Goal/Approach

The fund seeks capital appreciation. To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in the stocks of small-cap companies. The fund currently considers small-cap companies to be those companies with market capitalizations that fall within the range of companies in the Russell 2000 Value Index at the time of purchase.

Growth of a \$10,000 Investment

A hypothetical \$10,000 investment in the fund's Class A shares on 12/17/08 would have been worth \$50,349 on 6/30/21.

This does not reflect the 5.75% maximum front-end sales load applicable to Class A shares which, if reflected, would have lowered performance. Assumes reinvestment of dividends and capital gains. Performance for the fund's other share classes would vary.

DUE TO RECENT MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN. Investors should note that the fund's short-term performance is highly unusual, in part to unusually favorable market conditions, and is unlikely to be repeated or consistently achieved in the future.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. The net expense ratio(s) reflect a contractual expense reduction agreement through 3/31/2022, without which, the returns would have been lower. Total Expense Ratios: Class A 1.44%, Class C 2.39%, Class I 1.03%, Class Y 0.98%. Net Expense Ratios: Class A 1.30%, Class C 2.05%, Class I 1.03%, Class Y 0.98%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

¹The total return performance figures for Class Y shares of the fund represent the performance of the fund's Class A shares for periods prior to 7/1/13, the inception date for Class Y shares, and the performance of Class Y from that inception date. Performance reflects the applicable class's distribution/servicing fees since the inception date. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 6/30/2021 and is subject to change at any time.

³Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁴Source: FactSet. The Russell 2000® Value Index measures the performance of the small-cap value segment of the U.S. equity universe. It includes those Russell 2000 companies that are considered more value-oriented relative to the overall market as defined by Russell's leading style methodology. The Russell 2000® Value Index is constructed to provide a comprehensive and unbiased barometer for the small-cap value segment. The index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set and that the represented companies continue to reflect value characteristics. Investors cannot invest directly in any index.

Risks: **Equities** are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. **Multi-manager** risk means each sub adviser makes investment decisions independently, and it is possible that the investment styles of the sub advisers may not complement one another. Consequently, the fund's exposure to a given stock, industry or investment style could be greater or smaller than if the fund had a single adviser. **Small and midsized company stocks** tend to be more volatile and less liquid than larger company stocks as these companies are less established and have more volatile earnings histories. *Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.*
