#### SUPPLEMENT DATED MAY 18, 2021 TO THE ANNUAL REPORT DATED DECEMBER 31, 2020

The following information supplements and should be read in conjunction with the December 31, 2020 Annual Report (the "Report") for the WesMark Small Company Growth Fund, WesMark Growth Fund, WesMark Balanced Fund, WesMark Government Bond Fund, WesMark West Virginia Municipal Bond Fund, and WesMark Tactical Opportunity Fund (each a "Fund" and collectively, the "Funds"), each a series of WesMark Funds (the "Trust").

The following section titled "Statement Regarding the Liquidity Risk Management Program" is to be inserted before "Additional Information," which begins on page 77 of the Report:

#### Statement Regarding the Liquidity Risk Management Program

The WesMark Funds have adopted a liquidity risk management program pursuant to Rule 22e-4 (the "Liquidity Rule") under the Investment Company Act of 1940, as amended (the "Program"). The Funds' Board of Trustees (the "Board") has designated WesBanco Investment Department as the administrator of the Program. The Program's principal objectives are to support the Funds' compliance with limits on investments in illiquid assets and to mitigate the risk that a Fund is unable to meet its redemption obligations on a timely basis. In this regard, the Program includes a number of elements that support the management or assessment of liquidity risk, including an assessment of factors that influence a Fund's liquidity and the periodic classification and, as determined necessary, re-classification of a Fund's investments into buckets that reflect their relative liquidity under current market conditions.

On February 16, 2021, the Funds' Board reviewed a written report from the Program administrator that addressed the operation of the Program and assessed its adequacy and effectiveness since implementation. The report described the key features of the Funds' liquidity risk management program, including the liquidity classification methodology and holdings for each of the WesMark Funds, the status of regulatory filings required by the Liquidity Rule, an update of monitoring of illiquid securities in the West Virginia Municipal Bond Fund, and a review of redemptions in-kind. The Administrator also described the methodology in considering the Funds' highly liquid investment minimum ("HLIM") and obtained Board approval of revised policy verbiage regarding the HLIM.

The Board concluded that there were no market events that materially affected the Funds' liquidity risk since implementation of the liquidity risk management program. The Board also concluded that based on the operation of the functions, as described in the Report, the Program is operating as intended and is effective in implementing the requirements of the Liquidity Rule. No material changes to the Program were recommended.

# President's Message

Dear Fellow Shareholders:

The prior year will not be forgotten, as it was marked by extremes.

Early in 2020, the U.S. economy was recovering from the China Trade war that began in 2019, and domestic economic data suggested growth was improving, led by U.S. industrial production, employment, and business sentiment surveys. However, as the COVID-19 pandemic spread around the world, economic readings began to slow. With approximately two weeks left in the first quarter, the U.S. began to institute wide-ranging lockdowns of businesses, schools, and governmental offices. The result was a 3.4% decline in U.S. gross domestic product (GDP), marking the first quarterly decline since 2009.

With the drop in GDP, the National Bureau of Economic Research (NBER) announced the end of the longest U.S. economic expansion on record. The decline in GDP accelerated in the second quarter as lockdowns continued. U.S. GDP fell by 32.8% in the second quarter, marking the sharpest decline on record. Not to be outdone, as restrictions loosened and pent-up demand was released, U.S. GDP jumped 38% in the third quarter. This recovery marked the sharpest increase in domestic activity on record. The recently released fourth quarter U.S. GDP report shows growth continued, albeit at a moderating pace. The advance reading pointed to 4.0% growth, and it brought the full-year figure to -3.5%. This marks the weakest growth the U.S. has seen since millions of soldiers returned home from World War II in 1946.

The year began with the U.S. unemployment rate at 3.5%, the lowest reading in 50 years. However, as lockdowns increased, the number of job losses accelerated. In the span of two months, the U.S. unemployment rate rose to 14.7%, likely the highest reading since the Great Depression. We say "likely," as official unemployment statistics didn't begin to be tracked until 1948. Throughout the year, employment readings continued to improve. However, as renewed COVID-19 restrictions were ramped up in November, seven consecutive months of job gains stopped. Nonfarm payrolls dropped by 140,000 in December, the first payroll decline since the massive 20.8 million drop in April. The U.S. ended the year with an unemployment rate of 6.7%. While much improved from the peak, it remains well away from the Federal Reserve's "full employment" target.

Unlike prior recessions, personal incomes rose during this recession, as stimulus in the form of tax cuts and direct payments were used to offset the steep increase in unemployment. Personal income rose 4.1% during 2020; however, incomes fell when the 0.5% stimulus was excluded. Stimulus, including enhanced unemployment benefits, direct checks, and government loan programs, supported personal spending and helped employment readings stabilize.

Since 1960, the average U.S. recession has lasted 11.5 months, according to the NBER, the academic organization largely responsible for providing unbiased economic research, including recession indicators. February will mark the one-year anniversary of the start of the recession. Given some current economic readings, it appears likely the NBER will indicate the end of this recession during 2021.

Equity market returns were also extreme during the year. The S&P 500 Index rose to an all-time high reading in February 2020, only to tumble 35.4% to the near term bottom in March. However, equity investors have settled on a "V-shaped" recovery. The S&P 500 Index gained 67.9% from the cycle lows posted on March 23 through the end of the year. As a result, the S&P 500 Index rose 18.4% for the year, with the Russell 2000 Index increasing by 19.9%. Within large cap domestic equities, returns for the year were uneven, as the growth style outpaced value-focused holdings. For the full year of 2020, the S&P 500 Growth Index rose 33.5%, while the S&P 500 Value Index posted a total return of 1.4%. The international market, while positive, posted returns that trailed domestic equities. Developed international equities, as measured by the MSCI EAFA Index, rose 7.6%, and the MSCI Emerging Markets Index gained 17.0% for the year. Equity market volatility, as measured by the VIX Index, rose sharply as equity markets tumbled. The VIX peaked at 82 in March, surpassing highs set during the 2008-09 recession. As the year progressed, the VIX dropped; however, it remained above the long-term average for most of 2020. The year ended at near record levels for all major market indexes.

In addition, the Bloomberg Barclay's Government/Credit Index rose by 8.9%, as interest rates declined for much of the year. To stabilize the economy, the Federal Reserve aggressively cut rates, reintroduced quantitative easing, and lowered forecasts. The 10-year Treasury started the year at its highest reading, 1.92%. As the pandemic worsened, rates steadily dropped, reaching an intraday low of 0.31% in March. Rates moved higher but still finished the year below 1.0%. Inflation remained low for 2020, led by the dislocation in prices due to lockdowns.

The Funds ended the year with net assets of \$992.8 million, an increase of 6.7% from the prior year end. Fund flows were negative for the full year, but were more than fully offset by positive investment performance. Your investment in and support of WesMark Funds is important to us and, as always, we thank you. Our processes are always changing, and we are striving to provide a competitive result to you, our investors. Our investment in the resources necessary to execute a successful investment plan for all of our funds is always top of mind. Your support is instrumental to this success. Should you have any questions, or need additional information about the Funds, please visit our website (www.wesmarkfunds.com) or call 1-800-864-1013.

Sincerely,

. \_ /

Scott Love, CAIA, CIMA<sup>®</sup> President, WesMark Funds

Annual Report » December 31, 2020

#### Management's Discussion of Fund Performance

### WesMark Small Company Growth Fund

December 31, 2020 (Unaudited)

The S&P 500 Index rose to an all-time high in February 2020; however, small cap indices were largely unchanged over this period. As lockdowns roiled markets, small cap indices were also impacted. From the February 20 peak, the Russell 2000 Index dropped by 41% over the next 19 trading days. However, from near-term lows, small cap indices sharply rallied and ended the year near all-time highs.

For 2020, the WesMark Small Company Growth Fund posted a gain of 36.6%, compared to the Russell 2000 Index up 19.9%, and the Lipper Small-Cap Core Fund category gain of 9.2%. Over the past five years, the WesMark Small Company Growth Fund earned an average annual total return of 12.3%, versus 9.9% for the Lipper Small-Cap Core Fund peer group. The Fund's relative performance for the period was affected by both sector allocation decisions and stock selection.

From a sector perspective, returns were positive across all sectors except for financials and utilities. In terms of highest absolute performance, the S&P 600 Health Care Index and S&P 600 Consumer Discretionary Index led with gains of 31.4% and 27.5%, respectively. Both sectors were well positioned for the impact of COVID-19 and the rise in personal spending. In addition, half of the sectors held in the fund during the year posted gains that exceeded the Russell 2000 Index.

The Fund's top five sectors accounted for nearly 68% of the fund's overall allocation for much of the year. We made several changes in the underlying holdings; however, the sector allocation remained largely unchanged for much of the year. As a result, sector selection was as important as stock selection.

Our largest sector allocation, information technology, also posted solid returns for the period. The S&P 600 Information Technology Index rose 27.3% for 2020, while the Fund's holdings gained 61.0%. For the year, our weighting in the sector was nearly double the benchmark, and half of our holdings outperformed the benchmark. The sector returns were led by Five9 Inc., Teledoc Health Inc., and Varonis Systems Inc.

At the beginning of 2020, the health care sector was our second largest allocation and was modestly overweight relative to the benchmark. Our holdings benefitted from the increased testing for COVID-19 and, later, from the resumption of surgeries and office visits. As the year wore on, we lowered our allocation in favor of more cyclical sectors. For the year, health care holdings posted a return of 25.7%, led by Vocera Communication Inc., Patterson Companies Inc., and Atricure Inc.

We began the year with a neutral weighting relative to the benchmark in the financial services sector. As the pandemic negatively impacted banks' loan portfolios and earnings outlooks, we added to our positions. When the Federal Reserve introduced stimulus programs and helped support corporate borrowing facilities, we accelerated our buying program. By the end of the second quarter, we were firmly overweight in the sector relative to the benchmark. The sector posted a negative return for the year, but our holdings posted a positive 7.4% return. Much of the return came in the fourth quarter, as the sector benchmark and our holdings posted gains that were above the overall benchmark. For the year, Trupanion Inc., First Foundation Inc., and Ameris Bancorp led.

We also maintained a sizable allocation in the industrial sector, accounting for 16.7% of the final portfolio weight. While overweight relative to the benchmark, the sector decision was not accretive to overall performance. However, security selection was more than additive to returns for the Fund. During the year, our industrial holdings rose by 31.4%, led by Quanta Services Inc., The Shyft Group Inc., and Applied Industrial Technologies Inc.

During 2020, over half of the fund's holdings outperformed their underlying sector benchmarks with nearly a third posting gains that were greater than the Russell 2000 Index. The average performance for these holdings were compelling for the year, with seven of the top 10 posting returns that exceeded the benchmark. In addition to the strong performers mentioned above, the Fund saw sizable gains in Freshpet Inc. (+141.7%), Chegg Inc. (+138.0%), and Lithia Motors (+106.6%). In general, holdings that produced losses were smaller positions and were used to offset recognized gains from other holdings. Our top 10 holdings accounted for 35.9% of the overall market value of the Fund.

# Management's Discussion of Fund Performance WesMark Growth Fund

The WesMark Growth Fund posted a total return of 26.3% for the year ended December 31, 2020, compared to the Lipper Large-Cap Core Funds category average of 16.7%. During the year, equity indices were negatively impacted by the COVID-19-led recession, but they quickly rallied as lockdown restrictions eased. From March lows, the S&P 500 Index surpassed prior all-time highs by August, or six months after the official start of the recession. This marked one of the fastest recoveries on record, ending up 18.4% for 2020. However, the recovery was uneven with growth stocks posting gains that were well above value stocks. For the full year of 2020, the S&P 500 Growth Index rose 33.5%, while the S&P 500 Value Index posted a total return of 1.4%.

For the year, the WesMark Growth Fund was well positioned with a focus in more cyclical sectors. For the period, the Fund's largest overweight allocations relative to the benchmark were information technology, health care, and industrials. The lockdowns drove businesses to discover different ways to remotely connect workers given travel restrictions, social distancing requirements, and need for increased flexibly. This drove increased spending for consumers and business, and helped earnings in the sector for the year. Increased testing, and the rush to provide a vaccine, helped some health care companies report compelling revenue growth. However, the interruption of services, including routine office visits and non-essential surgeries, caused many other health care companies to show a decline in revenues and earnings for the year. The S&P 500 Index Health Care sector return was positive for the year (+13.4%), but it did not exceed returns for the S&P 500 Index.

The WesMark Growth Fund started the year with nearly a third of its total allocation committed to information technology, well above the S&P 500 Index allocation. For the year, the S&P 500 Information Technology sector rose 43.9%. The decision to overweight the sector and security selection was accretive to the overall performance for the Fund. Nearly all holdings posted returns above the S&P 500 Index, while slightly less than half reported returns above the sector benchmark. Returns for the year were led by PayPal Holdings (+115.9%), ServiceNow Inc. (+92.2%)., and Apple Inc. (+81.6%).

Security selection was positive within the health care sector. The Fund's health care holdings were up 16.1%, exceeding that of the S&P 500 Health Care Index's return of 13.4%. Several our holdings have played an important part in COVID-19 testing and the search for a vaccine. Abbott Laboratories (+27.8%) was one of the first companies to develop a reliable test for the detection of the virus. In addition, companies that provide consumables and testing equipment, Thermo Fischer Scientific (+43.7%) and Iqvia Holdings Inc. (+16.0%), were accretive to performance for the sector.

For most of the year, the Fund maintained a weighting above the S&P 500 Index's exposure to the Consumer Discretionary sector. The sector posted a total return that was above the S&P 500 Index, while our holdings performed slightly better for the period. The results were led by Amazon.com (+75.2%), which was our largest holding for most of the year.

Our top 10 holdings accounted for 35.9% of the overall market value of the Fund. All 10 of these holdings reported total returns for the year that exceeded the S&P 500 Index. In addition to the strong performers mentioned above, the fund saw sizable gains in Blackrock Inc. (+49.7%), Broadcom Inc. (+44.3%), and Salesforce.com Inc. (+36.6%).

The Fund exited the year with strong momentum. Maintaining a price discipline in the security selection process benefited the fund, as the market grew more focused on value and valuation levels than growth at any price.

WesMark Funds

# Management's Discussion of Fund Performance

### WesMark Balanced Fund

The WesMark Balanced Fund provided a total return of 5.1% for the year ended December 31, 2020, compared to the Lipper Balanced Fund Average of 11.7%. The Fund seeks to achieve capital appreciation and income by allocating its assets primarily among fixed income and equity securities. The Fund began the year with 35% in fixed income and cash equivalents; however, as equity indexes fell, we reduced cash to build equity positions. The asset allocation at year-end was 30.6% fixed income, 69.0% common equity, and 0.4% cash equivalents.

The Fund's focus on value stocks was out of favor during the year. In 2020, the S&P 500 Growth Index rose 33.5%, while the S&P 500 Value Index posted a total return of 1.4%. In addition, the recession led by the COVID-19 lockdown resulted in several companies suspending dividends or halting increases. Toward the end of the year, a number of these companies reinstated dividends. Historically, companies have reinstated dividends as recessions have come to an end. We expect to see a similar trend as this recession concludes.

In addition, the Fund's focus on high-quality and shorter-duration fixed income holdings did not benefit as much given the changes in interest rates. The 10-year Treasury started the year at its highest reading, 1.92%. As the pandemic worsened, rates steadily dropped, reaching an intraday low of 0.31% in March. The Federal Reserve's aggressive rate reduction and quantitative easing programs kept yields low for much of the year, and the 10-year Treasury remained below 1.0% for the remainder of 2020. The Bloomberg Barclay's Government/Credit Index rose by 8.9%, while the Bloomberg Barclays US Corporate High Yield Index rose 7.1%.

The Fund continued to maintain a relatively short fixed income structure with a modified duration of 3.3 years, compared to the fixed income benchmark duration of 6.0 years. All fixed income securities held in the Fund at year-end remained investment grade as determined by a nationally recognized statistical rating organization. The largest exposure in the fixed income allocation was corporate debt, which provided a return for the Fund's fixed income sector of 4.7%, compared to the Lipper Core Bond Fund Index return of 8.6%. Taxable municipal bonds provided a return of 7.2%, compared to the benchmark's 4.4% return. The Fund's fixed income structure remained in a position to benefit from a rising interest rate environment and a steeper yield curve. The unexpected decline in interest rates as the year progressed was a negative for the Fund, as the short-maturity structure does not benefit from the associated price increase of lower rates that intermediate and long-term debt instruments do.

As highlighted above, value-focused stocks and sectors significantly underperformed the broad benchmarks for the year. Overall, our equity holdings posted returns above the value benchmark, but they were below the S&P 500 Index for the year. The portfolio's largest equity allocations were in the health care and information technology sectors. Such companies have a history of increasing their dividend on a regular basis. The health care sector provided a positive, absolute contribution to the Fund's performance, although security selection was negative to performance. For the year, Abbvie Inc. and Eli Lilly Inc., our first and second largest holdings in the health care allocation, respectively, posted returns that were above the sector benchmark. However, remaining health care holdings in the Fund underperformed. The Fund's second largest sector, Information Technology, at 21.9%, was below the weighting within the S&P 500 Index. Apple Inc., the Fund's largest holding, and Applied Materials reported returns that were above the sector benchmark.

The consumer staples sector was our largest overweight relative to the S&P 500 Index. While the sector underperformed the broad benchmark, security selection was accretive to performance. The compelling results were led by Sysco Corp. and Walmart Inc.

Of the remaining top performing names for the year, United Parcel Service (+56.4%), Target Corp. (+40.5%), and Comcast Corp. (+38.2%) all posted returns that were accretive to the Fund's overall performance for the year.

## Management's Discussion of Fund Performance WesMark Government Bond Fund

December 31, 2020 (Unaudited)

Headlines were dominated by the COVID-19 virus in 2020. The global shutdown of non-essential activities and travel resulted in the largest economic disaster since the Great Depression. Coordinated monetary and fiscal stimulus from central banks and governments worldwide have helped blunt the economic downside, and the U.S. government released a wide array of legislation to help all areas of the economy. This included checks to Americans based on income level and family size, as well as grants and forgivable loans to hard-hit industries and small businesses.

The Federal Reserve had its own response to the risk. On March 3 2020, it lowered the Federal Funds Target Rate by 0.50% and did so again by another 1.00% on March 15 2020. These changes moved the Federal Funds Rate to a range of 0.00% to 0.25%, a target that had not been seen since 2015. In addition, the Federal Reserve pledged to continue its asset purchase program of \$80 billion in U.S. Treasuries and \$40 billion of mortgage-backed securities per month until its dual mandate of full employment and a 2.00% inflation rate is attained. The Federal Reserve created new programs to provide liquidity, prop up the economy, and stimulate companies and local governments.

In March, the Federal Reserve pledged to buy as much government debt as needed to strengthen the housing market and announced plans to purchase corporate bonds, including the riskiest investment-grade credit, for the first time in history. In April, it entered the municipal bond market by purchasing bonds issued by states and cities, as local governments were seeing budgets impacted by the virus outbreak.

The 10-year U.S. Treasury ended 2020 with a yield of 0.91%, compared to 1.92% from the previous year. The 10-year yield reached a record low of 0.51% in early August. U.S. Treasury yields experienced a decline in 2020 with the largest changes occurring in late February and early March, as the U.S. saw rising COVID-19 cases. History was set on March 9, 2020 when U.S. Treasury bonds with maturities from two years to 30 years reported yields of less than 1.00%.

The U.S. Treasury yield curve finished the year lower but steeper, as short-term interest rates fell more than longer-term rates in response to the U.S. central bank's emergency rate cuts in March. The 2-year to 10-year U.S. Treasury yield spread ended 2020 at 79 basis points, the widest since 2017. The U.S. Treasury markets anticipated the greater likelihood of increased Treasury issuance following the continuation of emergency and ongoing stimulus spending.

Although the U.S. 10-year Treasury reached historic lows of 0.51% in this period, the U.S. fixed income markets did not experience the negative yields reported in Europe and Japan. Globally, negatively yielding debt increased to approximately \$18 trillion during 2020.

With most of the country shutting down in March, concerns mounted over the possible impact COVID-19 could have on the economy, leading to sharp moves in various fixed-income sectors. Credit spreads widened in March to levels not seen since the Great Recession. With the intervention of numerous government programs, liquidity concerns abated. The outperformance of most fixed-income spread products was almost exclusively driven by the decline in U.S. Treasury yields, and credit spreads compressed to pre-pandemic levels.

Taxable municipal securities had a total return of 10.5% in 2020, as they benefited from their longer duration in the declining interest rate environment. Investment grade corporates posted a total return of 9.8% in 2020 with longer-maturity bonds showing greater total return than shorter-maturity bonds. U.S. Treasuries finished 2020 with a total return of 8.2%. U.S. Government Agency Mortgage-Backed Securities faced increased volatility with the onset of COVID-19 due to its then potential impact on the housing market. U.S. Government Agency MBS credit spreads widened with the onset of the virus; however, spreads tightened dramatically from their highs, as the Federal Reserve announced its plans to resume the purchase of mortgage-backed securities. Although MBS recovered from such lows, given monetary and fiscal policy, it lagged the outperformance in corporate credit markets, posting a total return of 4.1% in the period. With the significant decline in U.S. Treasury yields, homeowner refinancing accelerated, resulting in faster prepayment speeds on mortgage-related securities.

Total mortgage securities guaranteed by Fannie Mae and Freddie Mac represented 67% of the fund as of December 31, 2020, as compared to 79% of the fund on December 31, 2019. The mortgage allocation included:

- >> Fannie Mae and Freddie Mac-guaranteed mortgage pools (MBS, 22% of allocation);
- >> Collateralized mortgage obligations (CMO, 34% of allocation);
- >> And commercial mortgage securities (CMBS, 11% of allocation).

Small Business Administration securities accounted for 5% of the portfolio; U.S. Government Agency Securities accounted for 2%; and Taxable Municipal Securities accounted for 19%. The portfolio ended 2020 with a 7% cash position. Mortgage-related securities within the fund had a total return of 3% in the period, compared to the Lipper U.S. Government Mortgage Fund Index of 5.3%. Taxable Municipal Securities had a total return of 9.0%, compared to the Lipper Intermediate Municipal Fund Index return of 4.4%.

The WesMark Government Bond Fund had a total return of 3.46% for calendar year 2020. The Lipper General U.S. Government Bond Fund average return was 7.66%, and the Barclay's U.S. Government Credit Bond Index was 6.43% for the same period. The duration of the securities within the fund was 6.3 years as of December 31, 2020, compared to 4.0 years as of December 31, 2019. The duration of the Barclay's U.S. Government Credit Index was 7.5 years at the end of the period. The fund normally invests at least 80% of its assets in U.S. Government fixed-income securities. With credit spreads and treasury yields compressing, risk-adjusted returns favored credit over U.S. Treasury and U.S. Government Agency Securities. The WesMark Government Fund's shorter duration and limited credit exposure constrained its performance relative to its benchmark.

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Mutual fund performance changes over time and current performance may be lower or higher than what is stated. For current to the most recent month end performance and after-tax returns call 1-800-864-1013. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Mutual funds are not obligations of or guaranteed by any bank and are not federally insured.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices. The value of some mortgage-backed securities may be particularly sensitive to changes in prevailing interest rates, and although the securities are generally supported by some form of government or private insurance, there is no assurance that private guarantors or insurers will meet their obligations.

- \* Represents a hypothetical investment of \$10,000 in the Fund. The Fund's performance assumes the reinvestment of all dividends and distributions. The BCIGCI, LIGFA and the LGUSFA have been adjusted to reflect reinvestment of dividends on securities in the index and averages.
- \*\* The BCIGCI is an unmanaged market value weighted performance index for government and corporate fixed rate debt issues with maturities between one and ten years. The BCIGCI is not adjusted to reflect sales charges, expenses or other fees that the SEC requires to be reflected in the Fund's performance. The index is unmanaged and unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.
- \*\*\* The information presented for the LIGFA is the average of the total returns of funds designated by Lipper as falling into the category of funds that invest primarily in securities issued or guaranteed by the U.S. government, its agencies, or its instrumentalities, with dollar-weighted average maturities of five to ten years. Lipper averages do not reflect sales charges. It is not possible to invest directly in an average.
- \*\*\*\* The information presented for the LGUSFA is the average total returns of funds designated by Lipper as falling into the category of funds that invest primarily in U.S. government and agency issues. Lipper averages do not reflect sales charges. It is not possible to invest directly in an average.

# Management's Discussion of Fund Performance

# WesMark West Virginia Municipal Bond Fund

December 31, 2020 (Unaudited)

Headlines were dominated by the COVID-19 virus in 2020. The global shutdown of non-essential activities and travel resulted in the largest economic disaster since the Great Depression. Coordinated monetary and fiscal stimulus from central banks and governments worldwide have helped blunt the economic downside, and the U.S. government released a wide array of legislation to help all areas of the economy. This included checks to Americans based on income level and family size, as well as grants and forgivable loans to hard-hit industries and small businesses.

The Federal Reserve had its own response to the risk. On March 3, 2020, it lowered the Federal Funds Target Rate by 0.50% and did so again by another 1.00% on March 15, 2020. These changes moved the Federal Funds Rate to a range of 0.00% to 0.25%, a target that had not been seen since 2015. In addition, the Federal Reserve pledged to continue its asset purchase program of \$80 billion in U.S. Treasuries and \$40 billion of mortgage-backed securities per month until its dual mandate of full employment and a 2.00% inflation rate is attained. The Federal Reserve created new programs to provide liquidity, prop up the economy, and stimulate companies and local governments.

In March, the Federal Reserve pledged to buy as much government debt as needed to strengthen the housing market and announced plans to purchase corporate bonds, including the riskiest investment-grade credit, for the first time in history. In April, it entered the municipal bond market by purchasing bonds issued by states and cities, as local governments were seeing budgets impacted by the virus outbreak.

The 10-year U.S. Treasury ended 2020 with a yield of 0.91%, compared to 1.92% from the previous year. The 10-year yield reached a record low of 0.51% in early August. U.S. Treasury yields experienced a decline in 2020 with the largest changes occurring in late February and early March, as the U.S. saw rising COVID-19 cases. History was set on March 9, 2020 when U.S. Treasury bonds with maturities from two years to 30 years reported yields of less than 1.00%.

The U.S. Treasury yield curve finished the year lower but steeper, as short-term interest rates fell more than longer-term rates in response to the U.S. central bank's emergency rate cuts in March. The 2-year to 10-year U.S. Treasury yield spread ended 2020 at 79 basis points, the widest since 2017. The U.S. Treasury markets anticipated the greater likelihood of increased Treasury issuance following the continuation of emergency and ongoing stimulus spending.

Although the U.S. 10-year Treasury reached historic lows of 0.51% in this period, the U.S. fixed income markets did not experience the negative yields reported in Europe and Japan. Globally, negatively yielding debt increased to approximately \$18 trillion during 2020.

When COVID-19 first appeared, municipal investors were uneasy about how state and local governments would be able to function. In addition to providing stimulus for individuals, the unemployed, and small business, the federal government's \$150 billion CARES ACT provided funding for municipal governments. However, the funding was only to reimburse pandemic-related expenses and not to supplement revenue shortfalls. The \$900 billion relief bill passed in December 2020 contained \$157 billion of direct aid to certain municipal sectors, such as health care, transportation, and education. The federal government also created the Municipal Liquidity Facility. This program was designed to purchase municipal debt securities from state and local governments to enhance liquidity and provide stability to the municipal markets.

The onset of the COVID-19 pandemic, and the dislocation related to government actions, created a challenging credit environment for municipal issuers. The pandemic-induced recession disproportionately impacted certain service industries and lower-wage earners. Tourism dependent states such as Hawaii, Florida, Nevada, and Alaska faced budgetary concerns. In aggregate, local governments receive three-quarters of their tax revenues from property taxes, leaving just a quarter of their revenues being derived from the most sensitive receipts such as sales, income, and hospitality taxes. The pandemic induced lockdown did not have a destructive effect on housing, as most regions of the country experienced house price appreciation. Although mortgage delinquencies increased, the worst case scenario was avoided by forbearance programs that shift property tax responsibilities to the mortgage servicers. Similar to the state level, local governments that are funded to a greater degree by sales and income taxes that rely on tourism faced revenue and liquidity concerns.

West Virginia was not initially affected as hard by the economic disruptions caused by the pandemic. It was the last state to report a coronavirus case in mid-March. After initial shutdowns, the state experienced a rapid decline in employment like the rest of the United States West Virginia lost 92,000 jobs from March to April, but it recovered approximately 60% of those lost jobs. The state ended 2019 with an unemployment rate of 5.1%, and after reaching a peak of 15.9% in April, it ended 2020 with an unemployment rate of 6.3%.

The state responded proactively to the virus-induced 2020 budget gap of \$300 million. It reduced expenditures by approximately \$200 million, and it implemented the use of approximately \$100 million in one-time revenue sources, including \$57 million of CARES ACT funding. West Virginia maintains a statutorily required rainy day fund. State code requires 50% of all general fund surplus revenue to be deposited into this rainy day fund until it exceeds 13% of state appropriations for the previous fiscal year. The rainy day fund can be used to offset revenue shortfalls, fund emergency revenue needs in the case of acts of God or natural disasters, or for other needs as determined by the legislature. The rainy day fund balance as of October 31, 2020 was \$898 million, approximately 19.6% of estimated 2021 general revenues.

After sustaining deep losses with the onset of the pandemic, as federal stimulus programs were rolled out, tax-exempt municipal bonds rebounded and finished 2020 with a total return of 5.3%. In this low interest rate environment, municipal investors extended their maturity structures and reduced their credit qualities. Tax-exempt municipal securities with longer-dated maturity terms of 22 years and beyond posted returns of 6.5%. By contrast, shorter-term bonds with maturities of three to seven years posted a total return of 4.1% in 2020.

# WesMark Funds

# Management's Discussion of Fund Performance WesMark West Virginia Municipal Bond Fund

The WesMark West Virginia Municipal Bond Fund saw a total return of 3.48% in 2020. The Fund's benchmark, the Bloomberg Barclays Municipal 5-year Index, total return was 4.29% for the period. The Lipper Other States Municipal Debt Fund return was 4.17%.

The duration of the fund was 3.7 years, as of December 31, 2020, as compared to 4.0 years on December 31, 2019. The net investment income dividend (excluding capital gains distributions) was \$0.18 per share for the report period, compared to \$0.20 per share for the prior report period. Approximately 97.68% of the dividend was derived from West Virginia Municipal Securities, and it was exempt from federal and state income tax for West Virginia residents. At the end of the report period, 88% of the portfolio securities were BBB rated or higher with 5% rated AAA. The shorter duration and maturity structure of the fund limited its performance relative to its benchmark.

₩ WesMark Funds

# Management's Discussion of Fund Performance WesMark Tactical Opportunity Fund

December 31, 2020 (Unaudited)

We began 2020 with an allocation to equity markets that was slightly below the neutral target, while fixed income was slightly above a neutral weight. The yield on the 10-year Treasury was close to 2.0%, and the S&P 500 Index was moving toward an all-time high. While economic readings were supporting a modest increase in growth, the underlying company fundamentals were suggesting robust growth. As a result, we were more cautious on our allocation and holding decisions. We did not anticipate a global pandemic that would push the U.S. economy into a global recession; however, our allocation decisions allowed us to capitalize on the dislocation in financial markets.

During the selloff in equity markets, we were able to reduce our fixed income holdings and cash and increase our equity holdings. The increase in equities moved our holdings to the upper end of our target allocation from below neutral weight. Also, equity holdings were focused on traditional early economic recovery sectors. Within our fixed income exposure, we shifted to include more corporate debt and convertible securities, in an effort to take advantage of the equity market recovery and improving fixed income spreads.

By the end of the second quarter, the S&P 500 Index rose 38% from the near-term low and surpassed prior peak readings. We remained near the upper end of our equity target, and at the lower end of the fixed income allocation. Cash was building within the portfolio, but it remained in line with the neutral weight. Our holdings within the allocations remained largely unchanged. By the start of September, cash within the portfolio rose to nearly 10%. During the brief sell off in equity markets that month, we were able to put some cash to work. We increased our equity holdings and added to our corporate bond holdings. As a result, we ended the quarter with cash below 3% and equities back to the upper end of our allocation range.

As we closed out 2020, we remained near the upper end of our equity exposure at 72%. This was primarily focused domestically with a preference for value and cyclical holdings. Our fixed income allocation remained near the lower end of our target, given our view on interest rates over the next several quarters. The current allocation is focused on corporate debt with a smaller holding in emerging markets debt.

For the year, the WesMark Tactical Opportunity Fund posted a total return of 8.5%, compared to the Lipper Flexible Funds category return of 9.3%. On a trailing three year, the WesMark Tactical Opportunity Fund reported a 6.2% annualized return, compared to the Lipper category's 5.6% annualized return. Since the Fund's inception, March 1, 2017, the WesMark Tactical Opportunity Fund posted an annualized total return of 7.2%. That is compared to the MSCI All World Index's return of 12.7% and the U.S. BarCap Aggregate Bond Index's return of 4.7% for same period.

For the year, several of our industry-specific holdings posted solid returns. Our decision to focus on technology and consumer focused holdings, SPDR Technology Sector ETF (+17.4%) and First Trust Consumer Discretionary ETF (+16.5%), helped our performance during the period. In addition, our exposure to biotechnology and materials companies was accretive to performance. The iShares NASDAQ Biotechnology ETF rose 12.2%, while the SPDR Materials Sector increased by 11.0% during the holding period. The commodities and precious metals exposure helped lower the overall volatility during the pandemic and performed well in the early part of the recovery. The iShares Silver ETF and SPDR Gold ETF rose 31.9% and 16.3%, respectively. Our expanded commodities exposure, Invesco Diversified Commodity ETF, gained 10.3% for the holding period.

Within our fixed income allocation, our non-traditional holdings provided the most accretive returns for the Fund. The SPDR Convertible Securities ETF and iShares High Yield Corporate Bond ETF gained 21.7% and 12.1%, respectively, for the holding period.

Our top 10 holdings accounted for 79.9% of the overall market value of the Fund.

# Management's Discussion of Fund Performance WesMark Tactical Opportunity Fund

December 31, 2020 (Unaudited)

Also see Glossary of Terms on page 79.

Performance data quoted represents past performance which is no guarantee of future results.

An investment in the Fund involves risk, including loss of principal. Investment in the Fund is subject to investment risks, including, without limitation, market risk, credit risk, interest rate risk, risks related to ETF net asset value and market price, foreign securities risk, commodity risk, manager risks, risks of investing in real estate investment trust (REITs), and risks related to company size.

The views in this report were those of the Fund Managers as of the letter's publication date and may not reflect his views on the date this letter is first distributed or anytime thereafter. These views are intended to assist readers in understanding the Fund's investment methodology and do not constitute investment advice.

### Management's Discussion of Fund Performance WesMark Tactical Opportunity Fund

#### December 31, 2020 (Unaudited)

#### GROWTH of \$10,000 invested in WesMark Tactical Opportunity Fund

The graph below illustrates the hypothetical investment of \$10,000\* in the WesMark Tactical Opportunity Fund (the "Fund") from March 1, 2017 to December 31, 2020, compared to the Tactical Composite Index ("Composite")\*\*, The Hedge Fund Research, Inc. (HFRI) Fund of Funds Composite Index \*\*\*, and the Lipper Flexible Portfolio Funds\*\*\*\*

#### AVERAGE ANNUAL TOTAL RETURN for the periods ended December 31, 2020

| 1 Year | <b>3</b> Years | Since Inception (3/1/17) |
|--------|----------------|--------------------------|
| 8.48%  | 6.24%          | 7.06%                    |

Total Annual Fund Operating Expense (as of most current Prospectus): 1.69%

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Mutual fund performance changes over time and current performance may be lower or higher than what is stated. For current to the most recent month end performance and after-tax returns call 1-800-864-1013. Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Mutual funds are not obligations of or guaranteed by any bank and are not federally insured.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

- \* Represents a hypothetical investment of \$10,000 in the Fund. The Fund's performance assumes the reinvestment of all dividends and distributions. The Composite, the MSCI ACWI and the US BarCap Agg have been adjusted to reflect reinvestment of dividends on securities in the index and average.
- \*\* The Tactical Composite Index is comprised of a combination of 60% of MSCI All World Index ("ACWI") 30% Bloomberg Barclays US Aggregate Index and 10% of HFRI Fund of Funds Index. The Tactical Composite Index is not adjusted to reflect sales charges, expenses, or other fees that the SEC requires to be reflected in the Fund's performance. The index is unmanaged and unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.
- \*\*\* The Hedge Fund Research, Inc. (HFRI) Fund of Funds Composite Index is an equal weighted index that consists of over 800 constituent hedge funds, including both domestic and offshore funds. The HFRI is not adjusted to reflect sales charges, expenses, or other fees that the SEC requires to be reflected in the Fund's performance. The index is unmanaged and unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.
- \*\*\*\*The Lipper Flexible Portfolio Funds is an unmanaged index of funds that allocate their investments to both domestic and foreign securities across traditional asset classes with a focus on total return. The traditional asset classes utilized are common stocks, bonds, and money market instruments. Lipper Flexible Portfolio Funds is not adjusted to reflect sales charges, expenses, or other fees that the SEC requires to be reflected in the Fund's performance. The index is unmanaged and unlike the Fund, is not affected by cash flows. It is not possible to invest directly in an index.

#### **Investment Abbreviations:**

LIBOR - London Interbank Offered Rate

#### **Reference Rates:**

1M US L - 1 Month LIBOR as of December 31, 2020 was 0.14% 12M US L - 12 Month LIBOR as of December 31, 2020 was 0.34%

1Y US TI - 1 Year US Treasury Bill as of December 31, 2020 was 0.10%

- (1) Floating or variable rate security. The reference rate is described above. The Rate in effect as of December 31, 2020 is based on the reference rate plus the displayed spread as of the security's last reset date. Certain variable rate securities are not based on a published reference rate and spread but are determined by the issuer or agent and are based on current market conditions. These securities do not indicate a reference rate and spread in their description above.
- (2) Assets, other than investments in securities, less liabilities.

Portfolio of Investments Summary Table

WesMark West Virginia Municipal Bond Fund

- (1) See the Fund's Prospectus and Statement of Additional Information for a description of the types of securities in which the Fund invests.
- (2) Short Term Investments include investment in a money market mutual fund.
- (3) Assets, other than investments in securities, less liabilities.
- (4) These tables depict the long-term credit-quality ratings assigned to the Fund's portfolio holdings by Standard & Poor's (S&P) and Moody's Investors Service (Moody's), each of which is a Nationally Recognized Statistical Rating Organization (NRSRO). These credit-quality ratings are shown without regard to gradations within a given rating category. For example, securities rated "A-" have been included in the "A" rated category. Rated securities that have been prerefunded, but not rated again by the NRSRO, have been included in the "Not rated by..." category.

Rated securities include a security with an obligor and/or credit enhancer that has received a rating from an NRSRO with respect to a class of debt obligations that is comparable in priority and security with the security held by the Fund. Credit-quality ratings are an assessment of the risk that a security will default in payment and do not address other risks presented by the security. Please see the descriptions of credit-quality ratings in the Fund's Statement of Additional Information. Holdings that are rated only by a different NRSRO than the one identified have been included in the "Not rated by..." category.

(1) The WesMark Tactical Opportunity Fund commenced operations on March 1, 2017.

(2) Total return not annualized for periods less than one full year.

(3) The ratios shown do not include the Fund's proportionate shares of the expenses of the underlying investment companies in which the Fund invests.

(4) Ratios for periods of less than a year are annualized.

(5) Recognition of net investment income is affected by the timing and declaration of dividends by the underlying investment companies in which the Fund invests.

(6) This expense decrease from the voluntary waiver is reflected in both the net expense and the net investment income ratios shown.

Annual Report | December 31, 2020

### Notes to Financial Statements

#### 1. ORGANIZATION

WesMark Funds (the "Trust") is registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company. The Trust consists of six portfolios (individually referred to as the "Fund", or collectively as the "Funds"), which are presented herein:

| Portfolio Name   | Diversification | Investment Objective  |
|--|-----------------|---|
| WesMark Small Company Growth Fund<br>("Small Company Growth Fund")                 | Diversified     | To achieve capital appreciation   |
| WesMark Growth Fund ("Growth Fund")  | Diversified     | To achieve capital appreciation   |
| WesMark Balanced Fund ("Balanced Fund")  | Diversified     | To achieve capital appreciation and income  |
| WesMark Government Bond Fund<br>("Government Bond Fund")                           | Diversified     | To achieve high current income consistent with preservation of capital  |
| WesMark West Virginia Municipal Bond Fund<br>("West Virginia Municipal Bond Fund") | Non-diversified | To achieve current income which is exempt from federal income<br>tax and income taxes imposed by the State of West Virginia |
| WesMark Tactical Opportunity Fund ("Tactical Opportunity Fund")                    | Diversified     | To achieve capital appreciation   |

The assets of each Fund are segregated and a shareholder's interest is limited to the Fund in which shares are held.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Funds in the preparation of their financial statements. These policies are in conformity with generally accepted accounting principles ("GAAP") in the United States of America.

The accompanying financial statements were prepared in accordance with GAAP in the United States, which require the use of estimates made by management of the Funds. Actual results could differ from those estimates that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Each Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification Topic 946 *Financial Services - Investment Companies*.

Investment Valuation – In calculating their net asset value (NAV), the Funds generally value investments as follows:

- >> Equity securities listed on an exchange or traded through a regulated market system are valued at their last reported sale price or official closing price on their principal exchange or market.
- >> Fixed-income securities acquired with remaining maturities greater than 60 days are valued using price evaluations provided by a pricing service approved by the Board of Trustees (the "Trustees").
- Fixed-income securities acquired with remaining maturities of 60 days or less may be valued using price evaluations provided by a pricing service approved by the Trustees. They may also be valued at their cost (adjusted for the accretion of any discount or amortization of any premium), which approximates value.
- >> Options are generally valued at market values established by the exchanges on which they are traded at the close of trading on such exchanges.
- >> Shares of other mutual funds are valued based upon their reported NAVs.

If the Funds cannot obtain a price or price evaluation from a pricing service for an investment, the Funds may attempt to value the investment based upon the mean of bid and asked quotations or fair value the investment based on price evaluations, from one or more dealers. If any price, quotation, price evaluation or other pricing source is not readily available when the NAV is calculated, the Funds use the fair value of the investment determined in accordance with the procedures described below. There can be no assurance that the Funds could purchase or sell an investment at the price used to calculate the Funds' NAVs.

#### December 31, 2020

**Fair Valuation and Significant Events Procedures** – The Trustees have authorized the use of pricing services to provide evaluations of the current fair value of certain investments for purposes of calculating the NAV. Factors considered by pricing services in evaluating an investment include the yields or prices of investments of comparable quality, coupon, maturity, call rights and other potential prepayments, terms and type, reported transactions, indications as to values from dealers, and general market conditions. The Funds normally use mean evaluations (a price evaluation indicative of a price between the bid and asked prices for an investment) for fixed-income securities. In the event that market quotations and price evaluations are not available for an investment, the fair value of the investment is determined in accordance with procedures adopted by the Trustees.

The Trustees also have adopted procedures requiring an investment to be priced at its fair value whenever the Adviser determines that a significant event affecting the value of the investment has occurred between the time as of which the price of the investment would otherwise be determined and the time as of which the NAV is computed. An event is considered significant if there is both an affirmative expectation that the investment's value will change in response to the event and a reasonable basis for quantifying the resulting change in value. Examples of significant events that may occur after the close of the principal market on which a security is traded, or after the time of a price evaluation provided by a pricing service or a dealer, include:

- >> With respect to securities traded in foreign markets, significant trends in U.S. equity markets or in the trading of foreign securities index futures or options contracts;
- >> With respect to price evaluations of fixed-income securities determined before the close of regular trading on the NYSE, actions by the Federal Reserve Open Market Committee and other significant trends in U.S. fixed-income markets; and
- >> Corporate announcements concerning matters such as acquisitions, recapitalizations, litigation developments, a natural disaster affecting the issuer's operations or regulatory changes or market developments affecting the issuer's industry.

The Funds may seek to obtain more current quotations or price evaluations from alternative pricing sources. If a reliable alternative pricing source is not available, the Funds will determine the fair value of the investment using another method approved by the Trustees.

A three-tier hierarchy has been established to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation approach used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation approach. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities that the Funds have the ability to access at the measurement date.
- Level 2 Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Funds' own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

Annual Report | December 31, 2020

The following is a summary of the inputs used as of December 31, 2020 in valuing the Funds' investments carried at fair value:

All securities of the Funds were valued using either Level 1 or Level 2 inputs during the year ended December 31, 2020. Thus, a reconciliation of assets in which unobservable inputs (Level 3) were used is not applicable for the Funds.

\* For detailed descriptions of sector and/or geography classifications, see the accompanying Portfolios of Investments.

Annual Report | December 31, 2020

#### December 31, 2020

**Investment Income, Expenses and Distributions** – Investment transactions are accounted for on a trade-date basis. Realized gains and losses from investment transactions are recorded on an identified cost basis. Interest income and expenses are accrued daily. Dividend income and distributions to shareholders are recorded on the ex-dividend date. Non-cash dividends included in dividend income, if any, are recorded at fair value. Foreign dividends are recorded on the ex-dividend date or when the Funds are informed of the ex-dividend date. Trust level expenses are allocated to each Fund based on net assets, equally across all Funds, or to a specific Fund, whichever is deemed most appropriate for a particular expense. Each Fund pays its own expenses.

Distributions of net investment income, if any, for the Small Company Growth Fund, Growth Fund, and Tactical Opportunity Fund are declared and paid quarterly. Distributions of net investment income for the Balanced Fund are declared and paid monthly, and distributions of net investment income for the Government Bond Fund and West Virginia Municipal Bond Fund are declared daily and paid monthly. Distributions of capital gains, if any, for Small Company Growth Fund, Growth Fund, Balanced Fund, Government Bond Fund, West Virginia Municipal Bond Fund, and Tactical Opportunity Fund are declared and paid annually.

**Premium and Discount Amortization/Paydown Gains and Losses** – All premiums and discounts on fixed-income securities are amortized/accreted over the estimated lives of such securities for financial statement purposes using the effective interest method. Gains and losses realized on principal payments of mortgage-backed securities (paydown gains and losses) are classified as part of investment income.

**Federal Taxes** – It is each Fund's policy to comply with the Subchapter M provision of the Internal Revenue Code of 1986, as amended, (the "Code") and to distribute to shareholders each year substantially all of its income. As of and during the year ended December 31, 2020, the Funds did not have a liability for any unrecognized tax benefits. The Funds recognize interest and penalties, if any, related to tax liabilities as income tax expense in the Statements of Operations. The Funds file U.S. federal, state, and local tax returns as required. The Funds' tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations which is generally three years after the filing of the tax return for federal purposes and four years for most state returns. Tax returns for open years have not incorporated uncertain tax positions that require a provision for income taxes and federal and state taxing authorities.

The Funds may be subject to taxes imposed by governments of countries in which they invest. Such taxes are generally based on either income or gains earned or repatriated. The Funds accrue and apply such taxes to net investment income, net realized gains and net unrealized gains as income is earned.

Withholding taxes on foreign dividends have been provided for in accordance with the Funds' understanding of the applicable country's tax rules and rates.

When-Issued and Delayed Delivery Transactions – The Funds may engage in when-issued or delayed delivery transactions. The Funds record when-issued securities on the trade date and maintain security positions such that sufficient liquid assets will be available to make payment for the securities purchased. Securities purchased on a when-issued or delayed delivery basis are marked to market daily and begin earning interest on the settlement date. Losses may occur on these transactions due to changes in market conditions or the failure of counterparties to perform under the contract.

**Restricted Securities** – Restricted securities are securities that either: (a) cannot be offered for public sale without first being registered, or being able to take advantage of an exemption from registration, under the Securities Act of 1933; or (b) are subject to contractual restrictions on public sales. In some cases, when a security cannot be offered for public sale without first being registered, the issuer of the restricted security has agreed to register such securities for resale, at the issuer's expense, either upon demand by the Funds or in connection with another registered offering of the securities. Many such restricted securities may be resold in the secondary market in transactions exempt from registration. Restricted securities may be determined to be liquid under criteria established by the Trustees. The Funds will not incur any registration costs upon such resales. The Funds' restricted securities are valued at the price provided by dealers in the secondary market or, if no market prices are available, at the fair value as determined in accordance with procedures established by and under the general supervision of the Trustees.

Derivative Instruments and Hedging Activities – The following discloses the Funds' use of derivative instruments and hedging activities.

The Funds' exposure to derivative contracts and hybrid instruments, either directly or indirectly through another investment company, may involve risks different from or possibly greater than the risk associated with investing directly in a security instead of the derivative. Risks include: 1) the value of the derivative may not correlate with the value of the underlying security or may correlate inversely; 2) any potential risk reduction may be offset with gain limitations; 3) derivatives may be difficult to price; 4) possible adverse tax consequences; and 5) other risks, such as but not limited to, stock market, interest rate, credit, currency, liquidity, and leverage risks.

www.wesmarkfunds.com

*Market Risk Factors:* In pursuit of their investment objectives, certain Funds may use derivatives that increase or decrease a Fund's exposure to the following market risk factors:

Equity Risk: Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

*Interest Rate Risk:* Changes in interest rates will affect the value of a Fund's investments. In general, as interest rates rise, bond prices fall, and as interest rates fall, bond prices rise. Interest rate risk is generally greater for funds that invest a significant portion of their assets in high yield securities.

#### Writing Covered Call Options and Purchasing Put Options

The Funds will not write call options on securities unless the securities are held in the Fund's portfolio or unless the Fund is entitled to them in deliverable forms without further payment or after segregating cash in the amount of any further payment.

The Funds will not purchase put options on securities unless the securities are held in the Fund's portfolio.

Option contracts (options) - are rights to buy or sell a security for a specified price within a specified period. The seller of the option receives a payment, or premium, from the buyer, which the seller keeps regardless of whether the buyer uses (or exercises) the option. Options can trade on exchanges or in the over the counter (OTC) market and may be bought or sold on a wide variety of securities. As of December 31, 2020, all options held are exchange-traded and not subject to master netting arrangements.

A Fund may buy and/or sell the following types of options:

Call Options – A call option gives the holder (buyer) the right to buy the underlying security from the seller (writer) of the option. A Fund may use call options in the following ways:

- >> Buy call options on a security in anticipation of an increase in the value of the security; or
- Sell call options on a security to generate income from premiums, and in anticipation of a decrease or only limited increase in the value of the underlying security. If a Fund writes a call option on a security that it owns and that call option is exercised, a Fund must deliver the security to the buyer and foregoes any possible profit from an increase in the market price of the security over the exercise price plus the premium received.

Put Options – A put option gives the holder the right to sell the security to the writer of the option. A Fund may use put options in the following ways:

- >> Buy put options on a security in anticipation of a decrease in the value of the security; or
- >> Write put options on a security to generate income from premiums, and in anticipation of an increase or only limited decrease in the value of the security. In writing puts, there is a risk that a Fund may be required to take delivery of the security when its current market price is lower than the exercise price.

A Fund may also buy or write options, as needed, to close out existing option positions. Finally, a Fund may enter into combinations of options contracts in an attempt to benefit from changes in the prices of those options contracts (without regard to changes in the value of the security).

The Growth Fund, Balanced Fund and Tactical Opportunity Fund had average monthly written call option notional value of (4,214,533), (420,909), and (4,562,470), respectively, during the year ended December 31, 2020. The Tactical Opportunity Fund had average monthly purchased option notional value of \$890,073 during the year ended December 31, 2020.

WesMark Funds

**Market Risk** – The Funds may incur losses due to political, regulatory, market, economic or social developments affecting the market(s) generally. Local, regional or global events such as terrorism, war, natural disasters, disease/virus outbreaks and epidemics or other public health crises, recessions, depressions or other events – or the potential for such events – could have a significant negative impact on economic and market conditions.

The public health crisis caused by the novel coronavirus disease known as COVID-19 has become a pandemic that has resulted in, and may continue to result in, significant global economic and market volatility. COVID-19 has caused, and may continue to cause, societal disruptions such as quarantines, travel restrictions, workforce displacement and loss of resources. There is significant uncertainty surrounding the magnitude, duration, reach, costs and other effects of the COVID-19 pandemic, including actions that have been or could be taken by governmental authorities or other third parties. The impacts, as well as the uncertainty over impacts yet to unfold, of COVID-19 – and any other infectious illness outbreaks, epidemics, pandemics or other public health crises that may arise in the future – could negatively affect economies and markets in ways that cannot be foreseen.

## 4. FEDERAL TAX INFORMATION AND TAX BASIS

The timing and character of income and capital gain distributions are determined in accordance with income tax regulations, which may differ from GAAP. During the fiscal year, there were no permanent differences that resulted in adjustments to distributable earnings or paid-in capital.

For federal income tax purposes, the following amounts apply as of December 31, 2020:

| Fund Name                         | (ex | Gross<br>ppreciation<br>ccess of value<br>ver tax cost) | Gross<br>Depreciation<br>(excess of tax<br>cost over value) |           | Ā  | et Unrealized<br>Appreciation<br>Depreciation) | ]<br>(in | vestments for<br>Income Tax<br>Purposes<br>cludes cost of<br>derivatives) |
|-----------------------------------|-----|---|---|-----------|----|--|----------|---|
| Small Company Growth Fund         | \$  | 52,378,585  | \$  | (249,677) | \$ | 52,128,908                                     | \$       | 60,096,404  |
| Growth Fund                       | \$  | 200,304,019   | \$  | (118,331) | \$ | 200,185,688                                    | \$       | 153,551,389   |
| Balanced Fund                     | \$  | 29,590,093  | \$  | (378,007) | \$ | 29,212,086                                     | \$       | 85,162,120  |
| Government Bond Fund              | \$  | 6,376,750   | \$  | (205,659) | \$ | 6,171,091                                      | \$       | 225,479,678   |

Annual Report | December 31, 2020

December 31, 2020

Capital loss carryovers used during the year ended December 31, 2020, were as follows:

| Fund Name                 | (  | Capital<br>Losses |
|---------------------------|----|-------------------|
| Small Company Growth Fund | \$ | 102,367           |

Under current law, capital losses maintain their character as short-term or long-term and are carried forward to the next tax year without expiration. As of December 31, 2020, the following amounts are available as carry forwards to the next tax year:

|                      | Non ex          | xpiri | ng        |
|----------------------|-----------------|-------|-----------|
| Fund Name            | ST              |       | LT        |
| Government Bond Fund | \$<br>1,221,606 | \$    | 1,208,153 |

The Fund elects to defer to the period ending December 31, 2021, capital losses recognized during the period November 1, 2020 to December 31, 2020 in the amount of:

| Fund Name            | Capital<br>Losses |
|----------------------|-------------------|
| Government Bond Fund | \$<br>94,555      |

Capital losses arising in the post-October period of the current fiscal year may be deferred to the next fiscal year if the fund elects to defer the recognition of these losses. When this election is made any losses recognized during the period are treated as having occurred on the first day of the next fiscal year separate from and in addition to the application of normal capital loss carryovers as described above.

#### 5. INVESTMENT ADVISER FEE AND OTHER TRANSACTIONS WITH AFFILIATES

**Investment Adviser Fee** – WesBanco Investment Department is the Funds' investment adviser (the "Adviser"). The Advisory Agreement between the Funds and the Adviser provides for an annual fee equal to the percentage of each Fund's average daily net assets as follows:

| Fund Name                         | Investment Adviser Fee<br>Percentage |
|-----------------------------------|--------------------------------------|
| Small Company Growth Fund         | 0.75%                                |
| Growth Fund                       | 0.75%                                |
| Balanced Fund                     | 0.75%                                |
| Government Bond Fund              | 0.60%                                |
| West Virginia Municipal Bond Fund | 0.60%                                |
| Tactical Opportunity Fund         | 0.75%                                |

The Adviser is contractually obligated to waive a portion of its fees and reimburse other expenses until February 28, 2021 in amounts necessary to limit the Tactical Opportunity Fund's operating expenses (including the organizational expenses of the Fund, but excluding interest expense, fees on borrowings and expenses associated with the Fund's investment in other investment companies, if any, extraordinary expenses, tax reclaim recovery expenses and proxy-related expenses) to an annual rate (as a percentage of the Fund's average daily net assets) of 1.75%. This expense limitation arrangement may not be terminated by the Adviser prior to such date unless such termination is approved by the Trustees. The Adviser is not entitled to recoup any of the fees or expenses waived or reimbursed within this expense limitation arrangement.

For the year ended December 31, 2020, the Adviser did not waive any fees due to expenses being under the limit.

Administrative Fee – ALPS Fund Services, Inc. ("ALPS") provides the Funds with certain administrative personnel and services. The fees paid to ALPS are based on the daily average aggregate net assets of the Trust for the period, subject to an annual minimum (on the Trust level). The annual minimum fee will be allocated among the Funds using an equal per-Fund allocation. Any remaining amounts of the minimum fee after the per-Fund allocation will be allocated among the Funds based upon the relative net assets of each Fund.

**Transfer Agent Fee** – ALPS is the Transfer Agent and Dividend Disbursing Agent for the Funds. ALPS receives an annual base fee per Fund in addition to certain out-of-pocket expenses.

WesMark Funds

www.wesmarkfunds.com

**Distribution (12b-1) Fee** – ALPS Distributors, Inc. ("ADI"), an affiliate of ALPS, serves as the Funds' distributor. The Funds currently have no active distribution plan pursuant to Rule 12b-1 under the ACT.

**Shareholder Services Fee** – Under the terms of Shareholder Services Agreements with WesBanco Bank ("WesBanco", an affiliate of the Adviser) and other financial institutions, the Funds may pay WesBanco as well as other financial institutions, up to 0.25% of average daily net assets. The fee is used to finance certain services for shareholders and to maintain shareholder accounts. WesBanco and other financial institutions may voluntarily choose to waive any portion of their fee, which arrangement they can modify or terminate at any time at their sole discretion.

**Recordkeeping Fee** – The Funds may pay recordkeeping fees on an average net assets basis or on a per account per year basis to financial intermediaries for providing recordkeeping services to the Funds and shareholders.

**Custodian Fees** – WesBanco is the Funds' custodian. The custodian fee paid to WesBanco is based on the level of each Fund's average daily net assets for the period, plus out-of-pocket expenses. WesBanco may voluntarily choose to waive any portion of its fee. WesBanco can modify or terminate this voluntary waiver at any time at its sole discretion.

General - Certain Officers and Trustees of the Funds are Officers and Directors or Trustees of the above companies.

#### 6. INVESTMENT TRANSACTIONS

Purchases and sales of investments, excluding long-term U.S. government securities and short-term obligations, for the year ended December 31, 2020 were as follows:

| Fund                              | Purchases |            |    | Sales       |
|-----------------------------------|-----------|------------|----|-------------|
| Small Company Growth Fund         | \$        | 48,313,683 | \$ | 67,118,036  |
| Growth Fund                       |           | 86,083,154 |    | 137,374,310 |
| Balanced Fund                     |           | 28,926,732 |    | 26,724,433  |
| Government Bond Fund              |           | 84,350,018 |    | 95,567,394  |
| West Virginia Municipal Bond Fund |           | 12,011,512 |    | 11,722,928  |
| Tactical Opportunity Fund         |           | 66,519,039 |    | 65,493,291  |

Purchases and Sales of U.S. Government Securities, other than short-term securities, for the year ended December 31, 2020 were as follows:

| Fund                 | Purchases       | Sales           |
|----------------------|-----------------|-----------------|
| Balanced Fund        | \$<br>2,071,438 | \$<br>4,006,666 |
| Government Bond Fund | 28,456,708      | 26,483,367      |
|                      |                 |                 |

#### 7. CONCENTRATION OF RISK

Since the West Virginia Municipal Bond Fund invests a substantial portion of its assets in issuers located in one state, it is more susceptible to factors adversely affecting issuers of that state than would be a comparable tax-exempt mutual fund that invests nationally. In order to reduce the credit risk associated with such factors, as of December 31, 2020, 29% of the securities in the portfolio were backed by letters of credit, bond insurance of various financial institutions, or financial guaranty assurance agencies.

Additionally, the Funds may invest a portion of their assets in securities of companies that are deemed by the Funds' management to be classified in similar business sectors. The economic developments within a particular sector may have an adverse effect on the ability of issuers to meet their obligations. Additionally, economic developments may have an effect on the liquidity and volatility of portfolio securities.

Annual Report | December 31, 2020

## 8. COMPENSATION OF TRUSTEES

None of the Trustees are entitled to receive any retirement, pension plan or deferred compensation benefits from the Trust. Interested Trustees receive the same compensation as Independent Trustees. No officers of the Funds are compensated by the Funds, but officers may be reimbursed by the Funds for travel and related expenses incurred in performing their duties.

#### 9. RECENT ACCOUNTING PRONOUNCEMENT

In March 2020, the Financial Accounting Standards Board ("FASB") issued guidance providing optional temporary financial reporting relief from the effect of certain types of contract modifications due to the planned discontinuation of the LIBOR (London Interbank Offered Rate) or other interbank-offered based reference rates as of the end of December 2021. Management continues to evaluate the impact of the guidance and may apply other elections, as applicable, as the expected market transition to alternative reference rates evolves.

#### **10. SUBSEQUENT EVENTS**

In preparing these financial statements, the Funds' management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

Shareholder Distributions for the Balanced Fund: On January 29, 2021, the Balanced Fund paid a monthly distribution of \$0.018 per share to common shareholders of record as of January 20, 2021.

Shareholder Distributions for Government Bond Fund and West Virginia Municipal Bond Fund: On February 1, 2021, the Government Bond Fund and the West Virginia Municipal Bond Fund paid daily distributions declared from January 1, 2021 to January 31, 2021 totaling \$0.012 and \$0.015 per share, respectively, to common shareholders.

WesMark Funds

#### Report of Independent Registered Public Accounting Firm

# To the Shareholders and Board of Trustees of WesMark Funds

#### **Opinion on the Financial Statements**

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of WesMark Funds, comprising WesMark Small Company Growth Fund, WesMark Growth Fund, WesMark Balanced Fund, WesMark Government Bond Fund, WesMark West Virginia Municipal Bond Fund, and WesMark Tactical Opportunity Fund (the "Funds") as of December 31, 2020, the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the related notes, and the financial highlights for each of the five years in the period then ended of WesMark Small Company Growth Fund, WesMark Growth Fund, WesMark Balanced Fund, WesMark Government Bond Fund, and WesMark Small Company Growth Fund, WesMark Growth Fund, WesMark Balanced Fund, WesMark Government Bond Fund, and WesMark West Virginia Municipal Bond Fund, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the related notes, and the financial highlights for each of the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the related notes, and the financial highlights for each of the four periods in period then ended of WesMark Tactical Opportunities Fund (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2020, the results of their operations, the changes in net assets, and the financial highlights for the periods indicated above, in conformity with accounting principles generally accepted in the United States of America.

#### **Basis for Opinion**

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the Funds' auditor since 2011.

Cohn + Company

COHEN & COMPANY, LTD. Cleveland, Ohio February 25, 2021

Annual Report | December 31, 2020

# Shareholder Expense Example

As a shareholder of a Fund, you incur ongoing costs, including management fees and to the extent applicable, shareholder services fees and other Fund expenses. This example is intended to help you to understand your ongoing costs (in dollars) of investing in the Funds and to compare these costs with the ongoing costs of investing in other mutual funds. It is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from July 1, 2020 to December 31, 2020.

#### ACTUAL EXPENSES

The first line of the table below ("Actual Fund Return") provides information about actual account values and actual expenses. You may use the information in this section, together with the amount you invested, to estimate the expenses that you incurred over the period. Simply divide your account value by 1,000 (for example, an 8,600 account value divided by 1,000 = 8.6), then multiply the result by the number in the first section under the heading "Expense Paid During Period" to estimate the expenses attributable to your investment during this period.

#### HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The second line under each fund of the table below ("Hypothetical Fund Return") provides information about hypothetical account values and hypothetical expenses based on a Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. Thus, you should not use the hypothetical account values and expenses to estimate the actual ending account balance or your expenses for the period. Rather, these figures are required to be provided to enable you to compare the ongoing costs of investing in the Funds with other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. Therefore, the second line of the table below ("Hypothetical Fund Return") is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds.

(1) Expenses are equal to the Funds' annualized net expense ratios, multiplied by the average account value over the period, multiplied by 184/366 (to reflect the six month period).

(2) Annualized, based on the Fund's most recent fiscal half-year expenses.

W WesMark Funds

#### December 31, 2020 (Unaudited)

The Board is responsible for managing the Trust's business affairs and for exercising all the Trust's powers except those reserved for the shareholders. The following tables give information about each Board member and the senior officers of the Funds. Where required, the tables separately list Board members who are "interested persons" of the Funds (i.e., "Interested" Board members) and those who are not (i.e., "Independent" Board members). The WesMark Fund Complex consists of one Investment Company (comprising six portfolios). Unless otherwise noted, each Officer is elected annually; each Board member oversees all portfolios in the WesMark Fund Complex; and serves for an indefinite term.

#### VOTING PROXIES ON FUND PORTFOLIO SECURITIES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to securities held in a Fund's portfolio is available, without charge and upon request, by calling 1-800-864-1013. A report on Form N-PX of how the Funds voted any such proxies during the most recent 12-month period ended June 30 is available without charge and upon request by calling the Funds toll-free at 1-800-864-1013. This information is also available from the EDGAR database on the SEC's website at http://www.sec.gov.

#### **QUARTERLY PORTFOLIO SCHEDULE**

The Funds file with the SEC a complete schedule of their portfolio holdings, as of the close of the first and third quarters of its fiscal year, on Form N-PORT. These filings are also available on the SEC's website at http://www.sec.gov and may be reviewed and copied at the SEC's Public Reference Room in Washington, DC (call 1-800-SEC-0330 for information on the operation of the Public Reference Room). You may also access this information on the WesMark Funds website at www.wesmarkfunds.com by clicking on "Quarterly Reports", then selecting the name of the Fund.

#### WESMARK FUNDS SPECIAL MEETING OF SHAREHOLDERS- VOTING RESULTS

On January 4, 2021 the WesMark Funds held a special meeting of shareholders to consider the proposal set forth below:

Proposal 1: Election of Trustees: the election of J. Christopher Gardill and Gary J. Madich as Trustees with indefinite terms;

|                        | Number of  | % of Shares |
|------------------------|------------|-------------|
| J. Christopher Gardill | Shares     | Voted       |
| Affirmative            | 64,316,639 | 99.04%      |
| Withheld               | 621,923    | 0.96%       |
| Total                  | 64,938,562 | 100.00%     |

| Gary J. Madich | Number of<br>Shares | % of Shares<br>Voted |
|----------------|---------------------|----------------------|
| Affirmative    | 64,938,562          | 100.00%              |
| Withheld       | 0.00                | 0.00%                |
| Total          | 64,938,562          | 100.00%              |

Annual Report | December 31, 2020

## Additional Information

#### NOTICE TO STOCKHOLDERS

For the year ended December 31, 2020, 97.67% of the distributions from net investment income for West Virginia Municipal Bond Fund are exempt from federal income tax.

Of the ordinary income (including short-term capital gain) distributions made by the Funds during the year ended December 31, 2020, the percentages qualifying for the dividend received deduction available to corporate shareholders are as follows:

| Fund Name                 | Percentage |
|---------------------------|------------|
| Growth Fund               | 100.00%    |
| Balanced Fund             | 99.90%     |
| Tactical Opportunity Fund | 88.12%     |

For the year ended December 31, 2020, the following percentages of total ordinary dividends paid by the Funds are qualifying dividends which may be subject to a maximum tax rate of 15%, as provided for by the Jobs and Growth Tax Relief Act of 2003. Complete information will be reported in conjunction with the reporting of your distributions on Form 1099-DIV. The percentages were as follows:

| Fund Name                 | Percentage |
|---------------------------|------------|
| Growth Fund               | 100.00%    |
| Balanced Fund             | 100.00%    |
| Tactical Opportunity Fund | 100.00%    |

Pursuant to Section 852(b)(3) of the Internal Revenue Code, Small Company Growth Fund, West Virginia Municipal Bond Fund, Growth Fund, Balanced Fund, and Tactical Opportunity Fund designated \$9,440,746, \$49,168, \$26,186,863, \$2,422,946, and \$632,475, respectively as long-term capital gain dividends.

December 31, 2020 (Unaudited)

Basis points – a unit that is equal to 1/100th of 1% and is used to denote the change in a financial instrument.

**Collateralized Mortgage Obligation** – complex mortgage backed securities that allocate payments and prepayments from an underlying mortgage pools among holders of different classes or tranches of the CMO.

**Commercial Mortgage Securities (CMBS)** – fixed-income investment products that are backed by mortgages on commercial properties rather than residential real estate.

**Consumer Price Index (CPI)** – a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services.

**Covered call** – an options strategy where an investor holds a long position in an asset and writes (sells) call options on that same asset to generate an income stream.

**Duration** – a measure of a security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

Fannie Mae and Freddie Mac – government sponsored entities that receive support through federal subsidies, loan or other benefits. Floating rate debt – a debt instrument with a variable interest rate.

**HFRI Fund of Funds Composite Index** – The Hedge Fund Research, Inc. (HFRI) Fund of Funds Composite Index is an equal weighted index that consists of over 800 constituent hedge funds, including both domestic and offshore funds.

**LIBOR** – London Interbank Offered Rate – a benchmark interest rate at which major global banks lend to one another in the international interbank market for short-term loans.

**Maturity** – maturity date refers to the final payment date of a loan or other financial instrument, at which point the principal (and all remaining interest) is due to be paid.

**Mortgage Backed Securities** – a type of asset-backed security that is secured by a mortgage or collection of mortgages.

**Mortgage Pool** – a group of mortgages with similar interest rates and maturity dates "pooled together" for the issuance of a mortgagebacked security. Some mortgage-backed securities issued by Fannie Mae, Freddie Mac and Ginnie Mae are known as "pools" themselves. These are the simplest form of mortgage-backed security.

MSCI All World index - The MSCI All World Index captures large and mid-c stocks across 23 developed and 27 emerging markets.

**MSCI EAFA Index** – The MSCI EAFE Index is an equity index which captures large and mid cap representation across 21 Developed Markets countries around the world, excluding the US and Canada.

**MSCI Emerging Markets Index** – The MSCI Emerging Markets Index captures large and mid cap representation across 27 Emerging Markets (EM) countries.

**Options** – a contract which offers the buyer the right, but not the obligation, to buy (call option) or sell (put option) the underlying asset at an agreed-upon price during a certain period of time or on a specific date.

**Russell 2000 Index** – an index measuring the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000 serves as a benchmark for small-cap stocks in the United States.

S&P 500 – a market-capitalization-weighted index of the 500 largest publicly-traded companies in the U.S.

Annual Report | December 31, 2020

## Glossary of Terms

**S&P 600** – An index of small-cap stocks managed by Standard and Poor's. The S&P 600 SmallCap Index covers a broad range of small cap stocks in the United States. The index is weighted according to market capitalization and covers about 3-4% of the total market for equities in the United States.

**VIX Index** – The Volatility Index, or VIX, is a real-time market index created by the Chicago Board Options Exchange (CBOE), that represents the market's expectation of 30-day forward-looking volatility. Derived from the price inputs of the S&P 500 index options, it provides a measure of market risk and investors' sentiments.

Yield - the income return on an investment, such as the interest or dividends received from holding a particular security.

Yield curve – a line that plots the interest rates, at a set point in time, of bonds having equal credit quality but differing maturity dates.

**Yield spread** – the difference between yields on differing debt instruments of varying maturities, credit ratings and risk, calculated by deducting the yield of one instrument from another.

#### **Investment Ratings:**

| Description  | Standard and<br>Poor's Long-<br>Term Debt Rating | Moody's<br>Investors Service<br>Long-Term Bond<br>Rating |
|--|--|--|
| Highest rating available. Capacity to pay interest and repay principal is extremely strong. Carry smallest degree of investment risk.  | AAA  | Aaa  |
| Very strong capacity to pay interest and repay principal. Differ from AAA rated securities by very small degree. Still considered high grade obligation.   | AA   | Aa   |
| Strong capacity to pay interest and repay principal although is somewhat more susceptible to adverse effects of changes in circumstances and economic conditions than those rated higher. Considered upper medium grade obligation.  | А  | А  |
| Regarded as having an adequate capacity to pay interest and repay principal. Any adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay vs. those rated higher. Considered medium grade obligation.   | BBB  | Baa  |
| Judged to have speculative elements, but has less near-term vulnerability to default than other speculative=e issues. Faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments. | BB   | Ba   |
| Has greater vulnerability to default but currently has capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest or principal. Generally lack characteristics of the desirable investment.       | В  | В  |
| Currently identifiable vulnerability to default and is dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. Such issues may be in default or there may be present elements of danger with respect to principal or interest.        | CCC  | Caa  |
| Typically applied to debt subordinated to senior debt that is assigned an actual or implied CCC debt rating (by S&P). Represent obligations which are speculative in a high degree.  | CC   | Са   |
| Typically applied to debt subordinated to senior debt which has been assigned an actual or implied CCC-debt rating (by S&P). Represents the lowest rated class of bonds.   | С  | С  |

Credit rating firms, such as Standard & Poor's and Moody's, use different designations consisting of upper- and lower-case letters 'A' and 'B' to identify a bond's credit quality rating. 'AAA' and 'AA' (high credit quality) and 'A' and 'BBB' (medium credit quality) are considered investment grade. Credit ratings for bonds below these designations ('BB', 'B', 'CCC', etc.) are considered low credit quality, and are commonly referred to as "junk bonds."
