Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a contractual expense limitation for direct annual Fund expenses for all classes for certain periods since inception, without which returns would have been lower. Historical performance is based on that of the Fund's longest existing share class, adjusted for sales charges since the Fund's inception date if applicable.

Share class	Expense ratios		Inception date
	Gross (%)	Net (%)	
Class A	0.74	0.70	12/29/1999
Class C	1.44	1.40	10/22/2003
Institutional Service Class	0.57	0.53	12/06/2016

The expense ratios are as shown in the most recent prospectus. The difference between gross and net operating expenses reflects contractual fee waivers and/or expense reimbursements in place through 02/28/2022. Please see the Fund's prospectus for more details.

DEFINITIONS: **Average annual total returns** are the annual compounded returns that would have produced the cumulative total return if fund performance had been constant during the given period. **P/E ratio** is the price of a stock divided by trailing 12-month earnings per share. **Sharpe ratio** measures excess return per unit of risk (standard deviation). A higher Sharpe ratio suggests better risk-adjusted performance. **Standard deviation** measures performance fluctuation, may not be indicative of future risk and is not a predictor of returns. **Alpha** represents the excess returns of a fund relative to its benchmark. A positive alpha is the added value an active manager has contributed over the benchmark returns. **Beta** measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility, while a beta of more than 1.0 indicates higher volatility relative to the benchmark. **R-Squared** measures the percentage of a fund's movements that can be explained by movements in a benchmark. **Turnover** measures how frequently investments are bought and sold within a fund during a 12 month period. The portfolio turnover rate is as of the fund's fiscal year end and is usually expressed as a percentage of the total value of a fund.

Call 800-848-0920 to request a summary prospectus and/or a prospectus, or download prospectuses at nationwide.com/mutual-funds-prospectuses.jsp. These prospectuses outline investment objectives, risks, fees, charges and expenses, and other information that you should read and consider carefully before investing.

KEY RISKS: The Fund seeks to match the performance of an index. Correlation between Fund performance and index performance may be affected by Fund expenses, index composition changes, and the timing of Fund share purchases and redemptions. The Fund is subject to the risks of investing in equity securities (including small companies). Smaller companies are usually less stable in price and less liquid than larger, more established companies. Smaller companies are more vulnerable than larger companies to adverse business and economic developments and may have more limited resources. Therefore, they generally involve greater risk. The Fund may concentrate on specific sectors, subjecting it to greater volatility than other mutual funds. The Fund's strategy may lead to above-average short-term volatility. Please refer to the most recent prospectus for more detailed information.

Russell 2000 Index: An unmanaged index that measures the performance of the small-cap segment of the U.S. equity universe. Morningstar Ratings are based solely on a proprietary mathematical formula based on measures of risk and performance that it recalculates each month. The ratings formula measures the amount of variation in a fund's or ETF's monthly performance (excluding the effects of sales charges and loads) emphasizing downward variations and rewarding consistency. Ratings are subject to change every month. The top 10% of funds and ETFs in the category receive 5 stars; the next 22.5%, 4 stars; the next 35%, 3 stars; the next 22.5%, 2 stars; and the bottom 10%, 1 star. As of November 1, 2016, Morningstar no longer provides ratings for load-adjusted share classes. Other share classes may have different performance characteristics. Ratings are based on each fund's Class A performance. Current fund performance may be higher or lower, which may change a fund's star rating. Despite high ratings, funds may have experienced negative performance during the period. The fund received 4, 4 and 3 stars (Class A), 3, 4 and 3 stars (Class C) and 4, 4 and 4 stars (Institutional Service Class) for the 3-, 5- and 10-year periods among 609, 512 and 361 Small Blend funds, respectively. © 2021 Morningstar.
