenue Code"), or to maintain their exemption from registration under the Investment Company Act of 1940, as amended ("Investment Company Act"). REITs typically incur fees that are separate from those incurred by the Fund. Accordingly, the Fund's investment in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. The value of REIT common stock may decline when interest rates rise. REITs tend to be small- to mid-capitalization securities and, as such, are subject to the risks of investing in small- to mid-capitalization securities.

Foreign Investing Risk

Non-U.S. investments carry potential risks not associated with U.S. investments. Such risks include, but are not limited to: (1) currency exchange rate fluctuations, (2) political and financial instability, (3) less liquidity, (4) lack of uniform accounting, auditing and financial reporting standards, (5) greater volatility, (6) different government regulation and supervision of foreign stock exchanges, brokers and listed companies, and (7) delays in transaction settlement in some foreign markets. The Fund's investment in a foreign issuer may subject the Fund to regulatory, political, currency, security, economic and other risks associated with that country. Global economic and financial markets are becoming increasingly interconnected and conditions (including recent volatility and instability) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Futures Contracts Risk

Futures contracts are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date. The use of such derivative instruments may expose the Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities underlying those derivatives. There can be no assurance that any strategy used will succeed. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes. There also can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that the Fund has previously bought or sold, and this may result in the inability to close a futures contract when desired. Futures contracts may experience potentially dramatic price changes, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). Equity index futures contracts expose the

Fund to volatility in an underlying securities index. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Interest Rate Risk

Generally, the value of investments with interest rate risk, such as fixed income securities or derivatives, will move in the opposite direction to movements in interest rates. The prices of fixed income securities or derivatives are also affected by their durations. Fixed income securities or derivatives with longer durations generally have greater sensitivity to changes in interest rates. For example, if a bond has a duration of eight years, a 1% increase in interest rates could be expected to result in an 8% decrease in the value of the bond. An increase in interest rates can impact markets broadly as well. As of the date of this Prospectus, interest rates are historically low. Extremely low or negative interest rates may become more prevalent among U.S. and foreign issuers. To the extent the Fund holds an investment with a negative interest rate to maturity, the Fund may generate a negative return on that investment. Conversely, in the future, interest rates may rise, perhaps significantly and/or rapidly, potentially resulting in substantial losses to the Fund.

Investment Risk

An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets.

Large-Capitalization Companies Risk

The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities. Many larger-capitalization companies also may be unable to attain the high growth rates of successful smaller companies, especially during periods of economic expansion.

LIBOR Risk

Certain of the instruments identified in the Fund's principal investment strategies have variable or floating coupon rates that are based on the ICE LIBOR ("LIBOR"), Euro Interbank Offered Rate and other similar types of reference rates (each, a "Reference Rate"). These Reference Rates are generally intended to represent the rate at which contributing banks may obtain short-term borrowings from each other within certain financial markets. Arrangements are underway to phase out the use of LIBOR. These arrangements and any additional regulatory or market changes may have an adverse impact on the Fund or its investments, including increased volatility or illiquidity in markets for instruments that rely on LIBOR. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Fund and the financial markets generally. The transition process, or the failure of an industry to transition, could lead to increased volatility and illiquidity in markets for instruments that currently rely on LIBOR to determine interest rates and a reduction in the values of some LIBOR-based investments, all of which would impact the Fund. At this time, it is not possible to completely identify or predict the effect of any transition, establishment of alternative Reference Rates or other reforms to Reference Rates that may be enacted in the UK or elsewhere. In addition, any substitute Reference Rate and any pricing adjustments imposed by a regulator or by counterparties or otherwise may adversely affect the Fund's performance and/or NAV.

Liquidity Risk

The Fund is susceptible to the risk that certain investments held by the Fund may have limited marketability, be subject to restrictions on sale, be difficult or impossible to purchase or sell at favorable times or prices, or become less liquid in response to market developments or adverse credit events that may affect issuers or guarantors of a security. An inability to sell a portfolio position can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities. Market prices for such instruments may be volatile. The Fund could lose money if it is unable to dispose of an investment at a time that is most beneficial to the Fund. The Fund may be required to dispose of investments at unfavorable times or prices to satisfy obligations, which may result in losses or may be costly to the Fund. For example, liquidity risk may be magnified in rising interest rate environments due to higher than normal redemption rates. Unexpected redemptions may force the Fund to sell certain investments at unfavorable prices to meet redemption requests or other cash needs. Judgment plays a greater role in pricing illiquid investments than in investments with more active markets.

Market Risk

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple assets may decline in value simultaneously. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future. The value of a security may decline due to adverse issuer-specific conditions, general market conditions unrelated to a particular issuer, or factors that affect a particular industry or industries. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Changes in value may be temporary or may last for extended periods. Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, including changes in the U.S. presidential administration and Congress, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

- **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, widespread business closures and layoffs, travel restrictions and closed borders, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The impact of the COVID-19 pandemic may last for an extended

period of time and may result in a sustained economic downturn or recession. The U.S. Federal Reserve and the U.S. federal government have taken numerous measures to address the economic impact of the COVID-19 pandemic and stimulate the U.S. economy. The ultimate effects of these and other efforts that may be taken may not be known for some time.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets and has signaled that it plans to maintain its interventions at an elevated level. Amid these ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," and a trade agreement between the United Kingdom and the European Union, the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change.

Mid-Capitalization Companies Risk

Investing in the securities of mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since mid-capitalization companies may have narrower commercial markets and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity, and they can be particularly sensitive to expected changes in interest rates, borrowing costs and earnings.

Multiple Sub-Advisor Risk

The Manager may allocate the Fund's assets among multiple sub-advisors, each of which is responsible for investing its allocated portion of the Fund's assets. To a significant extent, the Fund's performance will depend on the success of the Manager in selecting and overseeing the sub-advisors and allocating the Fund's assets to sub-advisors. The sub-advisors' investment styles may not work together as planned, which could adversely affect the performance of the Fund. In addition, because each sub-advisor makes its trading decisions independently, it is possible that the sub-advisors may purchase or sell the same security at the same time without aggregating their transactions. This may cause unnecessary brokerage and other expenses.

Other Investment Companies Risk

To the extent that the Fund invests in shares of other registered investment companies, the Fund will indirectly bear the fees and expenses charged by those investment companies in addition to the Fund's direct fees and expenses. To the extent the Fund invests in other investment companies that invest in equity securities, fixed income securities and/or foreign securities, or that track an index, the Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject. The Fund will be subject to the risks associated with investments in those companies, including but not limited to the following:

- **Money Market Funds.** Investments in money market funds are subject to interest rate risk, credit risk, and market risk.

Prepayment and Extension Risk

Prepayment risk is the risk that the principal amount of a bond may be repaid prior to the bond's maturity date. Due to a decline in interest rates or excess cash flow, a debt security may be called or otherwise prepaid before maturity. If this occurs, no additional interest will be paid on the investment. The Fund may have to invest at a lower rate, may not benefit from an increase in value that may result from declining interest rates, and may lose any premium it paid to acquire the security. Variable and floating rate securities may be less sensitive to prepayment risk. Extension risk is the risk that a decrease in prepayments may, as a result of higher interest rates or other factors, result in the extension of a security's effective maturity, increase the risk of default and delayed payment, heighten interest rate risk and increase the potential for a decline in its price. In addition, as a consequence of a decrease in prepayments, the amount of principal available to the Fund for investment would be reduced.

Redemption Risk

The Fund may experience periods of high levels of redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. The sale of assets to meet redemption requests may create net capital gains, which could cause the Fund to have to distribute substantial capital gains. Redemption risk is heightened during periods of declining or illiquid markets. During periods of heavy redemptions, the Fund may borrow funds through the interfund credit facility or from a bank line of credit, which may increase costs. A rise in interest rates or other market developments may cause investors to move out of fixed income securities on a large scale. Heavy redemptions could hurt the Fund's performance.

Sector Risk

When the Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if the Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. As the Fund's portfolio changes over time, the Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations.

Securities Lending Risk

To the extent the Fund lends its securities, it may be subject to the following risks: i) the securities in which the Fund reinvests cash collateral may decrease in value, causing the Fund to incur a loss, or may not perform sufficiently to cover the Fund's payment to the borrower of a pre-negotiated fee or "rebate" for the use of that cash collateral in connection with the loan; ii) non-cash collateral may decline in value, resulting in the Fund becoming under-secured; iii)

delays may occur in the recovery of loaned securities from borrowers, which could result in the Fund being unable to vote proxies or settle transactions or cause the Fund to incur increased costs; and iv) if the borrower becomes subject to insolvency or similar proceedings, the Fund could incur delays in its ability to enforce its rights in its collateral.

Securities Selection Risk

Securities selected by a sub-advisor or the Manager for the Fund may not perform to expectations. It may not be possible to predict or to hedge against a widening in the yield of the securities selected by a sub-advisor. This could result in the Fund's underperformance compared to its benchmark index(es), or other funds with similar investment objectives or strategies.

Segregated Assets Risk

In connection with certain transactions that may give rise to future payment obligations, the Fund may be required to maintain a segregated amount of, or otherwise earmark, cash or liquid securities to cover the obligation. Segregated assets generally cannot be sold while the position they are covering is outstanding, unless they are replaced with other assets of equal value. The need to segregate cash or other liquid securities could limit the Fund's ability to pursue other opportunities as they arise.

Small-Capitalization Companies Risk

Investing in the securities of small-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since small-capitalization companies may have narrower commercial markets, and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity and they can be particularly sensitive to changes in interest rates, borrowing costs and earnings.

U.S. Government Securities and Government-Sponsored Enterprises Risk

A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only as to the timely payment of interest and principal when held to maturity. The market prices for such securities are not guaranteed and will fluctuate. Securities held by the Fund that are issued by government-sponsored enterprises, such as the Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac"), Federal Home Loan Bank ("FHLB"), Federal Farm Credit Bank ("FFCB"), and the Tennessee Valley Authority, are not guaranteed by the U.S. Treasury and are not backed by the full faith and credit of the U.S. government, and no assurance can be given that the U.S. government will provide financial support if these organizations do not have the funds to meet future payment obligations. U.S. government securities and securities of government-sponsored entities are also subject to credit risk, interest rate risk and market risk. The rising U.S. national debt may lead to adverse impacts on the value of U.S. government securities due to potentially higher costs for the U.S. government to obtain new financing.

U.S. Treasury Obligations Risk

The value of U.S. Treasury obligations may vary due to changes in interest rates. In addition, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's investments in obligations issued by the U.S. Treasury to decline. Certain political events in the U.S., such as a prolonged government shut down, may also cause investors to lose confidence in the U.S. government and may cause the value of U.S. Treasury obligations to decline.

Value Stocks Risk

Value stocks are subject to the risk that their intrinsic value may never be realized by the market or that their prices may decline. The Fund's investments in value stocks seek to limit potential downside price risk over time; however, value stock prices still may decline substantially. In addition, the Fund may produce more modest gains as a trade-off for this potentially lower risk. The Fund's investment in value stocks could cause the Fund to underperform funds that use a growth or non-value approach to investing or have a broader investment style.

Variable and Floating Rate Securities Risk

The coupons on variable and floating-rate securities are not fixed and may fluctuate based upon changes in market rates. A variable rate security has a coupon that is adjusted at pre-designated periods in response to changes in the market rate of interest on which the interest rate is based. The coupon on a floating rate security is generally based on an interest rate, such as a money-market index, LIBOR or a Treasury bill rate. Variable and floating rate securities are subject to interest rate risk and credit risk. As short-term interest rates decline, the coupons on variable and floating-rate securities typically decrease. Alternatively, during periods of rising short-term interest rates, the coupons on variable and floating-rate securities typically increase. Changes in the coupons of variable and floating-rate securities may lag behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of variable and floating-rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general. Conversely, variable and floating rate securities will not generally increase in value if interest rates decline. Certain types of variable and floating rate instruments may be subject to greater liquidity risk than other debt securities.

Fund Performance

The bar chart and table below provide an indication of risk by showing changes in the Fund's performance over time. The bar chart shows how the Fund's performance has varied from year to year. The table shows how the Fund's average annual total returns compare to a composite index and the two broad-based securities market indices that comprise the composite index, for the periods indicated.

The chart and the table show the performance of the Fund's Investor Class shares for all periods.

You may obtain updated performance information on the Fund's website at www.americanbeaconfunds.com. Past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Calendar year total returns for Investor Class Shares. Year Ended 12/31

Highest Quarterly Return:

15.36% 4th Quarter 2020
01/01/2011 through 12/31/2020

Lowest Quarterly Return:

-19.59% 1st Quarter 2020
01/01/2011 through 12/31/2020

Average annual total returns for periods ended December 31, 2020

	Inception Date of Class	1 Year	5 Years	10 Years

Russell 1000 Value Index		2.80%	9.74%	10.50%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local income taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The return after taxes on distributions and sale of Fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. If you are a tax-exempt entity or hold your Fund shares through a tax-deferred arrangement, such as an individual retirement account ("IRA") or a 401(k) plan, the after-tax returns do not apply to your situation. After-tax returns are shown only for Investor Class shares of the Fund; after-tax returns for other share classes will vary.

Management

The Manager

The Fund has retained American Beacon Advisors, Inc. to serve as its Manager.

Sub-Advisors

The Fund's assets are currently allocated among the Manager and the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Hotchkis and Wiley Capital Management, LLC

Portfolio Managers

American Beacon Advisors, Inc.	Gene L. Needles, Jr. Chief Executive Officer Since 2012	Samuel Silver Vice President, Fixed Income Investments Since 2014
	Paul B. Cavazos Chief Investment Officer Since 2016	Erin Higginbotham Senior Portfolio Manager Since 2011
	Kirk L. Brown Senior Portfolio Manager Since 2016	Mark M. Michel Associate Portfolio Manager Since 2018
Barrow, Hanley, Mewhinney & Strauss, LLC	Deborah A. Petruzzelli Portfolio Manager/Managing Director Since 2003	Mark C. Luchsinger Portfolio Manager/Senior Managing Director Co-Head of Fixed Income Since 1998
	Mark Giambrone Portfolio Manager/Senior Managing Director Since 2015	Rahul Bapna Portfolio Manager/Managing Director Since 2019
	J. Scott McDonald Portfolio Manager/Managing Director/ Co-Head of Fixed Income Since 1998

Purchase and Sale of Fund Shares

You may buy or sell shares of the Fund through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge. The Manager may, in its sole discretion, allow certain individuals to invest directly in the Fund. For more information regarding eligibility to invest directly please see "About Your Investment - Purchase and Redemption of Shares." Direct mutual fund account shareholders may buy subsequent shares or sell shares in various ways:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class only)	
Mail	American Beacon Funds P.O. Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$250
A, Investor	\$2,500	\$50	\$250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None

Tax Information

Dividends and capital gain distributions, and other distributions, if any, that you receive from the Fund are subject to federal income tax and may also be subject to state and local income taxes, unless you are a tax-exempt entity or your account is tax-deferred, such as an individual retirement account or a 401(k) plan (in which case you may be taxed later, upon the withdrawal of your investment from such account or plan).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and the Fund's distributor, Resolute Investment Distributors, Inc., or the Manager may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your individual financial professional to recommend the Fund over another investment. Ask your individual financial professional or visit your financial intermediary's website for more information.

American Beacon

Garcia Hamilton Quality Bond FundSM

Investment Objective

The Fund's investment objective is high current income consistent with preservation of capital.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** More information is available from your financial professional and in "Choosing Your Share Class" on page 67 of the Prospectus. Although the Fund does not impose any sales charge on Y Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder Fees (fees paid directly from your investment)

Share Class	Y	R5	Investor	R6
Maximum sales charge imposed on purchases (as a percentage of offering price)	None	None	None	None
Maximum deferred sales charge (as a percentage of the lower of original offering price or redemption proceeds)	None	None	None	None

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

Share Class	Y	R5	Investor	R6
Management Fees	0.55%	0.55%	0.55%	0.55%
Distribution and/or Service (12b-1) Fees	0.00%	0.00%	0.00%	0.00%
Other Expenses	0.19%	0.13%	0.65%	0.09%
Total Annual Fund Operating Expenses	0.74%	0.68%	1.20%	0.64%
Fee Waiver and/or expense reimbursement ¹	(0.23)%	(0.23)%	(0.37)%	(0.23)%
Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement²	0.51%	0.45%	0.83%	0.41%

1 American Beacon Advisors, Inc. (the "Manager") has contractually agreed to waive fees and/or reimburse expenses of the Fund's Y Class, R5 Class, Investor Class, and R6 Class shares, as applicable, through February 28, 2022 to the extent that Total Annual Fund Operating Expenses exceed 0.51% for the Y Class, 0.45% for the R5 Class, 0.83% for the Investor Class, and 0.41% for the R6 Class, (excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, securities lending fees, expenses associated with securities sold short, litigation, and other extraordinary expenses). The contractual expense reimbursement can be changed or terminated only in the discretion and with the approval of a majority of the Fund's Board of Trustees. The Manager will itself waive fees and/or reimburse expenses of the Fund to maintain the contractual expense ratio caps for each applicable class of shares. The Manager may also, from time to time, voluntarily waive fees and/or reimburse expenses of the Fund. The Manager can be reimbursed by the Fund for any contractual or voluntary fee waivers or expense reimbursements if reimbursement to the Manager (a) occurs within three years from the date of the Manager's waiver/reimbursement and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the lesser of the contractual percentage limit in effect at the time of the waiver/reimbursement or the time of the recoupment.

2 The Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement for Y Class shares do not correlate to the ratio of expenses to average net assets, net of reimbursements, provided in the Fund's Financial Highlights table, which reflects the Fund's expenses, including its fee waiver and/or expense reimbursement agreement in effect through February 28, 2021. The Annual Fund Operating Expenses table reflects the new fee waiver and/or expense reimbursement agreement that was approved by the Fund's Board effective through February 28, 2022, which differs from the prior agreement.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same, except that the Example reflects the fee waiver/expense reimbursement arrangement for each share class through February 28, 2022. Although your actual costs may be higher or lower, based on these assumptions, whether you redeem or hold your shares, your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
Y	\$52	\$213	\$389	\$897
R5	\$46	\$194	\$356	\$825
Investor	\$85	\$344	\$624	\$1,422
R6	\$42	\$182	\$334	\$777

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 122% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in investment grade bonds. For purposes of the 80% policy, investment grade bonds include other investment grade debt securities. The Fund considers investment grade debt securities to be debt securities that are rated A- or better by S&P Global Ratings ("S&P"), Moody's Investors Service, Inc. ("Moody's") or Fitch Ratings Inc. ("Fitch").

The types of investment grade debt securities that the Fund invests in primarily include obligations of the U.S. Government, its agencies and instrumentalities, including U.S. Government-sponsored enterprises (some of which are not backed by the full faith and credit of the U.S. Government), corporate bonds, debentures, and mortgage-backed securities. These types of obligations may have fixed-rate or floating-rate coupons (or variable rate coupons) and are commonly referred to as fixed income securities or bonds. If an investment held by the Fund is downgraded below investment grade, the sub-advisor may sell the security or request the Manager's permission to continue to hold the security. In selecting investment grade debt securities within the corporate sector, the sub-advisor first focuses on the largest U.S. issuers and companies rated A- or better by at least two of the three rating agencies. The sub-advisor then eliminates foreign companies, Yankee Bonds and alcohol, tobacco, gambling, and defense companies and evaluates the remaining issues based on the sustainability of their operations and their consideration for environmental, social, and governance ("ESG") principles as an integrated part of the sub-advisor's evaluation and investment process.

Under normal circumstances, the Fund seeks to maintain a weighted-average duration of zero to seven years. Duration is an indicator of a bond's price sensitivity to a change in interest rates. For example, a duration of seven years means that a security's price would be expected to decrease by approximately 7% with a 1% increase in interest rates. The Fund may invest in securities of any maturity, but typically invests in securities with maximum maturities of up to 30 years.

The sub-advisor follows a fixed income investment strategy that focuses on high current income, given its outlook for interest rates, and the preservation of capital. In selecting securities for the Fund, the sub-advisor employs a top-down approach, which includes a broad fundamental analysis of the current fixed income markets, including duration, the yield curve, and the performance of market sectors. Through this analysis, the sub-advisor creates defined parameters for the selection of investments for the Fund's portfolio and implements a proprietary investment process comprised of qualitative and quantitative components. The Fund may have significant exposure to the Financials sector. However, as the sector composition of the Fund's portfolio changes over time, the Fund's exposure to the Financials sector may be lower at a future date, and the Fund's exposure to other market sectors may be higher.

Principal Risks

There is no assurance that the Fund will achieve its investment objective and you could lose part or all of your investment in the Fund. The Fund is not a complete investment program and may not be appropriate for all investors. Investors should carefully consider their own investment goals and risk tolerance before investing in the Fund. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Callable Securities Risk

The Fund may invest in fixed-income securities with call features. A call feature allows the issuer of the security to redeem or call the security prior to its stated maturity date. In periods of falling interest rates, issuers may be more likely to call in securities that are paying higher coupon rates than prevailing interest rates. In the event of a call, the Fund would lose the income that would have been earned to maturity on that security, and the proceeds received by the Fund may be invested in securities paying lower coupon rates and may not benefit from any increase in value that might otherwise result from declining interest rates.

Credit Risk

The Fund is subject to the risk that the issuer or guarantor of a debt security may fail, or become less able, to make timely payment of interest or principal, or otherwise honor its obligations or default completely. Changes in the actual or perceived creditworthiness of an issuer, or a downgrade or default affecting any of the Fund's securities, could affect the Fund's performance.

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Fund and its service providers as well as the ability of shareholders to transact with the Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund or its service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Debentures Risk

Debentures are unsecured debt securities. The holder of a debenture is protected only by the general creditworthiness of the issuer. The Fund may invest in both corporate and government debentures.

Interest Rate Risk

Generally, the value of investments with interest rate risk, such as fixed income securities, will move in the opposite direction to movements in interest rates. The prices of fixed income securities are also affected by their durations. Fixed income securities with longer durations generally have greater sensitivity to changes in interest rates. For example, if a bond has a duration of seven years, a 1% increase in interest rates could be expected to result in a 7% decrease in the value of the bond. An increase in interest rates can impact markets broadly as well. As of the date of this Prospectus, interest rates are historically low. Extremely low or negative interest rates may become more prevalent among U.S. and foreign issuers. To the extent the Fund holds an investment with a negative interest rate to maturity, the Fund may generate a negative return on that investment. Conversely, in the future, interest rates may rise, perhaps significantly and/or rapidly, potentially resulting in substantial losses to the Fund.

Investment Risk

An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets.

LIBOR Risk

Certain of the instruments identified in the Fund's principal investment strategies have variable or floating coupon rates that are based on the ICE LIBOR ("LIBOR"), Euro Interbank Offered Rate and other similar types of reference rates (each, a "Reference Rate"). These Reference Rates are generally intended to represent the rate at which contributing banks may obtain short-term borrowings from each other within certain financial markets. Arrangements are

underway to phase out the use of LIBOR. These arrangements and any additional regulatory or market changes may have an adverse impact on the Fund or its investments, including increased volatility or illiquidity in markets for instruments that rely on LIBOR. There remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Fund and the financial markets generally. The transition process, or the failure of an industry to transition, could lead to increased volatility and illiquidity in markets for instruments that currently rely on LIBOR to determine interest rates and a reduction in the values of some LIBOR-based investments, all of which would impact the Fund. At this time, it is not possible to completely identify or predict the effect of any transition, establishment of alternative Reference Rates or other reforms to Reference Rates that may be enacted in the UK or elsewhere. In addition, any substitute Reference Rate and any pricing adjustments imposed by a regulator or by counterparties or otherwise may adversely affect the Fund's performance and/or NAV.

Liquidity Risk

The Fund is susceptible to the risk that certain investments held by the Fund may have limited marketability, be subject to restrictions on sale, be difficult or impossible to purchase or sell at favorable times or prices, or become less liquid in response to market developments or adverse credit events that may affect issuers or guarantors of a security. An inability to sell a portfolio position can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities. Market prices for such instruments may be volatile. The Fund could lose money if it is unable to dispose of an investment at a time that is most beneficial to the Fund. The Fund may be required to dispose of investments at unfavorable times or prices to satisfy obligations, which may result in losses or may be costly to the Fund. For example, liquidity risk may be magnified in rising interest rate environments due to higher than normal redemption rates. Unexpected redemptions may force the Fund to sell certain investments at unfavorable prices to meet redemption requests or other cash needs. Judgment plays a greater role in pricing illiquid investments than in investments with more active markets.

Market Risk

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple assets may decline in value simultaneously. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future. The value of a security may decline due to adverse issuer-specific conditions, general market conditions unrelated to a particular issuer, or factors that affect a particular industry or industries. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Changes in value may be temporary or may last for extended periods. Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, including changes in the U.S. presidential administration and Congress, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

- **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, widespread business closures and layoffs, travel restrictions and closed borders, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The impact of the COVID-19 pandemic may last for an extended period of time and may result in a sustained economic downturn or recession. The U.S. Federal Reserve and the U.S. federal government have taken numerous measures to address the economic impact of the COVID-19 pandemic and stimulate the U.S. economy. The ultimate effects of these and other efforts that may be taken may not be known for some time.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets and has signaled that it plans to maintain its interventions at an elevated level. Amid these ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," and a trade agreement between the United Kingdom and the European Union, the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change.

Mortgage-Backed and Mortgage-Related Securities Risk

Investments in mortgage-backed and mortgage-related securities are influenced by the factors affecting the mortgages underlying the securities or the housing market. Investments in mortgage-backed and mortgage-related securities also are subject to market risks for fixed income securities, which include, but are not limited to, credit risk, interest rate risk, prepayment risk, extension risk, callable securities risk, and valuation risk. A decline in the credit quality of the issuers of mortgage-backed and mortgage-related securities or instability in the markets for such securities may affect the value and liquidity of such securities, which could result in losses to the Fund. These securities are also subject to the risk of default on the underlying mortgages, particularly during periods of market downturn, and an unexpectedly high rate of defaults on the underlying assets will adversely affect the security's value.

Prepayment and Extension Risk

Prepayment risk is the risk that the principal amount of a bond may be repaid prior to the bond's maturity date. Due to a decline in interest rates or excess cash flow, a debt security may be called or otherwise prepaid before maturity. If this occurs, no additional interest will be paid on the investment. The Fund

may have to invest at a lower rate, may not benefit from an increase in value that may result from declining interest rates, and may lose any premium it paid to acquire the security. Variable and floating rate securities may be less sensitive to prepayment risk. Extension risk is the risk that a decrease in prepayments may, as a result of higher interest rates or other factors, result in the extension of a security's effective maturity, increase the risk of default and delayed payment, heighten interest rate risk and increase the potential for a decline in its price. In addition, as a consequence of a decrease in prepayments, the amount of principal available to the Fund for investment would be reduced.

Redemption Risk

The Fund may experience periods of high levels of redemptions that could cause the Fund to sell assets at inopportune times or at a loss or depressed value. The sale of assets to meet redemption requests may create net capital gains, which could cause the Fund to have to distribute substantial capital gains. Redemption risk is heightened during periods of declining or illiquid markets. During periods of heavy redemptions, the Fund may borrow funds through the interfund credit facility or from a bank line of credit, which may increase costs. A rise in interest rates or other market developments may cause investors to move out of fixed income securities on a large scale. Heavy redemptions could hurt the Fund's performance.

Sector Risk

When the Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if the Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. As the Fund's portfolio changes over time, the Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations.

Securities Selection Risk

Securities selected by the sub-advisor for the Fund may not perform to expectations. It may not be possible to predict or to hedge against a widening in the yield of the securities selected by the sub-advisor. This could result in the Fund's underperformance compared to its benchmark index(es), or other funds with similar investment objectives or strategies.

Socially Responsible Investing Risk

The Fund's incorporation of environmental, social and/or governance considerations in its investment strategy may cause it to make different investments than funds that have a similar investment style but do not incorporate such considerations in their strategy. The Fund may underperform funds that do not incorporate these considerations. The Fund may not be able to take advantage of certain investment opportunities due to these considerations, which may adversely affect investment performance.

U.S. Government Securities and Government-Sponsored Enterprises Risk

A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only as to the timely payment of interest and principal when held to maturity. The market prices for such securities are not guaranteed and will fluctuate. Securities held by the Fund that are issued by government-sponsored enterprises, such as the Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac"), Federal Home Loan Bank ("FHLB"), Federal Farm Credit Bank ("FFCB"), and the Tennessee Valley Authority, are not guaranteed by the U.S. Treasury and are not backed by the full faith and credit of the U.S. government, and no assurance can be given that the U.S. government will provide financial support if these organizations do not have the funds to meet future payment obligations. U.S. government securities and securities of government-sponsored entities are also subject to credit risk, interest rate risk and market risk. The rising U.S. national debt may lead to adverse impacts on the value of U.S. government securities due to potentially higher costs for the U.S. government to obtain new financing.

Variable and Floating Rate Securities Risk

The coupons on variable and floating-rate securities are not fixed and may fluctuate based upon changes in market rates. A variable rate security has a coupon that is adjusted at pre-designated periods in response to changes in the market rate of interest on which the interest rate is based. The coupon on a floating rate security is generally based on an interest rate, such as a money-market index, LIBOR or a Treasury bill rate. Variable and floating rate securities are subject to interest rate risk and credit risk. As short-term interest rates decline, the coupons on variable and floating-rate securities typically decrease. Alternatively, during periods of rising short-term interest rates, the coupons on variable and floating-rate securities typically increase. Changes in the coupons of variable and floating-rate securities may lag behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of variable and floating-rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general. Conversely, variable and floating rate securities will not generally increase in value if interest rates decline. Certain types of variable and floating rate instruments may be subject to greater liquidity risk than other debt securities.

Fund Performance

The bar chart and table below provide an indication of risk by showing changes in the Fund's performance over time. The bar chart shows how the Fund's performance has varied from year to year. The table shows how the Fund's average annual total returns compare to a broad-based market index, which is the Fund's benchmark index, for the periods indicated.

In the table below, the performance of the R6 Class shares for periods prior to February 28, 2019 represents the performance of the R5 Class shares of the Fund. The R6 Class shares would have had similar annual returns to the R5 Class shares of the Fund because the shares of each class represent investments in the same portfolio securities. However, the R5 Class shares of the Fund had different expenses than the R6 Class shares, which would affect performance. The R6 Class performance shown in the table has not been adjusted for differences in operating expenses between the R6 Class and R5 Class shares.

You may obtain updated performance information on the Fund's website at www.americanbeaconfunds.com. Past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Calendar year total returns for Investor Class Shares. Year Ended 12/31

Highest Quarterly Return:

4.53% 2nd Quarter 2020

01/01/2017 through 12/31/2020

Lowest Quarterly Return:

-1.32% 1st Quarter 2020

01/01/2017 through 12/31/2020

Average annual total returns for periods ended December 31, 2020

	Inception Date of Class	1 Year	Since Inception
Investor Class	04/04/2016		
Returns Before Taxes		4.31%	2.11%
Returns After Taxes on Distributions		3.22%	1.40%
Returns After Taxes on Distributions and Sales of Fund Shares		2.77%	1.33%
	Inception Date of Class	1 Year	Since Inception (04/04/2016)
Share Class (Before Taxes)			
Y	04/04/2016	4.59%	2.39%
R5	04/04/2016	4.70%	2.50%
R6	02/28/2019	4.84%	2.51%
		1 Year	Since Inception (04/04/2016)
Index (Reflects no deduction for fees, expenses or taxes)			
Bloomberg Barclays U.S. Aggregate Bond Index		7.51%	4.01%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local income taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The return after taxes on distributions and sale of Fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. If you are a tax-exempt entity or hold your Fund shares through a tax-deferred arrangement, such as an individual retirement account ("IRA") or a 401(k) plan, the after-tax returns do not apply to your situation. After-tax returns are shown only for Investor Class shares of the Fund; after-tax returns for other share classes will vary.

Management

The Manager

The Fund has retained American Beacon Advisors, Inc. to serve as its Manager.

Sub-Advisor

The Fund's investment sub-advisor is Garcia Hamilton & Associates, L.P.

Portfolio Managers

Garcia Hamilton & Associates, L.P.

Gilbert Andrew Garcia, CFA

Managing Partner & Portfolio Manager
Since Fund Inception (2016)

Nancy Rodriguez

Partner & Portfolio Manager
Since Fund Inception (2016)

Purchase and Sale of Fund Shares

You may buy or sell shares of the Fund through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge. The Manager may, in its sole discretion, allow certain individuals to invest directly in the Fund. For more information regarding eligibility to invest directly please see "About Your Investment - Purchase and Redemption of Shares." Direct mutual fund account shareholders may buy subsequent shares or sell shares in various ways:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class only)	
Mail	American Beacon Funds P.O. Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
Investor	\$2,500	\$50	\$250
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

Tax Information

Dividends and capital gain distributions, and other distributions, if any, that you receive from the Fund are subject to federal income tax and may also be subject to state and local income taxes, unless you are a tax-exempt entity or your account is tax-deferred, such as an individual retirement account or a 401(k) plan (in which case you may be taxed later, upon the withdrawal of your investment from such account or plan).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and the Fund's distributor, Resolute Investment Distributors, Inc., or the Manager may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your individual financial professional to recommend the Fund over another investment. Ask your individual financial professional or visit your financial intermediary's website for more information.

American Beacon International Equity FundSM

Investment Objective

The Fund's investment objective is long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales discounts if you and your eligible family members invest, or agree to invest in the future, at least \$50,000 in all classes of the American Beacon Funds on an aggregated basis. More information about these and other discounts is available from your financial professional and in "Choosing Your Share Class" on page 67 of the Prospectus and "Additional Purchase and Sale Information for A Class Shares" on page 66 of the statement of additional information ("SAI"). With respect to purchases of shares through specific intermediaries, you may find additional information regarding sales charge discounts and waivers in Appendix A to the Fund's Prospectus entitled "Intermediary Sales Charge Discounts and Waivers and Other Information." Although the Fund does not impose any sales charge on Y Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder Fees (fees paid directly from your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Maximum sales charge imposed on purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum deferred sales charge (as a percentage of the lower of original offering price or redemption proceeds)	0.50% ¹	1.00%	None	None	None	None	None

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Management Fees	0.61%	0.61%	0.61%	0.61%	0.61%	0.61%	0.61%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.00%	0.00%	0.25%	0.00%	0.00%
Other Expenses	0.27%	0.25%	0.19%	0.11%	0.34%	0.11%	0.46%
Total Annual Fund Operating Expenses	1.13%	1.86%	0.80%	0.72%	1.20%	0.72%	1.07%
Fee Waiver and/or expense reimbursement ²	0.00%	0.00%	0.00%	(0.03%)	0.00%	0.00%	0.00%
Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement	1.13%	1.86%	0.80%	0.69%	1.20%	0.72%	1.07%

¹ A contingent deferred sales charge ("CDSC") of 0.50% will be charged on certain purchases of \$1,000,000 or more of A Class shares that are redeemed in whole or part within 18 months of purchase.

² American Beacon Advisors, Inc. (the "Manager") has contractually agreed to waive fees and/or reimburse expenses of the Fund's R6 Class through February 28, 2022, to the extent that Total Annual Fund Operating Expenses exceed 0.69% for the R6 Class shares (excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, securities lending fees, expenses associated with securities sold short, litigation, and other extraordinary expenses). The contractual expense reimbursement can be changed or terminated only in the discretion and with the approval of a majority of the Fund's Board of Trustees. The Manager will itself waive fees and/or reimburse expenses of the Fund to maintain the contractual expense ratio caps for the R6 Class of shares. The Manager may also, from time to time, voluntarily waive fees and/or reimburse expenses of the Fund. The Manager can be reimbursed by the Fund for any contractual or voluntary fee waivers or expense reimbursements if reimbursement to the Manager (a) occurs within three years from the date of the Manager's waiver/reimbursement and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the lesser of the contractual percentage limit in effect at the time of the waiver/reimbursement or the time of the recoupment.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same, except that the Example reflects the fee waiver/expense reimbursement arrangement for the R6 Class shares through February 28, 2022. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
A	\$ 684	\$ 913	\$ 1,161	\$ 1,871
C	\$ 289	\$ 585	\$ 1,006	\$ 2,180
Y	\$ 82	\$ 255	\$ 444	\$ 990
R6	\$ 70	\$ 227	\$ 398	\$ 892
Advisor	\$ 122	\$ 381	\$ 660	\$ 1,455
R5	\$ 74	\$ 230	\$ 401	\$ 894
Investor	\$ 109	\$ 340	\$ 590	\$ 1,306

Assuming no redemption of shares:

Share Class	1 Year	3 Years	5 Years	10 Years
C	\$ 189	\$ 585	\$ 1,006	\$ 2,180

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 77% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, at least 80% of the Fund’s net assets (plus the amount of any borrowings for investment purposes) are invested in common stocks and securities convertible into common stocks (collectively, “stocks”) of issuers based in at least three different countries located outside the United States. The Fund’s investment in equity securities may include depositary receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges. The Fund will primarily invest in countries comprising the MSCI EAFE Index®. The MSCI EAFE Index is designed to represent the performance of large- and mid-capitalization securities across 21 developed markets countries, including countries in Europe, Australasia and the Far East, and excluding the U.S. and Canada. It covers approximately 85% of the free float-adjusted market capitalization in each country. Companies included in the MSCI EAFE Index are selected from among the larger capitalization companies in these markets. The Fund may invest in companies of all market capitalizations and in certain emerging market countries. The Fund may use futures contracts and foreign currency forward contracts, including non-deliverable forward contracts (“NDFs”), as a hedge against foreign currency fluctuations.

The Manager allocates the assets of the Fund among different sub-advisors. The Manager believes that this strategy may help the Fund outperform other investment styles over the longer term while reducing volatility and downside risk.

The sub-advisors select stocks that, in their opinion, have most or all of the following characteristics (relative to that stock’s country, sector or industry):

- above-average return on equity or earnings growth potential,
- below-average price to earnings or price to cash flow ratio,
- below-average price to book value ratio, and
- above-average dividend yields.

The sub-advisors may consider potential changes in currency exchange rates when choosing stocks. Each of the sub-advisors determines the earnings growth prospects of companies based upon a combination of internal and external research using fundamental analysis and considering changing economic trends. The decision to sell a stock is typically based on the belief that the company is no longer considered undervalued or shows deteriorating fundamentals, or that better investment opportunities exist in other stocks. A sub-advisor may trade forward foreign currency contracts, including NDFs, or currency futures in an attempt to reduce the Fund’s risk exposure to adverse fluctuations in currency exchange rates. The Fund may have significant exposure to the Financials sector. However, as the sector composition of the Fund’s portfolio changes over time, the Fund’s exposure to the Financials sector may be lower at a future date, and the Fund’s exposure to other market sectors may be higher. From time to time, based on market or economic conditions, the Fund may invest a significant portion of its assets in the securities of issuers located in, or with significant economic ties to, a single country or geographic region.

The Fund may invest cash balances in other investment companies, including money market funds, and may purchase and sell futures contracts to gain market exposure on cash balances or reduce market exposure in anticipation of liquidity needs. The Fund may lend its securities to broker-dealers and other institutions to earn additional income.

Principal Risks

There is no assurance that the Fund will achieve its investment objective and you could lose part or all of your investment in the Fund. The Fund is not designed for investors who need an assured level of current income and is intended to be a long-term investment. The Fund is not a complete investment program and may not be appropriate for all investors. Investors should carefully consider their own investment goals and risk tolerance before investing in the Fund. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Allocation Risk

The Manager’s and a sub-advisor’s judgments about, and allocations among, strategies, asset classes and market exposures may adversely affect the Fund’s performance. There can be no assurance, particularly during periods of market disruption and stress, that the Manager’s and a sub-advisor’s judgments about asset allocation will be correct.

Counterparty Risk

The Fund is subject to the risk that a party or participant to a transaction, such as a broker or derivative counterparty, will be unwilling or unable to satisfy its obligation to make timely principal, interest or settlement payments or to otherwise honor its obligations to the Fund.

Credit Risk

The Fund is subject to the risk that the issuer or guarantor of a debt security, or the counterparty to a derivatives contract, may fail, or become less able, to make timely payment of interest or principal or otherwise honor its obligations or default completely. Changes in the actual or perceived creditworthiness of an issuer, or a downgrade or default affecting any of the Fund’s securities, could affect the Fund’s performance.

Currency Risk

The Fund may have exposure to foreign currencies by using various instruments described below. Foreign currencies may fluctuate significantly over short periods of time, may be affected unpredictably by intervention, or the failure to intervene, of the U.S. or foreign governments or central banks, and may be affected by currency controls or political developments in the U.S. or abroad. Foreign currencies may also decline in value relative to the U.S. dollar and other currencies and thereby affect the Fund’s investments in non-U.S. currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, non-U.S. currencies. The Fund may gain exposure to foreign currencies because of its investments in one or more of the following:

- Non-U.S. currencies
- Securities denominated in non-U.S. currencies
- Foreign currency forward contracts, including non-deliverable forwards (“NDFs”)

- Non-U.S. currency futures contracts

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Fund and its service providers as well as the ability of shareholders to transact with the Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund or its service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Dividend Risk

An issuer of stock held by the Fund may choose not to declare a dividend or the dividend rate might not remain at current levels or increase over time. Dividend paying stocks might not experience the same level of earnings growth or capital appreciation as non-dividend paying stocks.

Emerging Markets Risk

When investing in emerging markets, the risks of investing in foreign securities are heightened. Emerging markets are generally smaller, less developed, less liquid and more volatile than the securities markets of the U.S. and other developed markets. There are also risks of: greater political or economic uncertainties; an economy's dependence on revenues from particular commodities or on international aid or development assistance; currency transfer restrictions; a limited number of potential buyers for such securities resulting in increased volatility and limited liquidity for emerging market securities; trading suspensions and other restrictions on investment; delays and disruptions in securities settlement procedures, and significant limitations on investor rights and recourse. The governments of emerging market countries may also be more unstable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, intervene in the financial markets, and/or impose burdensome taxes that could adversely affect security prices. In addition, there may be less publicly available information about issuers in emerging markets than would be available about issuers in more developed capital markets, and such issuers may not be subject to accounting, auditing, financial reporting and recordkeeping standards and requirements comparable to those to which U.S. companies are subject.

Equity Investments Risk

Equity securities are subject to investment risk and market risk. The Fund may invest in the following equity securities, which may expose the Fund to the following additional risks:

- **Common Stock Risk.** The value of a company's common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.
- **Convertible Securities Risk.** Convertible securities are subject to the risk that the credit standing of the issuer may have an effect on the convertible securities' investment value. Convertible securities are also sensitive to movements in interest rates. Generally, a convertible security is subject to the market risks of stocks when the underlying stock's price is high relative to the conversion price, and is subject to the market risks of debt securities when the underlying stock's price is low relative to the conversion price.
- **Depository Receipts and U.S. Dollar-Denominated Foreign Stocks Traded on U.S. Exchanges Risk.** Depository receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depository receipt or foreign stock, less liquidity, more volatility, less government regulation and supervision and delays in transaction settlement.

Foreign Currency Forward Contracts Risk

Foreign currency forward contracts, including non-deliverable forwards ("NDFs"), are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of foreign currency at an agreed date or to buy or sell a specific currency at a future date at a price set at the time of the contract. The use of foreign currency forward contracts may expose the Fund to additional risks, such as credit risk and counterparty risk, that it would not be subject to if it invested directly in the securities or currencies underlying the foreign currency forward contract. There are no limitations on daily price movements of forward contracts. There can be no assurance that any strategy used will succeed. Not all forward contracts, including NDFs, require a counterparty to post collateral, which may expose the Fund to greater losses in the event of a default by a counterparty. Forward currency transactions, including NDFs, and forward currency contracts include the risks associated with fluctuations in currency, and other risks inherent in trading derivatives.

Foreign Investing Risk

Non-U.S. investments carry potential risks not associated with U.S. investments. Such risks include, but are not limited to: (1) currency exchange rate fluctuations, (2) political and financial instability, (3) less liquidity, (4) lack of uniform accounting, auditing and financial reporting standards, (5) greater volatility, (6) different government regulation and supervision of foreign stock exchanges, brokers and listed companies, and (7) delays in transaction settlement in some foreign markets. The Fund's investment in a foreign issuer may subject the Fund to regulatory, political, currency, security, economic and other risks associated with that country. Global economic and financial markets are becoming increasingly interconnected and conditions (including recent volatility and instability) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Futures Contracts Risk

Futures contracts are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date. The use of such derivative instruments may expose the Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities underlying those derivatives. There can be no assurance that any strategy used will succeed. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes. There also can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that the Fund has previously bought or sold, and this may result in the inability to close a futures contract when desired. Futures contracts may experience potentially dramatic price changes, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). Equity index futures contracts expose the Fund to volatility in an underlying securities index. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Geographic Concentration Risk

From time to time, based on market or economic conditions, the Fund may invest a significant portion of its assets in the securities of issuers located in, or with significant economic ties to, a single country or geographic region, which could increase the risk that economic, political, business, regulatory,

diplomatic, social and environmental conditions in that particular country or geographic region may have a significant impact on the Fund's performance. Investing in such a manner could cause the Fund's performance to be more volatile than the performance of more geographically diverse funds.

Hedging Risk

If the Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, or the hedged instrument does not correlate to the risk sought to be hedged, the hedge might be unsuccessful, reduce the Fund's return, or create a loss. In addition, hedges, even when successful in mitigating risk, may not prevent the Fund from experiencing losses on its investments. Hedging instruments may also reduce or eliminate gains that may otherwise have been available had the Fund not used the hedging instruments.

Investment Risk

An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets.

Large-Capitalization Companies Risk

The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities. Many larger-capitalization companies also may be unable to attain the high growth rates of successful smaller companies, especially during periods of economic expansion.

Market Risk

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple assets may decline in value simultaneously. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future. The value of a security may decline due to adverse issuer-specific conditions, general market conditions unrelated to a particular issuer, or factors that affect a particular industry or industries. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Changes in value may be temporary or may last for extended periods. Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, including changes in the U.S. presidential administration and Congress, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

- **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, widespread business closures and layoffs, travel restrictions and closed borders, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The impact of the COVID-19 pandemic may last for an extended period of time and may result in a sustained economic downturn or recession. The U.S. Federal Reserve and the U.S. federal government have taken numerous measures to address the economic impact of the COVID-19 pandemic and stimulate the U.S. economy. The ultimate effects of these and other efforts that may be taken may not be known for some time.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets and has signaled that it plans to maintain its interventions at an elevated level. Amid these ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," and a trade agreement between the United Kingdom and the European Union, the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change.

Market Timing Risk

The Fund is subject to the risk of market timing activities by investors due to the Fund's investments in foreign securities, or its exposure to foreign securities through the derivatives it holds. If the Fund trades foreign securities, it generally prices these foreign securities using their closing prices from the foreign markets in which they trade, which typically is prior to the Fund's calculation of its net asset value ("NAV"). These prices may be affected by events that occur after the close of a foreign market but before the Fund prices its shares. As a result, the Fund in certain instances may fair value foreign securities. However, some investors may engage in frequent short-term trading in the Fund to take advantage of any price differentials that may be reflected in the NAV of the Fund's shares. Frequent trading by Fund shareholders poses risks to other shareholders in the Fund, including (i) the dilution of the Fund's NAV, (ii) an increase

in the Fund's expenses, and (iii) interference with the portfolio managers' ability to execute efficient investment strategies. While the Manager monitors trading in the Fund, there is no guarantee that it can detect all market timing activities.

Mid-Capitalization Companies Risk

Investing in the securities of mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since mid-capitalization companies may have narrower commercial markets and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity, and they can be particularly sensitive to expected changes in interest rates, borrowing costs and earnings.

Multiple Sub-Advisor Risk

The Manager may allocate the Fund's assets among multiple sub-advisors, each of which is responsible for investing its allocated portion of the Fund's assets. To a significant extent, the Fund's performance will depend on the success of the Manager in selecting and overseeing the sub-advisors and allocating the Fund's assets to sub-advisors. The sub-advisors' investment styles may not work together as planned, which could adversely affect the performance of the Fund. In addition, because each sub-advisor makes its trading decisions independently, it is possible that the sub-advisors may purchase or sell the same security at the same time without aggregating their transactions. This may cause unnecessary brokerage and other expenses.

Other Investment Companies Risk

To the extent that the Fund invests in shares of other registered investment companies, the Fund will indirectly bear the fees and expenses charged by those investment companies in addition to the Fund's direct fees and expenses. To the extent the Fund invests in other investment companies that invest in equity securities, fixed income securities and/or foreign securities, or that track an index, the Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject. The Fund will be subject to the risks associated with investments in those companies, including but not limited to the following:

- **Money Market Funds.** Investments in money market funds are subject to interest rate risk, credit risk, and market risk.

Sector Risk

When the Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if the Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. As the Fund's portfolio changes over time, the Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations.

Securities Lending Risk

To the extent the Fund lends its securities, it may be subject to the following risks: i) the securities in which the Fund reinvests cash collateral may decrease in value, causing the Fund to incur a loss, or may not perform sufficiently to cover the Fund's payment to the borrower of a pre-negotiated fee or "rebate" for the use of that cash collateral in connection with the loan; ii) non-cash collateral may decline in value, resulting in the Fund becoming under-secured; iii) delays may occur in the recovery of loaned securities from borrowers, which could result in the Fund being unable to vote proxies or settle transactions or cause the Fund to incur increased costs; and iv) if the borrower becomes subject to insolvency or similar proceedings, the Fund could incur delays in its ability to enforce its rights in its collateral.

Securities Selection Risk

Securities selected by a sub-advisor or the Manager for the Fund may not perform to expectations. This could result in the Fund's underperformance compared to its benchmark index(es), or other funds with similar investment objectives or strategies.

Segregated Assets Risk

In connection with certain transactions that may give rise to future payment obligations, the Fund may be required to maintain a segregated amount of, or otherwise earmark, cash or liquid securities to cover the obligation. Segregated assets generally cannot be sold while the position they are covering is outstanding, unless they are replaced with other assets of equal value. The need to segregate cash or other liquid securities could limit the Fund's ability to pursue other opportunities as they arise.

Valuation Risk

The Fund may value certain assets at a price different from the price at which they can be sold. This risk may be especially pronounced for investments that are illiquid or may become illiquid, or securities that trade in relatively thin markets and/or markets that experience extreme volatility. The Fund's ability to value its investments in an accurate and timely manner may be impacted by technological issues and/or errors by third party service providers, such as pricing services or accounting agents.

Value Stocks Risk

Value stocks are subject to the risk that their intrinsic value may never be realized by the market or that their prices may decline. The Fund's investments in value stocks seek to limit potential downside price risk over time; however, value stock prices still may decline substantially. In addition, the Fund may produce more modest gains as a trade-off for this potentially lower risk. The Fund's investment in value stocks could cause the Fund to underperform funds that use a growth or non-value approach to investing or have a broader investment style.

Fund Performance

The bar chart and table below provide an indication of risk by showing changes in the Fund's performance over time. The bar chart shows how the Fund's performance has varied from year to year. The table shows how the Fund's average annual total returns compare to a broad-based market index, which is the Fund's benchmark index, as well as an additional broad-based market index, for the periods indicated.

The chart and the table show the performance of the Fund's Investor Class shares for all periods. The Fund began offering R6 Class shares on February 28, 2017. In the table below, the performance of the R6 Class shares prior to February 28, 2017 represents the performance of the R5 Class shares of the Fund. The R6 Class shares would have had similar annual returns to the R5 Class shares of the Fund because the shares of each class represent investments in the same portfolio securities. However, the R5 Class shares of the Fund had different expenses than the R6 Class shares, which would affect performance. The R6 Class performance shown in the table has not been adjusted for differences in operating expenses between the R6 Class shares and the R5 Class shares.

You may obtain updated performance information on the Fund's website at www.americanbeaconfunds.com. Past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Calendar year total returns for Investor Class Shares. Year Ended 12/31

Highest Quarterly Return:

20.63% 4th Quarter 2020

01/01/2011 through 12/31/2020

Lowest Quarterly Return:

-29.98% 1st Quarter 2020

01/01/2011 through 12/31/2020

Average annual total returns for periods ended December 31, 2020

	Inception Date of Class	1 Year	5 Years	10 Years
Investor Class	08/01/1994			
Returns Before Taxes		0.73%	4.43%	4.08%
Returns After Taxes on Distributions		0.66%	3.81%	3.64%
Returns After Taxes on Distributions and Sales of Fund Shares		0.85%	3.61%	3.40%
	Inception Date of Class	1 Year	5 Years	10 Years
Share Class (Before Taxes)				
A	05/17/2010	-5.17%	3.14%	3.38%
C	09/01/2010	-1.09%	3.61%	3.23%
Y	08/03/2009	1.05%	4.72%	4.36%
R6	02/28/2017	1.14%	4.85%	4.48%
Advisor	05/01/2003	0.59%	4.31%	3.94%
R5	08/07/1991	1.06%	4.79%	4.45%
		1 Year	5 Years	10 Years
Index (Reflects no deduction for fees, expenses, or taxes, other than withholding taxes, as noted)				
MSCI EAFE Index (Net)*		7.82%	7.45%	5.51%
MSCI EAFE Value Index (Net)*		-2.63%	4.20%	3.37%

* Reflects the reinvestment of dividends after the deduction of withholding taxes, using a tax rate applicable to non-resident individuals who do not benefit from double taxation treaties.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local income taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The return after taxes on distributions and sale of Fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. If you are a tax-exempt entity or hold your Fund shares through a tax-deferred arrangement, such as an individual retirement account ("IRA") or a 401(k) plan, the after-tax returns do not apply to your situation. After-tax returns are shown only for Investor Class shares of the Fund; after-tax returns for other share classes will vary.

Management

The Manager

The Fund has retained American Beacon Advisors, Inc. to serve as its Manager.

Sub-Advisors

The Fund's assets are currently allocated among the following investment sub-advisors:

- American Century Investment Management, Inc.
- Causeway Capital Management LLC
- Lazard Asset Management LLC

Portfolio Managers

American Beacon Advisors, Inc.	Gene L. Needles, Jr. Chief Executive Officer Since 2012 Paul B. Cavazos Chief Investment Officer Since 2016	Kirk L. Brown Senior Portfolio Manager Since 1994 Mark M. Michel Associate Portfolio Manager Since 2018
American Century Investment Management, Inc.	Alvin Polit Vice President and Senior Portfolio Manager Since 2020	Jonathan Veiga Portfolio Manager and Senior Investment Analyst Since 2020
Causeway Capital Management LLC	Sarah H. Ketterer Chief Executive Officer Since 2001 Jonathan P. Eng Director Since 2006 Harry W. Hartford President Since 2001 Brian Cho Director Since 2021	Conor Muldoon Director Since 2010 Alessandro Valentini Director Since 2013 Ellen Lee Director Since 2015 Steven Nguyen Director Since 2019
Lazard Asset Management LLC	John R. Reinsberg Deputy Chairman Since 1999 Michael G. Fry Managing Director Since 2005 Kevin J. Matthews Managing Director Since 2013	Michael A. Bennett Managing Director Since 2003 Michael Powers Managing Director Since 2003 Giles Edwards Portfolio Manager/Analyst Since 2020

Purchase and Sale of Fund Shares

You may buy or sell shares of the Fund through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge. The Manager may, in its sole discretion, allow certain individuals to invest directly in the Fund. For more information regarding eligibility to invest directly please see "About Your Investment - Purchase and Redemption of Shares." Direct mutual fund account shareholders may buy subsequent shares or sell shares in various ways:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class only)	
Mail	American Beacon Funds P.O. Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$250
A, Investor	\$2,500	\$50	\$250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

Tax Information

Dividends and capital gain distributions, and other distributions, if any, that you receive from the Fund are subject to federal income tax and may also be subject to state and local income taxes, unless you are a tax-exempt entity or your account is tax-deferred, such as an individual retirement account or a 401(k) plan (in which case you may be taxed later, upon the withdrawal of your investment from such account or plan).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and the Fund's distributor, Resolute Investment Distributors, Inc., or the Manager may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your individual financial professional to recommend the Fund over another investment. Ask your individual financial professional or visit your financial intermediary's website for more information.

American Beacon Large Cap Value FundSM

Investment Objective

The Fund's investment objective is long-term capital appreciation and current income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales discounts if you and your eligible family members invest, or agree to invest in the future, at least \$50,000 in all classes of the American Beacon Funds on an aggregated basis. More information about these and other discounts is available from your financial professional and in "Choosing Your Share Class" on page 67 of the Prospectus and "Additional Purchase and Sale Information for A Class Shares" on page 66 of the statement of additional information ("SAI"). With respect to purchases of shares through specific intermediaries, you may find additional information regarding sales charge discounts and waivers in Appendix A to the Fund's Prospectus entitled "Intermediary Sales Charge Discounts and Waivers and Other Information." Although the Fund does not impose any sales charge on Y Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder Fees (fees paid directly from your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Maximum sales charge imposed on purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum deferred sales charge (as a percentage of the lower of original offering price or redemption proceeds)	0.50% ¹	1.00%	None	None	None	None	None

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Management Fees	0.55%	0.55%	0.55%	0.55%	0.55%	0.55%	0.55%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.00%	0.00%	0.25%	0.00%	0.00%
Other Expenses	0.20%	0.13%	0.15%	0.07%	0.30%	0.08%	0.41%
Total Annual Fund Operating Expenses	1.00%	1.68%	0.70%	0.62%	1.10%	0.63%	0.96%
Fee Waiver and/or expense reimbursement ²	0.00%	0.00%	0.00%	(0.02%)	0.00%	0.00%	0.00%
Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement³	1.00%	1.68%	0.70%	0.60%	1.10%	0.63%	0.96%

- 1 A contingent deferred sales charge ("CDSC") of 0.50% will be charged on certain purchases of \$1,000,000 or more of A Class shares that are redeemed in whole or part within 18 months of purchase.
- 2 American Beacon Advisors, Inc. (the "Manager") has contractually agreed to waive fees and/or reimburse expenses of the Fund's R6 Class through February 28, 2022, to the extent that Total Annual Fund Operating Expenses exceed 0.60% for the R6 Class shares (excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, securities lending fees, expenses associated with securities sold short, litigation, and other extraordinary expenses). The contractual expense reimbursement can be changed or terminated only in the discretion and with the approval of a majority of the Fund's Board of Trustees. The Manager will itself waive fees and/or reimburse expenses of the Fund to maintain the contractual expense ratio caps for the R6 Class of shares. The Manager may also, from time to time, voluntarily waive fees and/or reimburse expenses of the Fund. The Manager can be reimbursed by the Fund for any contractual or voluntary fee waivers or expense reimbursements if reimbursement to the Manager (a) occurs within three years from the date of the Manager's waiver/reimbursement and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the lesser of the contractual percentage limit in effect at the time of the waiver/reimbursement or the time of the recoupment.
- 3 The Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement for R6 Class shares do not correlate to the ratio of expenses to average net assets, net of reimbursements, provided in the Fund's Financial Highlights table, which reflects the Fund's expenses, including its fee waiver and/or expense reimbursement agreement in effect through February 28, 2021. The Annual Fund Operating Expenses table reflects the new fee waiver and/or expense reimbursement agreement that was approved by the Fund's Board effective through February 28, 2022, which differs from the prior agreement.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same, except that the Example reflects the fee waiver/expense reimbursement arrangement for the R6 Class shares through February 28, 2022. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
A	\$ 671	\$ 875	\$ 1,096	\$ 1,729
C	\$ 271	\$ 530	\$ 913	\$ 1,987
Y	\$ 72	\$ 224	\$ 390	\$ 871
R6	\$ 61	\$ 197	\$ 344	\$ 772
Advisor	\$ 112	\$ 350	\$ 606	\$ 1,340
R5	\$ 64	\$ 202	\$ 351	\$ 786
Investor	\$ 98	\$ 306	\$ 531	\$ 1,178

Assuming no redemption of shares:

Share Class	1 Year	3 Years	5 Years	10 Years
C	\$ 171	\$ 530	\$ 913	\$ 1,987

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 67% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, at least 80% of the Fund’s net assets (plus the amount of any borrowings for investment purposes) are invested in equity securities of large market capitalization U.S. companies. These companies have market capitalizations within the market capitalization range of the companies in the Russell 1000[®] Index at the time of investment. The Russell 1000 Index measures the performance of the 1,000 largest U.S. companies based on total market capitalization. As of December 31, 2020, the Russell 1000 Index consisted of companies with market capitalization of \$832.2 million and greater. The Fund may invest in companies of all market capitalizations.

The Fund’s investments in equity securities may include common stocks, convertible securities, preferred stocks, master limited partnerships (“MLPs”), real estate investment trusts (“REITs”), American Depositary Receipts (“ADRs”) and U.S. dollar-denominated foreign stocks traded on U.S. exchanges (collectively referred to as “stocks”).

The Manager allocates the assets of the Fund among different sub-advisors. The Manager believes that this strategy may help the Fund outperform other investment styles over the longer term while reducing volatility and downside risk. The Fund’s sub-advisors select stocks that, in their opinion, have most or all of the following characteristics (relative to the S&P 500[®] Index):

- above-average earnings growth potential,
- below-average price to earnings ratio,
- below-average price to book value ratio, and
- above-average dividend yields.

Each of the Fund’s sub-advisors determines the earnings growth prospects of companies based upon a combination of internal and external research using fundamental analysis and considering changing economic trends. The sub-advisors typically seek to invest in companies that they believe are undervalued at the time of purchase. The decision to sell a stock is typically based on the belief that the company is no longer considered undervalued or shows deteriorating fundamentals, or that better investment opportunities exist in other stocks. The Fund may have significant exposure to the Financials sector. However, as the sector composition of the Fund’s portfolio changes over time, the Fund’s exposure to the Financials sector may be lower at a future date, and the Fund’s exposure to other market sectors may be higher.

The Fund may invest cash balances in other investment companies, including money market funds, and may purchase and sell futures contracts to gain market exposure on cash balances or reduce market exposure in anticipation of liquidity needs. The Fund may seek to earn additional income by lending its securities to certain qualified broker-dealers and institutions on a short-term or long-term basis.

Principal Risks

There is no assurance that the Fund will achieve its investment objective and you could lose part or all of your investment in the Fund. The Fund is not designed for investors who need an assured level of current income and is intended to be a long-term investment. The Fund is not a complete investment program and may not be appropriate for all investors. Investors should carefully consider their own investment goals and risk tolerance before investing in the Fund. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Allocation Risk

The Manager’s and a sub-advisor’s judgments about, and allocations among, strategies, asset classes and market exposures may adversely affect the Fund’s performance. There can be no assurance, particularly during periods of market disruption and stress, that the Manager’s and a sub-advisor’s judgments about asset allocation will be correct.

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Fund and its service providers as well as the ability of shareholders to transact with the Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund or its service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Dividend Risk

An issuer of stock held by the Fund may choose not to declare a dividend or the dividend rate might not remain at current levels or increase over time. Dividend paying stocks might not experience the same level of earnings growth or capital appreciation as non-dividend paying stocks.

Equity Investments Risk

Equity securities are subject to investment risk and market risk. The Fund may invest in the following equity securities, which may expose the Fund to the following additional risks:

- **Common Stock Risk.** The value of a company’s common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.

- **Convertible Securities Risk.** Convertible securities are subject to the risk that the credit standing of the issuer may have an effect on the convertible securities' investment value. Convertible securities are also sensitive to movements in interest rates. Generally, a convertible security is subject to the market risks of stocks when the underlying stock's price is high relative to the conversion price, and is subject to the market risks of debt securities when the underlying stock's price is low relative to the conversion price.
- **Depository Receipts and U.S. Dollar-Denominated Foreign Stocks Traded on U.S. Exchanges Risk.** Depository receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depository receipt or foreign stock, less liquidity, more volatility, less government regulation and supervision and delays in transaction settlement.
- **Preferred Stock Risk.** Preferred stocks are sensitive to movements in interest rates. Preferred stocks may be less liquid than common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders. In certain situations, an issuer may call or redeem its preferred stock or convert it to common stock. The market prices of preferred stocks are generally more sensitive to actual or perceived changes in the issuer's financial condition or prospects than are the prices of debt securities.
- **Master Limited Partnerships ("MLPs") Risk.** Investing in MLPs involves certain risks related to investing in the underlying assets of the MLPs and risks associated with pooled investment vehicles. Investments held by MLPs may be relatively illiquid, limiting the MLPs's ability to change their portfolios promptly in response to changes in economic or other conditions. MLPs may have limited financial resources, their securities may trade infrequently and in limited volume, they may be difficult to value, and they may be subject to more abrupt or erratic price movements than securities of larger or more broadly based companies. Holders of units in MLPs have more limited rights to vote on matters affecting the partnership and may be required to sell their common units at an undesirable time or price. The Fund's investments in MLPs will be limited to no more than 25% of its assets in order for the Fund to meet the requirements necessary to qualify as a "regulated investment company" under the Internal Revenue Code of 1986, as amended ("Internal Revenue Code").
- **Real Estate Investment Trusts ("REITs") Risk.** Investments in REITs are subject to the risks associated with investing in the real estate industry, including, among other risks: adverse developments affecting the real estate industry; declines in real property values; changes in interest rates; defaults by mortgagors or other borrowers and tenants; lack of availability of mortgage funds or financing; extended vacancies of properties, especially during economic downturns; casualty or condemnation losses; and governmental actions, such as changes to tax laws, zoning regulations or environmental regulations. REITs also are dependent upon the skills of their managers and are subject to heavy cash flow dependency or self-liquidation. Regardless of where a REIT is organized or traded, its performance may be affected significantly by events in the region where its properties are located. Domestic REITs could be adversely affected by failure to qualify for tax-free "pass-through" of distributed net income and net realized gains under the Internal Revenue Code of 1986, as amended ("Internal Revenue Code"), or to maintain their exemption from registration under the Investment Company Act of 1940, as amended ("Investment Company Act"). REITs typically incur fees that are separate from those incurred by the Fund. Accordingly, the Fund's investment in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. The value of REIT common stock may decline when interest rates rise. REITs tend to be small- to mid-capitalization securities and, as such, are subject to the risks of investing in small- to mid-capitalization securities.

Foreign Investing Risk

Non-U.S. investments carry potential risks not associated with U.S. investments. Such risks include, but are not limited to: (1) currency exchange rate fluctuations, (2) political and financial instability, (3) less liquidity, (4) lack of uniform accounting, auditing and financial reporting standards, (5) greater volatility, (6) different government regulation and supervision of foreign stock exchanges, brokers and listed companies, and (7) delays in transaction settlement in some foreign markets. The Fund's investment in a foreign issuer may subject the Fund to regulatory, political, currency, security, economic and other risks associated with that country. Global economic and financial markets are becoming increasingly interconnected and conditions (including recent volatility and instability) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Futures Contracts Risk

Futures contracts are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date. The use of such derivative instruments may expose the Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities underlying those derivatives. There can be no assurance that any strategy used will succeed. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes. There also can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that the Fund has previously bought or sold, and this may result in the inability to close a futures contract when desired. Futures contracts may experience potentially dramatic price changes, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). Equity index futures contracts expose the Fund to volatility in an underlying securities index. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Investment Risk

An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets.

Large-Capitalization Companies Risk

The securities of large market capitalization companies may underperform other segments of the market because such companies may be less responsive to competitive challenges and opportunities. Many larger-capitalization companies also may be unable to attain the high growth rates of successful smaller companies, especially during periods of economic expansion.

Market Risk

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities

markets, multiple assets may decline in value simultaneously. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future. The value of a security may decline due to adverse issuer-specific conditions, general market conditions unrelated to a particular issuer, or factors that affect a particular industry or industries. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Changes in value may be temporary or may last for extended periods. Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, including changes in the U.S. presidential administration and Congress, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

- **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, widespread business closures and layoffs, travel restrictions and closed borders, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The impact of the COVID-19 pandemic may last for an extended period of time and may result in a sustained economic downturn or recession. The U.S. Federal Reserve and the U.S. federal government have taken numerous measures to address the economic impact of the COVID-19 pandemic and stimulate the U.S. economy. The ultimate effects of these and other efforts that may be taken may not be known for some time.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets and has signaled that it plans to maintain its interventions at an elevated level. Amid these ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," and a trade agreement between the United Kingdom and the European Union, the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change.

Mid-Capitalization Companies Risk

Investing in the securities of mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since mid-capitalization companies may have narrower commercial markets and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity, and they can be particularly sensitive to expected changes in interest rates, borrowing costs and earnings.

Multiple Sub-Advisor Risk

The Manager may allocate the Fund's assets among multiple sub-advisors, each of which is responsible for investing its allocated portion of the Fund's assets. To a significant extent, the Fund's performance will depend on the success of the Manager in selecting and overseeing the sub-advisors and allocating the Fund's assets to sub-advisors. The sub-advisors' investment styles may not work together as planned, which could adversely affect the performance of the Fund. In addition, because each sub-advisor makes its trading decisions independently, it is possible that the sub-advisors may purchase or sell the same security at the same time without aggregating their transactions. This may cause unnecessary brokerage and other expenses.

Other Investment Companies Risk

To the extent that the Fund invests in shares of other registered investment companies, the Fund will indirectly bear the fees and expenses charged by those investment companies in addition to the Fund's direct fees and expenses. To the extent the Fund invests in other investment companies that invest in equity securities, fixed income securities and/or foreign securities, or that track an index, the Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject. The Fund will be subject to the risks associated with investments in those companies, including but not limited to the following:

- **Money Market Funds.** Investments in money market funds are subject to interest rate risk, credit risk, and market risk.

Sector Risk

When the Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if the Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. As the Fund's portfolio changes over time, the Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign,

and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations.

Securities Lending Risk

To the extent the Fund lends its securities, it may be subject to the following risks: i) the securities in which the Fund reinvests cash collateral may decrease in value, causing the Fund to incur a loss, or may not perform sufficiently to cover the Fund’s payment to the borrower of a pre-negotiated fee or “rebate” for the use of that cash collateral in connection with the loan; ii) non-cash collateral may decline in value, resulting in the Fund becoming under-secured; iii) delays may occur in the recovery of loaned securities from borrowers, which could result in the Fund being unable to vote proxies or settle transactions or cause the Fund to incur increased costs; and iv) if the borrower becomes subject to insolvency or similar proceedings, the Fund could incur delays in its ability to enforce its rights in its collateral.

Securities Selection Risk

Securities selected by a sub-advisor or the Manager for the Fund may not perform to expectations. This could result in the Fund’s underperformance compared to its benchmark index(es), or other funds with similar investment objectives or strategies.

Small-Capitalization Companies Risk

Investing in the securities of small-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since small-capitalization companies may have narrower commercial markets, and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity and they can be particularly sensitive to changes in interest rates, borrowing costs and earnings.

Value Stocks Risk

Value stocks are subject to the risk that their intrinsic value may never be realized by the market or that their prices may decline. The Fund’s investments in value stocks seek to limit potential downside price risk over time; however, value stock prices still may decline substantially. In addition, the Fund may produce more modest gains as a trade-off for this potentially lower risk. The Fund’s investment in value stocks could cause the Fund to underperform funds that use a growth or non-value approach to investing or have a broader investment style.

Fund Performance

The bar chart and table below provide an indication of risk by showing changes in the Fund’s performance over time. The bar chart shows how the Fund’s performance has varied from year to year. The table shows how the Fund’s average annual total returns compare to a broad-based market index, which is the Fund’s benchmark index, for the periods indicated.

The chart and the table show the performance of the Fund’s Investor Class shares for all periods. The Fund began offering R6 Class shares on February 28, 2017. In the table below, the performance of the R6 Class shares prior to February 28, 2017 represents the performance of the R5 Class shares of the Fund. The R6 Class shares would have had similar annual returns to the R5 Class shares of the Fund because the shares of each class represent investments in the same portfolio securities. However, the R5 Class shares of the Fund had different expenses than the R6 Class shares, which would affect performance. The R6 Class performance shown in the table has not been adjusted for differences in operating expenses between the R5 Class shares and the R6 Class shares.

You may obtain updated performance information on the Fund’s website at www.americanbeaconfunds.com. Past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Calendar year total returns for Investor Class Shares. Year Ended 12/31

Highest Quarterly Return:
20.56% 4th Quarter 2020
 01/01/2011 through 12/31/2020

Lowest Quarterly Return:
-30.18% 1st Quarter 2020
 01/01/2011 through 12/31/2020

Average annual total returns for periods ended December 31, 2020

	Inception Date of Class	1 Year	5 Years	10 Years
Investor Class	08/01/1994			
Returns Before Taxes		2.94%	9.50%	9.69%
Returns After Taxes on Distributions		(0.48)%	7.04%	7.84%
Returns After Taxes on Distributions and Sales of Fund Shares		4.08%	7.25%	7.68%

	Inception Date of Class	1 Year	5 Years	10 Years

		1 Year	5 Years	10 Years
Index (Reflects no deduction for fees, expenses or taxes)				
Russell 1000 Value Index		2.80%	9.74%	10.50%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local income taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The return after taxes on distributions and sale of Fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. If you are a tax-exempt entity or hold your Fund shares through a tax-deferred arrangement, such as an individual retirement account ("IRA") or a 401(k) plan, the after-tax returns do not apply to your situation. After-tax returns are shown only for Investor Class shares of the Fund; after-tax returns for other share classes will vary.

Management

The Manager

The Fund has retained American Beacon Advisors, Inc. to serve as its Manager.

Sub-Advisors

The Fund's assets are currently allocated among the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Hotchkis and Wiley Capital Management, LLC
- Massachusetts Financial Services Company

Portfolio Managers

American Beacon Advisors, Inc.	Gene L. Needles, Jr. Chief Executive Officer Since 2012 Kirk L. Brown Senior Portfolio Manager Since 2016	Paul B. Cavazos Chief Investment Officer Since 2016 Mark M. Michel Associate Portfolio Manager Since 2018
Barrow, Hanley, Mewhinney & Strauss, LLC	Mark Giambrone Portfolio Manager/Senior Managing Director Since 2015	
Hotchkis and Wiley Capital Management, LLC	George Davis Principal, Portfolio Manager and Chief Executive Officer Since 1989 Scott McBride Portfolio Manager Since 2004	Judd Peters Portfolio Manager Since 2003 Patricia McKenna Principal and Portfolio Manager Since 1995
Massachusetts Financial Services Company	Katherine Cannan Investment Officer and Portfolio Manager Since 2019	Nevin Chitkara Investment Officer and Portfolio Manager Since 2010

Purchase and Sale of Fund Shares

You may buy or sell shares of the Fund through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge. The Manager may, in its sole discretion, allow certain individuals to invest directly in the Fund. For more information regarding eligibility to invest directly please see "About Your Investment - Purchase and Redemption of Shares." Direct mutual fund account shareholders may buy subsequent shares or sell shares in various ways:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class only)	
Mail	American Beacon Funds P.O. Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$250
A, Investor	\$2,500	\$50	\$250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

Tax Information

Dividends and capital gain distributions, and other distributions, if any, that you receive from the Fund are subject to federal income tax and may also be subject to state and local income taxes, unless you are a tax-exempt entity or your account is tax-deferred, such as an individual retirement account or a 401(k) plan (in which case you may be taxed later, upon the withdrawal of your investment from such account or plan).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and the Fund's distributor, Resolute Investment Distributors, Inc., or the Manager may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your individual financial professional to recommend the Fund over another investment. Ask your individual financial professional or visit your financial intermediary's website for more information.

Investment Objective

The Fund's investment objective is long-term capital appreciation and current income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales discounts if you and your eligible family members invest, or agree to invest in the future, at least \$50,000 in all classes of the American Beacon Funds on an aggregated basis. More information about these and other discounts is available from your financial professional and in "Choosing Your Share Class" on page 67 of the Prospectus and "Additional Purchase and Sale Information for A Class Shares" on page 66 of the statement of additional information ("SAI"). With respect to purchases of shares through specific intermediaries, you may find additional information regarding sales charge discounts and waivers in Appendix A to the Fund's Prospectus entitled "Intermediary Sales Charge Discounts and Waivers and Other Information." Although the Fund does not impose any sales charge on Y Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder Fees (fees paid directly from your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Maximum sales charge imposed on purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum deferred sales charge (as a percentage of the lower of original offering price or redemption proceeds)	0.50% ¹	1.00%	None	None	None	None	None

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Management Fees	0.83%	0.83%	0.83%	0.83%	0.83%	0.83%	0.83%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.00%	0.00%	0.25%	0.00%	0.00%
Other Expenses	0.22%	0.22%	0.20%	0.13%	0.45%	0.12%	0.38%
Acquired Fund Fees and Expenses ²	0.01%	0.01%	0.01%	0.01%	0.01%	0.01%	0.01%
Total Annual Fund Operating Expenses	1.31%	2.06%	1.04%	0.97%	1.54%	0.96%	1.22%
Fee Waiver and/or expense reimbursement ³	(0.04%)	(0.04%)	(0.04%)	(0.06%)	(0.04%)	(0.04%)	(0.04%)
Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement⁴	1.27%	2.02%	1.00%	0.91%	1.50%	0.92%	1.18%

- 1 A contingent deferred sales charge ("CDSC") of 0.50% will be charged on certain purchases of \$1,000,000 or more of A Class shares that are redeemed in whole or part within 18 months of purchase.
- 2 The Total Annual Fund Operating Expenses do not correlate to the ratio of expenses to average net assets provided in the Fund's Financial Highlights table, which reflects the operating expenses of the Fund and does not include Acquired Fund Fees and Expenses.
- 3 American Beacon Advisors, Inc. (the "Manager") has contractually agreed to waive fees and/or reimburse expenses of the Fund's A Class, C Class, Y Class, R6 Class, Advisor Class, R5 Class and Investor Class through February 28, 2022, to the extent that Total Annual Fund Operating Expenses exceed 1.26% for the A Class, 2.01% for the C Class, 0.99% for the Y Class, 0.90% for the R6 Class, 1.49% for the Advisor Class, 0.91% for the R5 Class, and 1.17% for the Investor Class (excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, securities lending fees, expenses associated with securities sold short, litigation, and other extraordinary expenses). The contractual expense reimbursement can be changed or terminated only in the discretion and with the approval of a majority of the Fund's Board of Trustees. The Manager will itself waive fees and/or reimburse expenses of the Fund to maintain the contractual expense ratio caps for each applicable class of shares. The Manager may also, from time to time, voluntarily waive fees and/or reimburse expenses of the Fund. The Manager can be reimbursed by the Fund for any contractual or voluntary fee waivers or expense reimbursements if reimbursement to the Manager (a) occurs within three years from the date of the Manager's waiver/reimbursement and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the lesser of the contractual percentage limit in effect at the time of the waiver/reimbursement or the time of the recoupment.
- 4 The Total Annual Fund Operating Expenses after fee waiver and/or expense reimbursement for each share class do not correlate to the ratio of expenses to average net assets, net of reimbursements, provided in the Fund's Financial Highlights table, which reflects the Fund's expenses, including its fee waiver and/or expense reimbursement agreement in effect through February 28, 2021, if applicable. The Annual Fund Operating Expenses table reflects the new fee waiver and/or expense reimbursement agreement that was approved by the Fund's Board effective through February 28, 2022, which differs from the prior agreement.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same, except that the Example reflects the fee waiver/expense reimbursement arrangement for each share class through February 28, 2022. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
A	\$ 697	\$ 963	\$ 1,248	\$ 2,060
C	\$ 305	\$ 642	\$ 1,105	\$ 2,387
Y	\$ 102	\$ 327	\$ 570	\$ 1,267
R6	\$ 93	\$ 303	\$ 530	\$ 1,184
Advisor	\$ 153	\$ 483	\$ 836	\$ 1,831
R5	\$ 94	\$ 302	\$ 527	\$ 1,174
Investor	\$ 120	\$ 383	\$ 666	\$ 1,474

Assuming no redemption of shares:

Share Class	1 Year	3 Years	5 Years	10 Years
C	\$ 205	\$ 642	\$ 1,105	\$ 2,387

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 35% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, at least 80% of the Fund’s net assets (plus the amount of any borrowings for investment purposes) are invested in equity securities of middle market capitalization U.S. companies. These companies have market capitalizations within the market capitalization range of the companies in the Russell Midcap[®] Index at the time of investment. As of December 31, 2020, the market capitalizations of the companies in the Russell Midcap Index ranged from \$831.2 million to \$58.5 billion. The Fund’s investments may include common stocks, real estate investment trusts (“REITs”), American Depositary Receipts (“ADRs”), master limited partnerships (“MLPs”), and U.S. dollar-denominated foreign stocks traded on U.S. exchanges (collectively referred to as “stocks”).

The Manager allocates the assets of the Fund among different sub-advisors. The Manager believes that this strategy may help the Fund outperform other investment styles over the longer term while reducing volatility and downside risk.

In general, the sub-advisors select stocks that, in their opinion, have most or all of the following characteristics (relative to the Russell Midcap Index):

- above-average earnings growth potential,
- below-average price to earnings ratio, and
- below-average price to book value ratio.

Barrow, Hanley, Mewhinney & Strauss, LLC (“Barrow”), one of the Fund’s sub-advisors, invests in medium-sized companies with low price to earnings and price to book value ratios and high dividend yields in relation to the Russell Midcap Index. Through extensive research and meetings with company management teams, Barrow seeks to identify companies that not only possess these three characteristics, but that also exhibit high or improving profitability translating into earnings growth above that of the overall Russell Midcap Index. Barrow’s portfolio will generally consist of 40 to 50 stocks.

Pzena Investment Management, LLC (“Pzena”), another one of the Fund’s sub-advisors, invests in medium-sized companies and intends to maintain a concentrated portfolio of 30 to 40 stocks selected from the most undervalued or “deep” value portion of its investment universe. Pzena looks for companies within that universe that sell for a low price relative to normal earnings (with “normal earnings” defined as a 5-year estimate of what the company should earn in a normal environment based on research of the company’s history and the history of its industry).

WEDGE Capital Management, L.L.P. (“WEDGE”), another one of the Fund’s sub-advisors, is primarily focused on identifying unrecognized value among high quality, market-leading companies, with a defensible competitive advantage, and market capitalization within the broad mid-cap market segment captured by the mid-cap Russell and S&P indices. Focusing on companies that meet initial value and financial quality parameters, research analysts employ comprehensive, qualitative and quantitative analysis, seeking stocks with unrecognized value. Areas of emphasis include independent earnings forecasts and financial statement analysis, an evaluation of free cash flow generation and return on invested capital, absolute and relative valuations, industry analysis and competitive positioning, and management capabilities and incentives.

Each of the Fund’s sub-advisors determines the earnings growth prospects of companies based upon a combination of internal and external research using fundamental analysis and considering changing economic trends. The decision to sell a security is typically based on the belief that the company is no longer considered undervalued or shows deteriorating fundamentals, or that better investment opportunities exist in other stocks. The Fund may have significant exposure to the Financials sector. However, as the sector composition of the Fund’s portfolio changes over time, the Fund’s exposure to the Financials sector may be lower at a future date, and the Fund’s exposure to other market sectors may be higher.

The Fund may invest cash balances in other investment companies, including money market funds, and may purchase and sell futures contracts to gain market exposure on cash balances or reduce market exposure in anticipation of liquidity needs.

The Fund may lend its securities to broker-dealers and other institutions to earn additional income.

Principal Risks

There is no assurance that the Fund will achieve its investment objective and you could lose part or all of your investment in the Fund. The Fund is not designed for investors who need an assured level of current income and is intended to be a long-term investment. The Fund is not a complete investment program and may not be appropriate for all investors. Investors should carefully consider their own investment goals and risk tolerance before investing in the Fund. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Allocation Risk

The Manager's and a sub-advisor's judgments about, and allocations among, strategies, asset classes and market exposures may adversely affect the Fund's performance. There can be no assurance, particularly during periods of market disruption and stress, that the Manager's and a sub-advisor's judgments about asset allocation will be correct.

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Fund and its service providers as well as the ability of shareholders to transact with the Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund or its service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Dividend Risk

An issuer of stock held by the Fund may choose not to declare a dividend or the dividend rate might not remain at current levels or increase over time. Dividend paying stocks might not experience the same level of earnings growth or capital appreciation as non-dividend paying stocks.

Equity Investments Risk

Equity securities are subject to investment risk and market risk. The Fund may invest in the following equity securities, which may expose the Fund to the following additional risks:

- **Common Stock Risk.** The value of a company's common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.
- **Depository Receipts and U.S. Dollar-Denominated Foreign Stocks Traded on U.S. Exchanges Risk.** Depository receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depository receipt or foreign stock, less liquidity, more volatility, less government regulation and supervision and delays in transaction settlement.
- **Master Limited Partnerships ("MLPs") Risk.** Investing in MLPs involves certain risks related to investing in the underlying assets of the MLPs and risks associated with pooled investment vehicles. Investments held by MLPs may be relatively illiquid, limiting the MLPs's ability to change their portfolios promptly in response to changes in economic or other conditions. MLPs may have limited financial resources, their securities may trade infrequently and in limited volume, they may be difficult to value, and they may be subject to more abrupt or erratic price movements than securities of larger or more broadly based companies. Holders of units in MLPs have more limited rights to vote on matters affecting the partnership and may be required to sell their common units at an undesirable time or price. The Fund's investments in MLPs will be limited to no more than 25% of its assets in order for the Fund to meet the requirements necessary to qualify as a "regulated investment company" under the Internal Revenue Code of 1986, as amended ("Internal Revenue Code").
- **Real Estate Investment Trusts ("REITs") Risk.** Investments in REITs are subject to the risks associated with investing in the real estate industry, including, among other risks: adverse developments affecting the real estate industry; declines in real property values; changes in interest rates; defaults by mortgagors or other borrowers and tenants; lack of availability of mortgage funds or financing; extended vacancies of properties, especially during economic downturns; casualty or condemnation losses; and governmental actions, such as changes to tax laws, zoning regulations or environmental regulations. REITs also are dependent upon the skills of their managers and are subject to heavy cash flow dependency or self-liquidation. Regardless of where a REIT is organized or traded, its performance may be affected significantly by events in the region where its properties are located. Domestic REITs could be adversely affected by failure to qualify for tax-free "pass-through" of distributed net income and net realized gains under the Internal Revenue Code of 1986, as amended ("Internal Revenue Code"), or to maintain their exemption from registration under the Investment Company Act of 1940, as amended ("Investment Company Act"). REITs typically incur fees that are separate from those incurred by the Fund. Accordingly, the Fund's investment in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to paying Fund expenses. The value of REIT common stock may decline when interest rates rise. REITs tend to be small- to mid-capitalization securities and, as such, are subject to the risks of investing in small- to mid-capitalization securities.

Foreign Investing Risk

Non-U.S. investments carry potential risks not associated with U.S. investments. Such risks include, but are not limited to: (1) currency exchange rate fluctuations, (2) political and financial instability, (3) less liquidity, (4) lack of uniform accounting, auditing and financial reporting standards, (5) greater volatility, (6) different government regulation and supervision of foreign stock exchanges, brokers and listed companies, and (7) delays in transaction settlement in some foreign markets. The Fund's investment in a foreign issuer may subject the Fund to regulatory, political, currency, security, economic and other risks associated with that country. Global economic and financial markets are becoming increasingly interconnected and conditions (including recent volatility and instability) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Futures Contracts Risk

Futures contracts are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date. The use of such derivative instruments may expose the Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities underlying those derivatives. There can be no assurance that any strategy used will succeed. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes. There also can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that the Fund has previously bought or sold, and this may result in the inability to close a futures contract when desired. Futures contracts may experience potentially dramatic price changes, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). Equity index futures contracts expose the Fund to volatility in an underlying securities index. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Investment Risk

An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets.

Market Risk

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple assets may decline in value simultaneously. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future. The value of a security may decline due to adverse issuer-specific conditions, general market conditions unrelated to a particular issuer, or factors that affect a particular industry or industries. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Changes in value may be temporary or may last for extended periods. Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, including changes in the U.S. presidential administration and Congress, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

- **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, widespread business closures and layoffs, travel restrictions and closed borders, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The impact of the COVID-19 pandemic may last for an extended period of time and may result in a sustained economic downturn or recession. The U.S. Federal Reserve and the U.S. federal government have taken numerous measures to address the economic impact of the COVID-19 pandemic and stimulate the U.S. economy. The ultimate effects of these and other efforts that may be taken may not be known for some time.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets and has signaled that it plans to maintain its interventions at an elevated level. Amid these ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," and a trade agreement between the United Kingdom and the European Union, the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change.

Mid-Capitalization Companies Risk

Investing in the securities of mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since mid-capitalization companies may have narrower commercial markets and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity, and they can be particularly sensitive to expected changes in interest rates, borrowing costs and earnings.

Multiple Sub-Advisor Risk

The Manager may allocate the Fund's assets among multiple sub-advisors, each of which is responsible for investing its allocated portion of the Fund's assets. To a significant extent, the Fund's performance will depend on the success of the Manager in selecting and overseeing the sub-advisors and allocating the Fund's assets to sub-advisors. The sub-advisors' investment styles may not work together as planned, which could adversely affect the performance of the Fund. In addition, because each sub-advisor makes its trading decisions independently, it is possible that the sub-advisors may purchase or sell the same security at the same time without aggregating their transactions. This may cause unnecessary brokerage and other expenses.

Other Investment Companies Risk

To the extent that the Fund invests in shares of other registered investment companies, the Fund will indirectly bear the fees and expenses charged by those investment companies in addition to the Fund's direct fees and expenses. To the extent the Fund invests in other investment companies that invest in equity securities, fixed income securities and/or foreign securities, or that track an index, the Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject. The Fund will be subject to the risks associated with investments in those companies, including but not limited to the following:

- **Money Market Funds.** Investments in money market funds are subject to interest rate risk, credit risk, and market risk.

Sector Risk

When the Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if the Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. As the Fund's portfolio changes over time, the Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations.

Securities Lending Risk

To the extent the Fund lends its securities, it may be subject to the following risks: i) the securities in which the Fund reinvests cash collateral may decrease in value, causing the Fund to incur a loss, or may not perform sufficiently to cover the Fund's payment to the borrower of a pre-negotiated fee or "rebate" for the use of that cash collateral in connection with the loan; ii) non-cash collateral may decline in value, resulting in the Fund becoming under-secured; iii) delays may occur in the recovery of loaned securities from borrowers, which could result in the Fund being unable to vote proxies or settle transactions or cause the Fund to incur increased costs; and iv) if the borrower becomes subject to insolvency or similar proceedings, the Fund could incur delays in its ability to enforce its rights in its collateral.

Securities Selection Risk

Securities selected by a sub-advisor or the Manager for the Fund may not perform to expectations. This could result in the Fund's underperformance compared to its benchmark index(es), or other funds with similar investment objectives or strategies.

Small-Capitalization Companies Risk

Investing in the securities of small-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since small-capitalization companies may have narrower commercial markets, and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity and they can be particularly sensitive to changes in interest rates, borrowing costs and earnings.

Value Stocks Risk

Value stocks are subject to the risk that their intrinsic value may never be realized by the market or that their prices may decline. The Fund's investments in value stocks seek to limit potential downside price risk over time; however, value stock prices still may decline substantially. In addition, the Fund may produce more modest gains as a trade-off for this potentially lower risk. The Fund's investment in value stocks could cause the Fund to underperform funds that use a growth or non-value approach to investing or have a broader investment style.

Fund Performance

The bar chart and table below provide an indication of risk by showing changes in the Fund's performance over time. The bar chart shows how the Fund's performance has varied from year to year. The table shows how the Fund's average annual total returns compare to a broad-based market index, which is the Fund's benchmark index, for the periods indicated.

The chart and the table show the performance of the Fund's Investor Class shares for all periods. The Fund began offering R6 Class shares on February 28, 2018. In the table below, the performance of the R6 Class shares prior to February 28, 2018 represents the performance of the R5 Class shares of the Fund. The R6 Class shares would have had similar annual returns to the R5 Class shares of the Fund because the shares of each class represent investments in the same portfolio securities. However, the R5 Class shares of the Fund had different expenses than the R6 Class shares, which would affect performance. The R6 Class performance shown in the table has not been adjusted for differences in operating expenses between the R5 Class shares and the R6 Class shares.

You may obtain updated performance information on the Fund's website at www.americanbeaconfunds.com. Past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Calendar year total returns for Investor Class Shares. Year Ended 12/31

Highest Quarterly Return:

29.08% 4th Quarter 2020
01/01/2011 through 12/31/2020

Lowest Quarterly Return:

-39.99% 1st Quarter 2020
01/01/2011 through 12/31/2020

Average annual total returns for periods ended December 31, 2020

	Inception Date of Class	1 Year	5 Years	10 Years
Investor Class	02/28/2006			
Returns Before Taxes		2.36%	7.36%	9.20%
Returns After Taxes on Distributions		2.12%	6.67%	8.34%
Returns After Taxes on Distributions and Sales of Fund Shares		1.57%	5.71%	7.41%

		1 Year	5 Years	10 Years
Index (Reflects no deduction for fees, expenses or taxes)				
Russell Midcap Value Index		4.96%	9.73%	10.49%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local income taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The return after taxes on distributions and sale of Fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. If you are a tax-exempt entity or hold your Fund shares through a tax-deferred arrangement, such as an individual retirement account ("IRA") or a 401(k) plan, the after-tax returns do not apply to your situation. After-tax returns are shown only for Investor Class shares of the Fund; after-tax returns for other share classes will vary.

Management

The Manager

The Fund has retained American Beacon Advisors, Inc. to serve as its Manager.

Sub-Advisors

The Fund's assets are currently allocated among the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Pzena Investment Management, LLC
- WEDGE Capital Management, L.L.P.

Portfolio Managers

American Beacon Advisors, Inc.	Gene L. Needles, Jr. Chief Executive Officer Since 2012 Paul B. Cavazos Vice President & Chief Investment Officer Since 2016	Cynthia M. Thatcher Portfolio Manager Since 2016 Colin J. Hamer Associate Portfolio Manager Since 2018
Barrow, Hanley, Mewhinney & Strauss, LLC	Terry L. Pelzel Portfolio Manager/Managing Director Since 2018	Mark Giambrone Portfolio Manager/Senior Managing Director Since Fund Inception (2004)
Pzena Investment Management, LLC	Richard S. Pzena Managing Principal, CEO, Co-Chief Investment Officer & Founder Since Fund Inception (2004) Ben Silver Principal and Portfolio Manager Since 2017	John Flynn Principal and Portfolio Manager Since 2015
WEDGE Capital Management, L.L.P.	John Carr General Partner Since 2015 Andrew Rosenberg General Partner Since 2020	Michael Ritzer General Partner Since 2019 Richard Wells General Partner Since 2015

Purchase and Sale of Fund Shares

You may buy or sell shares of the Fund through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge. The Manager may, in its sole discretion, allow certain individuals to invest directly in the Fund. For more information regarding eligibility to invest directly please see "About Your Investment - Purchase and Redemption of Shares." Direct mutual fund account shareholders may buy subsequent shares or sell shares in various ways:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class only)	
Mail	American Beacon Funds P.O. Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$250
A, Investor	\$2,500	\$50	\$250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

Tax Information

Dividends and capital gain distributions, and other distributions, if any, that you receive from the Fund are subject to federal income tax and may also be subject to state and local income taxes, unless you are a tax-exempt entity or your account is tax-deferred, such as an individual retirement account or a 401(k) plan (in which case you may be taxed later, upon the withdrawal of your investment from such account or plan).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and the Fund's distributor, Resolute Investment Distributors, Inc., or the Manager may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your individual financial professional to recommend the Fund over another investment. Ask your individual financial professional or visit your financial intermediary's website for more information.

American Beacon Small Cap Value FundSM

Investment Objective

The Fund's investment objective is long-term capital appreciation and current income.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** You may qualify for sales discounts if you and your eligible family members invest, or agree to invest in the future, at least \$50,000 in all classes of the American Beacon Funds on an aggregated basis. More information about these and other discounts is available from your financial professional and in "Choosing Your Share Class" on page 67 of the Prospectus and "Additional Purchase and Sale Information for A Class Shares" on page 66 of the statement of additional information ("SAI"). With respect to purchases of shares through specific intermediaries, you may find additional information regarding sales charge discounts and waivers in Appendix A to the Fund's Prospectus entitled "Intermediary Sales Charge Discounts and Waivers and Other Information." Although the Fund does not impose any sales charge on Y Class shares, you may pay a commission to your broker on your purchases and sales of those shares, which is not reflected in the tables or Example below.

Shareholder Fees (fees paid directly from your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Maximum sales charge imposed on purchases (as a percentage of offering price)	5.75%	None	None	None	None	None	None
Maximum deferred sales charge (as a percentage of the lower of original offering price or redemption proceeds)	0.50% ¹	1.00%	None	None	None	None	None

Annual Fund Operating Expenses (Expenses that you pay each year as a percentage of the value of your investment)

Share Class	A	C	Y	R6	Advisor	R5	Investor
Management Fees	0.73%	0.73%	0.73%	0.73%	0.73%	0.73%	0.73%
Distribution and/or Service (12b-1) Fees	0.25%	1.00%	0.00%	0.00%	0.25%	0.00%	0.00%
Other Expenses	0.28%	0.23%	0.16%	0.06%	0.27%	0.09%	0.42%
Acquired Fund Fees and Expenses ²	0.01%	0.01%	0.01%	0.01%	0.01%	0.01%	0.01%
Total Annual Fund Operating Expenses	1.27%	1.97%	0.90%	0.80%	1.26%	0.83%	1.16%

¹ A contingent deferred sales charge ("CDSC") of 0.50% will be charged on certain purchases of \$1,000,000 or more of A Class shares that are redeemed in whole or part within 18 months of purchase.

² The Total Annual Fund Operating Expenses do not correlate to the ratio of expenses to average net assets provided in the Fund's Financial Highlights table, which reflects the operating expenses of the Fund and does not include Acquired Fund Fees and Expenses.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Share Class	1 Year	3 Years	5 Years	10 Years
A	\$ 697	\$ 955	\$ 1,232	\$ 2,021
C	\$ 300	\$ 618	\$ 1,062	\$ 2,296
Y	\$ 92	\$ 287	\$ 498	\$ 1,108

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual Fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 61% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, at least 80% of the Fund's net assets (plus the amount of any borrowings for investment purposes) are invested in equity securities of small market capitalization U.S. companies. These companies have market capitalizations of \$5 billion or less at the time of investment. The Fund's investments may include common stocks, preferred stocks, real estate investment trusts ("REITs"), American Depositary Receipts ("ADRs"), master limited partnerships ("MLPs"), and U.S. dollar-denominated foreign stocks traded on U.S. exchanges (collectively, "stocks").

The Manager allocates the assets of the Fund among six sub-advisors. The Manager believes that this strategy may help the Fund outperform other investment styles over the longer term while reducing volatility and downside risk. The sub-advisors select stocks that, in their opinion, have most or all of the following characteristics (relative to the Russell 2000® Index):

- above-average earnings growth potential,
- below-average price to earnings ratio,
- below-average price to book value ratio
- below-average price to revenue ratios, and
- above average free cash flow yields and return on capital.

Each of the sub-advisors determines the earnings growth prospects of companies based upon a combination of internal and external research using fundamental analysis and considering changing economic trends. The process is research driven and takes into consideration items such as a company's tangible assets, sustainability of its cash flows, capital intensity and financial leverage. The Fund may have significant exposure to the Financials sector. However, as the sector composition of the Fund's portfolio changes over time, the Fund's exposure to the Financials sector may be lower at a future date, and the Fund's exposure to other market sectors may be higher.

Barrow, Hanley, Mewhinney & Strauss, LLC ("Barrow"), one of the Fund's sub-advisors, manages two allocations of the Fund's assets, one pursuant to the fundamental research strategy discussed above and the other pursuant to a quantitative application of its fundamental research process ("Quantitative Strategy"). Barrow implements the Quantitative Strategy by using a quantitative multi-factor model that identifies the factors present in Barrow's fundamental research portfolio, which may include, for example, below-average price-to-revenue ratios, price-to-earnings ratios and price-to-book ratios and above-average free cash flow yields and return on capital. The model applies these factors and factor weightings to the Russell 2000 Index universe of companies and makes recommendations for adjustments to the portfolio on a daily basis.

Hotchkis and Wiley Capital Management, LLC ("Hotchkis"), another sub-advisor to the Fund, also manages two allocations of the Fund's assets, one pursuant to the fundamental research strategy discussed above and the other pursuant to a small cap diversified value strategy which seeks to exploit market inefficiencies created by irrational investor behavior ("Small Cap Diversified Value Strategy"). Hotchkis implements the Small Cap Diversified Value Strategy by using a disciplined, bottom-up investment process based on a proprietary model that is augmented by fundamental research. Hotchkis seeks broad diversified exposure to investment opportunities that are allocated to the Small Cap Diversified Value Strategy. Hotchkis evaluates relative valuation, fundamental operating trends, deterioration of fundamentals, and the Small Cap Diversified Value Strategy's diversification guidelines, among other factors, in determining whether to sell a security.

For each sub-advisor, the decision to sell a stock is typically based on the belief that the company is no longer considered undervalued or shows deteriorating fundamentals, or that better investment opportunities exist in other stocks.

The Fund may invest cash balances in other investment companies, including money market funds, and may purchase and sell futures contracts to gain market exposure on cash balances or reduce market exposure in anticipation of liquidity needs.

The Fund may lend its securities to broker-dealers and other institutions to earn additional income.

Principal Risks

There is no assurance that the Fund will achieve its investment objective and you could lose part or all of your investment in the Fund. The Fund is not designed for investors who need an assured level of income and is intended to be a long-term investment. The Fund is not a complete investment program and may not be appropriate for all investors. Investors should carefully consider their own investment goals and risk tolerance before investing in the Fund. The principal risks of investing in the Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

Allocation Risk

The Manager's and a sub-advisor's judgments about, and allocations among, strategies, asset classes and market exposures may adversely affect the Fund's performance. There can be no assurance, particularly during periods of market disruption and stress, that the Manager's and a sub-advisor's judgments about asset allocation will be correct.

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact the Fund and its service providers as well as the ability of shareholders to transact with the Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund or its service providers, as well as securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for the Fund or its service providers to identify all of the operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects. Most issuers in which the Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which the Fund invests, leading to significant loss of value.

Equity Investments Risk

Equity securities are subject to investment risk and market risk. The Fund may invest in the following equity securities, which may expose the Fund to the following additional risks:

- **Common Stock Risk.** The value of a company's common stock may fall as a result of factors affecting the company, companies in the same industry or sector, or the financial markets overall. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company.
- **Depositary Receipts and U.S. Dollar-Denominated Foreign Stocks Traded on U.S. Exchanges Risk.** Depositary receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges are subject to certain of the risks associated with investing directly in foreign securities, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depositary receipt or foreign stock, less liquidity, more volatility, less government regulation and supervision and delays in transaction settlement.

- **Master Limited Partnerships (“MLPs”) Risk.** Investing in MLPs involves certain risks related to investing in the underlying assets of the MLPs and risks associated with pooled investment vehicles. Investments held by MLPs may be relatively illiquid, limiting the MLPs’s ability to change their portfolios promptly in response to changes in economic or other conditions. MLPs may have limited financial resources, their securities may trade infrequently and in limited volume, they may be difficult to value, and they may be subject to more abrupt or erratic price movements than securities of larger or more broadly based companies. Holders of units in MLPs have more limited rights to vote on matters affecting the partnership and may be required to sell their common units at an undesirable time or price. The Fund’s investments in MLPs will be limited to no more than 25% of its assets in order for the Fund to meet the requirements necessary to qualify as a “regulated investment company” under the Internal Revenue Code of 1986, as amended (“Internal Revenue Code”).
- **Preferred Stock Risk.** Preferred stocks are sensitive to movements in interest rates. Preferred stocks may be less liquid than common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders. In certain situations, an issuer may call or redeem its preferred stock or convert it to common stock. The market prices of preferred stocks are generally more sensitive to actual or perceived changes in the issuer’s financial condition or prospects than are the prices of debt securities.
- **Real Estate Investment Trusts (“REITs”) Risk.** Investments in REITs are subject to the risks associated with investing in the real estate industry, including, among other risks: adverse developments affecting the real estate industry; declines in real property values; changes in interest rates; defaults by mortgagors or other borrowers and tenants; lack of availability of mortgage funds or financing; extended vacancies of properties, especially during economic downturns; casualty or condemnation losses; and governmental actions, such as changes to tax laws, zoning regulations or environmental regulations. REITs also are dependent upon the skills of their managers and are subject to heavy cash flow dependency or self-liquidation. Regardless of where a REIT is organized or traded, its performance may be affected significantly by events in the region where its properties are located. Domestic REITs could be adversely affected by failure to qualify for tax-free “pass-through” of distributed net income and net realized gains under the Internal Revenue Code of 1986, as amended (“Internal Revenue Code”), or to maintain their exemption from registration under the Investment Company Act of 1940, as amended (“Investment Company Act”). REITs typically incur fees that are separate from those incurred by the Fund. Accordingly, the Fund’s investment in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs’ operating expenses, in addition to paying Fund expenses. The value of REIT common stock may decline when interest rates rise. REITs tend to be small- to mid-capitalization securities and, as such, are subject to the risks of investing in small- to mid-capitalization securities.

Foreign Investing Risk

Non-U.S. investments carry potential risks not associated with U.S. investments. Such risks include, but are not limited to: (1) currency exchange rate fluctuations, (2) political and financial instability, (3) less liquidity, (4) lack of uniform accounting, auditing and financial reporting standards, (5) greater volatility, (6) different government regulation and supervision of foreign stock exchanges, brokers and listed companies, and (7) delays in transaction settlement in some foreign markets. The Fund’s investment in a foreign issuer may subject the Fund to regulatory, political, currency, security, economic and other risks associated with that country. Global economic and financial markets are becoming increasingly interconnected and conditions (including recent volatility and instability) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Futures Contracts Risk

Futures contracts are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date. The use of such derivative instruments may expose the Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities underlying those derivatives. There can be no assurance that any strategy used will succeed. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes. There also can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that the Fund has previously bought or sold, and this may result in the inability to close a futures contract when desired. Futures contracts may experience potentially dramatic price changes, which will increase the volatility of the Fund and may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). Equity index futures contracts expose the Fund to volatility in an underlying securities index. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Investment Risk

An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. When you sell your shares of the Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in the Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer’s goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets.

Market Risk

The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple assets may decline in value simultaneously. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future. The value of a security may decline due to adverse issuer-specific conditions, general market conditions unrelated to a particular issuer, or factors that affect a particular industry or industries. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole. Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Changes in value may be temporary or may last for extended periods. Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, including changes in the U.S. presidential administration and Congress, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may

impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

- **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, widespread business closures and layoffs, travel restrictions and closed borders, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. The impact of the COVID-19 pandemic may last for an extended period of time and may result in a sustained economic downturn or recession. The U.S. Federal Reserve and the U.S. federal government have taken numerous measures to address the economic impact of the COVID-19 pandemic and stimulate the U.S. economy. The ultimate effects of these and other efforts that may be taken may not be known for some time.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets and has signaled that it plans to maintain its interventions at an elevated level. Amid these ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty. A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," and a trade agreement between the United Kingdom and the European Union, the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect consequences of regulation or business trends driven by climate change.

Multiple Sub-Advisor Risk

The Manager may allocate the Fund's assets among multiple sub-advisors, each of which is responsible for investing its allocated portion of the Fund's assets. To a significant extent, the Fund's performance will depend on the success of the Manager in selecting and overseeing the sub-advisors and allocating the Fund's assets to sub-advisors. The sub-advisors' investment styles may not work together as planned, which could adversely affect the performance of the Fund. In addition, because each sub-advisor makes its trading decisions independently, it is possible that the sub-advisors may purchase or sell the same security at the same time without aggregating their transactions. This may cause unnecessary brokerage and other expenses.

Other Investment Companies Risk

To the extent that the Fund invests in shares of other registered investment companies, the Fund will indirectly bear the fees and expenses charged by those investment companies in addition to the Fund's direct fees and expenses. To the extent the Fund invests in other investment companies that invest in equity securities, fixed income securities and/or foreign securities, or that track an index, the Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject. The Fund will be subject to the risks associated with investments in those companies, including but not limited to the following:

- **Money Market Funds.** Investments in money market funds are subject to interest rate risk, credit risk, and market risk.

Quantitative Strategy Risk

The success of the Fund's investment strategy may depend in part on the effectiveness of a sub-advisor's quantitative tools for screening securities. These strategies may incorporate factors that are not predictive of a security's value. The quantitative tools may not react as expected to market events, resulting in losses for the Fund. Additionally, a previously successful strategy may become outdated or inaccurate, which may not be identified by a sub-advisor and therefore may also result in losses.

Sector Risk

When the Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if the Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. As the Fund's portfolio changes over time, the Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations.

Securities Lending Risk

To the extent the Fund lends its securities, it may be subject to the following risks: i) the securities in which the Fund reinvests cash collateral may decrease in value, causing the Fund to incur a loss, or may not perform sufficiently to cover the Fund's payment to the borrower of a pre-negotiated fee or "rebate" for the use of that cash collateral in connection with the loan; ii) non-cash collateral may decline in value, resulting in the Fund becoming under-secured; iii) delays may occur in the recovery of loaned securities from borrowers, which could result in the Fund being unable to vote proxies or settle transactions or cause the Fund to incur increased costs; and iv) if the borrower becomes subject to insolvency or similar proceedings, the Fund could incur delays in its ability to enforce its rights in its collateral.

Securities Selection Risk

Securities selected by a sub-advisor or the Manager for the Fund may not perform to expectations. This could result in the Fund's underperformance compared to its benchmark index(es), or other funds with similar investment objectives or strategies.

Small-Capitalization Companies Risk

Investing in the securities of small-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger-capitalization and more established companies. Since small-capitalization companies may have narrower commercial markets, and more limited operating history, product lines, and managerial and financial resources than larger, more established companies, the securities of these companies may lack sufficient market liquidity and they can be particularly sensitive to changes in interest rates, borrowing costs and earnings.

Value Stocks Risk

Value stocks are subject to the risk that their intrinsic value may never be realized by the market or that their prices may decline. The Fund's investments in value stocks seek to limit potential downside price risk over time; however, value stock prices still may decline substantially. In addition, the Fund may produce more modest gains as a trade-off for this potentially lower risk. The Fund's investment in value stocks could cause the Fund to underperform funds that use a growth or non-value approach to investing or have a broader investment style.

Fund Performance

The bar chart and table below provide an indication of risk by showing changes in the Fund's performance over time. The bar chart shows how the Fund's performance has varied from year to year. The table shows how the Fund's average annual total returns compare to a broad-based market index, which is the Fund's benchmark index, for the periods indicated.

The chart and the table show the performance of the Fund's Investor Class shares for all periods. The Fund began offering R6 Class shares on February 28, 2017. In the table below, the performance of R6 Class shares prior to February 28, 2017 represents the performance of the R5 Class shares of the Fund. The R6 Class would have had similar annual returns to the R5 Class shares of the Fund because the shares of each class represent investments in the same portfolio securities. However, the R5 Class shares of the Fund had different expenses than the R6 Class shares, which would affect performance. The R6 Class performance shown in the table has not been adjusted for differences in operating expenses between the R5 Class shares and the R6 Class shares.

You may obtain updated performance information on the Fund's website at www.americanbeaconfunds.com. Past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future.

Calendar year total returns for Investor Class Shares. Year Ended 12/31

Highest Quarterly Return:

33.77% 4th Quarter 2020
01/01/2011 through 12/31/2020

Lowest Quarterly Return:

-38.48% 1st Quarter 2020
01/01/2011 through 12/31/2020

Average annual total returns for periods ended December 31, 2020

	Inception Date of Class	1 Year	5 Years	10 Years
Investor Class				
	02/28/1999

		1 Year	5 Years	10 Years
Index (Reflects no deduction for fees, expenses or taxes)				
Russell 2000 Value Index		4.63%	9.65%	8.66%

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local income taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. The return after taxes on distributions and sale of Fund shares may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period. If you are a tax-exempt entity or hold your Fund shares through a tax-deferred arrangement, such as an individual retirement account ("IRA") or a 401(k) plan, the after-tax returns do not apply to your situation. After-tax returns are shown only for Investor Class shares of the Fund; after-tax returns for other share classes will vary.

Management

The Manager

The Fund has retained American Beacon Advisors, Inc. to serve as its Manager.

Sub-Advisors

The Fund's assets are currently allocated among the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Brandywine Global Investment Management, LLC
- Foundry Partners, LLC
- Hillcrest Asset Management, LLC
- Hotchkis and Wiley Capital Management, LLC
- Mellon Investments Corporation

Portfolio Managers

American Beacon Advisors, Inc.	Gene L. Needles, Jr. Chief Executive Officer Since 2012 Paul B. Cavazos Chief Investment Officer Since 2016	Cynthia M. Thatcher Portfolio Manager Since 2016 Colin J. Hamer Associate Portfolio Manager Since 2018
Barrow, Hanley, Mewhinney & Strauss, LLC	James S. McClure Portfolio Manager/Managing Director Since 2003	Coleman Hubbard Portfolio Manager/Managing Director Since 2020
Brandywine Global Investment Management, LLC	Henry F. Otto Managing Director Since Fund Inception (1998)	Steven M. Tonkovich Managing Director Since Fund Inception (1998)
Foundry Partners, LLC*	Mark Roach Portfolio Manager Since 2010	Mario Tufano Associate Portfolio Manager Since 2010
Hillcrest Asset Management, LLC	Brian R. Bruce Chief Investment Officer Since 2014 Douglas Stark Managing Director, Portfolio Management & Research Since 2014	Brandon Troegle Managing Director, Fundamental Analysis & Portfolio Management Since 2014
Hotchkis and Wiley Capital Management, LLC	David Green Principal, Portfolio Manager Since Fund Inception (1998) Judd Peters Portfolio Manager Since 2017	Jim Miles Principal, Portfolio Manager Since Fund Inception (1998) Ryan Thomes Portfolio Manager Since 2017
Mellon Investments Corporation	Joseph M. Corrado Executive Vice President, Senior Portfolio Manager Since 2004	Edward R. Walter Managing Director, Senior Portfolio Manager Since 2004

* From 2010 to 2016, Messrs. Roach and Tufano's positions were held with Dreman Value Management, LLC, which was a former sub-advisor to the Fund.

Purchase and Sale of Fund Shares

You may buy or sell shares of the Fund through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge. The Manager may, in its sole discretion, allow certain individuals to invest directly in the Fund. For more information regarding eligibility to invest directly please see "About Your Investment - Purchase and Redemption of Shares." Direct mutual fund account shareholders may buy subsequent shares or sell shares in various ways:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class only)	
Mail	American Beacon Funds P.O. Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

You may purchase or redeem shares of the Fund on any day the New York Stock Exchange ("NYSE") is open, at the Fund's net asset value ("NAV") per share next calculated after your order is received in proper form, subject to any applicable sales charge.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$250
A, Investor	\$2,500	\$50	\$250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

Tax Information

Dividends and capital gain distributions, and other distributions, if any, that you receive from the Fund are subject to federal income tax and may also be subject to state and local income taxes, unless you are a tax-exempt entity or your account is tax-deferred, such as an individual retirement account or a 401(k) plan (in which case you may be taxed later, upon the withdrawal of your investment from such account or plan).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and the Fund's distributor, Resolute Investment Distributors, Inc., or the Manager may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your individual financial professional to recommend the Fund over another investment. Ask your individual financial professional or visit your financial intermediary's website for more information.

Additional Information About the Funds

To help you better understand the Funds, this section provides a detailed discussion of the Funds' investment policies, their principal strategies and principal risks and performance benchmarks; however, this Prospectus does not describe all of a Fund's investment practices. **Capitalized terms that are not otherwise defined are defined in Appendix B.** For additional information, please see the Funds' SAI, which is available at www.americanbeaconfunds.com or by contacting us via telephone at 1-800-658-5811, by U.S. mail at P.O. Box 219643, Kansas City, MO 64121-9643, or by e-mail at americanbeaconfunds@ambeacon.com.

Additional Information About Investment Policies and Strategies

Investment Objectives

- The American Beacon Balanced Fund's investment objective is income and capital appreciation.
- The American Beacon Garcia Hamilton Quality Bond Fund's investment objective is high current income consistent with preservation of capital.
- The American Beacon International Equity Fund's investment objective is long-term capital appreciation.
- The American Beacon Large Cap Value Fund's investment objective is long-term capital appreciation and current income.
- The American Beacon Mid-Cap Value Fund's investment objective is long-term capital appreciation and current income.
- The American Beacon Small Cap Value Fund's investment objective is long-term capital appreciation and current income.

With the exception of the American Beacon Garcia Hamilton Quality Bond Fund, each Fund's investment objective is "fundamental," which means that it may be changed only with the approval of Fund shareholders. The American Beacon Garcia Hamilton Quality Bond Fund's investment objective is "non-fundamental," which means that it may be changed by the Fund's Board without the approval of Fund shareholders.

80% Investment Policies

- The American Beacon Garcia Hamilton Quality Bond Fund has a non-fundamental policy to invest under normal circumstances at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in investment grade bonds.
- The American Beacon International Equity Fund has a non-fundamental policy to invest under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in common stocks and securities convertible into common stocks of issuers based in at least three different countries located outside the United States.
- The American Beacon Large Cap Value Fund has a non-fundamental policy to invest under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities of large market capitalization U.S. companies.
- The American Beacon Mid-Cap Value Fund has a non-fundamental policy to invest under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities of middle market capitalization U.S. companies.
- The American Beacon Small Cap Value Fund has a non-fundamental policy to invest under normal circumstances at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in equity securities of small market capitalization U.S. companies.

If a Fund changes its 80% investment policy, a notice will be sent to shareholders at least 60 days in advance of the change and this prospectus will be supplemented.

Temporary Defensive Policy

Each Fund may depart from its principal investment strategy by taking temporary defensive or interim positions in response to adverse market, economic, political or other conditions. During these times, a Fund may not achieve its investment objective.

Additional Information About the Management of the Funds

The Funds have retained American Beacon Advisors, Inc. to serve as their Manager. The Manager may allocate the assets of each Fund among different sub-advisors. The Manager provides or oversees the provision of all administrative, investment advisory and portfolio management services to the Funds. The Manager:

- develops overall investment strategies for each Fund,
- selects and changes sub-advisors,
- allocates assets among sub-advisors,
- monitors and evaluates the sub-advisors' investment performance,
- monitors the sub-advisors' compliance with each Fund's investment objectives, policies and restrictions,
- oversees a Fund's securities lending activities and actions taken by the securities lending agent to the extent applicable,
- directs the investment of the portion of Fund assets that the sub-advisors determine should be allocated to short-term investments, and
- manages directly a portion of the assets of the American Beacon Balanced Fund.

Each Fund's assets are allocated among one or more sub-advisors by the Manager. The assets of the American Beacon Balanced Fund are allocated by the Manager among the Manager and multiple sub-advisors.

Each sub-advisor has full discretion to purchase and sell securities for its segment of the Funds' assets in accordance with the Funds' objectives, policies, restrictions and more specific strategies provided by the Manager. The Manager oversees the sub-advisors but does not reassess individual security selections made by the sub-advisors for their portfolios.

The Funds operate in a manager of managers structure. The Funds and the Manager have received an exemptive order from the SEC that permits the Funds, subject to certain conditions and approval by the Board, to hire and replace sub-advisors, and materially amend agreements with sub-advisors, that are unaffiliated with the Manager without approval of the shareholders. In the future, the Funds and the Manager may rely on an SEC staff no-action letter, dated July 9, 2019, that would permit the Funds to expand their exemptive relief to hire and replace sub-advisors that are affiliated and unaffiliated with the Manager without shareholder approval, subject to approval by the Board and other conditions. The Manager has ultimate responsibility, subject to oversight by the Board, to oversee sub-advisors and recommend their hiring, termination and replacement. The SEC order also exempts the Funds from disclosing the advisory fees paid by the Funds to individual sub-advisors in a multi-manager fund in various documents filed with the SEC and provided to shareholders. In the future, the Funds may rely on the SEC staff no-action letter to expand their exemptive relief to individual sub-advisors that are affiliated with the Manager. Under that no-action letter, the fees payable to sub-advisors unaffiliated with or partially-owned by the Manager or its parent company would be aggregated, and fees payable to sub-advisors that are wholly-owned by the Manager or its parent company, if any, would be aggregated with fees payable to the

Manager. Whenever a sub-advisor change is proposed in reliance on the order, in order for the change to be implemented, the Board, including a majority of its “non-interested” trustees, must approve the change. In addition, the Funds are required to provide shareholders with certain information regarding any new sub-advisor within 90 days of the hiring of any new sub-advisor.

American Beacon Balanced Fund

The Fund’s assets are allocated among the Manager and the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Hotchkis and Wiley Capital Management, LLC

Currently, approximately one-half of the Fund’s assets are allocated to Barrow, Hanley, Mewhinney & Strauss, LLC, who decides the proportion of assets to invest in equity and fixed income securities in accordance with the Fund’s guidelines. The remaining one-half of the Fund’s assets are allocated between the Manager, who invests its allocation in fixed income securities and Hotchkis and Wiley Capital Management, LLC, who invests its allocation in equity securities.

American Beacon Garcia Hamilton Quality Bond Fund

The Manager allocates the Fund’s assets to one sub-advisor, Garcia Hamilton & Associates, L.P.

American Beacon International Equity Fund

The Fund’s assets are allocated among the following investment sub-advisors:

- American Century Investment Management, Inc.
- Causeway Capital Management LLC
- Lazard Asset Management LLC

Currently, the Fund’s assets are allocated among the sub-advisors generally on an equal basis.

American Beacon Large Cap Value Fund

The Fund’s assets are allocated among the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Hotchkis and Wiley Capital Management, LLC
- Massachusetts Financial Services Company

Currently, the Fund’s assets are allocated among the sub-advisors generally on an equal basis.

American Beacon Mid-Cap Value Fund

The Fund’s assets are allocated among the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Pzena Investment Management, LLC
- WEDGE Capital Management, L.L.P.

Currently, the Fund’s assets are allocated among the sub-advisors generally on an equal basis.

American Beacon Small Cap Value Fund

The Fund’s assets are allocated among the following investment sub-advisors:

- Barrow, Hanley, Mewhinney & Strauss, LLC
- Brandywine Global Investment Management, LLC
- Foundry Partners, LLC
- Hillcrest Asset Management, LLC
- Hotchkis and Wiley Capital Management, LLC
- Mellon Investments Corporation

The Manager intends to allocate new and existing assets among the Fund’s sub-advisors, as permitted by their respective capacity commitments to the Fund and other considerations by the Manager.

Additional Information About Investments

This section provides more detailed information regarding certain of the Funds’ principal investment strategies as well as information regarding the Funds’ strategy with respect to investment of cash balances.

Asset-Backed and Mortgage-Related Securities

Asset-backed securities are fractional interests in pools of loans, receivables or other assets. They are issued by trusts or other special purpose vehicles and are collateralized by the loans, receivables or other assets that make up the pool. The trust or other issuer passes the income from the underlying asset pool to the investor. A Fund, the Manager, and the sub-advisors do not select the loans or other assets that are included in the collateral backing those pools. A Fund may also invest in debt obligations of U.S. Government-sponsored enterprises, including Fannie Mae, Freddie Mac, FFCB and the Tennessee Valley Authority. Although chartered or sponsored by Acts of Congress, these entities are not backed by the full faith and credit of the U.S. Government. Fannie Mae and Freddie Mac are supported by the issuers’ right to borrow from the U.S. Treasury, the discretionary authority of the U.S. Treasury to lend to the issuers. The types of mortgage related securities that a Fund may invest in include:

- **CMOs** - CMOs and interests in REMICs are debt securities collateralized by mortgages or mortgage pass-through securities. CMOs divide the cash flow generated from the underlying mortgages or mortgage pass-through securities into different groups referred to as “tranches,” which are then retired sequentially over time in order of priority. The principal governmental issuers of such securities Fannie Mae, a government sponsored corporation owned entirely by private stockholders, and Freddie Mac, a corporate instrumentality of the United States created pursuant to an act of Congress that is owned entirely by the Federal Home Loan Banks. The issuers of CMOs are structured as trusts or corporations established for the purpose of issuing such CMOs and often have no assets other than those underlying the securities and any credit support provided. A REMIC is a mortgage securities vehicle that holds residential or commercial mortgages and issues securities representing interests in those mortgages. A REMIC may be formed as a corporation, partnership,

or segregated pool of assets. A REMIC itself is generally exempt from federal income tax, but the income from its mortgages is taxable to its investors. For investment purposes, interests in REMIC securities are virtually indistinguishable from CMOs.

There are a number of important differences among the agencies, instrumentalities and government-sponsored enterprises of the U.S. government that issue mortgage-related securities and among the securities that they issue. Such agencies and securities include:

- **GNMA Mortgage Pass-Through Certificates** - The GNMA is a wholly owned U.S. Government corporation within the U.S. Department of Housing and Urban Development. Ginnie Maes represent an undivided interest in a pool of mortgages that are insured by the Federal Housing Administration or the Farmers Home Administration or guaranteed by the Veterans Administration. Ginnie Maes entitle the holder to receive all payments (including prepayments) of principal and interest owed by the individual mortgagors, net of fees paid to the GNMA and to the issuer which assembles the mortgage pool and passes through the monthly mortgage payments to the certificate holders (typically, a mortgage banking firm), regardless of whether the individual mortgagor actually makes the payment. Because payments are made to certificate holders regardless of whether payments are actually received on the underlying mortgages, Ginnie Maes are of the "modified pass-through" mortgage certificate type. The GNMA is authorized to guarantee the timely payment of principal and interest on the Ginnie Maes. The GNMA guarantee is backed by the full faith and credit of the United States, and the GNMA has unlimited authority to borrow funds from the U.S. Treasury to make payments under the guarantee. The market for Ginnie Maes is highly liquid because of the size of the market and the active participation in the secondary market of security dealers and a variety of investors.
- **Mortgage-Related Securities Issued by Private Organizations** - Pools created by non-governmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government guarantees of payments in such pools. However, timely payment of interest and principal of these pools is often partially supported by various enhancements such as over-collateralization and senior/subordination structures and by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance. The insurance and guarantees are issued by government entities, private insurers or the mortgage poolers. Although the market for such securities is becoming increasingly liquid, securities issued by certain private organizations may not be readily marketable.
- **Freddie Mac Mortgage Participation Certificates** - Freddie Macs represent interests in groups of specified first lien residential conventional mortgages underwritten and owned by Freddie Mac. Freddie Macs entitle the holder to timely payment of interest, which is guaranteed by Freddie Mac. Freddie Mac guarantees either ultimate collection or timely payment of all principal payments on the underlying mortgage loans. In cases where Freddie Mac has not guaranteed timely payment of principal, Freddie Mac may remit the amount due because of its guarantee of ultimate payment of principal at any time after default on an underlying mortgage, but in no event later than one year after it becomes payable. Freddie Macs are not guaranteed by the United States or by any of the Federal Home Loan Banks and do not constitute a debt or obligation of the United States or of any Federal Home Loan Bank.
- **Fannie Mae Guaranteed Mortgage Pass-Through Certificates** - Fannie Maes represent an undivided interest in a pool of conventional mortgage loans secured by first mortgages or deeds of trust, on one family or two to four family, residential properties. Fannie Mae is obligated to distribute scheduled monthly installments of principal and interest on the mortgages in the pool, whether or not received, plus full principal of any foreclosed or otherwise liquidated mortgages. The obligation of Fannie Mae under its guarantee is solely its obligation and is not backed by, nor entitled to, the full faith and credit of the United States.

Cash Equivalents

A Fund may invest in cash equivalents including among others, time deposits, certificates of deposit, government obligations, commercial paper, short-term corporate debt securities and repurchase agreements.

Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate. Certificates of deposit are issued against funds deposited in an eligible bank (including its domestic and foreign branches, subsidiaries and agencies), are for a definite period of time, earn a specified rate of return and are normally negotiable.

CP is a short-term, unsecured promissory note issued by finance companies, banks, and corporations generally used as a source of working capital and other short-term financing. CP has maturities ranging from 1 to 270 days.

Cash Management Investments

A Fund may invest cash balances in money market funds that are registered as investment companies under the Investment Company Act, including money market funds that are advised by the Manager or a sub-advisor and in futures contracts. If a Fund invests in money market funds, the Fund becomes a shareholder of that investment company. As a result, Fund shareholders will bear their proportionate share of the expenses, including, for example, advisory and administrative fees, of the money market funds in which a Fund invests, such as advisory fees charged by the Manager to any applicable money market funds advised by the Manager, in addition to the fees and expenses Fund shareholders directly bear in connection with a Fund's own operations. Shareholders also would be exposed to the risks associated with money market funds and the portfolio investments of such money market funds, including the risk that a money market fund's yield will be lower than the return that a Fund would have derived from other investments that provide liquidity.

To gain market exposure on cash balances held in anticipation of liquidity needs or reduce market exposure in anticipation of liquidity needs, a Fund also may purchase and sell non-commodity based futures contracts on a daily basis that relate to securities in which they may invest directly and indices comprised of such securities.

A futures contract is a contract to purchase or sell a particular security, or the cash value of an index, at a specified future date at a price agreed upon when the contract is made. Under such contracts, no delivery of the actual securities is required. Rather, upon the expiration of the contract, settlement is made by exchanging cash in an amount equal to the difference between the contract price and the closing price of a security or index at expiration, net of the variation margin that was previously paid. As cash balances are invested in securities, a Fund may invest simultaneously those balances in futures contracts until the cash balances are delivered to settle the securities transactions. This exposes a Fund to the market risks associated with the underlying securities and indices. Because a Fund will have market exposure simultaneously in both the invested securities and futures contracts, a Fund may have more than 100% of its assets exposed to the markets. This can magnify gains and losses in a Fund. A Fund also may have to sell assets at inopportune times to satisfy its settlement or collateral obligations. The risks associated with the use of futures contracts also include that there may be an imperfect correlation between the changes in market value of the securities held by a Fund and the prices of futures contracts or the movement in the prices of futures contracts and the value of their underlying investment or indices and that there may not be a liquid secondary market for a futures contract.

Currencies

A Fund may invest in foreign currencies and foreign currency-denominated securities. A Fund may also purchase and sell foreign currency forward contracts, foreign currency futures contracts, and may engage in foreign currency transactions either on a spot (cash) basis at the rate prevailing in the currency exchange market at the time or through forward currency contracts (see "Forward Contracts"). A Fund may engage in these transactions in order to hedge or

protect against uncertainty in the level of future foreign exchange rates in the purchase and sale of securities or other derivative positions. A Fund also may use foreign currency, foreign currency denominated instruments and foreign currency forward contracts to increase exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one country to another.

Equity Investments

A Fund's equity investments may include:

- **Common Stock.** Common stock generally takes the form of shares in a corporation which represent an ownership interest. It ranks below preferred stock and debt securities in claims for dividends and for assets of the company in a liquidation or bankruptcy. Common stock may be traded via an exchange or over-the-counter. Over-the-counter stock may be less liquid than exchange-traded stock.
- **Convertible Securities.** Convertible securities are generally preferred stocks and other securities, including bonds and warrants that are convertible into or exercisable for common stock at a stated price or rate. Convertible debt securities may offer greater appreciation potential than non-convertible debt securities. Convertible securities are senior to common stock in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While typically providing a fixed income stream, a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.
- **Depository Receipts and U.S. Dollar-Denominated Foreign Stock Traded on U.S. Exchanges.** ADRs are U.S. dollar-denominated receipts issued generally by domestic banks and represent the deposit with the bank of a security of a foreign issuer. Depository receipts may not be denominated in the same currency as the securities into which they may be converted. Investing in depository receipts and U.S. dollar-denominated foreign stocks traded on U.S. exchanges entails substantially the same risks as direct investment in foreign securities. There is generally less publicly available information about foreign companies and there may be less governmental regulation and supervision of foreign stock exchanges, brokers and listed companies. In addition, such companies may use different accounting and financial standards (and certain currencies may become unavailable for transfer from a foreign currency), resulting in a Fund's possible inability to convert immediately into U.S. currency proceeds realized upon the sale of portfolio securities of the affected foreign companies. In addition, a Fund may invest in unsponsored depository receipts, the issuers of which are not obligated to disclose material information about the underlying securities to investors in the United States. Ownership of unsponsored depository receipts may not entitle a Fund to the same benefits and rights as ownership of a sponsored depository receipt or the underlying security.
- **Master Limited Partnerships.** MLPs are publicly traded partnerships. An MLP is an investment that combines the tax benefits of a limited partnership with the liquidity of publicly traded securities. A Fund's investments in MLPs will be limited by tax considerations.
- **Preferred Stock.** Preferred stock blends the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and its participation in the issuer's growth may be limited. Preferred stock has preference over common stock in the receipt of dividends and in any residual assets after payment to creditors should the issuer be dissolved. Although the dividend is typically set at a fixed annual rate, in some circumstances it can be variable, changed or omitted by the issuer.
- **Real Estate Investment Trust ("REITs").** REITs are pooled investment vehicles that own, and often operate, income producing real estate (known as "equity REITs") or invest in mortgages secured by loans on such real estate (known as "mortgage REITs") or both (known as "hybrid REITs"). REITs are susceptible to the risks associated with direct ownership of real estate, such as declines in property values, increase in property taxes, operating expenses, rising interest rates or overbuilding, zoning changes, and losses from casualty or condemnation. REITs typically are subject to management fees and other expenses that are separate from those of a Fund.

Fixed Income Instruments

A Fund's investments in fixed-income instruments may include:

- **Corporate Debt and Other Fixed-Income Securities.** Typically, the values of fixed-income securities change inversely with prevailing interest rates. Therefore, a fundamental risk of fixed-income securities is interest rate risk, which is the risk that their value will generally decline as prevailing interest rates rise, which may cause a Fund's NAV to likewise decrease, and vice versa. How specific fixed-income securities may react to changes in interest rates will depend on the specific characteristics of each security. For example, while securities with longer maturities tend to produce higher yields, they also tend to be more sensitive to changes in prevailing interest rates and are therefore more volatile than shorter-term securities and are subject to greater market fluctuations as a result of changes in interest rates. Fixed-income securities are also subject to credit risk, which is the risk that the credit strength of an issuer of a fixed-income security will weaken and/or that the issuer will be unable to make timely principal and interest payments and that the security may go into default.
- **Emerging Markets Debt.** A Fund may invest a significant portion of its assets in a particular geographic region or country, including emerging markets. A Fund may consider a country to be an emerging market country based on a number of factors including, but not limited to, if the country is classified as an emerging or developing economy by any supranational organization such as the World Bank, International Finance Corporation or the United Nations, or related entities, or if the country is considered an emerging market country for purposes of constructing emerging market indices.
- **Government-Sponsored Enterprises.** A Fund may invest in debt obligations of U.S. Government-sponsored enterprises, including the Fannie Mae, Freddie Mac, FHLB, FFCB, and the Tennessee Valley Authority. Although chartered or sponsored by Acts of Congress, these entities are not backed by the full faith and credit of the U.S. Government. Fannie Mae and Freddie Mac are supported by the issuers' right to borrow from the U.S. Treasury, the discretionary authority of the U.S. Treasury to lend to the issuers and the U.S. Treasury's commitment to purchase stock to ensure the issuers' positive net worth.
- **Investment Grade Securities.** Investment grade securities that a Fund may purchase, either as part of its principal investment strategy or to implement its temporary defensive policy, include securities issued or guaranteed by the U.S. Government, its agencies and instrumentalities, as well as securities rated in one of the four highest rating categories by a rating organization rating that security (such as S&P Global Ratings, Moody's Investors Service, Inc., or Fitch, Inc.) or comparably rated by a sub-advisor if unrated by a rating organization. A Fund, at the discretion of the applicable sub-advisor, may retain a security that has been downgraded below the initial investment criteria.
- **U.S. Government Securities.** U.S. Government securities may include U.S. Treasury securities or debt obligations of U.S. Government-sponsored enterprises.

Forward Contracts

Forward contracts are two-party contracts pursuant to which one party agrees to pay the counterparty a fixed price for an agreed upon amount of commodities or securities, or the cash value of commodities, securities or a securities index, at an agreed upon future date. A forward currency contract is an obligation to buy or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. An NDF is a forward contract where there is no physical settlement of the two currencies at maturity. Rather, on the contract settlement date, a net cash settlement will be made by one party to the other based on the difference between the contracted forward rate and the prevailing spot rate, on an agreed notional amount.

Futures Contracts

A futures contract is a contract to purchase or sell a particular asset, such as securities, indices, or currencies, or the cash value of an index, at a specified future date at a price agreed upon when the contract is made. Under many such contracts, no delivery of the actual underlying asset is required. Rather, upon the expiration of the contract, settlement is made by exchanging cash in an amount equal to the difference between the contract price and the closing price of the asset (e.g., a security or an index) at expiration, net of the initial and variation margin that was previously paid. An equity index futures contract is based on the value of an underlying index. A Fund may, from time to time, use futures positions to equitize cash and expose its portfolio to changes in securities prices or index prices. This can magnify gains and losses in the Fund. A Fund also may have to sell assets at inopportune times to satisfy its settlement or collateral obligations. The risks associated with the use of futures contracts also include that there may be an imperfect correlation between the changes in market value of the prices of futures contracts and the assets underlying such contracts and that there may not be a liquid secondary market for a futures contract.

Other Investment Companies Securities

A Fund at times may invest in shares of other investment companies, including money market funds. A Fund may invest in securities of an investment company advised by the Manager or its sub-advisor. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, a Fund becomes a shareholder of that investment company. As a result, Fund shareholders indirectly will bear a Fund's proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses Fund shareholders directly bear in connection with a Fund's own operations. These other fees and expenses are reflected as Acquired Fund Fees and Expenses and are included in the Fees and Expenses Table for a Fund in this Prospectus, if applicable. Investment in other investment companies may involve the payment of substantial premiums above the value of such issuer's portfolio securities.

A Fund can invest free cash balances in registered open-end investment companies regulated as money market funds under the Investment Company Act, to provide liquidity or for defensive purposes. A Fund could invest in money market funds rather than purchasing individual short-term investments. If a Fund invests in money market funds, shareholders will bear their proportionate share of the expenses, including for example, advisory and administrative fees, of the money market funds in which a Fund invests, including advisory fees charged by the Manager to any applicable money market funds advised by the Manager.

Although a money market fund is designed to be a relatively low risk investment, it is not free of risk. Despite the short maturities and high credit quality of a money market fund's investments, increases in interest rates and deteriorations in the credit quality of the instruments the money market fund has purchased may reduce the money market fund's yield and can cause the price of a money market security to decrease. In addition, a money market fund is subject to the risk that the value of an investment may be eroded over time by inflation.

Variable and Floating Rate Securities

The coupons on certain fixed income securities in which a Fund may invest are not fixed and may fluctuate based upon changes in market rates. The coupon on a variable or floating rate security is generally based on an interest rate such as a money market index, LIBOR or a Treasury bill rate. Variable and floating rate obligations are less effective than fixed rate obligations at locking in a particular yield. Nevertheless, such obligations are subject to interest rate risk and may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons. As short-term interest rates decline, the coupons on variable and floating rate securities typically should decrease. Alternatively, during periods of increasing interest rates, changes in the coupons of variable and floating rate securities may lag behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of variable and floating rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general. Variable and floating rate securities will not generally increase in value if interest rates decline.

Additional Information About Risks

The greatest risk of investing in a mutual fund is that its returns will fluctuate and you could lose money. The following table identifies the risk factors of each Fund in light of each Fund's respective principal investment strategies. These risk factors are explained following the table. References to "the Fund" and "a Fund" in the risk explanations are intended to refer the Fund(s) identified in the table as having that risk factor. The principal risks of investing in each Fund listed below are presented in alphabetical order and not in order of importance or potential exposure. Among other matters, this presentation is intended to facilitate your ability to find particular risks and compare them with the risks of other funds. Each risk summarized below is considered a "principal risk" of investing in a Fund, regardless of the order in which it appears.

Allocation Risk

This is the risk that the Manager's or a sub-advisor's judgments about, and allocations among, strategies, asset classes and market exposures may adversely affect a Fund's performance. There can be no assurance, particularly during periods of market disruption and stress, that the Manager's or a sub-advisor's judgments about asset allocation will be correct. Some broad asset categories and sub-classes may perform below expectations or the securities markets generally over short and extended periods.

Asset-Backed and Mortgage Related Securities Risk

Investments in asset-backed and mortgage related securities are subject to market risks for fixed income securities which include, but are not limited to, credit risk, interest rate risk, prepayment and extension risk, callable securities risk, valuation risk, and liquidity risk. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain mortgage-backed and asset-backed securities. If interest rates fall, the rate of prepayments tends to increase as borrowers are motivated to pay off debt and refinance at new lower rates. When mortgages and other obligations are prepaid and when securities are called, a Fund may have to reinvest in securities with a lower yield or fail to recover additional amounts (i.e., premiums) paid for securities with higher interest rates, resulting in an unexpected capital loss and/or a decrease in the amount of dividends and yield. Because prepayments increase when interest rates fall, the prices of mortgage-backed and asset-backed securities do not increase as much as other fixed income securities when interest rates fall. When interest rates rise, borrowers are less likely to prepay their mortgage and other loans. A decreased rate of prepayments lengthens the expected maturity of mortgage-backed and asset-backed securities. Therefore, the prices of mortgage-backed and asset-backed securities may decrease more than prices of other fixed income securities when interest rates rise. Rising interest rates tend to extend the duration of these securities, making them more sensitive to changes in interest rates. Rising interest rates also may increase the risk of default by borrowers. As a result, in a period of rising interest rates, a Fund that holds these types of securities may experience additional volatility and losses. A decline in the credit quality of and defaults by the issuers of asset-backed and mortgage related securities or instability in the markets for such securities may affect the value and liquidity of such securities, which could result in losses to a Fund. In addition, certain asset-backed and mortgage related securities may include securities backed by pools of loans made to "subprime" borrowers or borrowers with blemished credit histories; the risk of defaults is generally higher in the case of mortgage pools that include such subprime mortgages.

Asset Selection Risk

Assets selected by a sub-advisor or the Manager for a Fund may not perform to expectations. The portfolio managers' judgments about the attractiveness, value and potential performance of a particular asset class or individual security may be incorrect, and there is no guarantee that individual securities will perform as anticipated. Additionally, asset classes tend to go through cycles of outperformance and underperformance in comparison to each other and to the general securities markets. The investment models used to manage a Fund may rely in part on data derived from third parties and may not perform as intended. This could result in a Fund's underperformance compared to other funds with similar investment objectives.

Callable Securities Risk

A Fund may invest in fixed-income securities with call features. A call feature allows the issuer of the security to redeem or call the security prior to its stated maturity date. In periods of falling interest rates, issuers may be more likely to call in securities that are paying higher coupon rates than prevailing interest rates. In the event of a call, a Fund would lose the income that would have been earned to maturity on that security, the proceeds received by a Fund may be invested in securities paying lower coupon rates, and a Fund may not benefit from any increase in value that might otherwise result from declining interest rates. Thus, a Fund's income could be reduced as a result of a call. In addition, the market value of a callable security may decrease if it is perceived by the market as likely to be called, which could have a negative impact on a Fund's total return.

Counterparty Risk

A Fund is subject to the risk that a party or participant to a transaction, such as a broker or derivative counterparty, will be unwilling or unable to satisfy its obligation to make timely principal, interest or settlement payments or to otherwise honor its obligations to a Fund. As a result, a Fund may not recover its investment or may only obtain a limited recovery, and any recovery may be delayed. Not all derivative transactions require a counterparty to post collateral, which may expose a Fund to greater losses in the event of a default by a counterparty.

Credit Risk

A Fund is subject to the risk that the issuer or guarantor of a debt security, or the counterparty to a transaction, including a derivatives contract, may fail, or become less able, to make timely payment of interest or principal or otherwise honor its obligations or default completely. The strategies utilized by a sub-advisor require accurate and detailed credit analysis of issuers and there can be no assurance that its analysis will be accurate or complete. A Fund may be subject to substantial losses in the event of credit deterioration or bankruptcy of one or more issuers in its portfolio. Financial strength and solvency of an issuer are the primary factors influencing credit risk. In addition, inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of an instrument and debt obligations which are rated by rating agencies may be subject to downgrade. The credit ratings of debt instruments and investments represent the rating agencies' opinions regarding their credit quality and are not a guarantee of future credit performance of such securities. Rating agencies attempt to evaluate the safety of the timely payment of principal and interest (or dividends) and do not evaluate the risks of fluctuations in market value. The ratings assigned to securities by rating agencies do not purport to fully reflect the true risks of an investment. Further, in recent years many highly-rated structured securities have been subject to substantial losses as the economic assumptions on which their ratings were based proved to be materially inaccurate. A decline in the credit rating of an individual security held by a Fund may have an adverse impact on its price and may make it difficult for a Fund to sell it. Ratings represent a rating agency's opinion regarding the quality of the security and are not a guarantee of quality. Rating agencies might not always change their credit rating on an issuer or security in a timely manner to reflect events that could affect the issuer's ability to make timely payments on its obligations. Credit risk is typically greater for securities with ratings that are below investment grade (commonly referred to as "junk bonds"). Changes in the actual or perceived creditworthiness of an issuer, or a downgrade or default affecting any of a Fund's securities, could affect a Fund's performance.

Currency Risk

A Fund may have exposure to foreign currencies by using various instruments described below. Foreign currencies may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, may be affected unpredictably by intervention, or the failure to intervene, of the U.S. or foreign governments, central banks, or supranational entities such as the International Monetary Fund, and may be affected by the imposition of currency controls or political developments in the U.S. or abroad. As a result, a Fund's exposure to foreign currencies may reduce the returns of a Fund. Foreign currencies may decline in value relative to the U.S. dollar and other currencies and thereby affect a Fund's investments in non-U.S. currencies, securities that trade in and receive revenues in non-U.S. currencies or in derivatives that provide exposure to non-U.S. currencies. In addition, changes in currency exchange rates could adversely impact investment gains or add to investment losses. Currency futures and forwards may not always work as intended, and in specific cases, a Fund may be worse off than if it had not used such instrument(s). In the case of hedging positions, the U.S. dollar or other currency may decline in value relative to the foreign currency that is being hedged and thereby affect a Fund's investments. There may not always be suitable hedging instruments available. Even where suitable hedging instruments are available, a Fund may choose to not hedge its currency risks. A Fund may gain exposure to foreign currencies because of its investments in one or more of the following:

- Non-U.S. currencies
- Securities denominated in non-U.S. currencies
- Foreign currency forward contracts, including NDFs
- Non-U.S. currency futures contracts

Cybersecurity and Operational Risk

Operational risks arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents may negatively impact a Fund, its service providers, and third-party fund distribution platforms, as well as the ability of shareholders to transact with a Fund. Cybersecurity incidents may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause a Fund or its service providers, as well as the securities trading venues and their service providers, to suffer data corruption or lose operational functionality. A cybersecurity incident could, among other things, result in the loss or theft of shareholder data or funds, shareholders or service providers being unable to access electronic systems (also known as "denial of services"), loss or theft of proprietary information or corporate data, the inability to process Fund transactions, interference with a Fund's ability to calculate its NAV, impediments to trading, physical damage to a computer or network system, or remediation costs associated with system repairs. The occurrence of any of these problems could result in a loss of information, violations of applicable privacy and other laws, regulatory scrutiny, penalties, fines, reputational damage, additional compliance requirements, and other consequences, any of which could have a material adverse effect on a Fund or its shareholders. The Manager, through its monitoring and oversight of Fund service providers, endeavors to determine that service providers take appropriate precautions to avoid and mitigate risks that could lead to such problems. While the Manager has established business continuity plans and risk management systems seeking to address these problems, there are inherent limitations in such plans and systems, and it is not possible for the Manager, other Fund service providers, or third-party fund distribution platforms to identify all of the operational risks that may affect a Fund or to develop processes and controls to

completely eliminate or mitigate their occurrence or effects. Most issuers in which a Fund invests are heavily dependent on computers for data storage and operations, and require ready access to the internet to conduct their business. Thus, cybersecurity incidents could also affect issuers of securities in which a Fund invests, leading to significant loss of value.

Debentures Risk

Debentures are unsecured, medium- to long-term debt securities protected only by the general creditworthiness of the issuer, not by collateral. In the event of a default or bankruptcy by the issuer, as unsecured creditors, debenture holders will not have a claim against any specific assets of the issuer and will therefore only be paid from the issuer's assets after the secured creditors have been paid. A Fund is subject to the risk that the value of a debenture will fluctuate with changes in interest rates and the perceived ability of the issuer to make interest or principal payments on time. A Fund may invest in both corporate and government debentures.

Dividend Risk

A Fund's focus on dividend-paying stocks could cause a Fund to underperform funds that invest without consideration of a company's track record of paying dividends. An issuer of stock held by a Fund may choose not to declare a dividend or the dividend rate might not remain at current levels or increase over time. Dividend paying stocks might not experience the same level of earnings growth or capital appreciation as non-dividend paying stocks. In addition, stocks of companies with a history of paying dividends may not participate in a broad market advance to the same degree as most other stocks, and a sharp rise in interest rates or an economic downturn could cause a company to unexpectedly reduce or eliminate its dividend. Securities that pay dividends may be sensitive to changes in interest rates, and as interest rates rise, the prices of such securities may fall. At times, a Fund may not be able to identify dividend-paying stocks that are attractive investments. The income received by a Fund will also fluctuate due to the amount of dividends that companies elect to pay.

Emerging Markets Risk

When investing in emerging markets, the risks of investing in foreign securities are heightened. Emerging markets have unique risks that are greater than, or in addition to, the risks associated with investing in developed markets because emerging markets are generally smaller, less developed, less liquid and more volatile than the securities markets of the U.S. and other developed markets. There are also risks of: greater political and economic uncertainties; an economy's dependence on revenues from particular commodities or on international aid or development assistance; currency transfer restrictions; a limited number of potential buyers for such securities, resulting in increased volatility and limited liquidity for emerging market securities; trading suspensions and other restrictions on investment; delays and disruptions in securities settlement procedures; and significant limitations on investor rights and recourse. The economies and political environments of emerging market countries tend to be more unstable than those of developed countries, resulting in more volatile rates of return than the developed markets and substantially greater risk to investors. The governments of emerging market countries may also be more unstable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, intervene in the financial markets, and/or impose burdensome taxes that could adversely affect security prices. Emerging market countries often have less uniformity in accounting, auditing, financial reporting and recordkeeping requirements and less reliable clearance and settlement, registration and custodial procedures. In addition, there may be less publicly available or less reliable information about issuers in emerging markets than would be available about issuers in more developed capital markets, which can impede a sub-advisor's ability to accurately evaluate foreign securities. Such issuers may not be subject to accounting, auditing and financial reporting standards and requirements comparable to those to which U.S. companies are subject. In certain emerging market countries, fraud and corruption may be more prevalent than in developed market countries, and investor protections may be more limited than those in other countries. It may be difficult to obtain or enforce legal judgments against non-U.S. companies and non-U.S. persons in foreign jurisdictions, either through the foreign judicial system or through a private arbitration process. These matters have the potential to impact the Fund's investment objective and performance.

Equity Investments Risk

Equity securities are subject to investment risk and market risk. A Fund may invest in the following equity securities, which may expose a Fund to the following additional risks:

- **Common Stock Risk.** The value of a company's common stock may fall as a result of factors directly relating to that company, such as decisions made by its management or decreased demand for the company's products or services. A stock's value may also decline because of factors affecting not just the company, but also companies in the same industry or sector. The price of a company's stock may also be affected by changes in financial markets that are relatively unrelated to the company, such as changes in interest rates, exchange rates or industry regulation. Companies that pay dividends on their common stock generally only do so after they invest in their own business and make required payments to bondholders and on other debt and preferred stock. Therefore, the value of a company's common stock will usually be more volatile than its bonds, other debt and preferred stock. Common stock generally is subordinate to preferred stock upon the liquidation or bankruptcy of the issuing company. In the event of an issuer's bankruptcy, there is substantial risk that there will be nothing left to pay common stockholders after payments, if any, to bondholders and preferred stockholders have been made.
- **Convertible Securities Risk.** The value of a convertible security is influenced by both the yield of non-convertible securities of comparable issuers and by the value of the underlying common stock. The investment value of a convertible is based on its yield and tends to decline as interest rates increase. The conversion value of a convertible is the market value that would be received if the convertible were converted to its underlying common stock. The conversion value will decrease as the price of the underlying common stock decreases. When conversion value is substantially below investment value, the convertible's price tends to be influenced more by its yield, so changes in the price of the underlying common stock may not have as much of an impact. Conversely, the convertible's price tends to be influenced more by the price of the underlying common stock when conversion value is comparable to or exceeds investment value. Convertible securities may be subject to market risk, credit risk and interest rate risk. Generally, a convertible security is subject to the market risks of stocks when the underlying stock's price is high relative to the conversion price, and is subject to the market risks of debt securities when the underlying stock's price is low relative to the conversion price. Convertible securities are also subject to the risk that the credit standing of the issuer may have an effect on the convertible securities' investment value.
- **Depository Receipts and U.S. Dollar-Denominated Foreign Stocks Traded on U. S. Exchanges Risk.** A Fund may invest in securities issued by foreign companies through ADRs and U.S. dollar-denominated foreign stocks traded on U.S. exchanges. These securities are generally subject to many of the same risks of investing in the foreign securities that they evidence or into which they may be converted, including, but not limited to, currency exchange rate fluctuations, political and financial instability in the home country of a particular depository receipt or foreign stock, less liquidity and more volatility, less government regulation and supervision and delays in transaction settlement.
- **MLPs Risk.** Investing in MLPs involves certain risks related to investing in the underlying assets of the MLPs and risks associated with pooled investment vehicles. Investments held by MLPs may be relatively illiquid, limiting the MLPs' ability to change their portfolios promptly in response to changes in economic or other conditions. MLPs may have limited financial resources, their securities may trade infrequently and in limited volume, they may be difficult

to value, and they may be subject to more abrupt or erratic price movements than securities of larger or more broadly based companies. Holders of units in MLPs have more limited rights to vote on matters affecting the partnership and may be required to sell their common units at an undesirable time or price. A Fund invests as a limited partner, and normally would not be liable for the debts of an MLP beyond the amounts a Fund has contributed but it would not be shielded to the same extent that a shareholder of a corporation would be. In certain instances, creditors of an MLP would have the right to seek a return of capital that had been distributed to a limited partner. The right of an MLP's creditors would continue even after a Fund had sold its investment in the partnership. MLPs typically invest in real estate, oil and gas equipment leasing assets, but they also finance entertainment, research and development, and other projects. A Fund's investments in MLPs will be limited to no more than 25% of its assets in order for a Fund to meet the requirements necessary to qualify as a "regulated investment company" under the Internal Revenue Code of 1986, as amended. Distributions from an MLP may consist in part of a return of the amount originally invested, which would not be taxable to the extent the distributions do not exceed the investor's adjusted basis on its MLP interest. These reductions in a Fund's adjusted tax basis in the MLP securities will increase the amount of gain (or decrease the amount of loss) recognized by a Fund on a subsequent sale of the securities. MLPs holding credit-related investments are subject to interest rate risk and the risk of default on payment obligations by debt issuers. MLPs that concentrate in a particular industry or a particular geographic region are subject to risks associated with such industry or region.

- **Preferred Stock Risk.** Preferred stocks, which are a form of hybrid security (i.e., a security with both debt and equity characteristics), may pay fixed or adjustable rates of return. If interest rates rise, the dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stocks may have mandatory sinking fund provisions, as well as provisions for their call or redemption prior to maturity, which can have a negative effect on their prices when interest rates decline. Preferred stocks may be less liquid than common stocks and, unlike common stocks, participation in the growth of an issuer may be limited. Distributions on preferred stocks generally are payable at the discretion of an issuer and after required payments to bond holders. In certain situations, an issuer may call or redeem its preferred stock or convert it to common stock. The market prices of preferred stocks are generally more sensitive to actual or perceived changes in the issuer's financial condition or prospects than are the prices of debt securities. Issuers may threaten preferred stockholders with the cancellation of all dividends and liquidation preference rights in an attempt to force their conversion to less secure common stock. Certain preferred stocks are equity securities because they do not constitute a liability of the issuer and therefore do not offer the same degree of protection of capital or continuation of income as debt securities. The rights of preferred stock on distribution of a corporation's assets in the event of its liquidation are generally subordinated to the rights associated with a corporation's debt securities. Therefore, in the event of an issuer's bankruptcy, there is substantial risk that there will be nothing left to pay preferred stockholders after payments, if any, to bondholders have been made. Preferred stocks may also be subject to credit risk.
- **Real Estate Investment Trusts ("REITs") Risk.** REITs or other real estate-related securities are subject to the risks associated with direct ownership of real estate, including, among other risks: adverse developments affecting the real estate industry; declines in real property values; changes in interest rates; risks related to general and local economic conditions; defaults by mortgagors or other borrowers and tenants; lack of availability of mortgage funds or financing; increases in property taxes and other operating expenses; overbuilding in their sector of the real estate market; fluctuations in rental income; extended vacancies of properties, especially during economic downturns; casualty or condemnation losses; changes in tax and regulatory requirements; losses due to environmental liabilities; and governmental actions, such as changes to tax laws, zoning regulations or environmental regulations. All REITs are dependent on management skills, are subject to heavy cash flow dependency or self-liquidation and generally are not diversified. Regardless of where a REIT is organized or traded, its performance may be affected significantly by events in the region where its properties are located. Equity REITs are affected by the changes in the value of the properties owned by the trust. Mortgage REITs are affected by the quality of the credit extended. Equity, mortgage and hybrid REITs may not be diversified with regard to the types of tenants, may not be diversified with regard to the geographic locations of the properties, and are subject to cash flow dependency and defaults by borrowers, and any domestic REIT could fail to qualify for tax-free "pass-through" of distributed net income and net realized gains under the Internal Revenue Code, or to maintain its exemption from registration under the Investment Company Act. REITs typically incur fees that are separate from those incurred by a Fund. Accordingly, a Fund's investment in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs' operating expenses, in addition to indirectly paying Fund expenses. The value of REIT common stock may decline when interest rates rise. REITs tend to be small- to mid-capitalization securities and, as such, are subject to the risks of investing in small- to mid-capitalization securities.

Foreign Currency Forward Contracts Risk

Foreign currency forward contracts, including NDFs, are derivative instruments pursuant to a contract where the parties agree to pay a fixed price for an agreed amount of foreign currency at an agreed date or to buy or sell a specific currency at a future date at a price set at the time of the contract. The use of foreign currency forward contracts may expose a Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities or currencies underlying the foreign currency forward contract. There may at times be an imperfect correlation between the price of a forward contract and the underlying security, index or currency, which may increase the volatility of a Fund. A Fund bears the risk of loss of the amount expected to be received under a forward contract in the event of the default or bankruptcy of a counterparty. If such a default occurs, a Fund will have contractual remedies pursuant to the forward contract, but such remedies may be subject to bankruptcy and insolvency laws which could affect a Fund's rights as a creditor. Foreign currency forward transactions include risks associated with fluctuations in foreign currency, and other risks inherent in trading derivatives. There are no limitations on daily price movements of forward contracts. Not all forward contracts, including NDFs, require a counterparty to post collateral, which may expose a Fund to greater losses in the event of a default by a counterparty. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Foreign Investing Risk

Non-U.S. investments carry potential risks not associated with U.S. investments. Such risks include, but are not limited to: (1) currency exchange rate fluctuations, (2) political and financial instability, (3) less liquidity, (4) lack of uniform accounting, auditing and financial reporting standards, (5) greater volatility, (6) different government regulation and supervision of foreign banks, stock exchanges, brokers and listed companies, and (7) delays in transaction settlement in some foreign markets. There may be very limited oversight of certain foreign banks or securities depositories that hold foreign securities and currency and the laws of certain countries may limit the ability to recover such assets if a foreign bank, depository, or their agents goes bankrupt. To the extent a Fund invests a significant portion of its assets in securities of a single country or region, it is more likely to be affected by events or conditions of that country or region. A Fund's investment in a foreign issuer may subject a Fund to regulatory, political, currency, security, economic and other risks associated with that country. Global economic and financial markets are becoming increasingly interconnected and conditions (including recent volatility and instability) and events (including natural disasters) in one country, region or financial market may adversely impact issuers in a different country, region or financial market.

Futures Contracts Risk

Futures contracts are derivative instruments pursuant to a contract where the parties agree to a fixed price for an agreed amount of securities or other underlying assets at an agreed date. The use of futures contracts may expose a Fund to additional risks, such as credit risk, liquidity risk, and counterparty risk, that it would not be subject to if it invested directly in the securities underlying those futures contracts. There can be no assurance that any strategy used will succeed. There may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or index. Futures contracts may experience potentially dramatic price changes and imperfect correlations between the price of the contract and the underlying security, index or currency, which may increase the volatility of a Fund. An abrupt change in the price of an underlying security could render the underlying derivative instrument worthless. Futures contracts may involve a small investment of cash (the amount of initial and variation margin) relative to the magnitude of the risk assumed (the potential increase or decrease in the price of the futures contract). There can be no assurance that, at all times, a liquid market will exist for offsetting a futures contract that a Fund has previously bought or sold and this may result in the inability to close a futures contract when desired. Futures contracts are subject to the risk that an exchange may impose price fluctuation limits, which may make it difficult or impossible for a Fund to close out a position when desired. When a Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If a Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous. Equity index futures contracts expose a Fund to volatility in an underlying securities index. Use of derivatives is a highly specialized activity that can involve investment techniques and risks different from, and in some respects greater than, those associated with investing in more traditional investments. Derivatives can be highly complex and highly volatile and may perform in unanticipated ways.

Geographic Concentration Risk

From time to time, based on market or economic conditions, a Fund may invest a significant portion of its assets in the securities of issuers located in, or with significant economic ties to, a single country or geographic region, which could increase the risk that economic, political, business, regulatory, diplomatic, social and environmental conditions in that particular country or geographic region may have a significant impact on a Fund's performance. Investing in such a manner could cause a Fund's performance to be more volatile than the performance of more geographically diverse funds. The economies and financial markets of certain countries or regions can be highly interdependent. Therefore, a decline in the economies or financial markets of one country or region may adversely affect the economies or financial markets of another.

Hedging Risk

A Fund may enter into hedging transactions with the intention of reducing or controlling risk. It is possible that hedging strategies will not be effective in controlling risk, due to unexpected non-correlation (or even positive correlation) between the hedging instrument and the position being hedged, increasing, rather than reducing, both risk and losses. To the extent that a Fund enters into hedging transactions, the hedges will not be static but rather will need to be continually adjusted based on a sub-advisor's assessment of market conditions, as well as the expected degree of non-correlation between the hedges and the portfolio being hedged. The success of a Fund's hedging strategies will depend on a sub-advisor's ability to implement such strategies efficiently and cost-effectively, as well as on the accuracy of a sub-advisor's judgments concerning the hedging positions to be acquired by a Fund. A counterparty to a hedging transaction may be unable to honor its financial obligation to a Fund. In addition, a sub-advisor may be unable to close the transaction at the time it would like or at the price it believes the security is currently worth. A Fund may not, in general, attempt to hedge all market or other risks inherent in a Fund's investments, and may hedge certain risks only partially, if at all. Certain risks, either in respect of particular investments or in respect of a Fund's overall portfolio, may not be hedged, particularly if doing so is economically unattractive. As a result, various directional market risks may remain unhedged. Gains or losses from positions in hedging instruments may be much greater than the instrument's original cost. If a Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, or the hedged instrument does not correlate to the risk sought to be hedged, the hedge might be unsuccessful. The use of hedges may fail to mitigate risks, reduce a Fund's return, or create a loss. In addition, hedges, even when successful in mitigating risk, may not prevent a Fund from experiencing losses on its investments. Hedging instruments may also reduce or eliminate gains that may otherwise have been available had a Fund not used the hedging instruments. When hedging is combined with leverage, a Fund risks losses that are multiplied by the degree of leverage used.

Interest Rate Risk

Investments in fixed income securities that are influenced by interest rates are subject to interest rate risk. Generally, the value of investments with interest rate risk, such as fixed income securities, will move in the opposite direction as movements in interest rates. For example, the value of a Fund's fixed income investments typically will fall when interest rates rise. A Fund may be particularly sensitive to changes in interest rates if it invests in fixed income securities with intermediate and long terms to maturity. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than fixed income securities with shorter durations. For example, if a bond has a duration of eight years, a 1% increase in interest rates could be expected to result in an 8% decrease in the value of the bond. Yields of fixed income securities will fluctuate over time. As of the date of this Prospectus, interest rates are historically low. During periods of very low or negative interest rates, a Fund may be unable to maintain positive returns. Certain European countries and Japan have recently experienced negative interest rates on deposits and debt securities have traded at negative yields. Negative interest rates may become more prevalent among U.S. and foreign issuers. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from Fund performance to the extent a Fund is exposed to such interest rates. To the extent a Fund holds an investment with a negative interest rate to maturity, a Fund may generate a negative return on that investment. Conversely, in the future, interest rates may rise significantly and/or rapidly, potentially resulting in substantial losses to a Fund.

Investment Risk

An investment in a Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. A Fund should not be relied upon as a complete investment program. The share price of a Fund fluctuates, which means that when you sell your shares of a Fund, they could be worth less than what you paid for them. Therefore, you may lose money by investing in a Fund.

Issuer Risk

The value of, and/or the return generated by, a security may decline for a number of reasons that directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services, as well as the historical and prospective earnings of the issuer and the value of its assets. When the issuer of a security implements strategic initiatives, including mergers, acquisitions and dispositions, there is the risk that the market response to such initiatives will cause the share price of the issuer's securities to fall.

Large-Capitalization Companies Risk

The securities of large market capitalization companies may underperform other segments of the market, in some cases for extended periods of time, because such companies may be less responsive to competitive challenges and opportunities, such as changes in technology and consumer tastes. Large market capitalization companies generally are expected to be less volatile than companies with smaller market capitalizations. However, large market capitalization companies may be unable to attain the high growth rates of successful smaller companies, especially during periods of economic expansion, and may instead focus their competitive efforts on maintaining or expanding their market share.

LIBOR Risk

Certain of the instruments identified in a Fund's principal investment strategies have variable or floating coupon rates that are based on LIBOR, Euro Interbank Offered Rate and other similar types of reference rates (each, a "Reference Rate"). These Reference Rates are generally intended to represent the rate at which contributing banks may obtain short-term borrowings from each other within certain financial markets. LIBOR is produced daily by averaging the rates reported by a number of banks and may be a significant factor in determining a Fund's payment obligations under a derivative instrument, the cost of financing to a Fund, or an investment's value or return to a Fund, and may be used in other ways that affect a Fund's performance. Arrangements are underway to phase out the use of LIBOR. These arrangements and any additional regulatory or market changes may have an adverse impact on a Fund or its investments, including increased volatility or illiquidity in markets for instruments that rely on LIBOR.

Regulators and market participants are working together to identify or develop successor Reference Rates. Additionally, it is expected that market participants will focus on the transition mechanisms by which the Reference Rates in existing contracts or instruments may be amended, whether through marketwide protocols, fallback contractual provisions, bespoke negotiations or amendments or otherwise. Nonetheless, there remains uncertainty regarding the nature of any replacement rate and the impact of the transition from LIBOR on the Fund and the financial markets generally, and the termination of certain Reference Rates presents risks to a Fund. Financial industry groups have begun planning for a transition to the use of a different Reference Rate or benchmark rate, but there are obstacles to converting certain securities and transactions to a new Reference Rate or benchmark rate. The transition process, or the failure of an industry to transition, could lead to increased volatility and illiquidity in markets for instruments that currently rely on LIBOR to determine interest rates and a reduction in the values of some LIBOR-based investments, all of which would impact the Fund. While some LIBOR-based instruments may contemplate a scenario where LIBOR becomes unavailable by providing for an alternative rate-setting methodology, not all may have such provisions and there may be significant uncertainty regarding the effectiveness of any such methodologies. In addition, the alternative reference or benchmark rate may be an ineffective substitute, potentially resulting in prolonged adverse market conditions for a Fund. The elimination of a Reference Rate or any other changes or reforms to the determination or supervision of Reference Rates could have an adverse impact on the market for or value of any securities or payments linked to those Reference Rates and other financial obligations held by a Fund or on its overall financial condition or results of operations. Any substitute Reference Rate and any pricing adjustments imposed by a regulator or by counterparties or otherwise may adversely affect a Fund's performance and/or NAV. At this time, it is not possible to completely identify or predict the effect of any such changes, any establishment of alternative Reference Rates or any other reforms to Reference Rates that may be enacted in the UK or elsewhere. Because the usefulness of LIBOR as a benchmark could deteriorate during the transition period, any of the effects described above could occur prior to the official phasing out of LIBOR.

Liquidity Risk

A Fund is susceptible to the risk that certain investments held by a Fund may have limited marketability, be subject to restrictions on sale, be difficult or impossible to purchase or sell at favorable times or prices or become less liquid in response to market developments or adverse credit events that may affect issuers or guarantors of a security. Market prices for such instruments may be volatile. When there is little or no active trading market for specific types of securities, it can become more difficult to purchase or sell the securities at or near their perceived value. As a result, a Fund may have to lower the price on certain securities that it is trying to sell, sell other securities instead or forgo an investment opportunity, any of which could have a negative effect on Fund management or performance. An inability to sell a portfolio position can adversely affect a Fund's NAV or prevent a Fund from being able to take advantage of other investment opportunities. A Fund could lose money if it is unable to dispose of an investment at a time that is most beneficial to a Fund. Unexpected redemptions or redemptions by a few large investors in a Fund may force a Fund to sell certain investments at unfavorable prices to meet redemption requests or other cash needs and may have a significant adverse effect on a Fund's NAV per share and remaining Fund shareholders. This could negatively affect a Fund's ability to buy or sell debt securities and increase the related volatility and trading costs. A Fund may lose money if it is forced to sell certain investments at unfavorable prices to meet redemption requests or other cash needs. For example, liquidity risk may be magnified in rising interest rate environments due to higher than normal redemption rates. Judgment plays a greater role in pricing illiquid investments than in investments with more active markets.

Market Risk

A Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect a Fund's performance. Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple asset classes may decline in value simultaneously. In some cases, traditional market participants have been less willing to make a market in some types of debt instruments, which has affected the liquidity of those instruments. During times of market turmoil, investors tend to look to the safety of securities issued or backed by the U.S. Treasury, causing the prices of these securities to rise and the yields to decline. Reduced liquidity in fixed income and credit markets may negatively affect many issuers worldwide. Prices in many financial markets have increased significantly over the last decade, but there have also been periods of adverse market and financial developments and cyclical change during that timeframe, which have resulted in unusually high levels of volatility in domestic and foreign financial markets that has caused losses for investors and may occur again in the future, particularly if markets enter a period of uncertainty or economic weakness. Periods of unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or geographic region, continue to recur. The value of a security may decline due to adverse issuer-specific conditions or general market conditions unrelated to a particular issuer, such as real or perceived adverse geopolitical, regulatory, market, economic or other developments that may cause broad changes in market value, changes in the general outlook for corporate earnings, changes in interest or currency rates, lack of liquidity in the markets, public perceptions concerning these developments or adverse market sentiment generally. The value of a security may also decline due to factors that affect a particular industry or industries, such as tariffs, labor shortages or increased production costs and competitive conditions within an industry. Changes in the financial condition of a single issuer or market segment also can impact the market as a whole.

Geopolitical and other events, including war, terrorism, economic uncertainty, trade disputes, pandemics, public health crises, natural disasters and related events have led, and in the future may continue to lead, to instability in world economies and markets generally and reduced liquidity in equity, credit and fixed-income markets, which may disrupt economies and markets and adversely affect the value of your investment. Such market disruptions have caused, and may continue to cause, broad changes in market value, negative public perceptions concerning these developments, a reduction in the willingness and ability of some lenders to extend credit, difficulties for some borrowers in obtaining financing on attractive terms, if at all, and adverse investor sentiment or publicity. Changes in value may be temporary or may last for extended periods. Adverse market events may also lead to increased shareholder redemptions, which could cause a Fund to experience a loss or difficulty in selling investments to meet redemption requests by shareholders and may increase a Fund's

portfolio turnover, which will increase the costs that a Fund incurs and lower a Fund's performance. Even when securities markets perform well, there is no assurance that the investments held by a Fund will increase in value along with the broader market.

Policy changes by the U.S. government and/or Federal Reserve and political events within the U.S. and abroad, such as changes in the U.S. presidential administration and Congress, the U.S. government's inability at times to agree on a long-term budget and deficit reduction plan, the threat of a federal government shutdown and threats not to increase the federal government's debt limit, may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. The severity or duration of adverse economic conditions may also be affected by policy changes made by governments or quasi-governmental organizations. Global economies and financial markets are becoming increasingly interconnected, which increases the possibility of many markets being affected by events in a single country or events affecting a single or small number of issuers.

Markets and market participants are increasingly reliant upon both publicly available and proprietary information data systems. Data imprecision, software or other technology malfunctions, programming inaccuracies, unauthorized use or access, and similar circumstances may impair the performance of these systems and may have an adverse impact upon a single issuer, a group of issuers, or the market at large. In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in a Fund being, among other things, unable to buy or sell certain securities or financial instruments or accurately price its investments. These fluctuations in securities prices could be a sustained trend or a drastic movement. The financial markets generally move in cycles, with periods of rising prices followed by periods of declining prices. The value of your investment may reflect these fluctuations.

■ **Recent Market Events.** An outbreak of infectious respiratory illness caused by a novel coronavirus, known as COVID-19, was first detected in December 2019 and has subsequently spread globally. The impact of the outbreak has been rapidly evolving, and the transmission of COVID-19 and efforts to contain its spread have resulted, and may continue to result, in significant disruptions to business operations, supply chains and customer activity, widespread business closures and layoffs, travel restrictions, closed international, national and local borders, enhanced health screenings at ports of entry and elsewhere, prolonged quarantines and stay-at-home orders, disruption of and delays in healthcare service preparation and delivery, service and event cancellations, reductions and other changes, and lower consumer demand, as well as general concern and uncertainty that has negatively affected the global economy. Markets generally have also been adversely impacted by reduced demand for oil and other energy commodities as a result of the slowdown in economic activity resulting from the spread of COVID-19 and by price competition among key oil producing companies. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty and further developments could result in additional disruptions and uncertainty. These impacts have caused significant volatility in global financial markets, which have caused and may continue to cause losses for investors. The impact of the COVID-19 pandemic may last for an extended period of time and may result in a sustained economic downturn or recession.

The U.S. Federal Reserve has taken numerous measures to address the economic impact of the COVID-19 pandemic, such as the reduction of the federal funds target rate and the introduction of several credit and liquidity facilities, and the U.S. federal government has taken steps to stimulate the U.S. economy, including adopting stimulus packages targeted at large parts of the economy. The ultimate effects of these and other efforts that may be taken may not be known for some time, and it is not known whether and to what extent they will be successful. In addition, COVID-19 has caused and may continue to cause employees and vendors at various businesses, including the Manager and other service providers, to work at external locations, and could cause extensive medical absences. Not all events that could affect the business of the Manager, or other service providers can be determined and addressed in advance. The impact of COVID-19 and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. Deteriorating economic fundamentals may in turn increase the risk of default or insolvency of particular issuers, negatively impact market value, increase market volatility, cause credit spreads to widen, and reduce liquidity. The impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems.

The Federal Reserve has spent hundreds of billions of dollars to keep credit flowing through short-term money markets. The Federal Reserve has signaled that it plans to maintain its interventions at an elevated level. Amid the Federal Reserve's ongoing efforts, concerns about the markets' dependence on the Federal Reserve's provision of liquidity have grown. The U.S. government has reduced the federal corporate income tax rate, and future legislative, regulatory and policy changes may result in more restrictions on international trade, less stringent prudential regulation of certain players in the financial markets, and significant new investments in infrastructure and national defense. Markets may react strongly to expectations about the changes in these policies, which could increase volatility, especially if the market's expectations for changes in government policies are not borne out. High public debt in the U.S. and other countries creates ongoing systemic and market risks and policymaking uncertainty.

A rise in protectionist trade policies, slowing global economic growth, risks associated with the United Kingdom's departure from the European Union on December 31, 2020, commonly referred to as "Brexit," the risks associated with ongoing trade negotiations with China, the possibility of changes to some international trade agreements, tensions or open conflict between nations, or political or economic dysfunction within some nations that are global economic powers or major producers of oil could affect the economies of many nations, including the United States, in ways that cannot necessarily be foreseen at the present time. Interest rates have been unusually low in recent years in the U.S. and abroad and are currently at historic lows. The full impact of Brexit and the nature of the future relationship between the United Kingdom and the European Union remains uncertain. The United Kingdom and the European Union reached a trade agreement on December 31, 2020 that is due to be approved by all applicable United Kingdom and European Union governmental bodies in early 2021. The period following the United Kingdom's withdrawal from the European Union is expected to be one of significant political and economic uncertainty particularly until the United Kingdom government and European Union member states agree and implement the terms of the United Kingdom's future relationship with the European Union. Brexit may create additional economic stresses for the United Kingdom, which may include causing a contraction of the United Kingdom economy and price volatility in United Kingdom stocks, decreased trade, capital outflows, devaluation of pounds sterling, and wider corporate bond spreads due to uncertainty and declines in business and consumer spending as well as foreign direct investment. The Fund may be negatively impacted by changes in law and tax treatment resulting from or following Brexit. Until the economic effects of Brexit become clearer, and while a period of political, regulatory and commercial uncertainty continues, there remains a risk that Brexit may negatively impact the value of investments held by a Fund.

Economists and others have expressed increasing concern about the potential effects of global climate change on property and security values. Impacts from climate change may include significant risks to global financial assets and economic growth. A rise in sea levels, an increase in powerful windstorms and/or a climate-driven increase in sea levels or flooding could cause coastal properties to lose value or become unmarketable altogether. Certain issuers, industries and regions may be adversely affected by the impacts of climate change, including on the demand for and the development of goods and services and related production costs, and the impacts of legislation, regulation and international accords related to climate change, as well as any indirect

consequences of regulation or business trends driven by climate change. Regulatory changes and divestment movements tied to concerns about climate change could adversely affect the value of certain land and the viability of industries whose activities or products are seen as accelerating climate change. These losses could adversely affect, among others, corporate issuers and mortgage lenders, the value of mortgage-backed securities, the bonds of municipalities that depend on tax or other revenues and tourist dollars generated by affected properties, and insurers of the property and/or of corporate, municipal or mortgage-backed securities.

Market Timing Risk

A Fund that invests in foreign securities is particularly subject to the risk of market timing activities. Frequent trading by Fund shareholders poses risks to other shareholders in that Fund, including (i) the dilution of a Fund's NAV, (ii) an increase in a Fund's expenses, and (iii) interference with the portfolio manager's ability to execute efficient investment strategies. Because of the types of specific securities in which a Fund may invest, it could be subject to the risk of market timing activities by shareholders. If a Fund trades foreign securities, it generally prices these foreign securities using their closing prices from the foreign markets in which they trade, which typically is prior to a Fund's calculation of its NAV. These prices may be affected by events that occur after the close of a foreign market but before a Fund prices its shares. In such instances, a Fund may fair value foreign securities. However, some investors may engage in frequent short-term trading in a Fund to take advantage of any price differentials that may be reflected in the NAV of a Fund's shares. While the Manager monitors trading in a Fund, there is no guarantee that it can detect all market timing activities.

Mid-Capitalization Companies Risk

Investments in mid-capitalization companies generally involve greater risks and the possibility of greater price volatility than investments in larger, more established companies. Mid-capitalization companies often have narrower commercial markets and more limited operating history, product lines, and managerial and financial resources than larger, more established companies. As a result, performance can be more volatile and they may face greater risk of business failure, which could increase the volatility of a Fund's portfolio. Generally, the smaller the company size, the greater these risks. Additionally, mid-capitalization companies may have less market liquidity than large-capitalization companies, and they can be sensitive to changes in interest rates, borrowing costs and earnings.

Mortgage Backed and Mortgage Related Securities Risk

Investments in mortgage-backed and mortgage-related securities are subject to market risks for fixed income securities which include, but are not limited to, credit risk, interest rate risk, prepayment and extension risk, callable securities risk, valuation risk, and liquidity risk. Small movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain mortgage-backed securities. If interest rates fall, the rate of prepayments tends to increase as borrowers are motivated to pay off debt and refinance at new lower rates. When mortgages are prepaid and when securities are called, a Fund may have to reinvest in securities with a lower yield or fail to recover additional amounts (i.e., premiums) paid for securities with higher interest rates, resulting in an unexpected capital loss and/or a decrease in the amount of dividends and yield. Because prepayments increase when interest rates fall, the prices of mortgage-backed securities do not increase as much as other fixed income securities when interest rates fall. When interest rates rise, borrowers are less likely to prepay their mortgage. A decreased rate of prepayments lengthens the expected maturity of mortgage-backed securities. Therefore, the prices of mortgage-backed securities may decrease more than prices of other fixed income securities when interest rates rise. Rising interest rates tend to extend the duration of these securities, making them more sensitive to changes in interest rates. Rising interest rates also may increase the risk of default by borrowers. As a result, in a period of rising interest rates, a Fund that holds these types of securities may experience additional volatility and losses. A decline in the credit quality of and defaults by the issuers of mortgage related securities or instability in the markets for such securities may affect the value and liquidity of such securities, which could result in losses to a Fund. In addition, certain mortgage related securities may include securities backed by pools of loans made to "subprime" borrowers or borrowers with blemished credit histories; the risk of defaults is generally higher in the case of mortgage pools that include such subprime mortgages.

Multiple Sub-Advisor Risk

The Manager may allocate a Fund's assets among multiple sub-advisors, each of which is responsible for investing its allocated portion of a Fund's assets. To a significant extent, a Fund's performance will depend on the success of the Manager in selecting and overseeing the sub-advisors and allocating a Fund's assets to sub-advisors. The sub-advisors' investment styles may not work together as planned, which could adversely affect the performance of a Fund. Because each sub-advisor manages its allocated portion of a Fund independently from another sub-advisor, the same security may be held in different portions of a Fund, or may be acquired for one portion of a Fund at a time when a sub-advisor to another portion deems it appropriate to dispose of the security from that other portion, resulting in higher expenses without accomplishing any net result in a Fund's holdings. Similarly, under certain market conditions, one sub-advisor may believe that temporary, defensive investments in short-term instruments or cash are appropriate when another sub-advisor believes continued exposure to the equity or debt markets is appropriate for its allocated portion of a Fund. Because each sub-advisor directs the trading for its own portion of a Fund, and does not aggregate its transactions with those of the other sub-advisors, a Fund may incur higher brokerage costs than would be the case if a single sub-advisor were managing the entire Fund. In addition, while the Manager seeks to allocate a Fund's assets among a Fund's sub-advisors in a manner that it believes is consistent with achieving a Fund's investment objective(s), the Manager may be subject to potential conflicts of interest in allocating a Fund's assets among sub-advisors, due to factors that could impact the Manager's revenues and profits.

Other Investment Companies Risk

To the extent that a Fund invests in shares of other registered investment companies, a Fund will indirectly bear the fees and expenses, including, for example, advisory and administrative fees, charged by those investment companies in addition to a Fund's direct fees and expenses. If a Fund invests in other investment companies, a Fund may receive distributions of taxable gains from portfolio transactions by that investment company and may recognize taxable gains from transactions in shares of that investment company, which could be taxable to a Fund's shareholders when distributed to them. A Fund must rely on the investment company in which it invests to achieve its investment objective. If the investment company fails to achieve its investment objective, the value of a Fund's investment may decline, adversely affecting a Fund's performance. To the extent a Fund invests in other investment companies that invest in equity securities, fixed income securities and/or foreign securities, or that track an index, a Fund is subject to the risks associated with the underlying investments held by the investment company or the index fluctuations to which the investment company is subject. A Fund will be subject to the risks associated with investments in those companies, including but not limited to the following:

- **Money Market Funds.** Investments in money market funds are subject to interest rate risk, credit risk, and market risk.

Prepayment and Extension Risk

When interest rates fall, borrowers will generally repay the loans that underlie certain debt securities, especially mortgage-related and other types of asset backed securities, more quickly than expected, causing the issuer of the security to repay the principal prior to the security's expected maturity date. A Fund may need to reinvest the proceeds at a lower interest rate, reducing its income. Securities subject to prepayment risk generally offer less potential for gains when prevailing interest rates fall. If a Fund buys those securities at a premium, accelerated prepayments on those securities could cause a Fund to lose a

portion of its principal investment. The impact of prepayments on the price of a security may be difficult to predict and may increase the security's price volatility. Variable and floating rate securities may be less sensitive to prepayment risk. Extension risk is the risk that a decrease in prepayments may, as a result of higher interest rates or other factors, result in the extension of a security's effective maturity, heighten interest rate risk and increase the potential for a decline in its price.

Quantitative Strategy Risk

The success of a Fund's investment strategy may depend in part on the effectiveness of a sub-advisor's quantitative tools for screening securities. Securities selected using quantitative analysis can react differently to issuer, political, market, and economic developments than the market as a whole or securities selected using only fundamental analysis, which could adversely affect their value. As a result, a portfolio of securities selected using quantitative analysis may underperform the market as a whole or a portfolio of securities selected using a different investment approach, such as fundamental analysis. A sub-advisor's quantitative tools may use factors that may not be predictive of a security's value, and any changes over time in the factors that affect a security's value may not be reflected in the quantitative model. The quantitative tools may not react as expected to market events, resulting in losses for a Fund. Data for some companies, particularly for non-U.S. companies, may be less available and/or less current than data for other companies. There may also be errors in the computer code for the quantitative model or in the model itself, or issues relating to the computer systems used to screen securities. A sub-advisor's stock selection can be adversely affected if it relies on insufficient, erroneous or outdated data or flawed models or computer systems. Additionally, a previously successful strategy may become outdated or inaccurate, which may not be identified by a sub-advisor and therefore may also result in losses.

Redemption Risk

A Fund may experience periods of heavy redemptions that could cause a Fund to sell assets at inopportune times or at a loss or a depressed value. Redemption risk is greater to the extent that one or more investors or intermediaries control a large percentage of investments in a Fund, have short investment horizons, or have unpredictable cash flow needs. The risk of loss is also greater if redemption requests are frequent, occur in times of overall market turmoil or declining prices for the securities sold, or when the securities a Fund wishes to sell are illiquid. Heavy redemptions, whether by a few large investors or many smaller investors, could hurt a Fund's performance. The ability or willingness of dealers and other institutional investors to buy or hold fixed income securities or otherwise to "make a market" in debt securities has also been reduced. These factors, along with an inability to find a ready buyer, or legal restrictions on a security's resale, may result in decreased liquidity and increased volatility in the fixed income markets, and heightened redemption risk. Certain securities that were liquid when purchased may later become illiquid, particularly in times of overall economic distress. During periods of heavy redemptions, a Fund may borrow funds through the interfund credit facility, or from a bank line of credit, which may increase costs. Redemption risk is heightened if a Fund invests in emerging market securities, which are generally less liquid than the securities of U.S. and other developed markets. The sale of assets to meet redemption requests may create net capital gains or losses, which could cause a Fund to have to distribute substantial capital gains.

Sector Risk

Sector risk is the risk associated with a Fund holding a significant amount of investments in similar businesses, which would be similarly affected by particular economic or market events that may, in certain circumstances, cause the value of the equity and debt securities of companies in a particular sector of the market to change. To the extent a Fund has substantial holdings within a particular sector, the risks to a Fund associated with that sector increase. In addition, when a Fund focuses its investments in certain sectors of the economy, its performance may be driven largely by sector performance and could fluctuate more widely than if a Fund were invested more evenly across sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. The businesses that constitute a sector may all react the same way to economic, political or regulatory events. A Fund's performance could also be affected if the sectors do not perform as expected. The lack of exposure to one or more sectors may adversely affect performance. As a Fund's portfolio changes over time, a Fund's exposure to a particular sector may become higher or lower.

- **Financials Sector Risk.** Financial services companies are subject to extensive governmental regulation, which may limit both the amounts and types of loans and other financial commitments they can make, the interest rates and fees they can charge, the scope of their activities, the prices they can charge and the amount of capital they must maintain. Profitability is largely dependent on the availability and cost of capital funds and can fluctuate significantly when interest rates change or due to increased competition. In addition, deterioration of the credit markets generally may cause an adverse impact in a broad range of markets, including U.S. and international credit and interbank money markets generally, thereby affecting a wide range of financial institutions and markets. Certain events in the Financials sector may cause an unusually high degree of volatility in the financial markets, both domestic and foreign, and cause certain financial services companies to incur large losses. Securities of financial services companies may experience a dramatic decline in value when such companies experience substantial declines in the valuations of their assets, take action to raise capital (such as the issuance of debt or equity securities), or cease operations. Credit losses resulting from financial difficulties of borrowers and financial losses associated with investment activities can negatively impact the sector. Insurance companies may be subject to severe price competition. Adverse economic, business or political developments could adversely affect financial institutions engaged in mortgage finance or other lending or investing activities directly or indirectly connected to the value of real estate.

Securities Lending Risk

A Fund may lend its portfolio securities to brokers, dealers and financial institutions in order to obtain additional income. Borrowers of a Fund's securities provide collateral either in the form of cash, which a Fund reinvests in securities or in the form of non-cash collateral consisting of securities issued or guaranteed by the U.S. government or one of its agencies or instrumentalities. A Fund will be responsible for the risks associated with the investment of cash collateral, including any collateral invested in an affiliated money market fund. A Fund may lose money on its investment of cash collateral or may fail to earn sufficient income on its investment to cover its payment to the borrower of a pre-negotiated fee or "rebate" for the use of that cash collateral in connection with the loan. A Fund could also lose money due to a decline in the value of non-cash collateral. In addition, delays may occur in the recovery of securities from borrowers, which could interfere with a Fund's ability to vote proxies or to settle transactions or could result in increased costs. Moreover, if the borrower becomes subject to insolvency or similar proceedings, a Fund could incur delays in its ability to enforce its rights in its collateral. There also is a risk that a borrower may default on its obligation to return loaned securities at a time when the value of a Fund's collateral is inadequate. Although a Fund's securities lending agent may indemnify a Fund against that risk, it is also possible that the securities lending agent will be unable to satisfy its indemnification obligations. In any case in which the loaned securities are not returned to a Fund before an ex-dividend date, whether or not due to a default by the borrower, the payment in lieu of the dividend that a Fund receives from the securities' borrower would not be treated as a dividend for federal income tax purposes and thus would not qualify for treatment as "qualified dividend income" (as described under "Distributions and Taxes – Taxes" below).

Securities Selection Risk

Securities selected by a sub-advisor or the Manager for a Fund may decline substantially in value or may not perform to expectations. The portfolio managers' judgments about the attractiveness, value and anticipated price movements of a particular asset class or individual security may be incorrect, and there is no guarantee that individual securities will perform as anticipated. It may not be possible to predict, or to hedge against, a widening in the yield spread of the securities selected by a sub-advisor. This could result in a Fund's underperformance compared to other funds with similar investment objectives.

Segregated Assets Risk

In connection with certain transactions that may give rise to future payment obligations, a Fund may be required to maintain a segregated amount of, or otherwise earmark, cash or liquid securities to cover the position. Segregated or earmarked securities cannot be sold while the position or transaction they are covering is outstanding, unless they are replaced with other securities of equal value. There is the possibility that the segregation or earmarking of a large percentage of a Fund's assets may, in some circumstances, limit a Fund's ability to take advantage of investment opportunities or meet redemption requests. In addition, the need to segregate cash or other liquid securities could limit a Fund's ability to pursue other opportunities as they arise.

Small-Capitalization Companies Risk

Investments in small-capitalization companies generally involve greater risks and the possibility of greater price volatility than investments in larger capitalization and more established companies. Small-capitalization companies often have narrower commercial markets and more limited operating history, product lines, and managerial and financial resources than larger, more established companies. As a result, performance of small-capitalization companies can be more volatile and these companies may face greater risk of business failure, which could increase the volatility of a Fund's portfolio. Generally, the smaller the company size, the greater these risks. Additionally, small-capitalization companies may have less market liquidity than larger capitalization companies, and they can be sensitive to changes in interest rates, borrowing costs and earnings.

Socially Responsible Investing Risk

A Fund's incorporation of environmental, social and/or governance ("ESG") considerations in its investment strategy may cause it to make different investments than funds that have a similar investment style but do not incorporate such considerations in their strategy and generally may limit the types and number of investment opportunities available to a Fund. As a result of these considerations, a Fund may forego opportunities to buy certain securities when it might otherwise be advantageous to do so, or sell securities when it might be otherwise disadvantageous for it to do so. A Fund's socially responsible investment process may also affect a Fund's exposure to certain sectors or types of investments, which may impact a Fund's relative investment performance depending on the performance of issuers in those sectors relative to issuers in the broader market. Securities of companies with ESG practices may shift into and out of favor depending on market and economic conditions, and a Fund's performance may at times be better or worse than the performance of funds that do not use ESG or sustainability criteria.

A Fund's portfolio managers are dependent on available information to assist in the social evaluation process, and, because there are few generally accepted standards to use in such evaluation, the process employed for a Fund may differ from processes employed for other funds. Rulemaking or other regulatory initiatives may affect a Fund's ability to incorporate ESG considerations or use a socially responsible investment process. As of the date of this Prospectus, the potential impact of any such initiatives on a Fund is uncertain.

U.S. Government Securities and Government-Sponsored Enterprises Risk

A security backed by the U.S. Treasury or the full faith and credit of the United States is guaranteed only as to the timely payment of interest and principal when held to maturity. The market prices for such securities are not guaranteed and will fluctuate. Additionally, circumstances could arise that would prevent the payment of interest or principal. This could result in losses to a Fund. Investments in securities issued by government-sponsored enterprises are debt obligations issued by agencies and instrumentalities of the U.S. government. These obligations vary in the level of support they receive from the U.S. government. They may be: (i) supported by the full faith and credit of the U.S. Treasury, such as those of GNMA; (ii) supported by the right of the issuer to borrow from the U.S. Treasury, such as those of the Federal Home Loan Bank and the Federal Farm Credit Banks; (iii) supported by the discretionary authority of the U.S. government to purchase the agency obligations, such as those of Fannie Mae and Freddie Mac or (iv) supported only by the credit of the issuer, such as those of the Federal Farm Credit Bureau. The U.S. government may choose not to provide financial support to U.S. government-sponsored agencies or instrumentalities if it is not legally obligated to do so, in which case, if the issuer defaulted, to the extent a Fund holds securities of such issuer, it might not be able to recover its investment from the U.S. government. U.S. government securities and securities of government-sponsored entities are also subject to credit risk, interest rate risk and market risk. The rising U.S. national debt may lead to adverse impacts on the value of U.S. government securities due to potentially higher costs for the U.S. government to obtain new financing.

U.S. Treasury Obligations Risk

Securities issued or guaranteed by the U.S. Treasury are backed by the "full faith and credit" of the United States; however, the U.S. government guarantees the securities only as to the timely payment of interest and principal when held to maturity, and the market prices of such securities may fluctuate. The value of U.S. Treasury obligations may vary due to changes in interest rates. In addition, changes to the financial condition or credit rating of the U.S. government may cause the value of a Fund's investments in obligations issued by the U.S. Treasury to decline. Certain political events in the U.S., such as a prolonged government shut down, may also cause investors to lose confidence in the U.S. government and may cause the value of U.S. Treasury obligations to decline. Because U.S. Treasury securities trade actively outside the United States, their prices may also rise and fall as changes in global economic conditions affect the demand for these securities.

The total public debt of the U.S. as a percent of GDP has grown rapidly since the beginning of the recent financial and market volatility as a result of the coronavirus pandemic. Although high debt levels do not necessarily indicate or cause economic problems, they have the potential to create systemic risks if sound debt management practices are not implemented.

Valuation Risk

This is the risk that a Fund has valued a security at a price different from the price at which it can be sold. This risk may be especially pronounced for investments that may be illiquid or may become illiquid and for securities that trade in relatively thin markets and/or markets that experience extreme volatility. A Fund's ability to value its investments in an accurate and timely manner may be impacted by technological issues and/or errors by third party service providers, such as pricing services or accounting agents. If market conditions make it difficult to value certain investments, SEC rules and applicable accounting protocols may require a Fund to value these investments using more subjective methods, such as fair-value methodologies. Investors who purchase or redeem Fund shares on days when a Fund is holding fair-valued securities may receive fewer or more shares, or lower or higher redemption proceeds, than they would have received if a Fund had not fair-valued the securities or had used a different valuation methodology. The value of foreign securities, certain fixed income securities and currencies, as applicable, may be materially affected by events after the close of the markets on which they are traded, but before a Fund determines its NAV.

Value Stocks Risk

Investments in value stocks are subject to the risk that their intrinsic value may never be realized by the market or that their prices may decline. This may result in the value stocks' prices remaining undervalued for extended periods of time. While a Fund's investments in value stocks seek to limit potential downside price risk over time, value stock prices still may decline substantially. In addition, a Fund may produce more modest gains as a trade-off for this potentially lower risk. Different investment styles tend to shift in and out of favor, depending on market conditions and investor sentiment. A Fund's performance also

may be affected adversely if value stocks become unpopular with, or lose favor among, investors. A Fund's value style could cause it to underperform funds that use a growth or non-value approach to investing or have a broader investment style.

Variable and Floating Rate Securities Risk

The coupons on variable and floating rate securities in which a Fund may invest are not fixed and may fluctuate based upon changes in market rates. Variable and floating rate securities are subject to interest rate risk and may fluctuate in value in response to interest rate changes if there is a delay between changes in market interest rates and the interest reset date for the obligation, or for other reasons. As short-term interest rates decline, the coupons on variable and floating rate securities typically decrease. Alternatively, during periods of rising short-term interest rates, the coupons on variable and floating rate securities typically increase. Changes in the coupons of variable and floating rate securities may lag behind changes in market rates or may have limits on the maximum increases in the coupon rates. The value of variable and floating rate securities may decline if their coupons do not rise as much, or as quickly, as interest rates in general. Conversely, variable and floating rate securities will not generally increase in value if interest rates decline. Variable and floating rate securities are less effective than fixed rate securities at locking in a particular yield and may be subject to credit risk. Certain types of floating rate instruments may also be subject to greater liquidity risk than other debt securities.

Additional Information About Performance Benchmarks

The annual total return of each Fund is compared to a broad-based market index. Set forth below is additional information regarding the index and composite, if applicable, to which each Fund's performance is compared.

American Beacon Balanced Fund

Market Index

The Fund's performance is compared to the Russell 1000® Value Index and the Bloomberg Barclays US Aggregate Bond Index. To reflect the Fund's allocation of its assets between investment grade fixed income securities and equity securities, the Fund's performance is also compared to the Balanced Composite Index, which combines the returns of the Russell 1000® Value Index and the Bloomberg Barclays US Aggregate Bond Index in a 60%/40% proportion.

- Russell 1000 Value Index is a registered trademark of Frank Russell Company. The Russell 1000® Value Index is an unmanaged index of those stocks in the Russell 1000® Index with lower price-to-book ratios and lower forecasted growth values.
- The Bloomberg Barclays US Aggregate Bond Index is a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes components for Treasuries, government-related and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

American Beacon Garcia Hamilton Quality Bond Fund

Market Index

The Fund's performance is compared to the Bloomberg Barclays US Aggregate Bond Index. Set forth below is additional information regarding the index to which the Fund's performance is compared.

- The Bloomberg Barclays US Aggregate Bond Index is a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes components for Treasuries, government-related and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

American Beacon International Equity Fund

Market Index

The Fund's performance is compared to the MSCI® EAFE Index and the MSCI® EAFE Value Index.

- The MSCI EAFE Index is designed to represent the performance of large- and mid-capitalization securities across 21 developed markets countries, including countries in Europe, Australasia and the Far East, and excluding the U.S. and Canada. It covers approximately 85% of the free float-adjusted market capitalization in each country.
- The MSCI EAFE Value Index captures large and mid-cap securities exhibiting overall value style characteristics across Developed Markets countries around the world, excluding the US and Canada. The value investment style characteristics for index construction are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield.

American Beacon Large Cap Value Fund

Market Index

The Fund's performance is compared to the Russell 1000® Value Index.

- Russell 1000 Value Index is a registered trademark of Frank Russell Company. The Russell 1000® Value Index is an unmanaged index of those stocks in the Russell 1000® Index with lower price-to-book ratios and lower forecasted growth values.

American Beacon Mid-Cap Value Fund

Market Index

The Fund's performance is compared to the Russell Midcap Value® Index.

- The Russell Midcap Value Index is an unmanaged index of those stocks in the Russell Midcap® Index with lower price-to-book ratios and lower forecasted growth values. The Russell Midcap Index measures the performance of the 800 smallest companies in the Russell 1000® Index. Russell Midcap Index, Russell Midcap Value Index and Russell 1000 Index are registered trademarks of Frank Russell Company.

American Beacon Small Cap Value Fund

Market Index

The Fund's performance is compared to the Russell 2000® Value Index.

- The Russell 2000® Value Index is a registered trademark of Frank Russell Company. The Russell 2000® Value Index is an unmanaged index of those stocks in the Russell 2000® Index with lower price-to-book ratios and lower forecasted growth values. The Russell 2000® Index is an unmanaged index comprised of approximately 2,000 smaller-capitalization stocks.

Fund Management

The Manager

AMERICAN BEACON ADVISORS, INC. (the "Manager") serves as the Manager and administrator of the Funds. The Manager, located at 220 East Las Colinas Boulevard, Suite 1200, Irving, Texas 75039, is an indirect wholly-owned subsidiary of Resolute Investment Holdings, LLC, which is owned primarily by Kelso Investment Associates VIII, L.P., KEP VI, LLC and Estancia Capital Partners L.P.

The Manager was organized in 1986 to provide investment management, advisory, and administrative services. The Manager is registered as an investment adviser under the Advisers Act. The Manager is not registered as a CPO with respect to the Funds in reliance on the delayed compliance date provided by No-Action Letter 12-38 of the Division of Swaps Dealer and Intermediary Oversight ("Division") of the CFTC. Pursuant to this letter, the Manager is not required to register as a CPO, or rely on an exemption from registration, until six months from the date the Division issues revised guidance on the application of the calculation of the de minimis thresholds in the context of the CPO exclusion in CFTC Regulation 4.5. In addition, on behalf of the Funds, the Manager has also filed a notice claiming the CFTC Regulation 4.5 exclusion from CPO registration under the Commodity Exchange Act. The Manager is also exempt from registration as a commodity trading advisor under CFTC Regulation 4.14(a)(8) with respect to the Funds.

For the fiscal year ended October 31, 2020, each Fund identified below paid aggregate management fees to the Manager and investment advisory fees to its sub-advisor(s) as a percentage of each Fund's average daily net assets, net of any waivers and recoupments of the management fees and sub-advisory fees, as follows:

American Beacon Fund	Aggregate Management and Investment Advisory Fees
American Beacon Balanced Fund	0.68% *
American Beacon Garcia Hamilton Quality Bond Fund	0.36%
American Beacon International Equity Fund	0.61%
American Beacon Large Cap Value Fund	0.55%
American Beacon Mid-Cap Value Fund	0.83%
American Beacon Small Cap Value Fund	0.73%

* This includes a non-recurring payment of accrued sub-advisory fees of 0.16%. The effective fee rate would have been 0.52% without this payment.

As compensation for services provided by the Manager in connection with securities lending activities conducted by a Fund, the lending Fund pays to the Manager, with respect to cash collateral posted by borrowers, a fee of 10% of the net monthly interest income (the gross interest income earned by the investment of cash collateral, less the amount paid to borrowers and related expenses) from such activities and, with respect to loan fees paid by borrowers when a borrower posts collateral other than cash, a fee up to 10% of such loan fees. The SEC has granted exemptive relief that permits a Fund to invest cash collateral received from securities lending transactions in shares of one or more private or registered investment companies managed by the Manager.

As of the date of this prospectus, each Fund, except for the Garcia Hamilton Quality Bond Fund, intends to engage in securities lending activities.

A discussion of the Board's consideration and approval of the Management Agreement between the Funds and the Manager and the Investment Advisory Agreements among the Trust, on behalf of the Funds, each sub-advisor and the Manager is available in the Funds' Annual Report for the fiscal year ended October 31, 2020.

The Manager has contractually agreed to waive fees and/or reimburse expenses of the following Funds and share classes to the extent that Total Annual Fund Operating Expenses exceed a percentage of that class' average daily net assets (excluding taxes, interest, brokerage commissions, acquired fund fees and expenses, securities lending fees, expenses associated with securities sold short, litigation, and other extraordinary expenses) through February 28, 2022 as follows:

Contractual Expense Limitations

American Beacon Fund	A Class	C Class	Y Class	R6 Class	Advisor Class	R5 Class	Investor Class
American Beacon Garcia Hamilton Quality Bond Fund	n/a	n/a	0.51%	0.41%	n/a	0.45%	0.83%
American Beacon International Equity Fund	n/a	n/a	n/a	0.69%	n/a	n/a	n/a
American Beacon Large Cap Value Fund	n/a	n/a	n/a	0.60%	n/a	n/a	n/a
American Beacon Mid-Cap Value Fund	1.26%	2.01%	0.99%	0.90%	1.49%	0.91%	1.17%

The contractual expense reimbursement can be changed or terminated only in the discretion and with the approval of a majority of a Fund's Board. The Manager will itself waive fees and/or reimburse expenses of a Fund to maintain the contractual expense ratio caps for each applicable class of shares or make arrangements with other service providers to do so. The Manager may also, from time to time, voluntarily waive fees and/or reimburse expenses of a Fund. The Board has approved a policy whereby the Manager may seek repayment for any contractual or voluntary fee waivers or expense reimbursements if reimbursement to the Manager (a) occurs within three years from the date of the Manager's waiver/reimbursement and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the lesser of the contractual percentage limit in effect at the time of the waiver/reimbursement or the time of recoupment.

The American Beacon team members, except for Samuel Silver and Erin Higginbotham, discussed below are jointly and primarily responsible for the day-to-day management oversight of the sub-advisors, including reviewing the sub-advisors' performance, allocating the Fund's assets among the sub-advisors and the Manager, as applicable, and investing the portion of Fund assets that the sub-advisors determine should be allocated to short-term investments. Mr. Silver and Ms. Higginbotham are jointly and primarily responsible for the day-to-day management of the fixed income portion of the Balanced Fund allocated to the Manager.

American Beacon Funds	Team Members
American Beacon Balanced Fund	Kirk L. Brown, Paul B. Cavazos, Erin Higginbotham, Mark M. Michel, Gene L. Needles, Jr., Samuel Silver
American Beacon International Equity Fund and American Beacon Large Cap Value Fund	Kirk L. Brown, Paul B. Cavazos, Mark M. Michel, Gene L. Needles, Jr.
American Beacon Mid-Cap Value Fund and American Beacon Small Cap Value Fund	Cynthia M. Thatcher, Paul B. Cavazos, Gene L. Needles, Jr, Colin J. Hamer

Kirk L. Brown is Senior Portfolio Manager, and has served on the portfolio management team since February 1994. Mr. Brown is a CFA® charterholder.

Paul B. Cavazos is Chief Investment Officer and became a member of the portfolio management team upon joining the Manager in 2016. Prior to joining the Manager, Mr. Cavazos was Chief Investment Officer and Assistant Treasurer of DTE Energy from 2007 to 2016.

Colin J. Hamer is Associate Portfolio Manager, and has served on the portfolio management team since 2018. Mr. Hamer has served on the asset management team since January 2015, is a CFA® charterholder, and has earned the CAIA designation. Prior to joining the Manager, Mr. Hamer worked at Fidelity Investments in various investment-related roles from 2008 to 2014.

Erin Higginbotham has served as Senior Portfolio Manager to the American Beacon Balanced Fund since February 2011. She has responsibility for credit and relative value analysis of corporate bonds. Ms. Higginbotham managed cash and money market portfolios at American Beacon Advisors and has been a Portfolio Manager since April 2003 and became a Senior Portfolio Manager in April 2005. Ms. Higginbotham is a CFA® charterholder.

Mark M. Michel is Associate Portfolio Manager, and has served on the portfolio management team since 2018. Mr. Michel has served on the asset management team since February 2016. Prior to joining the Manager, Mr. Michel worked at JPMorgan as a senior portfolio analyst from 2013 to 2016. Mr. Michel is a CFA® charterholder and member of the CFA Institute and the CFA Society of Dallas/Fort Worth.

Gene L. Needles, Jr. has served as Chief Executive Officer of the Manager since April 2009, President of the Manager from 2009 to 2018, and has served on the portfolio management team since June 2011. Prior to joining the Manager, Mr. Needles was President of Touchstone Investments from 2008 to 2009 and President and CEO of AIM Distributors from 2004 to 2007.

Samuel Silver oversees the team responsible for the portfolio management of a portion of the fixed income assets of the American Beacon Balanced Fund. Mr. Silver has been with the Manager since September 1999 and has served as Vice President, Fixed Income Investments since October 2011. Prior to October 2011, Mr. Silver was a Senior Portfolio Manager, Fixed Income Investments.

Cynthia M. Thatcher is Portfolio Manager, and became a member of the portfolio management team upon joining the Manager in December 1999. Prior to joining the firm Ms. Thatcher worked at Merrill Lynch, Pierce, Fenner and Smith as a Financial Consultant. Ms. Thatcher is a CFA® charterholder and member of the CFA Institute and the CFA Society of Dallas/Fort Worth.

Messrs. Cavazos and Needles are responsible for recommending sub-advisors to the Fund's Board of Trustees. Messrs. Brown, Hamer, and Michel, and Ms. Thatcher oversee the sub-advisors, review the sub-advisors' performance and allocate the Fund's assets among the sub-advisors, as applicable.

The Funds' SAI provides additional information about the members of the portfolio management team, including other accounts they manage, their ownership in the Funds they manage and their compensation.

The Sub-Advisors

Set forth below is a brief description of the sub-advisors and the portfolio managers who are jointly and primarily responsible for the day-to-day management of a Fund. The SAI provides additional information about the portfolio managers, including other accounts they manage, their ownership in the Funds they manage and their compensation.

All other assets of a corporate client of the Manager, its affiliates and employee retirement plans under management by each respective sub-advisor (except assets managed by Barrow under the HALO Bond Program), where applicable, may be considered when calculating the fees for each sub-advisor. Including these assets may lower the investment advisory fees for each applicable Fund.

American Century Investment Management, Inc. ("American Century"), 4500 Main Street, Kansas City, Missouri 64111, is a registered investment advisor and a wholly-owned subsidiary of American Century Companies, Inc. ("ACC"). ACC is a privately controlled company and the parent to a related group of subsidiaries involved in the management and distribution of investment products, collectively referred to as American Century Investments. Nearly all of the firm's revenue is derived from investment management related activities, with minor ancillary revenues derived from rental income on office space that American Century Investments owns. As of December 31, 2020, American Century had approximately \$212.5 billion in assets under management.

American Century serves as a sub-advisor to the American Beacon International Equity Fund. The following individuals are jointly and primarily responsible for the day-to-day management of a portion of the Fund's portfolio.

Alvin Polit, Senior Portfolio Manager, Vice President, is a member of the team of investment professionals managing a portion of the Fund's portfolio. He joined American Century in 2017. Previously, he was a partner, senior portfolio manager, and board member at Lombard Capital Partners from 2011 to 2017. He earned a bachelor's degree in finance and international business from New York University and is a CFA® charterholder and member of the CFA Institute.

Jonathan Veiga, Portfolio Manager, Senior Investment Analyst, is a member of the team of investment professionals managing a portion of the Fund's portfolio. He joined American Century in 2017. Previously, he was a research analyst at Lombard Capital Partners from 2008 to 2017. He holds a bachelor's degree in business administration from the University of Southern California. He is a CFA® charterholder and member of the CFA Institute and the CFA Society of Los Angeles.

BARROW, HANLEY, MEWHINNEY & STRAUSS, LLC ("Barrow"), 2200 Ross Avenue, 31st Floor, Dallas, Texas 75201, is a professional investment counseling firm that has been providing investment advisory services since 1979. The firm is an indirect subsidiary of Perpetual Limited (ASX:PPT), an Australian financial services company. As of December 31, 2020, Barrow had discretionary investment management authority with respect to approximately \$48.4 billion of assets, including assets of a corporate client of the Manager and its subsidiaries and affiliated entities.

Barrow serves as a sub-advisor to the American Beacon Balanced Fund, American Beacon Large Cap Value Fund, American Beacon Mid-Cap Value Fund, and American Beacon Small Cap Value Fund. Barrow manages client assets on a team basis for their equity and fixed income strategies. The members of the team for each American Beacon Fund are listed below.

Name and Title of Portfolio Managers	Length of Service to Fund	Business Experience Past 5 Years
Balanced & Large Cap Value		
<i>Mark Giambone</i> Portfolio Manager/Senior Managing Director	Since 2015	Portfolio Manager/Barrow
Mid-Cap Value Fund		
<i>Mark Giambone</i> Portfolio Manager/Senior Managing Director	Since Inception (2004)	Portfolio Manager/Barrow
<i>Terry L. Pelzel</i> Portfolio Manager/Managing Director	Since 2018	Portfolio Manager/Barrow
Small Cap Value Fund		
<i>James S. McClure</i> Portfolio Manager/Managing Director	Since 2003	Portfolio Manager/Barrow
<i>Coleman Hubbard</i> Portfolio Manager/Managing Director	Since 2020	Portfolio Manager/Barrow
Balanced Fund		
<i>J. Scott McDonald</i> Portfolio Manager/Senior Managing Director Co-Head of Fixed Income	Since 1998	Portfolio Manager/Barrow
<i>Mark C. Luchsinger</i> Portfolio Manager/Senior Managing Director Co-Head of Fixed Income	Since 1998	Portfolio Manager/Barrow
<i>Deborah A. Petruzzelli</i> Portfolio Manager/Managing Director	Since 2003	Portfolio Manager/Barrow
<i>Rahul Bapna</i> Portfolio Manager/Managing Director	Since 2019	Portfolio Manager/Barrow

All of Barrow's equity portfolio managers and analysts work as a team for the purposes of generating and researching investment ideas. Portfolio managers have broad research responsibilities, although they focus their efforts on particular sectors. Analysts have specific sector/industry assignments for more specialized, in-depth research.

Barrow manages its fixed income portion of the American Beacon Balanced Fund using a team approach, with investment strategy decisions resulting from a consensus of its fixed income professionals including senior portfolio managers and dedicated research analysts. All portfolio managers are generalists, but each also has specific responsibilities for strategic focus on particular aspects of the marketplace and the portfolio structure strategy. Fixed income research responsibilities are divided among the team members, each specializing in areas in which they have particular expertise and interest. Individual bond selection decisions are also consistently made across all portfolios having similar investment objectives.

BRANDYWINE GLOBAL INVESTMENT MANAGEMENT, LLC ("Brandywine Global"), 1735 Market Street, Suite 1800, Philadelphia, PA 19103, is a professional investment advisory firm founded in 1986. Brandywine Global is a wholly owned indirect subsidiary of Franklin Resources, Inc. As of December 31, 2020, Brandywine Global had assets under management totaling approximately \$65.9 billion, including assets of a corporate client of the Manager and its subsidiaries and affiliated entities.

Brandywine Global serves as a subadvisor to the American Beacon Small Cap Value Fund.

Henry F. Otto is the founder and co-lead portfolio manager of the Diversified Value Equity strategies. Prior to joining Brandywine Global in 1988, he was with Dimensional Fund Advisors, Inc., where he managed and traded small cap portfolios and developed computer systems to structure portfolios and analyze performance (1984-1987), and the Chicago Board of Trade as a financial economist developing financial-based futures and options (1982-1984). Mr. Otto is a member of the firm's Executive Board.

Steve M. Tonkovich is co-lead portfolio manager of the Diversified Value Equity strategies. He plays an integral role in the team's continual refinement of the Diversified Value Equity investment process and the firm's ongoing research into value investing. Prior to joining the firm in 1989, he was with the Wharton School of the University of Pennsylvania as a research analyst in the Finance Department (1987-1989) and the Moore School of Electrical Engineering of the University of Pennsylvania as a research assistant (1986-1987). He is a member of the firm's Executive Board.

CAUSEWAY CAPITAL MANAGEMENT LLC ("Causeway"), 11111 Santa Monica Blvd., 15th Floor, Los Angeles, California 90025, is an international and global equity investment management firm. Causeway began operations in June 2001. As of December 31, 2020, Causeway had approximately \$45.5 billion in assets under management. Causeway serves as a sub-advisor to the American Beacon International Equity Fund.

Causeway's portion of the American Beacon International Equity Fund is managed by a team of portfolio managers comprised of Sarah H. Ketterer, Harry W. Hartford, Jonathan P. Eng, Conor Muldoon, Alessandro Valentini, Ellen Lee, Steven Nguyen, and Brian Cho.

Sarah H. Ketterer is the Chief Executive Officer. Ms. Ketterer co-founded Causeway in June 2001. Prior to that, she was with the Hotchkis and Wiley division of Merrill Lynch Investment Managers, L.P. ("MLIM") since 1996, where she was a Managing Director and co-head of the International and Global Value Equity Team in Los Angeles. Ms. Ketterer has co-managed the Fund since August 2001.

Harry W. Hartford is the President. Mr. Hartford co-founded Causeway in June 2001. Prior to that, he was with the Hotchkis and Wiley division of MLIM since 1996, where he was a Managing Director and co-head of the International and Global Value Equity Team in Los Angeles. Mr. Hartford has co-managed the Fund since August 2001.

Jonathan P. Eng is a Director of Causeway and is responsible for research in the global consumer discretionary, industrials and energy sectors. Mr. Eng joined the firm as a Research Associate in July 2001 and became a Portfolio Manager and Director in 2002. From 1997 to July 2001, Mr. Eng was with the Hotchkis and Wiley division of MLIM in Los Angeles and London, where he was an equity research associate for the International and Global Value Equity Team. Mr. Eng has co-managed the Fund since January 2006.

Conor Muldoon is a Director of Causeway and is responsible for research in the global financials and materials sectors. Mr. Muldoon joined the firm in August 2003 as a Research Associate and became a Portfolio Manager in 2010. From 1995 to June 2003, Mr. Muldoon was an investment consultant for Fidelity Investments where he served as liaison between institutional clients and investment managers within Fidelity. Mr. Muldoon has co-managed the Fund since 2010.

Alessandro Valentini is a Director of Causeway and is responsible for research in the global health care, financials and materials sectors. Mr. Valentini joined the firm in July 2006 as a Research Associate and became a Portfolio Manager in 2013. During the summer of 2005, Mr. Valentini worked as a research analyst at Thornburg Investment Management, where he conducted fundamental research for the International Value Fund and the Value Fund, focusing on the European telecommunication and Canadian oil sectors. From 2000 to 2004, Mr. Valentini worked as a financial analyst at Goldman Sachs in the European Equities Research-Sales division in New York. Mr. Valentini has co-managed the Fund since 2013.

Ellen Lee is a Director of Causeway and is responsible for research in the global consumer and utilities sectors. Ms. Lee joined the firm in August 2007 as a Research Associate and became a Portfolio Manager in January 2015. During the summer of 2006, Ms. Lee interned at Tiger Asia, a long short equity hedge fund focused on China, Japan, and Korea. From 2001-2004, Ms. Lee was an associate in the Mergers and Acquisitions division of Credit Suisse First Boston in Seoul, where she advised Korean corporates and multinational corporations. From 1999-2000, she was an analyst in the Mergers and Acquisitions division of Credit Suisse First Boston in Hong Kong. Ms. Lee has co-managed the Fund since 2015.

Steven Nguyen is a Director of Causeway and is responsible for investment research in the utilities and healthcare sectors. He joined the firm in April 2012. From 2006 to 2012, Mr. Nguyen was a Senior Credit Analyst at Bradford & Marzec covering high yield and investment grade companies in the telecommunication services, cable, media, gaming, insurance, and REIT industries. From 2003 to 2006, Mr. Nguyen was a Credit Analyst/Portfolio Manager in the corporate bond department of Allegiance Capital. Mr. Nguyen earned a BA in Business Economics from Brown University and an MBA, with honors, from the UCLA Anderson School of Management. He is a CFA® charterholder. Mr. Nguyen has co-managed the Fund since 2019.

Brian Cho is a Director of Causeway. Mr. Cho joined Causeway in September 2013. His responsibilities include coverage of companies in the technology and communication services sectors. From 2011 to 2013, Mr. Cho was a vice president at BofA-ML Equity Research, covering the IT hardware and supply chain sector. From 2007 to 2011, he worked as an associate at Goldman Sachs Equity Research covering the same sector. From 2006 to 2007, he worked as an analyst at Morgan Stanley Equity Research covering the internet and interactive software sector. Prior to that, he worked as an analyst at PA Consulting Group in the financial services practice. Mr. Cho earned a BSc in management science from Massachusetts Institute of Technology. Mr. Cho has co-managed the Fund since 2021.

FOUNDRY PARTNERS, LLC ("Foundry") 323 Washington Avenue North, Suite 360, Minneapolis, MN 55401, is an investment management company with assets under management of \$2.7 billion as of December 31, 2020. Foundry was founded in 2013 and is a boutique asset management company that specializes in providing active management. Foundry purchased growth and value teams from ClearArc Capital, formerly Fifth Third Asset Management, and the small cap value team from Dremar Value Management, LLC ("Dremar"), a former sub-advisor to the American Beacon Small Cap Value Fund. Foundry serves as a sub-advisor to the American Beacon Small Cap Value Fund. The members of the team for the Fund are listed below.

Mark Roach has served as the Lead Portfolio Manager for Foundry's portion of the American Beacon Small Cap Value Fund since 2010. Mr. Roach has been with Foundry since 2016. Prior to joining Foundry, Mr. Roach was a Lead Portfolio Manager at Dremar from 2006 to 2016.

Mario Tufano has served as Associate Portfolio Manager for Foundry's portion of the American Beacon Small Cap Value Fund since 2010. Mr. Tufano has been with Foundry since 2016. Prior to joining Foundry, Mr. Tufano was an Associate Portfolio Manager at Dremar from 2007 to 2016.

GARCIA HAMILTON & ASSOCIATES, L.P. ("Garcia Hamilton"), 1401 McKinney Street, Suite 1600, Houston, Texas 77010, is an investment management company with assets under management of \$16.7 billion as of December 31, 2020. Garcia Hamilton was founded in 1988 and offers high quality fixed income strategies for institutional investors. Its diversified client base includes public funds, jointly-trusted plans, endowments and corporations.

Garcia Hamilton serves as sub-advisor to the American Beacon Garcia Hamilton Quality Bond Fund. Investment decisions for the Fund are based on decisions made by Garcia Hamilton's Investment Management Team. Collectively, the following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio.

Gilbert Andrew Garcia, CFA, is a Managing Partner and Portfolio Manager and began working at Garcia Hamilton in 2002. His responsibilities include portfolio management and investment research.

Nancy Rodriguez is a Portfolio Manager and began working at Garcia Hamilton in 1998. Her responsibilities include portfolio management and investment research.

HILLCREST ASSET MANAGEMENT, LLC ("Hillcrest"), 2805 Dallas Parkway, Suite 250, Plano, TX 75093, is an investment management company with assets under management of \$855.8 million as of December 31, 2020. Hillcrest provides portfolio management in small cap value, small cap core and midcap US equities. Hillcrest was founded in 2007 and is an independent, employee-controlled company which manages assets using Behavioral Finance techniques. Hillcrest serves as sub-advisor to the American Beacon Small Cap Value Fund. Hillcrest personnel primary responsible for managing the Fund are:

Brian R. Bruce, CEO and Chief Investment Officer. Mr. Bruce has been with Hillcrest since its inception in July 2007 as the CEO and Chief Investment Officer and oversees all business and investment activities at the firm.

Brandon Troegle, CFA, Managing Director, Fundamental Analysis and Portfolio Manager. Mr. Troegle is a partner at Hillcrest and an analyst and portfolio manager focusing on the firm's security selection. Mr. Troegle has been with Hillcrest since its inception in July 2007.

Douglas Stark, CFA, Managing Director, Portfolio Management and Research. Mr. Stark is a partner at Hillcrest and focuses on the firm's research and portfolio management. Mr. Stark has been with Hillcrest since January 2008. Prior to joining Hillcrest, Mr. Stark was Partner, Senior Vice President, and Director of Research at Martingale Asset Management from 1996 to 2007.

HOTCHKIS AND WILEY CAPITAL MANAGEMENT, LLC ("Hotchkis"), 601 South Figueroa Street, 39th Floor, Los Angeles, California 90017-5704, is a limited liability company, the primary members of which are HWCap Holdings, a limited liability company with members who are current and former employees of Hotchkis, and Stephens-H&W, LLC, a limited liability company whose primary member is SF Holding Corp., which is a diversified holding company. Hotchkis' predecessor entity was organized as an investment advisor in 1980. As of December 31, 2020, Hotchkis had approximately \$31.7 billion in investment company and other portfolio assets under management.

Hotchkis serves as a subadvisor to the American Beacon Balanced Fund, American Beacon Large Cap Value Fund and the American Beacon Small Cap Value Fund. Hotchkis supervises and arranges the purchase and sale of securities held in its respective portions of the Funds' portfolios.

In addition to the Funds, Hotchkis manages institutional separate accounts and is the advisor and sub-advisor to other mutual funds. The investment process employed is the same for similar accounts, including the Funds and is team-based utilizing primarily in-house, fundamental research. The investment research staff is organized by industry and sector and supports all of the accounts managed in each of Hotchkis' investment strategies. Portfolio coordinators for each strategy ensure that the best thinking of the investment team is reflected in the "target portfolios." Investment ideas for each Fund are generated by Hotchkis' investment team.

Although portions of the American Beacon Balanced Fund, American Beacon Large Cap Value Fund and American Beacon Small Cap Value Fund are managed by Hotchkis' investment team, Hotchkis has identified the portfolio managers with the most significant responsibility for Hotchkis' portion of each Fund's assets. This list does not include all members of the investment team.

Hotchkis Portfolio Managers for the American Beacon Balanced and American Beacon Large Cap Value Funds

George Davis, Judd Peters, Scott McBride, and Patricia McKenna participate in the investment research review and decision making process for the Funds. Mr. McBride, Mr. Peters and Mr. Davis coordinate the day-to-day management of the Funds:

Mr. Davis, Principal, Portfolio Manager and Chief Executive Officer, joined Hotchkis' investment team in 1988. Mr. Davis has been a Portfolio Manager since 1989 and Chief Executive Officer since 2001. In his role as portfolio manager, Mr. Davis plays an integral part in the investment research review and decision-making process. He coordinates the day-to-day management of large cap fundamental value, large cap diversified value, mid cap value and value opportunities portfolios, represents these strategies to current and prospective clients, as well as provides expertise and insight into the capital goods and financials sectors. Prior to joining the firm, Mr. Davis was an assistant to the senior partner of RCM Capital Management. He began his career in equity research with internships at Cramer, Rosenthal & McGlynn and Fidelity Management & Research. Mr. Davis received his BA in Economics and History and MBA from Stanford University.

Mr. Peters, Portfolio Manager, joined Hotchkis' investment team in 1999 and has been a Portfolio Manager since 2003. In his role as portfolio manager, Mr. Peters plays an integral part in the investment research review and decision-making process as well as coordinates the day-to-day management of large cap fundamental value, large cap diversified value, small cap diversified value and global value portfolios. He also provides expertise and insight into the capital goods, energy and technology sectors. Prior to joining the firm, Mr. Peters was an analyst in the corporate finance department of an investment banking firm. Mr. Peters, a CFA® charterholder, received his BA in Mathematics and a BS in Biochemistry from University of California, San Diego.

Mr. McBride, Portfolio Manager, joined Hotchkis' investment team in 2001 and has been a Portfolio Manager since 2004. In his role as portfolio manager, Mr. McBride plays an integral part in the investment research review and decision-making process as well as coordinates the day-to-day management of large cap fundamental value, large cap diversified value and global value portfolios. He also provides expertise and insight into the consumer, financials, healthcare and technology sectors. Prior to joining the firm, Mr. McBride was an associate consultant with Deloitte Consulting and worked as an investment marketing analyst with Fidelity Investments. Mr. McBride, a CFA® charterholder, received his BA in Economics from Georgetown University and MBA from Columbia University.

Ms. McKenna, Principal and Portfolio Manager, joined Hotchkis' investment team in 1995 and has been a Principal since 2001. In her role as portfolio manager, Ms. McKenna plays an integral part in the investment research review and decision-making process and represents the large cap fundamental value and large cap diversified value strategies to current and prospective clients. She also provides expertise and insight into the consumer and healthcare sectors. Prior to joining the firm, Ms. McKenna was an equity analyst at Trust Company of the West. Before entering the field of investment management, she worked for five years in corporate finance at Bankers Trust and then at Fieldstone Private Capital Group. Ms. McKenna began her career as a forensic accountant in 1983. Ms. McKenna, a CFA® charterholder, received her BA in Economics with distinction from Stanford University and MBA from Harvard Business School.

Hotchkis Portfolio Managers for the American Beacon Small Cap Value Fund

David Green, Jim Miles, Judd Peters, and Ryan Thomes participate in the investment research review and decision-making process for the Fund and coordinate the day-to-day management of the Fund.

Mr. Green, Principal and Portfolio Manager, joined Hotchkis' investment team in 1997. In his role as portfolio manager, Mr. Green plays an integral part in the investment research review and decision-making process. He coordinates the day-to-day management of small cap value and value opportunities portfolios, represents these strategies to current and prospective clients, as well as provides expertise and insight into Special Situations. Prior to joining the firm, Mr. Green worked as a senior equity analyst with Goldman Sachs Asset Management on the Broad Market Value team. Before joining Goldman Sachs, he worked as an equity analyst with Prudential Investment Corporation where he began his investment career in 1990. Mr. Green's investment experience is focused primarily on analysis of publicly traded equities. Mr. Green, a CFA® charterholder, received his BA in Economics with honors from the University of California, Berkeley and is a member of Phi Beta Kappa.

Mr. Miles, Principal and Portfolio Manager, joined Hotchkis' investment team in 1995. Hotchkis' investment team has managed Hotchkis' portion of the Fund since its inception in 1998. In his role as portfolio manager, Mr. Miles plays an integral part in the investment research review and decision-making process. He coordinates the day-to-day management of small cap value portfolios, represents all strategies to current and prospective clients, as well as provides expertise and insight into the consumer and technology sectors. Prior to joining the firm, Mr. Miles was a vice president in corporate finance at BT Securities Corporation, an affiliate of Bankers Trust. He specialized in lending to and arranging debt for highly leveraged companies. Mr. Miles received his BS in Mechanical Engineering and MS in Engineering from Stanford University and MBA from the University of California, Los Angeles.

Mr. Peters, Portfolio Manager, has 19 years of investment experience of which 17 are with Hotchkis. Mr. Peters led the effort to create the Small Cap Diversified Value strategy in 2005. Mr. Peters plays an integral part in the investment research review and decision-making process as well as coordinates the day-to-day management of the Small Cap Diversified Value portfolios. Prior to joining the firm, Mr. Peters was an analyst in the corporate finance department of Wedbush Morgan Securities. Mr. Peters, a CFA charterholder, received his BA in Mathematics and a BS in Biochemistry from University of California, San Diego. Mr. Peters is an equity owner of Hotchkis.

Mr. Thomes, Portfolio Manager, has 14 years of investment experience of which 9 are with Hotchkis. Mr. Thomes co-manages the Small Cap Diversified Value along with Mr. Peters. Prior to joining the firm, Mr. Thomes was a global equity senior research associate for Jeffrey Slocum and Associates. Mr. Thomes began his investment career as a research analyst at Berthel Schutter LLC. Mr. Thomes, a CFA charterholder, received his BS in Entrepreneurial Management and Finance from the University of Minnesota. Mr. Thomes is an equity owner of Hotchkis.

LAZARD ASSET MANAGEMENT LLC ("Lazard"), 30 Rockefeller Plaza, 55th floor, New York, New York 10112, an investment advisor, is a subsidiary of Lazard Frères & Co. LLC, a New York Limited Liability Company. Lazard and its affiliates provided investment management services to client discretionary accounts with assets totaling approximately \$229.7 billion as of December 31, 2020, including assets of a corporate client of the Manager and its subsidiaries and affiliated entities. Lazard serves as a sub-advisor to the American Beacon International Equity Fund.

The following individuals comprise Lazard's International Equity management team, which is responsible for the day-to-day management of a portion of the American Beacon International Equity Fund. Responsibility is shared equally among each member of the team.

John R. Reinsberg is a Deputy Chairman of Lazard with responsibility for international and global strategies. He is also Portfolio Manager/Analyst on the Global Equity and International Equity portfolio teams. He joined Lazard in 1992 and began working in the investment field in 1981. Mr. Reinsberg has co-managed Lazard's portion of the Fund since March 1999.

Michael A. Bennett is a Managing Director of Lazard and a Portfolio Manager/Analyst on various international equity teams. He joined Lazard in 1992 and has worked in the investment field since 1986. Mr. Bennett has co-managed Lazard's portion of the Fund since May 2003.

Michael G. Fry is a Managing Director and Portfolio Manager/Analyst on various international equity teams. From 1995 to 2005, Mr. Fry held several positions at UBS Global Asset Management, including Lead Portfolio Manager and Head of Global Equity Portfolio Management, Global Head of Equity Research and Head of Australian Equities. He joined Lazard in 2005 and has worked in the investment field since 1981. He has co-managed Lazard's portion of the Fund since November 2005.

Michael S. Powers is a Managing Director of Lazard and a Portfolio Manager/Analyst on various international equity teams. He began working in the investment field in 1990 when he joined Lazard and has co-managed Lazard's portion of the Fund since May 2003.

Kevin J. Matthews is a Managing Director of Lazard and a Portfolio Manager/Analyst on various international equity teams. Prior to joining the investment teams, he was a Research Analyst from 2001 to 2010 with a background in financials, automotive, aerospace, and capital goods sectors. He joined Lazard in 2001 and has co-managed Lazard's portion of the Fund since 2013.

Giles Edwards is a Portfolio Manager/Analyst on various international equity teams as of January 2020. Prior to joining the investment teams, he was a Research Analyst with a background in media, automotive, and services. Prior to joining Lazard in 2008, Giles was a Management Accountant at BSKyB, completing his CIMA qualifications. He has a BA (Hons) in Politics and Economics from the University of Newcastle upon Tyne.

MASSACHUSETTS FINANCIAL SERVICES COMPANY ("MFS"), 111 Huntington Avenue, Boston, MA 02199, is a subsidiary of Sun Life of Canada (U.S.) Financial Services Holdings, Inc., which in turn is an indirect majority-owned subsidiary of Sun Life Financial Inc. (a diversified financial services company). MFS and its predecessor organizations have a history of money management dating from 1924. As of December 31, 2020, net assets under management of the MFS organization were approximately \$610.2 billion, including assets of a corporate client of the Manager and its subsidiaries and affiliated entities. MFS serves as a sub-advisor to the American Beacon Large Cap Value Fund, and Nevin Chitkara and Katherine Cannan co-manage MFS' Large Cap Value Equity strategy of the Fund.

Ms. Cannan is an Investment Officer of MFS and has been employed in the investment area of MFS since 2013.

Mr. Chitkara is an Investment Officer of MFS and has been employed in the investment area of MFS since 1997.

MELLON INVESTMENTS CORPORATION ("Mellon"), One Boston Place, Boston, Massachusetts 02108, is a subsidiary of The Bank of New York Mellon Corporation. Assets under management as of December 31, 2020 were \$613.6 billion. Certain of the assets managed by Mellon are managed as dual officers of affiliated entities. Mellon serves as a sub-advisor to the American Beacon Small Cap Value Fund.

Mellon Portfolio Managers for the American Beacon Small Cap Value Fund

Joseph M. Corrado, Executive Vice President, Senior Portfolio Manager, is the lead portfolio manager for the US Small Cap Value Equity strategy for Mellon and he oversees the US Small Cap Value team. Mr. Corrado joined Mellon in 1986.

Edward R. Walter, Managing Director, Senior Portfolio Manager, has served as US Small Cap Value Equity portfolio manager for Mellon since May 2004. Prior to becoming a portfolio manager, Mr. Walter served as research analyst, and he continues to fulfill certain research responsibilities in conjunction with his portfolio management duties. Mr. Walter focuses on the Health Care, Technology, and Industrial sectors.

Mr. Corrado and Mr. Walter have managed a portion of the American Beacon Small Cap Value Fund since September 2004.

PZENA INVESTMENT MANAGEMENT, LLC ("Pzena"), 320 Park Avenue 8th Floor, New York, New York 10022, is a majority employee-owned investment management firm founded in 1995. As of December 31, 2020, Pzena had assets of approximately \$43.3 billion under management, including assets of a corporate client of the Manager and its subsidiaries and affiliated entities. Pzena serves as a sub-advisor to the American Beacon Mid-Cap Value Fund. Investment decisions for the portion of the American Beacon Mid-Cap Value Fund sub-advised by Pzena are made by a three person investment team. The team consists of Richard S. Pzena, Ben Silver and John Flynn. Each member has equal weight in determining how research findings are translated into an earnings model. Further, all decisions require unanimous consent of the three individuals. Should one of the members become unavailable for either planned or unplanned reasons, the remaining members would continue the process.

Richard Pzena is Founder, Managing Principal, Co-Chief Investment Officer, Portfolio Manager, and member of the firm's Executive Committee. Mr. Pzena is the architect of the firm's investment strategy and conceived and developed the firm's proprietary screening model. He serves as co-portfolio manager for the U.S. Large Cap and Mid Cap strategies, Focused Value, and U.S. Best Ideas. Mr. Pzena began the firm in 1995. Prior to forming Pzena Investment Management, Mr. Pzena was the Director of U.S. Equity Investments and Chief Research Officer for Sanford C. Bernstein & Company. He joined Bernstein as an oil industry analyst and was named to the Institutional Investor All America Research Team for three years running. Mr. Pzena also served as Chief Investment Officer, Small Cap Equities. Prior to joining Bernstein, Mr. Pzena worked for the Amoco Corporation in various financial and planning roles. He earned a B.S. summa cum laude and an M.B.A. from The Wharton School of the University of Pennsylvania.

John Flynn is a Principal and Portfolio Manager. Mr. Flynn is a co-portfolio manager for the U.S. Mid Cap and Large Cap strategies, along with the Focused Value and Small Cap Focused Value services. Mr. Flynn became a member of the firm in 2005. Prior to joining Pzena Investment Management, Mr. Flynn was an associate at Weston Presidio, a middle-market private equity investment firm. He earned a B.A. in Music from Yale University and an M.B.A. with distinction from the Harvard Business School.

Ben Silver is a Principal and Portfolio Manager. Mr. Silver serves as co-portfolio manager for the U.S. Mid Cap, Large Cap, and Global strategies, along with the Focused Value and Small Cap Focused Value services. Mr. Silver became a member of the firm in 2001. Prior to joining Pzena Investment Management, Mr. Silver was a research analyst at Levitas & Company, a value-based equity hedge fund, and a manager for Ernst & Young LLP in their Financial Services Group. He earned a B.S. magna cum laude in Accounting from Sy Syms School of Business at Yeshiva University. Mr. Silver is a Certified Public Accountant and holds the Chartered Financial Analyst designation. Mr. Silver joined the portfolio management team of the Mid-Cap Value Fund in 2017.

WEDGE CAPITAL MANAGEMENT, L.L.P. ("WEDGE"), 301 South College Street, Suite 3800, Charlotte, NC 28202, is an investment management company with assets under management of \$10.8 billion as of December 31, 2020. WEDGE was founded in 1984, in Charlotte, North Carolina by a group of investment professionals who had previously managed the common trust funds of a nationally oriented bank. Initially, venture capital funding was provided by the WEDGE International Group of Houston, Texas. In 1989, the firm's founders purchased the venture capital position and WEDGE has been independently owned since that time. The firm is currently owned and operated by eight active General Partners. WEDGE has served as a sub-advisor to the American Beacon Mid-Cap Value Fund since 2015, and the following individuals serve as portfolio managers to the American Beacon Mid-Cap Value Fund.

John Carr, General Partner, has twenty-six years of investment experience and is responsible for portfolio management and client service. Prior to joining WEDGE in 2011, Mr. Carr was a Partner and Senior Vice President at Callan Associates where he managed the southern region from the Atlanta office from 2006 to 2011. He has former portfolio management experience with INVESCO Institutional and Trusco Capital Management.

Michael D. Ritzer, CFA, General Partner, has fourteen years of investment experience and is responsible for mid cap equity research. Prior to joining WEDGE in 2010, Mike was a Senior Analyst at Freestyle Fund Services Company in New York, NY. He was formerly an Investment Banking Analyst for Jefferies & Company. Mike received his Bachelor of Science in Commerce degree with a concentration in Finance and a second major in English from the McIntire School of Commerce at the University of Virginia. He received his Master of Business Administration degree from the Darden Graduate School of Business at the University of Virginia. Mike is a member of the firm's Investment Policy Committee.

Andrew Rosenberg, CFA, General Partner, has twenty-one years of investment experience and serves as head of large cap research and co-head of mid cap research. Prior to joining WEDGE in 2007, Andrew was a Vice President in the Strategic Investments Group at Bank of America where he analyzed and executed private equity transactions on behalf of the bank. He was also associated with Bank of America's leveraged finance and syndicated loan platforms. In addition, Andrew was formerly associated with Goldman Sachs. Andrew received his Bachelor of Arts degree in English from Colgate University and his Master of Business Administration degree from Vanderbilt University. Andrew is a member of the firm's Investment Policy Committee.

Richard Wells, General Partner, has thirty-six years of investment experience and is responsible for portfolio management and client service. Prior to joining WEDGE in 2011, Mr. Wells was a Partner and Director of National Sales with DePrince, Race & Zollo, Inc., in Winter Park, Florida from 1998 to 2011. He was formerly associated with PaineWebber, Incorporated, Salomon Brothers, and the First Boston Company.

Valuation of Shares

The price of each Fund's shares is based on its NAV. Each Fund's NAV per share is computed by adding total assets, subtracting all of the Funds' liabilities, and dividing the result by the total number of shares outstanding.

The NAV per share of each class of a Fund's shares is determined based on a pro rata allocation of a Fund's investment income, expenses and total capital gains and losses. A Fund's NAV per share is determined each business day as of the regular close of trading on the New York Stock Exchange ("NYSE"), which is typically 4:00 p.m. Eastern Time. However, if trading on the NYSE closes at a time other than 4:00 p.m. Eastern Time, a Fund's NAV per share typically would still be determined as of the regular close of trading on the NYSE. The Funds do not price their shares on days that the NYSE is closed. Foreign exchanges may permit trading in foreign securities on days when a Fund is not open for business, which may result in the value of a Fund's portfolio investments being affected at a time when you are unable to buy or sell shares.

Equity securities and certain derivative instruments that are traded on an exchange are valued based on market value. Certain derivative instruments (other than short-term securities) usually are valued on the basis of prices provided by a pricing service. The price of debt securities generally is determined using pricing services or quotes obtained from broker/dealers who may consider a number of inputs and factors, such as comparable characteristics, yield curve, credit spreads, estimated default rates, coupon rates, underlying collateral and estimated cash flow. Investments in other mutual funds are valued at the closing NAV per share of the mutual funds on the day of valuation. Equity securities, including shares of closed-end funds and ETFs, are valued at the last sale price or official closing price.

The valuation of securities traded on foreign markets and certain fixed income securities will generally be based on prices determined as of the earlier closing time of the markets on which they primarily trade, unless a significant event has occurred. When a Fund holds securities or other assets that are denominated in a foreign currency, a Fund will normally use the currency exchange rates as of 4:00 p.m. Eastern Time.

Securities may be valued at fair value, as determined in good faith and pursuant to procedures approved by the Board, under certain limited circumstances. For example, fair value pricing will be used when market quotations are not readily available or reliable, as determined by the Manager, such as when: (i) trading for a security is restricted or stopped; (ii) a security's trading market is closed (other than customary closings); or (iii) a security has been de-listed from a national exchange. A security with limited market liquidity may require fair value pricing if the Manager determines that the available price does not reflect the security's true market value. In addition, if a significant event that the Manager determines to affect the value of one or more securities held by a Fund occurs after the close of a related exchange but before the determination of a Fund's NAV per share, fair value pricing may be used on the affected security or securities. Securities of small capitalization companies are also more likely to require a fair value determination using these procedures because they are more thinly traded and less liquid than the securities of larger capitalization companies. The Funds may fair value securities as a result of significant events occurring after the close of the foreign markets in which a Fund invests. In addition, the Funds may invest in illiquid securities requiring these procedures.

The American Beacon International Equity Fund often fair values securities as a result of significant events occurring after the close of the foreign markets in which this Fund invests. The Fund may fair value securities as a result of significant events occurring after the close of the foreign markets in which the Fund invests. Securities of small capitalization companies are also more likely to require a fair value determination using these procedures because they are more thinly traded and less liquid than the securities of larger capitalization companies. In addition, the Funds may invest in illiquid securities requiring these procedures.

Attempts to determine the fair value of securities introduce an element of subjectivity to the pricing of securities. As a result, the price of a security determined through fair valuation techniques may differ from the price quoted or published by other sources and may not accurately reflect the market value of the security when trading resumes. If a reliable market quotation becomes available for a security formerly valued through fair valuation techniques, the Manager compares the new market quotation to the fair value price to evaluate the effectiveness of the Funds' fair valuation procedures. If any significant discrepancies are found, the Manager may adjust the Funds' fair valuation procedures. You may view a Fund's most recent NAV per share at www.americanbeaconfunds.com by clicking on "Quick Links" and then "Daily NAVs."

About Your Investment

Choosing Your Share Class

Each Fund offers various classes of shares. Each share class of a Fund represents an investment in the same portfolio of securities for that Fund, but each class has its own expense structure and combination of purchase restrictions, sales charges, and ongoing fees, allowing you to choose the class that best fits your situation.

Factors you should consider when choosing a class of shares include:

- How long you expect to own the shares;
- How much you intend to invest;
- Total expenses associated with owning shares of each class;
- Whether you qualify for any reduction or waiver of sales charges;
- Whether you plan to take any distributions in the near future; and
- Availability of share classes.

Each investor's financial considerations are different. You should speak with your financial professional to help you decide which share class is best for you.

A Class Charges and Waivers

The table below shows the amount of sales charges you will pay on purchases of A Class shares of the Funds both as a percentage of offering price and as a percentage of the amount you invest. The sales charge differs depending upon the amount you invest and may be reduced or eliminated for larger purchases as indicated below. If you invest more, the sales charge will be lower.

Any applicable sales charge will be deducted directly from your investment. Because of rounding of the calculation in determining the sales charges, you may pay more or less than what is shown in the table below. Shares acquired through reinvestment of dividends or other distributions are not subject to a front-end sales charge. You may qualify for a reduced sales charge or the sales charge may be waived as described below in "A Class Sales Charge Reductions and Waivers."

A Class Shares

Amount of Sale/Account Value	As a % of Offering Price	As a % of Investment	Dealer Commission as a % of Offering Price
Less than \$50,000	5.75%	6.10%	5.00%
\$50,000 but less than \$100,000	4.75%	4.99%	4.00%
\$100,000 but less than \$250,000	3.75%	3.90%	3.00%
\$250,000 but less than \$500,000	2.75%	2.83%	2.05%
\$500,000 but less than \$1 million	2.00%	2.04%	1.50%
\$1 million and above	0.00%	0.00% [†]	[‡]

[†] No initial sales charge applies on purchases of \$1,000,000 or more. A CDSC of 0.50% of the offering price will be charged on purchases of \$1,000,000 or more that are redeemed in whole or in part within eighteen (18) months of purchase.

[‡] See "Dealer Concessions on A Class Purchases Without a Front-End Sales Charge."

The Distributor retains any portion of the commissions that are not paid to financial intermediaries to solely pay distribution-related expenses. This information is available, free of charge, on the Funds' website. Please visit www.americanbeaconfunds.com. You may also call (800) 658-5811 or consult with your financial professional.

A Class Sales Charge Reductions and Waivers

A shareholder may qualify for a waiver or reduction in sales charges under certain circumstances. To receive a waiver or reduction in your A Class sales charge, you must advise the Funds' transfer agent, your broker-dealer or other financial intermediary of your eligibility at the time of purchase. If you, or your financial intermediary, do not let the Funds' transfer agent know that you are eligible for a reduction, you may not receive a sales charge discount to which you are otherwise entitled. This information is available, free of charge, on the Funds' website. Please visit www.americanbeaconfunds.com. You may also call (800) 658-5811 or consult with your financial advisor.

Waiver of Sales Charges

There is no sales charge if you invest \$1 million or more in A Class shares of the Funds.

Sales charges also may be waived for certain shareholders or transactions, such as:

- The Manager or its affiliates;
- Present and former directors, trustees, officers, employees of the Manager, the Manager's parent company, and the American Beacon Funds (and their "immediate family" as defined in the SAI), and retirement plans established by them for their employees;
- Registered representatives or employees of intermediaries that have selling agreements with the Funds;

- Shares acquired through merger or acquisition;
- Insurance company separate accounts;
- Employer-sponsored retirement plans;
- Dividend reinvestment programs;
- Purchases through certain fee-based programs under which investors pay advisory fees that may be offered through selected registered investment advisers, broker-dealers, and other financial intermediaries;
- Shareholders that purchase a Fund through a financial intermediary that offers our A Class shares uniformly on a “no load” (or reduced load) basis to you and all similarly situated customers of the intermediary in accordance with the intermediary’s prescribed fee schedule for purchases of fund shares;
- Mutual fund shares exchanged from an existing position in the same fund as part of a share class conversion instituted by an intermediary; and
- Reinvestment of proceeds within 90 days of a redemption from A Class account (see Redemption Policies for more information).

The availability of A Class shares sales charge waivers may depend upon the policies, procedures, and trading platform of your financial intermediary.

Reduced Sales Charges

Under a “Rights of Accumulation Program,” a “Letter of Intent” or through “Concurrent Purchases” you may be eligible to buy A Class shares of the Funds at the reduced sales charge rates that would apply to a larger purchase. Each Fund reserves the right to modify or to cease offering these programs at any time.

This information is available, free of charge, on the Funds’ website. Please visit www.americanbeaconfunds.com. You may also call (800) 658-5811 or consult with your financial advisor.

Dealer Concessions on A Class Purchases Without a Front-End Sales Charge

Brokers who initiate and are responsible for purchases of \$1,000,000 or more of A Class shares of a Fund may receive a dealer concession from the Funds’ Distributor of 0.50% of the offering price. If a client or broker is unable to provide account verification on purchases of \$1,000,000 or more, the dealer concession will be forfeited by the broker and front-end sales loads will apply. Dealer concessions will not be paid on shares purchased by exchange or shares that were previously subject to a front-end sales charge or dealer concession. Dealer concessions will be paid only on eligible purchases where the applicability of the CDSC can be monitored. Purchases eligible for sales charge waivers as described under “A Class Sales Charge Reductions and Waivers” are not eligible for dealer concessions on purchases of \$1,000,000 or more.

Rights of Accumulation Program

Under the Rights of Accumulation Program, you may qualify for a reduced sales charge for A Class shares by aggregating all of your investments held in certain accounts (“Qualified Accounts”). The following Qualified Accounts holding any share class of the American Beacon Funds may be grouped together to qualify for the reduced sales charge under the Rights of Accumulation Program or Letter of Intent:

- Accounts owned by you, your spouse or your minor children under the age of 21, including trust or other fiduciary accounts in which you, your spouse or your minor children are the beneficiary;
- UTMA/UGMA’s;
- IRAs, including traditional, Roth, SEP and SIMPLE IRAs; and
- Coverdell Education Savings Accounts or qualified 529 plans.

A fiduciary can apply a right of accumulation to all shares purchased for a trust, estate or other fiduciary account that has multiple accounts.

You must notify your financial intermediary, or the Funds’ transfer agent, in the case of shares held directly with the Funds, at the time of purchase that a purchase qualifies for a reduced sales charge under the Rights of Accumulation Program. In addition, you must provide either a list of account numbers or copies of account statements verifying your qualification. You may combine the historical cost or current market value, as of the day prior to your additional American Beacon Funds’ purchase (whichever is higher) of your existing American Beacon Funds’ mutual fund with the amount of your current purchase in order to take advantage of the reduced sales charge. Historical cost is the price you actually paid for the shares you own, plus your reinvested dividends and other distributions. If you are using historical cost to qualify for a reduced sales charge, you should retain any records to substantiate your historical costs since the Fund, its transfer agent or your financial intermediary may not maintain this information.

If your shares are held through financial intermediaries and/or in a retirement account (such as a 401(k) or employee benefit plan), you may combine the current market value of your existing American Beacon Funds mutual fund investment with the amount of your current purchase in order to take advantage of the reduced sales charge. You or your financial intermediary must notify the Funds’ transfer agent at the time of purchase that a purchase qualifies for a reduced sales charge and provide copies of account statements dated within three months of your current purchase verifying your qualification.

Upon receipt of the above referenced supporting documentation, the financial intermediary or the Funds’ transfer agent will calculate the combined value of all of your Qualified Accounts to determine if the current purchase is eligible for a reduced sales charge. Purchases made for nominee or street name accounts (securities held in the name of a dealer or another nominee such as a bank trust department instead of the customer) may not be aggregated with purchases for other accounts and may not be aggregated with other nominee or street name accounts unless otherwise qualified as described above.

Letter of Intent

If you plan to invest at least \$50,000 (excluding any reinvestment of dividends and other distributions) during the next 13 months in any class of a Fund, you may qualify for a reduced sales charge for purchases of A Class shares by completing the Letter of Intent section of your account application.

A Letter of Intent indicates your intent to purchase at least \$50,000 in any class of the American Beacon Funds over the next 13 months in exchange for a reduced A Class sales charge indicated on the above tables. The minimum initial investment under a Letter of Intent is \$2,500. You are not obligated to purchase additional shares if you complete a Letter of Intent. However, if you do not buy enough shares to qualify for the projected level of sales charge by the end of the 13-month period (or when you sell your shares, if earlier), your sales charge will be recalculated to reflect your actual purchase level. During the term of the Letter of Intent, shares representing 5% of your intended purchase will be held in escrow. If you do not purchase enough shares during the 13-month period to qualify for the projected reduced sales charge, the additional sales charge will be deducted from your account. If you have purchased shares of any American Beacon mutual fund within 90 days prior to signing a Letter of Intent, they may be included as part of your intended purchase, however, previous purchase transactions will not be recalculated with the proposed new breakpoint. You must provide either a list of account numbers or copies of account statements verifying your purchases within the past 90 days.

Concurrent Purchases

You may combine simultaneous purchases in shares of any of the American Beacon Funds to qualify for a reduced charge.

CDSC — A Class Shares

Unless a waiver applies, investors who purchase \$1,000,000 or more of A Class shares of a Fund (and, thus, pay no initial sales charge) will be subject to a 0.50% CDSC if those shares are redeemed within 18 months after they are purchased. The CDSC does not apply if you are otherwise eligible to purchase A Class shares without an initial sales charge or are eligible for one of the waivers described herein or in the SAI.

CDSC — C Class Shares

If you redeem C Class shares within 12 months of purchase, you may be charged a CDSC of 1%. The CDSC generally will be deducted from your redemption proceeds. In some circumstances, you may be eligible for one of the waivers described herein or in the SAI. You must advise the transfer agent of your eligibility for a waiver when you place your redemption request.

How CDSCs will be Calculated

The amount of the CDSC will be based on the market value of the redeemed shares at the time of the redemption or the original purchase price, whichever is lower. Because of the rounding of the calculation in determining the CDSC, you may pay more or less than the indicated rate. Your CDSC holding period is based upon the date of your purchase. The CDSCs will be deducted from the proceeds of your redemption, not from amounts remaining in your account. A CDSC is not imposed on any increase in NAV per share over the initial purchase price or shares you received through the reinvestment of dividends or other distributions.

To keep your CDSC as low as possible, each time you place a request to sell shares, the Funds will redeem your shares in the following order:

- shares acquired by the reinvestment of dividends or other distributions;
- other shares that are not subject to the CDSC;
- shares held the longest during the holding period.

Waiver of CDSCs — A and C Class Shares

A shareholder may qualify for a CDSC waiver under certain circumstances. To have your CDSC waived, you must advise the Funds' transfer agent, your broker-dealer or other financial intermediary of your eligibility at the time of redemption. If you or your financial intermediary do not let the Funds' transfer agent know that you are eligible for a waiver, you may not receive a waiver to which might otherwise be otherwise entitled.

The CDSC may be waived if:

- The redemption is due to a shareholder's death or post-purchase disability;
- The redemption is from a systematic withdrawal plan and represents no more than 10% of your annual account value;
- The redemption is a benefit payment made from a qualified retirement plan, unless the redemption is due to the termination of the plan or the transfer of the plan to another financial institution;
- The redemption is for a "required minimum distribution" from a traditional IRA as determined by the Internal Revenue Service;
- The redemption is due to involuntary redemptions by the Funds as a result of your account not meeting the minimum balance requirements, the termination and liquidation of the Funds, or other actions;
- The redemption is from accounts for which the broker-dealer of record has entered into a written agreement with the Distributor (or Manager) allowing this waiver;
- The redemption is to return excess contributions made to a retirement plan; or
- The redemption is to return contributions made due to a mistake of fact.

The SAI contains further details about the CDSC and the conditions for waiving the CDSC.

Information regarding CDSC waivers for A and C Class shares is available, free of charge, on the Funds' website. Please visit www.americanbeaconfunds.com. You may also call (800) 658-5811 or consult with your financial advisor.

Sales Charge Waivers and Reductions Available Through Certain Financial Intermediaries

Different intermediaries may impose different sales charges (including potential reductions in or waivers of sales charges). Such intermediary-specific sales charge variations are described in Appendix A to this Prospectus, entitled "Intermediary Sales Charge Discounts and Waivers and Other Information." Appendix A is incorporated herein by reference (is legally a part of this Prospectus).

In all instances, it is the purchaser's responsibility to notify the Funds or the purchaser's financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. For waivers and discounts not available through a particular intermediary, shareholders may have to purchase Fund shares through another intermediary to receive these waivers or discounts. This information is available, free of charge, on the Funds' website. Please visit www.americanbeaconfunds.com. You may also call (800) 658-5811 or consult with your financial advisor.

Conversion of C Class Shares to A Class Shares

C Class shares convert automatically into A Class shares ten (10) years after the initial date of purchase or, if you acquired your C Class shares through an exchange or conversion from another share class, ten (10) years after the date you acquired your C Class shares. When C Class shares that you acquired through a purchase or exchange convert, any other C Class shares that you purchased with reinvested dividends and distributions also will convert into A Class shares on a pro rata basis. A shorter holding period may also apply depending on your intermediary. Please see "Appendix A—Intermediary Sales Charge Discounts and Waivers and Other Information" in this Prospectus.

Purchase and Redemption of Shares

Eligibility

The A Class, C Class, Y Class, Advisor Class, R5 Class, and Investor Class shares offered in this Prospectus are available to eligible investors who meet the minimum initial investment. R6 Class shares are available only to participating 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit-sharing and money purchase pension plans, defined benefit plans, non-qualified deferred compensation plans, health savings plans, health savings accounts and funded welfare benefit plans (e.g., Voluntary Employees' Beneficiary Association (VEBA) and Other Post-Employment Benefits (OPEB) plans). R6 Class shares generally are available only to retirement plans where plan level or omnibus accounts are held on the books of a Fund; however, a Fund reserves the right in its sole discretion to waive this requirement. Generally, R6 Class shares are not available to retail non-retirement accounts, Traditional and Roth IRAs, Coverdell

Education Savings Accounts, SEPs, SARSEPs, SIMPLE IRAs and individual 403(b) plans. American Beacon Funds do not accept accounts registered to foreign individuals or entities, including foreign correspondent accounts. The Funds do not conduct operations and are not offered for purchase outside of the United States.

Subject to your eligibility, as described below, you may invest in a Fund directly or through intermediary organizations, such as broker-dealers, insurance companies, plan sponsors, third party administrators, and retirement plans. As described below, the Manager may allow certain individuals to invest directly in a Fund in its sole discretion.

If you invest directly with a Fund, the fees and policies with respect to the Fund's shares that are outlined in this Prospectus are set by the Fund. The Manager and the Funds are not responsible for determining the suitability of the Funds or a share class for any investor.

Because in most cases it is more advantageous for investors using an intermediary to purchase A Class shares than C Class shares for amounts of \$1,000,000 or more, a Fund will decline a request to purchase C Class shares for \$1,000,000 or more.

If you invest through a financial intermediary, most of the information you will need for managing your investment will come from your financial intermediary. This includes information on how to buy, sell and exchange shares of a Fund. If you establish an account through a financial intermediary, the investment minimums described in this section may not apply. Investors investing in a Fund through a financial intermediary should consult with their financial intermediary to ensure they obtain any proper "breakpoint" discount and all information regarding the differences between available share classes. Your broker-dealer or financial intermediary also may charge fees that are in addition to those described in this Prospectus. Please contact your intermediary for information regarding investment minimums, how to purchase and redeem shares and applicable fees.

Minimum Investment Amount by Share Class

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$ 250
A, Investor	\$2,500	\$50	\$ 250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

The Manager may allow a reasonable period of time after opening an account for a Y Class or R5 Class investor to meet the initial investment requirement. In addition, for investors such as trust companies and financial advisors who make investments for a group of clients, the minimum initial investment can be met through aggregated purchase orders for more than one client.

R6 Class shares can only be purchased through a participating retirement plan. R6 Class shares are available only to participating 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit-sharing and money purchase pension plans, defined benefit plans, non-qualified deferred compensation plans, health savings plans, health savings accounts and funded welfare benefit plans (e.g., Voluntary Employees' Beneficiary Association (VEBA) and Other Post-Employment Benefits (OPEB) plans). R6 Class shares generally are available only to retirement plans where plan level or omnibus accounts are held on the books of a Fund; however, a Fund reserves the right in its sole discretion to waive this requirement. Generally, R6 Class shares are not available to retail non-retirement accounts, Traditional and Roth IRAs, Coverdell Education Savings Accounts, SEPs, SARSEPs, SIMPLE IRAs and individual 403(b) plans.

Opening an Account

You may open an account through a retirement plan, an investment professional, a broker-dealer, or other financial intermediary. Please contact your financial intermediary for more information on how to open an account. Shares you purchase through your broker-dealer will normally be held in your account with that firm.

Direct mutual fund accounts are not available to new shareholders. Existing direct mutual fund account shareholders may continue to buy or sell shares through their existing direct mutual fund accounts, but will not be able to open new direct mutual fund accounts. The Manager may allow the following individuals or entities to open new direct mutual fund accounts in its sole discretion: (i) corporate accounts, (ii) employees of the Manager, or its direct parent company, Resolute Investment Managers, Inc., and its affiliates and subsidiaries, (iii) employees of a sub-advisor to a fund in the American Beacon Funds Complex, (iv) members of the Board, (v) employees of Kelso & Company, L.P. or Estancia Capital Management, LLC, the Manager's indirect parent companies, and (vi) members of the Manager's Board of Directors.

To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. When you open an account, you will be asked for information that will allow a Fund or your financial institution to identify you. Non-public corporations and other entities may be required to provide articles of incorporation, trust or partnership agreements, and taxpayer identification numbers on the account or other documentation. A Fund is required by law to reject your new account application if the required identifying information is not provided.

A Fund reserves the right to liquidate a shareholder's account at the current day's NAV per share and remit proceeds via check if a Fund or a financial institution is unable to verify the shareholder's identity within three days of account opening.

Purchase Policies

Shares of the Funds are offered and purchase orders are typically accepted until 4:00 p.m. Eastern Time or the close of the NYSE (whichever comes first) on each day on which the NYSE is open for business. If a purchase order is received by a Fund in good order prior to the Fund's deadline, the purchase price will be the NAV per share next determined on that day, plus applicable sales charges. A purchase order is considered to be received in good order when it complies with all of a Fund's applicable policies. If a purchase order is received in good order after the applicable deadline, the purchase price will be the NAV per share of the following day that a Fund is open for business, plus applicable sales charges. Shares of a Fund will only be issued against full payment, as described more fully in this Prospectus and SAI.

The Funds have authorized certain third party financial intermediaries, such as broker-dealers, insurance companies, third party administrators and trust companies, to receive purchase and redemption orders on behalf of the Funds and to designate other intermediaries to receive purchase and redemption orders on behalf of the Funds. A Fund is deemed to have received such orders when they are received by the financial intermediaries or their designees. Thus, an order to purchase or sell Fund shares will be priced at the Fund's next determined NAV per share after receipt by the financial intermediary or its designee.

It is the responsibility of your broker-dealer or financial intermediary to transmit orders that will be received by the Funds in proper form and in a timely manner. The Funds are not responsible for the failure of a broker-dealer or financial intermediary to transmit a purchase order in proper form and in a timely manner.

Fund shares may be purchased only in U.S. States and Territories in which they can be legally sold. Prospective investors should inquire as to whether shares of a Fund are available for offer and sale in their jurisdiction. Each Fund reserves the right to refuse purchases if, in the judgment of the Funds, the transaction would adversely affect the Funds and its shareholders. Each Fund has the right to reject any purchase order or cease offering any or all classes of shares at any time. Each Fund reserves the right to require payment by wire. Checks to purchase shares are accepted subject to collection at full face value in U.S. funds and must be drawn in U.S. dollars on a U.S. bank. The Funds will not accept "starter" checks, credit card checks, money orders, cashier's checks, or third party checks.

If your payment is not received and collected, your purchase may be canceled and you could be liable for any losses or fees the Funds or the Manager has incurred. Under applicable anti-money laundering regulations and other federal regulations, purchase orders may be suspended, restricted or canceled and the monies may be withheld.

Please refer to the section titled "Frequent Trading and Market Timing" for information on the Funds' policies regarding frequent purchases, redemptions, and exchanges.

Redemption Policies

If you purchased shares of a Fund through your financial intermediary, please contact your broker-dealer or other financial intermediary to sell shares of a Fund. A sale or redemption of your shares is generally taxable to you. See "Distributions and Taxes - Taxes."

The redemption price will be the NAV per share next determined after a redemption request is received in good order, minus any applicable CDSC. In order to receive the redemption price calculated on a particular business day, redemption requests must be received in good order by 4:00 p.m. Eastern Time or by the close of the NYSE (whichever comes first).

Wire proceeds from redemption requests received in good order by 4:00 p.m. Eastern Time or by the close of the NYSE (whichever comes first) generally are transmitted to shareholders on the next day the Funds are open for business. In any event, proceeds from a redemption request will typically be transmitted to a shareholder by no later than seven days after the receipt of a redemption request in good order. Delivery of proceeds from shares purchased by check, ACH, or pre-authorized automatic investment may be delayed until the funds have cleared, which may take up to ten days.

You may, within 90 days of redemption, reinvest all or part of the proceeds of your redemption of A or C Class shares of a Fund, without incurring any applicable additional sales charge, in the same class of another American Beacon Fund, by sending a written request and a check to your financial intermediary or directly to the Funds. Reinvestment must be into the same account from which you redeemed the shares or received the distribution. Proceeds from a redemption and all dividend payments and other distributions will be reinvested in the same share class from which the original redemption or distribution was made. Reinvestment will be at the NAV per share next calculated after the Funds receive your request. You must notify the Funds and your financial intermediary at the time of investment if you decide to exercise this privilege.

The Funds reserve the right to suspend redemptions or postpone the date of payment for more than seven days (i) when the NYSE is closed (other than for customary weekend and holiday closings); (ii) when trading on the NYSE is restricted; (iii) when the SEC determines that an emergency exists so that disposal of a Fund's investments or determination of its NAV per share is not reasonably practicable; or (iv) by order of the SEC for protection of the Funds' shareholders.

Although the Funds intend to redeem shares by paying out available cash, cash generated by selling portfolio holdings (including cash equivalent portfolio holdings), or funds borrowed through the interfund credit facility, or from a bank line of credit, in stressed market conditions and other appropriate circumstances, the Funds reserve the right to pay the redemption price in whole or in part by borrowing funds from external parties or distributing securities or other assets held by the Funds. To the extent that a Fund redeems its shares in this manner, the shareholder assumes the risk of a subsequent change in the market value of those securities, the cost of liquidating the securities and the possibility of a lack of a liquid market for those securities.

Please refer to the section titled "Frequent Trading and Market Timing" for information on the Funds' policies regarding frequent purchases, redemptions, and exchanges.

Exchange Policies

If you purchased shares of a Fund through your financial intermediary, please contact your financial intermediary to determine if you may take advantage of the exchange policies described in this section and for its policies to effect an exchange.

Shares of any class of a Fund may be exchanged for shares of the same class of another American Beacon Fund under certain limited circumstances. Since an exchange involves a concurrent redemption and purchase, please review the sections titled "Redemption Policies" and "Purchase Policies" for additional limitations that apply to redemptions and purchases. There is no front-end sales charge on exchanges between A Class shares of a Fund for A Class shares of another fund. Shares otherwise subject to a CDSC will not be charged a CDSC in an exchange to shares of another fund that has a CDSC however, shares exchanged between funds that impose a CDSC will be charged a CDSC if redeemed within 12 months to 18 months, as applicable, of the purchase of the initial shares.

Before exchanging shares, shareholders should consider how the exchange may affect any CDSC that might be imposed on the subsequent redemption of remaining shares.

If shares of a Fund were purchased by check, a shareholder must have owned those shares for at least ten days prior to exchanging out of the Fund and into another fund.

The eligibility and minimum investment requirement must be met for the class into which the shareholder is exchanging. Fund shares may be acquired through exchange only in U.S. states and Territories in which they can be legally sold. Each Fund reserves the right to charge a fee and to modify or terminate the exchange privilege at any time. Each Fund reserves the right to refuse exchange requests if, in the judgment of the Fund, the transaction would adversely affect the Fund and its shareholders. Please refer to the section titled "Frequent Trading and Market Timing" for information on the Funds' policies regarding frequent purchases, redemptions, and exchanges.

Shares of any class of a Fund may be converted to shares of another class of the same Fund under certain limited circumstances. For federal income tax purposes, the conversion of shares of one share class of a Fund to shares of a different share class of the same Fund will not result in the realization of a capital gain or loss. However, an exchange of shares of one Fund for shares of a different American Beacon Fund generally is considered a redemption and a concurrent purchase, respectively, and thus may result in the realization of a capital gain or loss for those purposes.

How to Purchase, Redeem or Exchange Shares

If your account is through a broker-dealer or other financial intermediary, please contact them directly to purchase, redeem or exchange shares of a Fund. Your broker-dealer or financial intermediary can help you open a new account, review your financial needs and formulate long-term investment goals and objectives. Your broker dealer or financial intermediary will transmit your request to a Fund and may charge you a fee for this service. A Fund will not accept a purchase order of \$1,000,000 or more for C Class shares if the purchase is known to be on behalf of a single investor (not including dealer "street name" or omnibus accounts). Dealers, other financial intermediaries or fiduciaries purchasing shares for their customers are responsible for determining the suitability of a particular share class for an investor. You should include the following information with any order:

- Your name/account registration
- Your account number
- Type of transaction requested
- Fund name(s) and fund numbers
- Dollar amount or number of shares

Transactions for direct shareholders are conducted through:

Internet	www.americanbeaconfunds.com	
Phone	To reach an American Beacon representative call 1-800-658-5811, option 1 Through the Automated Voice Response Service call 1-800-658-5811, option 2 (Investor Class Only)	
Mail	American Beacon Funds PO Box 219643 Kansas City, MO 64121-9643	Overnight Delivery: American Beacon Funds c/o DST Asset Manager Solutions, Inc. 330 West 9th Street Kansas City, MO 64105

Purchases by Wire:

Send a bank wire to State Street Bank and Trust Co. with these instructions:

- ABA# 0110-0002-8; AC-9905-342-3,
- Attn: American Beacon Funds
- the fund name and fund number, and
- shareholder account number and registration.

Share Class	New Account	Existing Account	
	Minimum Initial Investment Amount	Purchase/Redemption Minimum by Check/ACH/Exchange	Purchase/Redemption Minimum by Wire
C	\$1,000	\$50	\$ 250
A, Investor	\$2,500	\$50	\$ 250
Advisor	\$2,500	\$50	None
Y	\$100,000	\$50	None
R5	\$250,000	\$50	None
R6	None	\$50	None

Redemption proceeds will be mailed to the account of record or transmitted to commercial bank designated on the account application form.

Supporting documents may be required for redemptions by estates, trusts, guardianships, custodians, corporations, and welfare, pension and profit sharing plans. Redemption requests must also include authorized signature(s) of all persons required to sign for the account. Call 1-800-658-5811 for instructions.

To protect the Funds and your account from fraud, a Medallion signature guarantee is required for redemption orders:

- with a request to send the proceeds to an address or commercial bank account other than the address or commercial bank account designated on the account application, or
- for an account whose address has changed within the last 30 days if proceeds are sent by check.

The Funds only accept Medallion signature guarantees, which may be obtained at participating banks, broker-dealers and credit unions. A notary public cannot provide a signature guarantee. Call 1-800-658-5811 for instructions and further assistance.

Payments to Financial Intermediaries

For certain share classes, the Funds and/or the Manager (and/or the Manager's affiliates), at their own expense, may pay compensation to financial intermediaries for shareholder-related services and, if applicable, distribution-related services, including administrative, sub-transfer agency type, recordkeeping and shareholder communication services. For example, compensation may be paid to make Fund shares available to sales representatives and/or customers of a fund supermarket platform or similar program sponsor or for services provided in connection with such fund supermarket platforms and programs.

The amount of compensation paid to different financial intermediaries may differ. The compensation paid to a financial intermediary may be based on a variety of factors, including average assets under management in accounts distributed and/or serviced by the financial intermediary, gross sales by the financial intermediary and/or the number of accounts serviced by the financial intermediary that invest in the Funds. To the extent that the Funds pay any such compensation, it is designed to compensate the financial intermediary for providing services that would otherwise be provided by the Manager, the Funds or their transfer agent. To the extent the Manager or its affiliates pay such compensation, it would likely include amounts from that party's own resources and constitute what is sometimes referred to as "revenue sharing."

Compensation received by a financial intermediary from a Fund, the Manager or an affiliate of the Manager may include payments for marketing and/or training expenses incurred by the financial intermediary, including expenses incurred by the financial intermediary in educating (itself and) its salespersons with respect to Fund shares. For example, such compensation may include reimbursements for expenses incurred in attending educational seminars regarding the Funds, including travel and lodging expenses. It may also cover costs incurred by financial intermediaries in connection with their efforts to sell Fund shares, including costs incurred compensating (registered) sales representatives and preparing, printing and distributing sales literature.

Any compensation received by a financial intermediary, whether from the Funds or the Manager and/or its affiliates, and the prospect of receiving it may provide the financial intermediary with an incentive to recommend the shares of the Funds, or a certain class of shares of the Funds, over other potential investments. Similarly, the compensation may cause financial intermediaries to elevate the prominence of the Funds within its organization by, for example, placing it on a list of preferred funds. You can contact your financial intermediary for details about any such payments it receives from the Manager, its affiliates and/or the Funds, or any other fees, expenses, or commissions your financial intermediary may charge you in addition to those disclosed in this Prospectus.

The Funds will not make any of the payments described in this section with respect to their R6 Class shares.

Additional Payments with Respect to Y Class Shares

Y Class shares may also be available on brokerage platforms of firms that have agreements with a Fund's distributor to offer such shares solely when acting as an agent for the investor. An investor transacting in Y Class shares in these programs may be required to pay a commission and/or other forms of compensation to the broker. Shares of a Fund are available in other share classes that have different fees and expenses.

General Policies

If a shareholder's account balance falls below the following minimum levels, the shareholder may be asked to increase the balance.

Share Class	Account Balance
A	\$2,500
C	\$1,000
Y	\$25,000
R6	\$0
Advisor	\$2,500
R5	\$75,000
Investor	\$2,500

If the account balance remains below the applicable minimum account balance after 45 days, each Fund reserves the right, upon 30 days' advance written notice, to close the account and send the proceeds to the shareholder. Each Fund reserves the authority to modify minimum account balances in its discretion.

A traditional IRA or Roth IRA invested directly will be charged an annual maintenance fee of \$15.00 by the Custodian.

An ACH privilege allows electronic transfer from a checking or savings account into a direct account with the Funds. The ACH privilege may not be used for initial purchases but may be used for subsequent purchases and redemptions. Purchases of Fund shares by ACH are subject to a limit of \$2,000 per Fund per day. The Funds reserve the right to waive such limit in their sole discretion.

ACH privileges must be requested on the account application, or may be established on an existing account by submitting a request in writing to the Funds. Validated signatures from all shareholders of record for the account are required on the written request. See details below regarding signature validations. Such privileges apply unless and until the Funds receive written instructions from all shareholders of record canceling such privileges. Changes of bank account information must also be made in writing with validated signatures. The Funds reserve the right to amend, suspend or discontinue the ACH privilege at any time without prior notice. The ACH privilege does not apply to shares held in broker "street name" accounts or in other omnibus accounts.

When a signature validation is called for, a Medallion signature guarantee or SVP stamp may be required. A Medallion signature guarantee is intended to provide signature validation for transactions considered financial in nature, and an SVP stamp is intended to provide signature validation for transactions non-financial in nature. A Medallion signature guarantee or SVP stamp may be obtained from a domestic bank or trust company, broker, dealer, clearing agency, savings association or other financial institution which is participating in a Medallion program or SVP recognized by the Securities Transfer Association. The Funds may reject a Medallion signature guarantee or SVP stamp. Shareholders should call 800-658-5811 for additional details regarding a Fund's signature guarantee requirements.

The following policies apply to instructions you may provide to the Funds by telephone:

- The Funds, their officers, trustees, employees, or agents are not responsible for the authenticity of instructions provided by telephone, nor for any loss, liability, cost or expense incurred for acting on them.
- The Funds employ procedures reasonably designed to confirm that instructions communicated by telephone are genuine.
- Due to the volume of calls or other unusual circumstances, telephone redemptions may be difficult to implement during certain time periods.

The Funds reserve the right to:

- liquidate a shareholder's account at the current day's NAV per share and remit proceeds via check if the Funds or a financial institution is unable to verify the shareholder's identity within three business days of account opening,
- seek reimbursement from the shareholder for any related loss incurred by a Fund if payment for the purchase of Fund shares by check does not clear the shareholder's bank, and
- reject a purchase order and seek reimbursement from the shareholder for any related loss incurred by a Fund if funds are not received by the applicable wire deadline.

A shareholder will not be required to pay a CDSC when the registration for A Class or C Class shares is transferred to the name of another person or entity. The transfer may occur by absolute assignment, gift or bequest, as long as it does not involve, directly or indirectly, a public sale of the shares. When A Class or C Class shares are transferred, any applicable CDSC will continue to apply to the transferred shares and will be calculated as if the transferee had acquired the shares in the same manner and at the same time as the transferring shareholder.

Escheatment

Please be advised that certain state escheatment laws may require a Fund to turn over your mutual fund account to the state listed in your account registration as abandoned property unless you contact the Funds. Many states have added "inactivity" or the absence of **customer-initiated contact** as a component of their rules and guidelines for the escheatment of unclaimed property. These states consider property to be abandoned when there is no **shareholder-initiated activity** on an account for at least three (3) to five (5) years.

Depending on the laws in your jurisdiction, customer-initiated contact might be achieved by one of the following methods:

- Send a letter to American Beacon Funds via the United States Post Office,
- Speak to a Customer Service Representative on the phone after you go through a security verification process. For residents of certain states, contact cannot be made by phone but must be in writing or through the Funds' secure web application.
- Access your account through the Funds' secure web application,
- Cashing checks that are received and are made payable to the owner of the account.

The Funds, the Manager, and the Transfer Agent will not be liable to shareholders or their representatives for good faith compliance with escheatment laws. To learn more about the escheatment rules for your particular state, please contact your attorney or State Treasurer's and/or Controller's Offices. Unless you hold your shares directly with a Fund, you should contact your broker-dealer, retirement plan, or other third party, intermediary regarding applicable state escheatment laws.

Shareholders that reside in the state of Texas may designate a representative to receive escheatment notifications by completing and submitting a designation form that can be found on the website of the Texas Comptroller. While the designated representative does not have any rights to claim or access the shareholder's account or assets, the escheatment period will cease if the representative communicates knowledge of the shareholder's location and confirms that the shareholder has not abandoned his or her property. If a shareholder designates a representative to receive escheatment notifications, any escheatment notices will be delivered both to the shareholder and the designated representative. The completed designation form may be mailed to the below address.

Frequent Trading and Market Timing

Frequent trading by Fund shareholders poses risks to other shareholders in that Fund, including: (i) the dilution of a Fund's NAV per share, (ii) an increase in a Fund's expenses, and (iii) interference with the portfolio manager's ability to execute efficient investment strategies. Frequent, short-term trading of Fund shares in an attempt to profit from day-to-day fluctuations in a Fund's NAV per share is known as market timing.

The Funds' Board has adopted policies and procedures intended to discourage frequent trading and market timing.

The American Beacon International Equity Fund is particularly at risk for market timing activity. Please see "Market Timing Risk" under the description of each of these Funds.

Shareholders may transact one "round trip" in a Fund in any rolling 90-day period. A "round trip" is defined as two transactions, each in an opposite direction. A round trip may involve either (i) a purchase or exchange into a Fund followed by a redemption or exchange out of a Fund or (ii) a redemption or exchange out of a Fund followed by a purchase or exchange into a Fund. If the Manager detects that a shareholder has exceeded one round trip in a Fund in any rolling 90-day period, the Manager, without prior notice to the shareholder, may prohibit the shareholder from making further purchases of that Fund. In general, each Fund reserves the right to reject any purchase order, terminate the exchange privilege, or liquidate the account of any shareholder that the Manager determines has engaged in frequent trading or market timing, regardless of whether the shareholder's activity violates any policy stated in this Prospectus. Additionally, the Manager may in its discretion, reject any purchase or exchange into a Fund from any individual investor, institutional investor, or group whose trading activity could disrupt the management of the Fund or dilute the value of the Fund's shares, including collective trading (e.g., following the advice of an investment newsletter). Such investors may be barred from future purchases of American Beacon Funds.

The round-trip limit does not apply to the following transaction types:

- shares acquired through the reinvestment of dividends and other distributions;
- systematic purchases and redemptions;
- shares redeemed to return excess IRA contributions; or
- certain transactions made within a retirement or employee benefit plan, such as payroll contributions, minimum required distributions, loans, and hardship withdrawals, or other transactions that are initiated by a party other than the plan participant.

Financial intermediaries that offer Fund shares, such as broker-dealers, third party administrators of retirement plans, and trust companies, will be asked to enforce the Funds' policies to discourage frequent trading and market timing by investors. However, certain intermediaries that offer Fund shares have informed the Funds that they are currently unable to enforce a Fund's policies on an automated basis. In those instances, the Manager will monitor trading activity of the intermediary in an attempt to detect patterns of activity that indicate frequent trading or market timing by underlying investors. In some cases, intermediaries that offer Fund shares have their own policies to deter frequent trading and market timing that differ from a Fund's policies. A Fund may defer to an intermediary's policies. For more information, please contact the financial intermediary through which you invest in a Fund.

The Manager monitors trading activity in the Funds to attempt to identify shareholders engaged in frequent trading or market timing. The Manager may exclude transactions below a certain dollar amount from monitoring and may change that dollar amount from time to time. The ability of the Manager to detect frequent trading and market timing activity by investors who own shares through an intermediary is dependent upon the intermediary's provision of information necessary to identify transactions by the underlying investors. The Funds have entered into agreements with the intermediaries that service the Funds' investors, pursuant to which the intermediaries agree to provide information on investor transactions to the Funds and to act on the Funds' instructions to restrict transactions by investors who the Manager has identified as having violated the Funds' policies and procedures to deter frequent trading and market timing.

Wrap programs offered by certain intermediaries may be designated "Qualified Wrap Programs" by a Fund based on specific criteria established by the Funds and a certification by the intermediary that the criteria have been met. A Qualified Wrap Program is a wrap program whose sponsoring intermediary: (i) certifies that it has investment discretion over \$50 million or more in client assets invested in mutual funds at the time of the certification, (ii) certifies that it directs transactions in accounts participating in the wrap program(s) in concert with changes in a model portfolio; (iii) provides the Manager a description of the wrap program(s); and (iv) managed by an intermediary that agrees to provide the Manager sufficient information to identify individual accounts in the intermediary's wrap program(s). For purposes of applying the round-trip limit, transactions initiated by clients invested in a Qualified Wrap Program will not be matched to transactions initiated by the intermediary sponsoring the Qualified Wrap Program. For example, a client's purchase of a Fund followed within 90 days by the intermediary's redemption of the same Fund would not be considered a round trip. However, transactions initiated by a Qualified Wrap Program client are subject to the round-trip limit and will be matched to determine if the client has exceeded the round-trip limit. In addition, the Manager will monitor transactions initiated by Qualified Wrap Program intermediaries to determine whether any intermediary has engaged in frequent trading or market timing. If the Manager determines that an intermediary has engaged in activity that is harmful to a Fund, the Manager will revoke the intermediary's Qualified Wrap Program status. Upon termination of status as a Qualified Wrap Program, all account transactions will be matched for purposes of testing compliance with the Fund's frequent trading and market timing policies, including any applicable redemption fees.

Each Fund reserves the right to modify the frequent trading and market timing policies and procedures and grant or eliminate waivers to such policies and procedures at any time without advance notice to shareholders. There can be no assurance that the Funds' policies and procedures to deter frequent trading and market timing will have the intended effect or that the Manager will be able to detect frequent trading and market timing.

Distributions and Taxes

Each Fund distributes most or all of its net earnings and realized gains, if any, each taxable year in the form of dividends from net investment income ("dividends"), distributions of realized net capital gains ("capital gains distributions") and net gains from foreign currency transactions (sometimes referred to below collectively as "other distributions") (and dividends, capital gains distributions, and other distributions are sometimes referred to below collectively as "distributions"). Different tax treatment applies to different types of distributions (as described in the table below).

The Funds do not have a fixed dividend rate nor do they guarantee that they will pay any distributions in any particular period. Distributions paid by a Fund with respect to each class of shares are calculated in the same manner and at the same time, but dividends on different classes of shares may be different as a result of the services and/or fees applicable to certain classes of shares. Distributions are paid as follows:

American Beacon Fund	Dividends Paid	Other Distributions Paid
Balanced	Quarterly	Annually
Garcia Hamilton Quality Bond	Monthly	Annually
International Equity	Annually	Annually
Large Cap Value	Annually	Annually
Mid-Cap Value	Annually	Annually
Small Cap Value	Annually	Annually

Options for Receiving Dividends and Other Distributions

When you open your Fund account, you can specify on your application how you want to receive distributions. To change that option, you must notify the transfer agent. Unless you instruct otherwise in your account application, distributions payable to you by a Fund will be reinvested in additional shares of the distributing class of that Fund. There are four payment options available:

- **Reinvest All Distributions.** You can elect to reinvest all distributions by a Fund in additional shares of the distributing class of that Fund.
- **Reinvest Only Some Distributions.** You can elect to reinvest some types of distributions by a Fund in additional shares of the distributing class of that Fund while receiving the other types of distributions by that Fund by check or having them sent directly to your bank account by ACH ("in cash").
- **Receive All Distributions in Cash.** You can elect to receive all distributions in cash.
- **Reinvest Your Distributions in shares of another American Beacon Fund.** You can reinvest all of your distributions by a Fund on a particular class of shares in shares of the same class of another American Beacon Fund that is available for exchanges. You must have an existing account in the same share class of the selected fund.

Distributions of Fund income are generally taxable to you regardless of the manner in which received or reinvested.

If you invest directly with a Fund, any election to receive distributions payable by check will only apply to distributions totaling \$10.00 or more. Any distribution by a Fund totaling less than \$10.00 will be reinvested in shares of the distributing class of that Fund and will not be paid to you by check.

If you elect to receive a distribution by check and the U.S. Postal Service cannot deliver your check, or if your check remains uncashed for at least six months, a Fund reserves the right to reinvest the amount of your check, and to reinvest all subsequent distributions, in shares of the distributing class of that Fund at the NAV per share on the day of the reinvestment. Interest will not accrue on amounts represented by uncashed distribution or redemption checks.

Shareholders investing in a Fund through a financial intermediary should discuss their options for receiving distributions with the intermediary.

Taxes

Fund distributions are taxable to shareholders other than tax-qualified retirement plans and accounts and other tax-exempt investors. However, the portion of a Fund's dividends derived from its investments in U.S. Government obligations, if any, is generally exempt from state and local income taxes. Fund dividends, except those that are "qualified dividend income" (as described below), are subject to federal income tax at the rates for ordinary income contained in the Internal Revenue Code. The following table outlines the typical status of transactions in taxable accounts:

Type of Transaction	Federal Tax Status
Dividends from net investment income*	Ordinary income**
Distributions of the excess of net short-term capital gain over net long-term capital loss*	Ordinary income
Distributions of net gains from certain foreign currency transactions*	Ordinary income

Type of Transaction	Federal Tax Status
Distributions of the excess of net long-term capital gain over net short-term capital loss ("net capital gain")*	Long-term capital gains
Redemptions or exchanges of shares owned for more than one year	Long-term capital gains or losses
Redemptions or exchanges of shares owned for one year or less	Net gains are taxed at the same rate as ordinary income; net losses are subject to special rules

* Whether reinvested or taken in cash.

** Except for dividends that are attributable to "qualified dividend income," if any.

To the extent distributions are attributable to net capital gain that a Fund recognizes, they are subject to a 15% maximum federal income tax rate for individual and certain other non-corporate shareholders (each, an "individual") (20% for individuals with taxable income exceeding certain thresholds, which are indexed for inflation annually), regardless of how long the shareholder held his or her Fund shares.

A portion of the dividends a Fund pays to individuals may be QDI and thus eligible for the preferential rates mentioned above that apply to net capital gain. QDI is the aggregate of dividends a Fund receives on shares of most domestic corporations (excluding most distributions from REITs) and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions. To be eligible for those rates, a shareholder must meet similar restrictions with respect to his or her Fund shares.

A portion of the dividends a Fund pays may also be eligible for the DRD allowed to corporations, subject to similar holding period and other restrictions, but the eligible portion may not exceed the aggregate dividends a Fund receives from domestic corporations only.

The American Beacon Garcia Hamilton Quality Bond Fund does not expect a substantial part of its dividends to qualify as QDI or be eligible for the DRD.

A shareholder may realize a taxable gain or loss when redeeming or exchanging shares. That gain or loss is treated as a short-term or long-term capital gain or loss, depending on how long the redeemed or exchanged shares were held. Any capital gain an individual shareholder recognizes on a redemption or exchange of Fund shares that have been held for more than one year will qualify for the 15% and 20% tax rates mentioned above.

A shareholder who wants to use an acceptable basis determination method with respect to Fund shares other than the average basis method (the Fund's default method), must elect to do so in writing, which may be electronic. The Fund, or its administrative agent, must report to the Internal Revenue Service and furnish to its shareholders the basis information for dispositions of Fund shares. See "Tax Information" in the SAI for a description of the rules regarding that election and the Fund's reporting obligation.

An individual must pay a 3.8% tax on the lesser of (1) the individual's "net investment income," which generally includes distributions a Fund pays and net gains realized on a redemption or exchange of Fund shares, or (2) the excess of the individual's "modified adjusted gross income" over a threshold amount (\$250,000 for married persons filing jointly and \$200,000 for single taxpayers). This tax is in addition to any other taxes due on that income. A similar tax applies to estates and trusts. Shareholders should consult their own tax advisers regarding the effect, if any, this tax may have on their investment in Fund shares.

Each year, each Fund's shareholders will receive tax information regarding Fund distributions and dispositions of Fund shares to assist them in preparing their income tax returns.

The foregoing is only a summary of some of the important federal income tax considerations that may affect Fund shareholders, who should consult their tax advisers regarding specific questions as to the effect of federal, state and local income taxes on an investment in a Fund.

Additional Information

The Funds' Board oversees generally the operations of the Funds. The Trust enters into contractual arrangements with various parties, including among others, the Funds' manager, sub-advisor(s), custodian, transfer agent, and accountants, who provide services to the Funds. Shareholders are not parties to any such contractual arrangements, and those contractual arrangements are not intended to create in any shareholder any right to enforce them directly against the service providers or to seek any remedy under them directly against the service providers.

This Prospectus provides information concerning the Funds that you should consider in determining whether to purchase Fund shares. Neither this Prospectus nor the SAI is intended, or should be read, to be or create an agreement or contract between the Trust or the Funds and any investor, or to create any rights in any shareholder or other person other than any rights under federal or state law that may not be waived. Nothing in this Prospectus, the SAI or the Funds' reports to shareholders is intended to provide investment advice and should not be construed as investment advice.

Distribution and Service Plans

The Funds have adopted separate Distribution Plans for their A Class, C Class, and Advisor Class shares in accordance with Rule 12b-1 under the Investment Company Act, which allows the A Class, C Class and Advisor Class shares to pay distribution and other fees for the sale of Fund shares and for other services provided to shareholders. Each Plan also authorizes the use of any fees received by the Manager in accordance with the Management Agreement, and any fees received by the sub-advisors pursuant to their Investment Advisory Agreements with the Manager, to be used for the sale and distribution of Fund shares. The Plans provide that the A Class and Advisor Class shares of the Funds will pay up to 0.25% per annum of the average daily net assets attributable to the A Class, and Advisor Class, respectively, and the C Class shares of the Funds will pay up to 1.00% per annum of the average daily net assets attributable to the C Class to the Manager (or another entity approved by the Board). Because these fees are paid out of a Fund's A Class, C Class, and Advisor Class assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. The Funds have also adopted a distribution plan under Rule 12b-1 under the Investment Company Act that applies to all share classes of the Funds (the "Fund-Level Distribution Plan"). Currently, the Board has not authorized payments under the Fund-Level Distribution Plan.

The Funds have also adopted a shareholder services plan for their A Class, C Class, Investor Class, and Advisor Class shares for certain non-distribution shareholder services provided by financial intermediaries. The shareholder services plan authorizes annual payment of up to 0.25% of the average daily net assets attributable to the A Class shares, up to 0.25% of the average daily net assets attributable to the C Class shares, up to 0.375% of the average daily net assets attributable to the Investor Class shares, and up to 0.25% of the average daily net assets attributable to the Advisor Class shares. In addition, the Funds may reimburse the Manager for certain non-distribution shareholder services provided by financial intermediaries attributable to Y Class and R5 Class shares of the Funds.

R6 Class shares will not reimburse the Manager for certain non-distribution shareholder services provided by financial intermediaries.

Portfolio Holdings

A complete list of each Fund's holdings is made available on the Funds' website on a monthly basis approximately twenty days after the end of each month and remains available for six months thereafter. A list of each Fund's ten largest holdings is made available on the Funds' website on a quarterly basis. The ten largest holdings of the Funds are generally posted to the website approximately fifteen days after the end of each calendar quarter and remain available until the next quarter. To access the holdings information, go to www.americanbeaconfunds.com. A Fund's ten largest holdings may also be accessed by selecting a particular Fund's fact sheet.

A description of the Funds' policies and procedures regarding the disclosure of portfolio holdings is available in the Funds' SAI, which you may access on the Funds' website at www.americanbeaconfunds.com or call 1-800-658-5811 to request a free copy.

Delivery of Documents

If you are interested in electronic delivery of the Funds' summary prospectuses or shareholder reports, please go to www.americanbeaconfunds.com and click on "Quick Links" and then "Register for E-Delivery."

To reduce expenses, your financial institution may mail only one copy of the summary prospectus, Annual Report and Semi-Annual Report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please contact your financial institution. Delivery of individual copies will commence thirty days after receiving your request.

Financial Highlights

The financial highlights tables are intended to help you understand each Fund's financial performance for the past five fiscal years or, if shorter, the period of that Fund's operations, as applicable. Certain information reflects financial results for a single Fund share. The total returns in each Fund's tables represent the rate that an investor would have earned (or lost) on an investment in that Fund (assuming reinvestment of all dividends and other distributions). The information in the financial highlights has been derived from the Funds' financial statements audited by Ernst & Young LLP, Independent Registered Public Accounting Firm, whose report, along with the Funds' financial statements, is included in the Funds' Annual Report, which you may obtain upon request.

Appendix A

INTERMEDIARY SALES CHARGE DISCOUNTS AND WAIVERS AND OTHER INFORMATION

Specific intermediaries may have different policies and procedures regarding the availability of front-end sales load waivers or CDSC waivers, which are discussed below. In all instances, it is the purchaser's responsibility to notify the Fund or the purchaser's financial intermediary at the time of purchase of any relationship or other facts qualifying the purchaser for sales charge waivers or discounts. For waivers and discounts not available through a particular intermediary, shareholders will have to purchase Fund shares directly from the Fund or through another intermediary to receive any applicable waivers or discounts. Please see the section entitled "Choosing Your Share Class" for more information on sales charges and waivers available for different classes.

The information in this Appendix is part of, and incorporated into, the Fund's prospectus.

Appendix A: Baird

Effective June 15, 2020, shareholders purchasing fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the SAI.

Front-End Sales Charge Waivers on Investors A-shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing share of the same fund
- Shares purchased by employees and registers representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the Fund's Investor C shares will have their share converted at net asset value to Investor A shares of the fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Investor A and C shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Shares bought due to returns of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching age 72 as described in the Fund's prospectus
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulations

- Breakpoints as described in this prospectus
- Rights of accumulation which entitles shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Baird. Eligible fund family assets not held at Baird may be included in the rights of accumulations calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases within a fund family through Baird, over a 13-month period of time

Appendix A: Janney Montgomery Scott

Effective May 1, 2020, if you purchase fund shares through a Janney Montgomery Scott LLC ("Janney") brokerage account, you will be eligible for the following load waivers (front-end sales charge waivers and contingent deferred sales charge ("CDSC"), or back-end sales charge, waivers) and discounts, which may differ from those disclosed elsewhere in this fund's Prospectus or SAI.

Front-end sales charge* waivers on Class A shares available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., right of reinstatement).
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Shares acquired through a right of reinstatement.
- Class C shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Janney's policies and procedures.

CDSC waivers on Class A and C shares available at Janney

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's Prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and other retirement accounts due to the shareholder reaching age 70½ as described in the fund's Prospectus.
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney.

- Shares acquired through a right of reinstatement.
- Shares exchanged into the same share class of a different fund.

Front-end sales charge* discounts available at Janney: breakpoints, rights of accumulation, and/or letters of intent

- Breakpoints as described in the fund's Prospectus.
- Rights of accumulation ("ROA"), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Janney. Eligible fund family assets not held at Janney may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Janney Montgomery Scott may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

*Also referred to as an "initial sales charge."

Appendix A: Merrill Lynch

A CLASS AND C CLASS PURCHASES THROUGH MERRILL LYNCH

Shareholders purchasing Fund shares through a Merrill Lynch platform or account will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end sales charge waivers) and discounts, which may differ from those disclosed elsewhere in a Fund's prospectus or SAI.

Front-end Sales Load Waivers on A Class Shares available at Merrill Lynch

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan.
- Shares purchased by a 529 Plan (does not include 529 Plan units or 529-specific share classes or equivalents)
- Shares purchased through a Merrill Lynch affiliated investment advisory program.
- Shares exchanged due to the holdings moving from a Merrill Lynch affiliated investment advisory program to a Merrill Lynch brokerage (non-advisory) account pursuant to Merrill Lynch's policies relating to sales load discounts and waivers
- Shares purchased by third party investment advisors on behalf of their advisory clients through Merrill Lynch's platform.
- Shares of funds purchased through the Merrill Edge Self-Directed platform (if applicable).
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares exchanged from C Class (i.e. level-load) shares of the same fund pursuant to Merrill Lynch's policies relating to sales load discounts and waivers
- Employees and registered representatives of Merrill Lynch or its affiliates and their family members.
- Directors or Trustees of a Fund, and employees of a Fund's investment adviser or any of its affiliates, as described in this Prospectus.
- Eligible shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement). Automated transactions (i.e. systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill Lynch's account maintenance fees are not eligible for reinstatement

CDSC Waivers on A Class and C Class Shares available at Merrill Lynch

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code.
- Shares sold to pay Merrill Lynch fees but only if the transaction is initiated by Merrill Lynch
- Shares acquired through a right of reinstatement
- Shares held in retirement brokerage accounts, that are exchanged for a lower cost share class due to transfer to certain fee based accounts or platforms (applicable to A Class and C Class shares only)
- Shares received through an exchange due to the holdings moving from a Merrill Lynch affiliated investment advisory program to a Merrill Lynch brokerage (non-advisory) account pursuant to Merrill Lynch's policies relating to sales load discounts and waivers

Front-end load Discounts Available at Merrill Lynch: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in this prospectus.
- Rights of Accumulation (ROA) which entitle shareholders to breakpoint discounts as described in the Fund's prospectus will be automatically calculated based on the aggregated holding of fund family assets held by accounts (including 529 program holdings, where applicable) within the purchaser's household at Merrill Lynch. Eligible fund family assets not held at Merrill Lynch may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of Intent (LOI) which allow for breakpoint discounts based on anticipated purchases within a fund family, through Merrill Lynch, over a 13-month period of time (if applicable)

Appendix A: Morgan Stanley

Effective July 1, 2018, shareholders purchasing Fund shares through a Morgan Stanley Wealth Management transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from and may be more limited than those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-end Sales Charge Waivers on Class A Shares available at Morgan Stanley Wealth Management

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account
- Class C (i.e., level-load) shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program
- Shares purchased from the proceeds of redemptions within the same fund family, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge.

Appendix A: Oppenheimer & Co. Inc. ("OPCO")

Effective February 26, 2020, shareholders purchasing Fund shares through an OPCO platform or account are eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's prospectus or SAI.

Front-end Sales Load Waivers on Class A Shares available at OPCO

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by or through a 529 Plan
- Shares purchased through an OPCO affiliated investment advisory program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family)
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same amount, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Restatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of OPCO
- Employees and registered representatives of OPCO or its affiliates and their family members
- Directors or Trustees of the Fund, and employees of the Fund's investment adviser or any of its affiliates, as described in this prospectus

CDSC Waivers on A, B and C Shares available at OPCO

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching age 70½ as described in the prospectus
- Shares sold to pay OPCO fees but only if the transaction is initiated by OPCO
- Shares acquired through a right of reinstatement

Front-end load Discounts Available at OPCO: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in this prospectus.
- Rights of Accumulation (ROA) which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at OPCO. Eligible fund family assets not held at OPCO may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.

Appendix A: Raymond James

Shareholders purchasing Fund shares through a Raymond James platform or account, or through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's prospectus or SAI.

Front-end Sales Charge Waivers on Class A Shares available at Raymond James

- Shares purchased in an investment advisory program.
- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions.
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC Waivers on Classes A and C shares available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's prospectus.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the fund's prospectus.

- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.
- Shares acquired through a right of reinstatement.

Front-end load discounts available at Raymond James: breakpoints, rights of accumulation, and/or letters of intent

- Breakpoints as described in this Prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

Appendix A: Wells Fargo

Effective June 30, 2020, C Class shares will convert automatically into A Class shares on the 25th day of the month (or, if the 25th is not a business day, the next business day thereafter) following the eighth anniversary of the month on which the purchase order was accepted, provided that the Fund or the financial intermediary through which a shareholder purchased C Class shares has records verifying that the C Class shares have been held for at least eight years. The first conversion of C Class to A Class shares under this new policy would take place on July 25, 2020 for all C Class shares that were held for more than eight years as of June 30, 2020.
