Investment Value

DF Dent Premier Growth Fund	\$74,441
S&P 500 Index	\$48,900

Past performance is not reflective of future performance. Performance shown in the Growth of \$10,000 chart represents a hypothetical investment initiated at the beginning of the time period shown. The total return of the Fund includes operating expenses that reduce returns, while the Index returns do not include expenses.

INVESTMENT STRATEGIES

The D.F. Dent Premier Growth Fund (the "Fund") invests primarily in U.S. exchange-listed equity securities, including common, preferred and convertible stock and real estate investment trusts ("REITs") that the Adviser believes possess superior long-term growth characteristics and have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may also invest in companies that do not have particularly strong earnings histories but do have other attributes that the Adviser believes may contribute to accelerated growth in the foreseeable future. The Fund primarily invests in medium and large size domestic companies. Medium size companies typically have market capitalizations in the range of \$3 billion to \$20 billion. Large companies typically have market capitalizations greater than \$20 billion.

FUND MANAGEMENT

Investing involves risks, including the possible loss of principal. The Fund invests in small and medium size companies, which carry greater risk than is customarily associated with larger, more established companies. With non-diversification risk, the Fund will typically invest in securities of fewer issuers, which exposes the Fund to greater market risk. Investing in ADRs (American Depositary Receipt) carries risks of political and financial instability, less liquidity and greater volatility, as well as risks associated with the lack of reliable accounting and financial information. The Fund is also subject to other risks, such as REIT risk with possible real estate market declines, which are detailed in the Fund's prospectus. Geopolitical and similar disruptive events, including pandemics (such as COVID-19), may destabilize various countries' economies and markets, which may experience increased volatility and reduced liquidity.

The S&P 500 Index is a broad-based, unmanaged measurement of changes in stock market conditions based on the average of 500 widely held stocks. One cannot invest directly in an index. Foreside Fund Services, LLC, Distributor.

Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other information is in the prospectus, a copy of which may be obtained by calling 866.233.3368. Please read the prospectus carefully before you invest.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Historically, some of the Fund's fees were waived or expenses reimbursed; otherwise, returns would have been lower. For the most recent month-end performance, please call 866.233.3368.

Short-term performance, in particular, is not a good indication of the Fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, Fund performance may be subject to substantial short-term changes.
