Objective

The fund seeks to maximize total return.

Strategy

The DWS Communications Fund is a sector-based, equity focused strategy investing in telecommunications companies and related industries including cable/video distribution, media, enabling technologies, social media and internet related companies. The team seeks to capitalize on growth by casting a wide net in search of the best opportunities, looking for companies that offer products, services, and innovative technologies - from traditional to newer data-centric communications and corporate networks.

EXPENSE RATIO (as of latest prospectus)

Class	Net	Gross	Contractual Waiver
A	1.63%	1.66%	04/30/2022
C	2.38%	2.43%	04/30/2022
INST	1.38%	1.41%	04/30/2022

Without a waiver, returns would have been lower and any rankings/ratings might have been less favorable.

Performance is historical and does not guarantee future results. Investment returns and principal fluctuate so your shares may be worth more or less when redeemed. Current performance may differ from the data shown. Please visit www.dws.com for the fund's most recent month-end performance. Performance includes reinvestment of all distributions. Index returns assume reinvestment of all distributions and do not reflect fees or expenses. It is not possible to invest directly in an index. Not all share classes are available to all investors. A minimum investment of \$1 million is required to open an account for Institutional shares.

* Returns prior to inception reflect Class A performance, adjusted for higher operating expenses and, where indicated, for sales charges. Performance of share classes may vary.

SECTOR ALLOCATION (6/30/21)

¹ The MSCI World Index tracks the performance of stocks in select developed markets around the world, including the United States.

² MSCI World Communication Services Index measures the performance of the global telecom sector and is designed to capture the large and mid cap segments across 23 Developed Markets (DM) countries. All securities in the index are classified in the Communication Services sector as per the Global Industry Classification Standard (GICS®)

³ Beta is a historical measurement of a fund's sensitivity to the movements of the fund's benchmark index. A fund with a beta greater than one is more volatile than the benchmark. A fund with a beta less than one is less volatile. Beta is based on a three-year period relative to the index. Average market capitalization measures the size of the companies in which the fund invests. ⁴Source: Morningstar, Inc. as of 05/31/2021.

War, terrorism, economic uncertainty, trade disputes, public health crises (including the recent pandemic spread of the novel coronavirus) and related geopolitical events could lead to increased market volatility, disruption to U.S. and world economies and markets and may have significant adverse effects on the fund and its investments.

Fund risk: Stocks may decline in value. Any fund that concentrates in a particular segment of the market will generally be more volatile than a fund that invests more broadly. Investing in foreign securities presents certain risks, such as currency fluctuations, political and economic changes, and market risks. Emerging markets tend to be more volatile and less liquid than the markets of more mature economies, and generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Investing in derivatives entails special risks relating to liquidity, leverage and credit that may reduce returns and/or increase volatility. This fund is non-diversified and can take larger positions in fewer issues, increasing its potential risk. The fund may lend securities to approved institutions. This fund may use ESG criteria. ESG criteria in a fund's investment strategy does not guarantee a return or protect against a loss, limits the types and number of investment opportunities available to the fund and, as a result, the fund may underperform other funds that do not have an ESG focus.
