On February 23, 2021, Wells Fargo & Company (“Wells Fargo”) announced that it has entered into a definitive agreement to sell Wells Fargo Asset Management (“WFAM”) to GTCR LLC (“GTCR”) and Reverence Capital Partners, L.P. (“Reverence Capital Partners”). WFAM is the trade name used by the asset management businesses of Wells Fargo and includes Wells Fargo Funds Management, LLC, the investment manager to the Funds, Wells Capital Management Incorporated and Wells Fargo Asset Management (International) Limited, both registered investment advisers providing sub-advisory services to certain Funds, and Wells Fargo Funds Distributor, LLC, the Funds’ principal underwriter. Under the terms of the agreement, the purchase price is \$2.1 billion. As part of the transaction, Wells Fargo will own a 9.9% equity interest and will continue to serve as an important client and distribution partner.

The Funds’ Boards of Trustees (the “Boards”) will be asked to approve new investment management arrangements with the new company. If approved by the Boards, and to the extent required by applicable law, the new investment management arrangements with the new company will be presented to the

shareholders of each Fund for approval, and, if approved by shareholders, would take effect upon the closing of the transaction. The transaction is expected to close in the second half of 2021, subject to customary closing conditions.

Investment Objective

The Fund seeks long-term capital appreciation.

Fees and Expenses

These tables are intended to help you understand the various costs and expenses you will pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	None
Maximum deferred sales charge (load) (as a percentage of offering price)	None

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.40%
Distribution (12b-1) Fees	0.00%
Other Expenses	0.60%
Total Annual Fund Operating Expenses	1.00%
Fee Waivers	(0.60)%
Total Annual Fund Operating Expenses After Fee Waivers¹	0.40%

1. The Manager has contractually committed through November 30, 2021, to waive fees and/or reimburse expenses to the extent necessary to cap Total Annual Fund Operating Expenses After Fee Waiver at 0.40% for Institutional Class. Brokerage commissions, stamp duty fees, interest, taxes, acquired fund fees and expenses (if any), and extraordinary expenses are excluded from the expense cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

Example of Expenses

The example below is intended to help you compare the costs of investing in the Fund with the costs of investing in other funds. The example assumes a \$10,000 initial investment, 5% annual total return, and that fees and expenses remain the same

as in the tables above. To the extent that the Manager is waiving fees or reimbursing expenses, the example assumes that such waiver or reimbursement will only be in place through the date noted above. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

After:

1 Year	\$41
3 Years	\$259
5 Years	\$494
10 Years	\$1,170

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 165% of the average value of its portfolio.

Principal Investment Strategies

Under normal circumstances, we invest:

- at least 80% of the Fund’s net assets in equity securities of domestic issuers.

In pursuing the Fund’s investment objective, we seek to produce returns that are similar to those of the Russell 1000® Index, but with lower volatility over a full market cycle. We may invest in equity securities of any market capitalization, but will primarily invest in equity securities of large-capitalization companies, which we define as companies with market capitalizations within the range of the Russell 1000® Index at the time of purchase. The market capitalization range of the Russell 1000® Index was approximately \$816 million to \$1.8 trillion, as of October 31, 2020, and is expected to change frequently. We may invest in any sector, and at times we may emphasize one or more particular sectors.

Our investment process uses multiple risk models to evaluate and forecast the risks for all constituents of the Russell 1000® Index. We then construct a diversified portfolio of stocks with below average forecasted risk characteristics in an effort to achieve market-like returns with considerably less volatility than the U.S. equity market as a whole. We monitor the portfolio’s overall risk and the risk of each individual security and either rebalance the portfolio or sell one or more individual securities when those risks increase beyond acceptable levels.

Principal Investment Risks

An investment in the Fund may lose money, is not a deposit of Wells Fargo Bank, N.A. or its affiliates, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer’s products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments.

Growth/Value Investing Risk. Securities that exhibit growth or value characteristics tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund’s manager or sub-adviser in seeking to achieve the Fund’s investment objective may not produce expected returns, may cause the Fund’s shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Regulatory Risk. Pursuant to section 619 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and certain rules promulgated thereunder (collectively known as the “Volcker Rule”), if the Manager and/or its affiliates own 25% or more of the outstanding shares of the Fund after the permitted seeding period following the Fund’s inception, the Fund will be subject to restrictions on trading that will adversely impact the Fund’s ability to execute its investment strategy. Should this occur, the Fund may decide to liquidate, or the Manager and/or its affiliates may be required to reduce their ownership interests in the Fund, either of which may result in gains or losses, increased transaction costs and adverse tax consequences.

As of November 22, 2019, the Manager and/or its affiliates held approximately 81.06% of the Fund's shares in the form of a seed capital investment intended to enable the Fund to commence investment operations and/or achieve sufficient scale. This percentage may change over time.
