## INVESTMENT OBJECTIVE

The Fund seeks to maximize long-term capital appreciation.

## FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

<b>Shareholder Fees</b> <i>(fees paid directly from your investment)</i>	
Redemption Fee <i>(as a percentage of amount redeemed only on shares held for less than 30 days)</i>	2.00%
<b>Annual Fund Operating Expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	1.50%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.01%
Total Annual Fund Operating Expenses <sup>(1)</sup>	1.51%

(1) The total annual fund operating expenses do not correlate to the ratio of expenses to average net assets shown in the Fund's Financial Highlights, which does not include Acquired Fund Fees and Expenses. Acquired Fund Fees and Expenses represent fees and expenses incurred indirectly by the Fund as a result of its investment in shares of investment companies.

## Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. It assumes that you invest \$10,000 in the Fund for the time periods indicated, that your investment has a 5% return each year, that the Fund's operating expenses remain the same, and that you redeem all of your shares at the end of those periods. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$155	\$481	\$829	\$1,812

## PORTFOLIO TURNOVER

The Fund pays transactions costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 25.74% of the average value of the portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its objective by investing, under normal market conditions, at least 80% of its net assets in common stocks of companies with capitalizations at the time of purchase of up to \$3.0 billion, or up to the market capitalization of the largest

company included in the Russell 2000® Index measured at the end of the previous twelve months. The Russell 2000® Index measures the performance of the 2,000 smallest companies in the Russell 3000® Index (which is made up of the 3,000 largest U.S. companies based on total market capitalization). As of September 30, 2020, the market capitalization of the largest company included in the Russell 2000® Index measured at the end of the previous twelve months was \$12.9 billion.

The Adviser invests in domestic growth-oriented small companies it believes exhibit the potential for superior growth. The Adviser believes that a company's earnings growth is the primary determinant of its potential long-term return and evaluates a company's potential for above average long-term earnings and revenue growth. Several factors are considered in the Adviser's evaluation of a company, including:

- › unique product or service,
- › growing product demand,
- › dominant and growing market share,
- › management experience and capabilities, and
- › strong financial condition.

When selling equity securities for the Fund, the Adviser considers several factors, including changes in a company's fundamentals and anticipated earnings.

The Fund may invest in open-end investment companies (mutual funds) and closed-end investment companies which invest in the same types of securities in which the Fund may invest directly.

## **PRINCIPAL INVESTMENT RISKS**

You could lose money by investing in the Fund. The principal risks of investing in the Fund are as follows:

- › **Market Risk:** The market value of securities may fall, sometimes rapidly and unpredictably. These declines may be due to factors affecting a particular issuer, or the result of, among other things, political, regulatory, market, economic or social developments affecting the markets(s) generally. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the Fund and its investments and potentially increase the risks described herein.  
  
The public health crisis caused by the novel coronavirus disease known as COVID-19 has severely impacted business activity in virtually all economies, markets, and sectors and negatively impacted the value of many financial and other assets. The COVID-19 outbreak has resulted in numerous disruptions, including travel and border restrictions, quarantines, supply chain disruptions, lower consumer demand and general market uncertainty. These events could have a significant impact on the Fund's performance, as well as the performance and viability of issuers in which it invests. The extent and duration of the COVID-19 outbreak and its effects cannot be determined with certainty. Similar consequences could arise as a result of the spread of other infectious diseases.
- › **Small Cap Stock Risk:** Stocks of smaller companies involve substantial risk. Prices of small cap stocks may be subject to more abrupt or erratic market movements than stocks of larger, more established companies. Additionally, for certain small cap stocks, there may also be limited liquidity, or trading opportunities at a favorable price or time.
- › **Growth Style Investing Risk:** Different types of stocks tend to shift into and out of favor with stock market investors depending on market and economic conditions. The Fund invests in growth style stocks. The Fund's performance may at times be better or worse than the performance of funds that focus on other types of stocks or that have a broader investment style.
- › **Investment Company Risk:** To the extent that the Fund invests in shares of another investment company, it will indirectly absorb its pro rata share of such investment company's operation expenses, including investment advisory and administrative fees, which will reduce the Fund's return on such investment relative to investment alternatives that do not include such expenses. In addition, the ability of the Fund to achieve its investment objective will partially depend upon the ability of the acquired fund to achieve its investment objective.
- › **Management Risk:** A strategy used by the investment management team may not produce the intended results.
- › **Cybersecurity Risk:** Cybersecurity breaches may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund and/or its service providers to suffer data corruption or lose operational functionality.
