

COLUMBIA DIVIDEND INCOME FUND

Focusing on the cash flow for sustainable income

Identifies free cash flow as a source of dividends

The fund focuses on free cash flow yield to identify attractively valued securities and forecast a company's potential dividend actions. We believe cash flow analysis is a key indicator of a company's true profitability.

Focus on high-quality dividend payers

We seek companies with defensible business models and strong balance sheets — both of which are critical to providing downside protection. Our target companies have a history of long-term, sustainable profitability and cash flow from operations.

Conviction in disciplined companies

Disciplined companies often have a history of above-average dividend growth, which we believe is a sign of strong capital discipline. We believe these companies are more likely to generate consistent, risk-adjusted performance over time.

Overall Morningstar Rating

Class Inst

Class A

The Morningstar rating is for the indicated share classes only as of 06/30/21; other classes may have different performance characteristics. Among 1,141 Large Value funds, Morningstar Ratings are based on a Morningstar Risk-Adjusted Return measure.

Morningstar Percentile Rankings

Category: Large Value

	Class Inst (%)	Class A (%)	Total Funds
1-year	77	79	1210
3-year	12	14	1141
5-year	18	21	1012
10-year	6	9	740

Morningstar Rankings are based on annualized total returns (1 being most favorable and 100 being least).

Investment Objective

The fund seeks total return, consisting of current income and capital appreciation.

Growth of a \$10,000 Investment

Past performance does not guarantee future results. Illustration is based on a hypothetical \$10,000 investment in Institutional Class shares. All results shown assume reinvestment of dividends and capital gains.

The fund returns shown include the performance of Galaxy Strategic Equity Fund, a series of The Galaxy Fund and the predecessor to the fund, for periods prior to November 25, 2002.

The **Russell 1000 Index** tracks the performance of 1,000 of the largest U.S. companies, based on market capitalization. The **Russell 1000 Value Index** measures the performance of those Russell 1000 Index companies with lower price-to-book ratios and lower forecasted growth values. It is not possible to invest directly in an index.

Not all products and share classes are available through all firms.

* The fund's expense ratio is from the most recent prospectus.

The fund is available through an investment portfolio in the Future Scholar 529 Plan.

Performance data shown represents past performance and is not a guarantee of future results. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data shown. With sales charge performance is calculated with max sales charge of 5.75% for the A share and 1.00% CDSC for the C share. Please visit www.columbiathreadneedle.com for performance data current to the most recent month end. Class Adv, Inst, Inst 2, Inst 3 and R shares are sold at net asset value and have limited eligibility. Columbia Management Investment Distributors, Inc. offers multiple share classes, not all available through all firms, and the share class ratings may vary. Contact us for details.

¹ The returns shown for periods prior to the share class inception date (including returns since inception, which are since fund inception) include the returns of the fund's oldest share class. These returns are adjusted to reflect any higher class-related operating expenses of the newer share classes, as applicable. For more information please visit: www.columbiathreadneedleus.com/investor/investment-products/mutual-funds/appended-performance.

Returns shown assume reinvestment of distributions and do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares.

Investors should consider the investment objectives, risks, charges and expenses of a mutual fund carefully before investing. For a free prospectus or a summary prospectus, which contains this and other important information about the funds, visit www.columbiathreadneedle.com. Read the prospectus carefully before investing.

Portfolio Management

Scott L. Davis	41 years of experience
Michael S. Barclay, CFA	30 years of experience

Investment risks — **Market** risk may affect a single issuer, sector of the economy, industry or the market as a whole. **Value** securities may be unprofitable if the market fails to recognize their intrinsic worth or the portfolio manager misgauged that worth. **Foreign** investments subject the fund to risks, including political, economic, market, social and others within a particular country, as well as to currency instabilities and less stringent financial and accounting standards generally applicable to U.S. issuers. **Dividend** payments are not guaranteed and the amount, if any, can vary over time. A rise in **interest rates** may result in a price decline of fixed-income instruments held by the fund, negatively affecting its performance and NAV. Falling rates may result in the fund investing in lower yielding debt instruments, lowering the fund's income and yield. These risks may be heightened for longer maturity and duration securities. The fund may invest significantly in issuers within a particular **sector**, which may be negatively affected by market, economic or other conditions, making the fund more vulnerable to unfavorable developments in the sector.

▲ **Beta** measures a fund's risk relative to its benchmark. A beta of 1.00 indicates that the fund is as volatile as its benchmark. **R-squared** ranges from 0.00 to 1.00 and tells what percentage of an investment's movements is explained by movements in its benchmark index. **Sharpe ratio** divides a fund's gross return (excluding fees and expenses) in excess of the 90-day Treasury bill by the investment's standard deviation to measure risk-adjusted performance. **Standard deviation** is a statistical measure of the degree to which an individual value in a probability distribution tends to vary from the mean of the distribution. **Price-to-book ratio** is a stock's price divided by its book value, and may help determine if it is valued fairly. **Price-to-earnings ratio** is a stock's price divided by after-tax earnings over a trailing 12-month period, which serves as an indicator of value based on earnings. **Active Share** is a measure of the percentage of equity holdings in a portfolio that differ from the benchmark index as of month end. Active Share can be calculated as 100% minus the sum of the overlapping holdings of the portfolio and the index. A portfolio that is identical to the benchmark index will have an active share of 0%, while 100% indicates no overlap in holdings.

The **30-day SEC Yield** is an estimate of the fund's rate of investment income reflecting an estimated yield to maturity (assuming all current portfolio holdings are held to maturity), and it may not equal the fund's actual income distribution rate or the income paid to a shareholder's account. The yield shown reflects fee waivers in effect, if any. In the absence of such waivers, yields would be reduced. The yield will reflect an inflation adjustment that is attributable to any inflation-protected securities owned by the fund. This adjustment and the resulting yield can be positive (in the case of inflation) or negative (in the case of deflation).

Morningstar Percentile Rankings are based on the average annual total returns of the funds in the category for the periods stated. They do not include sales charges or redemption fees but do include operating expenses and the reinvestment of dividends and capital gains distributions. Share class rankings vary due to different expenses. If sales charges or redemption fees were included, total returns would be lower. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ used to rank the fund against other funds in the same category. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly excess performance, without any adjustments for loads (front-end, deferred, or redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Morningstar ratings for the overall-, three-, five- and ten-year periods for the A-share are 5 stars, 5 stars, 5 stars, and 5 stars and for the Inst-share are 5 stars, 5 stars, 5 stars, and 5 stars among 1,141, 1,141, 1,012 and 740 Large Value funds, respectively, and are based on a Morningstar Risk-Adjusted Return measure. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics.

Morningstar Analyst Rating™ for Institutional share class as of 06/30/2021. The Analyst Rating scale is Gold, Silver, Bronze, Neutral, and Negative. A Morningstar Analyst Rating of Gold, Silver, or Bronze reflects the Manager Research Group's conviction in a fund's prospects for outperformance. Analyst Ratings ultimately reflect the Manager Research Group's overall assessment, are overseen by an Analyst Rating Committee, and are continuously monitored and reevaluated at least every 14 months. For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to www.global.morningstar.com/managerdisclosures/.

Columbia Management Investment Distributors, Inc., is the distributor for the Future Scholar 529 College Savings Plan. Account Owners do not have any direct beneficial interests in the underlying mutual funds held by an Investment Portfolio of the Plan and, accordingly, have no rights as an owner or shareholder of such underlying fund. Separate fact sheets are available for the Future Scholar Investment Portfolios. Investors should consider the investment objectives, risks, charges and expenses associated with a municipal fund security before investing. Contact your financial advisor or visit www.columbiathreadneedle.com for a mutual fund prospectus or 529 plan's program brochure, which provides this and other important information. Read it carefully before investing. Before investing, also consider whether the investor's or beneficiary's home state offers any state tax or other state benefits such as financial aid, scholarship funds, and protection from creditors that are only available for investments in such state's qualified tuition program.
