IMPORTANT INFORMATION

The views expressed in this report are those of the MAI Managed Volatility Fund (the "Fund") managers as of August 31, 2020, and may not reflect their views on the date this report is first published or anytime thereafter. These views are intended to assist shareholders of the Fund in understanding their investments in the Fund and do not constitute investment advice.

An investment in the Fund is subject to risk, including the possible loss of principal amount invested. The Fund may invest in securities issued by smaller and medium-sized companies, which typically involves greater risk than investing in larger, more established companies. Selling call options risk occurs if the Fund is required to sell an underlying security and forego gains if the market price exceeds the exercise price before the expiration date. Selling put options risk occurs if the Fund is required to buy an underlying security and forego gains if the market price is below the exercise price before the expiration date. Option risks include, but are not limited to, the possibility of an imperfect correlation between the movement in the options' prices and that of the securities/indices hedged (or used for cover), which may render a given hedge unable to achieve its objective;

possible loss of the premium paid for options; and potential inability to benefit from the appreciation of an underlying security above the exercise price. ADRs (American Depositary Receipt) may be subject to international trade, currency, political, regulatory and diplomatic risks. The Fund is also subject to other risks, such as fixed-income securities risk, which are detailed in the Fund's prospectus. Diversification does not assure a profit or protect against a loss in a declining market.

A **put** is an option contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying asset at a set price within a specified time. A **cash-secured put** is a put for which the writer deposits an amount of cash equal to the option's exercise price. A **call** is an option contract giving the owner the right (but not the obligation) to buy a specified amount of an underlying security at a specified price within a specified time. A **covered call** is an options strategy whereby an investor holds a (long) position in an asset and writes (sells) call options on that same asset in an effort to, potentially, generate increased income from the asset. A **call option is out-of-the-money** if the stock price is below its strike price and a **put option is out-of-the-money** if the stock price is above its strike price. The **spread to strike price** is the difference between the current price of the security and the strike price. **Strike price** is the price at which a specific options contract can be exercised. **Beta** is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market. **Premium** realized through the sale of options is not distributable as quarterly income. **Sharpe ratio** measures risk-adjusted performance. The greater a portfolio's sharpe ratio, the better its risk-adjusted performance has been. **Standard deviation** is a statistical measure of the volatility of the fund's returns. In general, the higher the standard deviation, the greater the volatility of the return. The **CBOE S&P 500 BuyWrite Index (BXM)** tracks the performance of a hypothetical at-the-money buy-write strategy on the S&P 500. Data is available on the index going back to June 30, 1986. One cannot invest directly in an index.

MAI MANAGED VOLATILITY FUND

A MESSAGE TO OUR SHAREHOLDERS (Unaudited)
AUGUST 31, 2020

Dear Shareholder,

The Fund seeks to achieve long-term capital appreciation and income; however, we differ from a traditional long equity fund in our equity exposure and use of an option overlay strategy. Premiums received from writing options provide a potential source of return to the Fund that is not dependent on economic growth.

For the fiscal year ending August 31, 2020, the MAI Managed Volatility Fund's (the "Fund") Institutional Class returned 2.42%. Over the same period, the S&P 500® Index (the "S&P 500") gained 21.94%. During the fiscal year, the CBOE Volatility Index ("VIX"), a measure of market risk, jumped 39% as it started the fiscal year at 18.98, hit a low of 11.54 on November 26th, spiked to an all-time high of 82.69 on March 16, and closed the fiscal year at 26.41. Please note, that the range on the VIX from low to high of 71.15 is an all-time record illustrating that we had unique conditions as the market moved from a low VIX environment to a high VIX environment in a short period of time before moderating later in the fiscal year.

It was a very challenging period for option selling strategies due to the sharp 34% five week decline the market experienced in February and March, which was then followed by an almost 58% rally from the lows on March 23 to the end of the fiscal year on August 31. For example, the CBOE S&P 500 BuyWrite Index ("BXM"), is perhaps the most widely known option-selling index and follows a straightforward rules-based approach. During the fiscal year, the BXM fell 5.03% compared to the Fund's gain of 2.42%. This strategy is not the strategy for the Fund as our approach seeks to be more flexible. This strategy helps mitigate the risk of being whipsawed during bouts of market volatility, like the significant market advance that occurred in late March and April.

We believe that options selling has the potential to produce attractive risk-adjusted returns and that the Fund is a "better mousetrap" than an approach like the BXM. With the VIX at 26.41, option pricing is currently elevated relative to history as the 10 year historical average on the VIX is only 17.34. This provides us the potential to generate higher returns. We remain personally invested in the strategy.

Consistent with our thoughts since inception, we believe that the combination of seeking equity contribution, option premiums, dividends and interest income has positioned the Fund to experience less downside deviation than traditional equity investment strategies by, in effect, mitigating volatility.

The macroeconomic environment remains tumultuous with a litany of well-known risks including COVID-19 and related government actions, trade wars, the upcoming elections, and an unprecedented response from the Federal Reserve and other central banks. Depending on how the aforementioned are resolved we could see significant volatility to the upside or downside. And while we could speculate on the second and third order effects, we think it is more important to try to position the strategy to be successful in as many outcomes as possible. We've done this by maintaining a shorter than average duration in our option portfolio, diversifying our strike prices and expirations, and proactively closing out positions when we've captured a satisfactory amount of return.

We thank you for your support.
Sincerely,

Seth E. Shalov

Kurt D. Nye

Richard J. Buoncore

MAI MANAGED VOLATILITY FUND
PERFORMANCE CHART AND ANALYSIS (Unaudited)
AUGUST 31, 2020

The following chart reflects the change in the value of a hypothetical \$50,000 investment in the Institutional Class, including reinvested dividends and distributions, in the MAI Managed Volatility Fund (the "Fund") compared with the performance of the benchmark, the S&P 500 Index ("S&P 500"), since inception. The S&P 500 is a broad-based measurement of the U.S. stock market based on the performance of 500 widely held large capitalization common stocks. The total return of the index includes the reinvestment of dividends and income. The total return of the Fund includes operating expenses that reduce returns, while the total return of the index does not include expenses. The Fund is professionally managed, while the index is unmanaged and is not available for investment.

Comparison of Change in Value of a \$50,000 Investment
MAI Managed Volatility Fund - Institutional Class vs. S&P 500 Index

Average Annual Total Returns
Periods Ended August 31, 2020

	One Year	Five Year	Since Inception*
MAI Managed Volatility Fund - Institutional Class	2.42%	5.30%	5.48%
MAI Managed Volatility Fund - Investor Class	2.22%	5.05%	5.14%
S&P 500® Index (since September 23, 2010)	21.94%	14.46%	14.45%

* Institutional Class and Investor Class commenced operations on September 23, 2010, and December 2, 2010, respectively.

Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than original cost. As stated in the Fund's prospectus, the annual operating expense ratios (gross) for Institutional Class and Investor Class are 1.13% and 5.59%, respectively. However, the Fund's adviser has contractually agreed to waive its fee and/or reimburse Fund expenses to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding all taxes, interest, acquired fund fees and expenses, dividends on short sales, brokerage costs, and extraordinary expenses) to 0.99% and 1.24%, for the Institutional Class and Investor Class, respectively, through January 1, 2021 (the "Expense Cap"). The Expense Cap may be raised or eliminated only with the consent of the Board of Trustees. The net operating expenses after fee waiver and/or expense reimbursements are 1.02% and 1.27% for the Institutional Class and Investor Class, respectively. The adviser may be reimbursed by the Fund for fees waived and expenses reimbursed by the adviser pursuant to the Expense Cap if such payment is made within three years of the fee waiver or expense reimbursement and does not cause the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to exceed the lesser of (i) the then-current Expense Cap and (ii) the Expense Cap in place at the time the fees/expenses were waived/reimbursed. Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement will increase if exclusions from the Expense Cap apply. During the period, certain fees were waived and/or expenses reimbursed; otherwise, returns would have been lower. The performance table and graph do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Returns greater than one year are annualized. For the most recent month-end performance, please call (877) 414-7884.

MAI MANAGED VOLATILITY FUND
NOTES TO FINANCIAL STATEMENTS
AUGUST 31, 2020

Organization

The MAI Managed Volatility Fund (the "Fund") is a diversified portfolio of Forum Funds (the "Trust"). The Trust is a Delaware statutory trust that is registered as an open-end, management investment company under the Investment Company Act of 1940, as amended (the "Act"). Under its Trust Instrument, the Trust is authorized to issue an unlimited number of the Fund's shares of beneficial interest without par value. The Fund currently offers two classes of shares: Institutional Class and Investor Class. Institutional Class and Investor Class commenced operations on September 23, 2010, and December 2, 2010, respectively. The Fund's investment objective is income and long-term capital appreciation. Prior to September 28, 2015, the Fund was named Dividend Plus Income Fund.

Summary of Significant Accounting Policies

The Fund is an investment company and follows accounting and reporting guidance under Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946, "Financial Services – Investment Companies." These financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements, and the reported amounts of increases and decreases in net assets from operations during the fiscal year. Actual amounts could differ from those estimates. The following summarizes the significant accounting

policies of the Fund:

Security Valuation – Securities are valued at market prices using the last quoted trade or official closing price from the principal exchange where the security is traded, as provided by independent pricing services on each Fund business day. In the absence of a last trade, securities are valued at the mean of the last bid and ask price provided by the pricing service. Debt securities may be valued at prices supplied by a fund's pricing agent based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics such as rating, interest rate and maturity. Exchange-traded options for which the last quoted sale price is outside the closing bid and ask price will be valued at the mean of the closing bid and ask price. Short-term investments that mature in sixty days or less may be valued at amortized cost.

The Fund values its investments at fair value pursuant to procedures adopted by the Trust's Board of Trustees (the "Board") if (1) market quotations are not readily available or (2) the Adviser, as defined in Note 3, believes that the values available are unreliable. The Trust's Valuation Committee, as defined in the Fund's registration statement, performs certain functions as they relate to the administration and oversight of the Fund's valuation procedures. Under these procedures, the Valuation Committee convenes on a regular and ad hoc basis to review such investments and considers a number of factors, including valuation methodologies and significant unobservable inputs, when arriving at fair value.

The Valuation Committee may work with the Adviser to provide valuation inputs. In determining fair value, the Valuation Committee may consider inputs and market-based data that may be considered non-representative information. Adviser inputs may include an income-based approach in which the anticipated future cash flows of the investment are discounted in determining fair value. Discounts may also be applied based on the nature or duration of any restrictions on the disposition of the investments. The Valuation Committee performs regular reviews of valuation methodologies, key inputs and assumptions, disposition analysis and market activity.

Fair valuation is based on subjective factors and, as a result, the fair value price of an investment may differ from the security's market price and may not be the price at which the asset may be sold. Fair

MAI MANAGED VOLATILITY FUND
NOTES TO FINANCIAL STATEMENTS
AUGUST 31, 2020

valuation could result in a different Net Asset Value ("NAV") than a NAV determined by using market quotes.

GAAP has a three-tier fair value hierarchy. The basis of the tiers is dependent upon the various "inputs" used to determine the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

Level 1 - Quoted prices in active markets for identical assets and liabilities.

Level 2 - Prices determined using significant other observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.). Short-term securities with maturities of sixty days or less are valued at amortized cost, which approximates market value, and are categorized as Level 2 in the hierarchy. Municipal securities, long-term U.S. government obligations and corporate debt securities are valued in accordance with the evaluated price supplied by a pricing service and generally categorized as Level 2 in the hierarchy. Other securities that are categorized as Level 2 in the hierarchy include, but are not limited to, warrants that do not trade on an exchange, securities valued at the mean between the last reported bid and ask quotation and international equity securities valued by an independent third party with adjustments for changes in value between the time of the securities' respective local market closes and the close of the U.S. market.

Level 3 - Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The aggregate value by input level, as of August 31, 2020, for the Fund's investments is included in the Fund's Notes to Schedules of Investments and Call and Put Options Written.

Security Transactions, Investment Income and Realized Gain and Loss – Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Foreign dividend income is recorded on the ex-dividend date or as soon as possible after

determining the existence of a dividend declaration, but before exercising reasonable due diligence, which are accrued as applicable. Interest income is recorded on an accrual basis. Premium is amortized to the next call date above par and discount is accreted to maturity using the effective interest method. Identified cost of investments sold is used to determine the gain and loss for both financial statement and federal income tax purposes.

Written Options – When a fund writes an option, an amount equal to the premium received by the fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by the fund on the expiration date as realized gain from written options. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by the fund. The fund, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. Written options are non-income producing securities.

The values of each individual written option outstanding as of August 31, 2020, are disclosed in the Fund's Schedule of Call and Put Options Written.

Distributions to Shareholders – Distributions to shareholders are not reinvested in the fund, and are

MAI MANAGED VOLATILITY FUND
NOTES TO FINANCIAL STATEMENTS
AUGUST 31, 2020

declared and paid at least annually. Distributions to shareholders are recorded on the ex-dividend date. Distributions are based on amounts calculated in accordance with applicable federal income tax regulations, which may differ from GAAP. These differences are due primarily to differing treatments of income and gain on various investment securities held by the Fund, timing differences and differing characterizations of distributions made by the Fund.

Federal Taxes – The Fund intends to continue to qualify each year as a regulated investment company under Subchapter M of Chapter 1, Subtitle A, of the Internal Revenue Code of 1986, as amended (“Code”), and to distribute all of its taxable income to shareholders. In addition, by distributing in each calendar year substantially all of its net investment income and capital gains, if any, the Fund will not be subject to a federal excise tax. Therefore, no federal income or excise tax provision is required. The Fund files a U.S. federal income and excise tax return as required. The Fund’s federal income tax

after they are subject to an audit by the Internal Revenue Service for positions of three fiscal years after the year ended. As a result, by 2020, the Fund will be required to recognize, de-recognize or disclose.

Income and Expense Allocation – The Trust accounts separately for the assets, liabilities and operations of each of its investment portfolios. Expenses that are directly attributable to more than one investment portfolio are allocated among the respective investment portfolios in an equitable manner.

The Fund’s other expenses are allocated to the operations of the classes of shares. Income and losses on investments are allocated to each class of shares based on the class’ respective net assets to the total net assets of the Fund.

Commitments and Contingencies – In the normal course of business, the Fund enters into contracts that provide general indemnifications by the Fund to the counterparty to the contract. The Fund’s maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated; however, based on experience, the risk of loss from such claims is considered remote. The Fund has determined that none of these arrangements requires disclosure on the Fund’s balance sheet.

Fees and Expenses

Investment Adviser – MAI Capital Management, LLC (the “Adviser”) is the investment adviser to the Fund. Pursuant to an investment advisory agreement, the Adviser receives an advisory fee, payable monthly, from the Fund at an annual rate of 0.75% of the Fund’s average daily net assets.

Distribution – Foreside Fund Services, LLC serves as the Fund’s distributor (the “Distributor”). The Distributor is not affiliated with the Adviser or Atlantic Fund Administration, LEC, a wholly owned subsidiary of Apex US Holdings, LLC (d/b/a Apex Fund Services) (“Apex”) or their affiliates. The Trust has adopted a Rule 12b-1 plan under which the Fund pays the Distributor a fee up to 0.25% of the average daily net assets of the Investor Class for distribution services and/or the servicing of shareholder accounts. Because the Investor Class pays distribution fees on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. The Distributor may pay any fee received under the Rule 12b-1 plan to the Adviser or other financial intermediaries that provide distribution and shareholder services with respect to Investor Class shares. In addition to paying fees under the Rule 12b-1 plan, the Fund may pay service fees to financial intermediaries for administration, recordkeeping and other shareholder services associated with shareholders whose shares are held of record in omnibus accounts, other group accounts or accounts traded through registered securities clearing agents. If the Fund pays

MAI MANAGED VOLATILITY FUND
NOTES TO FINANCIAL STATEMENTS
AUGUST 31, 2020

shareholder service fees on an ongoing basis, over time these fees will increase the cost of your investment.

Other Service Providers – Apex provides fund accounting, fund administration, compliance and transfer agency services to the Fund. The fees related to these services are included in Fund services fees within the Statement of Operations. Apex also provides certain shareholder report production and EDGAR conversion and filing services. Pursuant to an Apex Services Agreement, the Fund pays Apex customary fees for its services. Apex provides a Principal Executive Officer, a Principal Financial Officer, a Chief Compliance Officer and an Anti-Money Laundering Officer to the Fund, as well as certain additional compliance support functions.

Trustees and Officers – Each Independent Trustee's annual retainer is \$31,000 (\$41,000 for the Chairman), and the Audit Committee Chairman receives an additional \$2,000 annually. The Trustees and Chairman may receive additional fees for special Board meetings. Each Trustee is also reimbursed for all reasonable out-of-pocket expenses incurred in connection with his or her duties as a Trustee, including travel and related expenses incurred in attending Board meetings. The amount of Trustees' fees attributable to the Fund is disclosed in the Statement of Operations. Certain officers of the Trust are also officers or employees of the above named service providers, and during their terms of office received no compensation from the Fund.

Expense Reimbursements and Fees Waived

The Adviser has contractually agreed to waive its fee and/or reimburse Fund expenses to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding all taxes, interest, acquired fund fees and expenses, dividends on short sales, brokerage costs, and extraordinary expenses) to 0.99% and 1.24%, of the Institutional Class and Investor Class, respectively, through at least January 1, 2021. The contractual waivers may be changed or eliminated at any time with consent of the Board. During the year ended August 31, 2020, fees waived were \$208,075.

The Adviser may be reimbursed by the Fund for fees waived and expenses reimbursed by the Adviser pursuant to the Expense Cap if such payment is made within three years of the fee waiver or expense reimbursement, and does not cause the total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to exceed the lesser of (i) the then-current expense cap, or (ii) the expense cap in place at the time the fees/expenses were waived/reimbursed. As of August 31, 2020, \$563,253 is subject to recapture by the Adviser.

Security Transactions

Investment transactions for the year ended August 31, 2020, excluding U.S. Government and Agency securities and short-term investments, were as follows:

Non-U.S. Government Obligations

	Purchases		Sales	
MAI Managed Volatility Fund	\$	11,345,948	\$	11,721,872

Investment transactions in U.S. Government and Agency securities for the year ended August 31, 2020, were as follows:

U.S. Government Obligations

	Purchases		Sales	
MAI Managed Volatility Fund	\$	7,478,906	\$	6,130,000

MAI MANAGED VOLATILITY FUND
NOTES TO FINANCIAL STATEMENTS
AUGUST 31, 2020

Summary of Derivative Activity

The volume of open derivative positions may vary on a daily basis as the Fund transacts derivative contracts in order to achieve the exposure desired by the Adviser. Premiums received on written options for the year ended August 31, 2020, for any derivative type that was held during the period is as follows:

Written Options \$ (30,521,012)

The Fund's use of derivatives during the year ended August 31, 2020, was limited to written options.

Following is a summary of the effect of derivatives on the Statement of Assets and Liabilities as of August 31, 2020:

Location:	Equity Risk
Liability derivatives:	
Call options written	\$ (5,819,877)
Put options written	(334,430)
Total liability derivatives	\$ (6,154,307)

Realized and unrealized gains and losses from derivatives on the Statement of Operations: August 31,

Location:	Equity Contracts
Net realized gain (loss) on:	
Written options	\$ (8,322,687)
Net change in unrealized appreciation (depreciation) on:	
Written options	\$ (1,863,680)

Asset (Liability) amounts shown in the table below represent amounts for derivative related investments at August 31, 2020. These amounts may be collateralized by cash or financial instruments.

	Gross Asset (Liability) as Presented in the Statement of Assets and Liabilities	Financial Instruments (Received)	Cash Collateral (Received)	Net Amount
Liabilities:	Liabilities	Pledged*	Pledged*	
Over-the-counter derivatives**	\$ (6,154,307)	\$ 6,154,307	\$ -	\$ -

* The actual financial instruments and cash collateral (received) pledged may be in excess of the amounts shown in the table. The table only reflects collateral amounts up to the amount of the financial instrument disclosed on the Statement of Assets and Liabilities

** Over-the-counter derivatives may consist of written options contracts. The amounts disclosed above represent the exposure to one or more counterparties. For further detail on individual derivative contracts and the corresponding unrealized appreciation (depreciation), see the Schedule of Call and Put Options Written.

Federal Income Tax

As of August 31, 2020, the cost of investments for federal income tax purposes is \$134,405,529 and the components of net unrealized appreciation were as follows:

MAI MANAGED VOLATILITY FUND
NOTES TO FINANCIAL STATEMENTS
AUGUST 31, 2020

Gross Unrealized Appreciation	\$	29,220,246
Gross Unrealized Depreciation		(6,818,758)
Net Unrealized Appreciation	\$	22,401,488

Distributions paid during the fiscal years ended as noted were characterized for tax purposes as follows:

		2020		2019
Ordinary Income	\$	1,456,394	\$	2,888,745
Long-Term Capital Gain	\$	2,196,381	\$	3,943,166

As of August 31, 2020, distributable earnings (accumulated loss) on a tax basis were as follows:

Undistributed Ordinary Income	\$	35,482
Capital and Other Losses		(9,318,220)
Unrealized Appreciation		22,401,488
Total	\$	13,118,750

The difference between components of distributable earnings on a tax basis and the amounts reflected in the Statement of Assets and Liabilities are primarily due to temporary book/tax differences related to wash sales, constructive sales, straddles, index options and equity return of capital.

For tax purposes, the current year post October loss was \$9,318,220 (realized during the period November 1, 2019 through August 31, 2020). This loss will be recognized for tax purposes on the first business day of the Fund's next fiscal year, September 1, 2020.

Underlying Investments in Other Pooled Investment Vehicles

The Fund currently meets the collateral requirements of a tri-party agreement between the prime broker, custodian and the Fund by investing a portion of its assets in the Fidelity Investments Money Market Government Portfolio - Class I and holding the certificate representing the Fund's interest in the Fidelity Investments Money Market Government Portfolio - Class I. As of August 31, 2020, the percentage of net assets invested in the Fidelity Investments Money Market Government Portfolio - Class I was 42.1%. The latest financial statements for the Fidelity Investments Money Market Government Portfolio - Class I can be found at www.sec.gov.

Subsequent Events

The global outbreak of the COVID-19 virus has caused negative effects on many companies, sectors, countries, regions, and financial markets in general, and uncertainty exists as to its long-term implications. The effects of the pandemic may adversely impact the Fund's assets and performance. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

and the Shareholders of MAI Managed Volatility Fund**

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of MAI Managed Volatility Fund, a series of shares of beneficial interest in Forum Funds (the "**Fund**"), including the schedules of investments and call and put options written, as of August 31, 2020, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the five-year period then ended, and the related notes (collectively referred to as the "**financial statements**"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of August 31, 2020, and the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and its financial highlights for each of the years in the five-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting

firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are subject to the standards and rules of the PCAOB and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting.

As part of our audits we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of August 31, 2020 by correspondence with the custodian and broker. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

BBD, LLP

We have served as the auditor of one or more of the Funds in the Forum Funds since 2009.

MAI MANAGED VOLATILITY FUND
 ADDITIONAL INFORMATION (Unaudited)
 AUGUST 31, 2020

Proxy Voting Information

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to securities held in the Fund's portfolio is available, without charge and upon request, by calling (877) 414-7884 and on the U.S. Securities and Exchange Commission's (the "SEC") website at www.sec.gov. The Fund's proxy voting record for the most recent twelve-month period ended June 30 is available, without charge and upon request, by calling (877) 414-7884 and on the SEC's website at www.sec.gov.

Availability of Quarterly Portfolio Schedules

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-PORT. Forms N-PORT are available free of charge on the SEC's website at www.sec.gov.

Shareholder Expense Example

As a shareholder of the Fund, you incur ongoing costs, including management fees, distribution (12b-1) fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from March 1, 2020 through August 31, 2020.

Actual Expenses – The first line under each share class of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during the period.

Hypothetical Example for Comparison Purposes – The second line under each share class of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only. Therefore, the second line of the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds.

ADDITIONAL INFORMATION (Unaudited)
AUGUST 31, 2020

	Beginning Account Value March 1, 2020	Ending Account Value August 31, 2020	Expenses Paid During Period*	Annualized Expense Ratio*
Institutional Shares				
Actual	\$ 1,000.00	\$ 1,046.86	\$ 5.09	0.99%
Hypothetical (5% return before expenses)	\$ 1,000.00	\$ 1,020.16	\$ 5.03	0.99%
Investor Shares				
Actual	\$ 1,000.00	\$ 1,046.25	\$ 6.38	1.24%
Hypothetical (5% return before expenses)	\$ 1,000.00	\$ 1,018.90	\$ 6.29	1.24%

* Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal half-year (184) divided by 366 to reflect the half-year period.

Federal Tax Status of Dividends Declared during the Fiscal Year

For federal income tax purposes, dividends from short-term capital gains are classified as ordinary income. The Fund designates 90.97% of its income dividend distributed as qualifying for the corporate dividends-received deduction (DRD) and 92.48% for the qualified dividend rate (QDI) as defined in Section 1(h)(11) of the Code. The Fund also designates 22.04% as short-term capital gain dividends exempt from U.S. tax for foreign shareholders (QSD). The Fund also designates 6.08% as qualified interest income exempt from U.S. tax for foreign shareholders (QII).

Trustees and Officers of the Trust

The Board is responsible for oversight of the management of the Trust's business affairs and of the exercise of all the Trust's powers except those reserved for the shareholders. The following table provides information about each Trustee and certain officers of the Trust. Each Trustee and officer holds office until the person resigns, is removed, or is replaced. Unless otherwise noted, the persons have held their principal occupations for more than five years. The address for all Trustees and officers is Three Canal Plaza, Suite 600, Portland, Maine 04101. The Fund's Statement of Additional Information includes additional information about the Trustees and is available, without charge and upon request, by calling (877) 414-7884.
