**What Are the Risks?**

All investments involve risks, including possible loss of principal. The fund's concentration in real estate securities involves special risks, such as declines in the value of real estate and increased susceptibility to adverse economic or regulatory developments affecting the sector. The fund's investments in REITs involves additional risks, since REITs typically are invested in a limited number of projects or in a particular market segment they are more susceptible to adverse developments affecting a single project or market segment than more broadly diversified investments. These and other risks are described more fully in the fund's prospectus.

**Glossary**

**Beta:** A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.
