Goal/Approach

The fund seeks long-term growth of capital. The fund invests, under normal circumstances, at least 80% of its net assets in equity securities of small-cap U.S. companies. The fund currently considers small-cap companies to be those with total market capitalizations, at the time of purchase, that are equal to or less than the total market capitalization of the largest company included in the Russell 2000 Value Index.

Growth of a \$10,000 Investment¹

A hypothetical \$10,000 investment in the fund's Class A shares on 2/1/00 would have been worth \$106,040 on 6/30/21.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

DUE TO RECENT MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN. Investors should note that the fund's short-term performance is highly unusual, in part to unusually favorable market conditions, and is unlikely to be repeated or consistently achieved in the future.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. The net expense ratio(s) reflect a contractual expense reduction agreement through 2/1/2022, without which, the returns would have been lower. Total Expense Ratios: Class A 1.42%, Class C 2.31%, Class I 1.07%, Class Y 1.01%. Net Expense Ratios: Class A 1.42%, Class C 2.31%, Class I 1.07%, Class Y 1.00%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

¹The total return performance figures for Class A, Class C and Class Y shares of the fund represent the performance of the fund's Class I shares for periods prior to 8/1/16, the inception date for Class A, Class C and Class Y shares, and the performance of Class A, Class C and Class Y, respectively, from that inception date. Performance reflects the applicable class's distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 6/30/2021 and is subject to change at any time. ³Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁴Source: FactSet. The Russell 2000[®] Value Index measures the performance of the small-cap value segment of the U.S. equity universe. It includes those Russell 2000 companies that are considered more value-oriented relative to the overall market as defined by Russell's leading style methodology. The Russell 2000[®] Value Index is constructed to provide a comprehensive and unbiased barometer for the small-cap value segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect value characteristics. Investors cannot invest directly in any index.

Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Small and midsize company stocks tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
