

## Fund Information

**Began operations:** October 1, 2008

**Objective:** The fund's investment objective is to provide long-term growth of capital while providing current income.

**Distinguishing characteristics:** This strategy invests primarily in companies outside of the U.S., including the emerging markets. It focuses on well-established companies with strong earnings that often pay dividends, which can help reduce volatility. Historically, its dividend-income focus has helped the strategy provide less volatility than its peers.\*

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

There may have been periods when the results lagged the index(es). Certain indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index. Results for Lipper indexes/averages do not reflect sales charges. Lipper categories are dynamic and averages may have few funds, especially over longer periods. Lipper indexes track the largest mutual funds (no more than 30), represented by one share class per fund, in the corresponding Lipper category. Lipper averages reflect the current composition of all eligible mutual funds (all share classes) within a given category. To see the number of funds included in the Lipper category for each fund's lifetime, please see the quarterly statistical update, available on [www.capgroup.com](http://www.capgroup.com).

Portfolios are managed, so holdings will change. Certain fixed income and/or cash and equivalents holdings may be held through individual mutual funds managed by the investment adviser or its affiliates that are not offered to the public.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. Returns for one year or less are not annualized, but calculated as cumulative total returns.

<sup>1</sup>Expense ratios are as of each fund's prospectus available at the time of publication.

<sup>2</sup>The portfolio managers shown are as of each fund's prospectus available at the time of publication.

<sup>3</sup>YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above.

<sup>4</sup>Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds' shares sold after the funds' date of first offering.

<sup>5</sup>Figures include convertible securities; totals may not reconcile due to rounding. Methodology notes: The equity breakdown by revenue reflects the portfolio's publicly traded equity holdings and excludes cash (and fixed income securities, if applicable). Underlying revenue data were compiled by MSCI and account for disparities in the way companies report their revenues across geographic segments. MSCI breaks out each company's reported revenues into country-by-country estimates. MSCI provides revenue data figures based on a proprietary, standardized model. Revenue exposure at the portfolio and index level was calculated by using FactSet, which takes these company revenue exposures and multiplies by the company's weighting in the portfolio and index. In this breakdown, Israel has been included in Europe.

<sup>6</sup>The information shown does not include cash and cash equivalents. This includes shares of money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

<sup>7</sup>Totals may not reconcile due to rounding.

<sup>8</sup>Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

#### TERMS & DEFINITIONS

**International Growth and Income Fund Historical Benchmarks:** International Growth and Income Fund Historical Benchmarks Index returns reflect the results of the MSCI World ex USA Index through 06/30/2011 and the MSCI All Country World ex USA Index, the fund's current primary benchmark, thereafter. MSCI World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results of developed markets, excluding the United States. The index consists of more than 20 developed market country indexes. MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends net of withholding taxes. These indexes are unmanaged, and their results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

**Lipper International Funds:** Lipper International Funds Index is an equally weighted index of funds that invest assets in securities with primary trading markets outside the United States. The results of the underlying funds in the index include the reinvestment of dividends and capital gain distributions, as well as brokerage commissions paid by the funds for portfolio transactions and other fund expenses, but do not reflect the effect of sales charges, account fees or U.S. federal income taxes.

**MSCI All Country World Index (ACWI) ex USA:** MSCI All Country World ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, excluding the United States. The index consists of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
