Past performance is no guarantee of future results. Performance prior to 01 Mar 2013 reflects investment strategies under a different sub-advisor that differed slightly from those currently in place. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit [nuveen.com](http://nuveen.com). Performance shown for benchmark since inception is as of the Fund's oldest share class.

Class I shares have no sales charge and may be purchased by specified classes of investors. Class C shares have a 1% CDSC for redemptions within less than one year, which is not reflected in the one-year total return. Effective Jul 2018, Class C shares automatically convert to Class A shares during the month in which the 10-year anniversary (effective Mar 2021, this will change to 8-year anniversary) of the share purchase occurred. Since Inception returns for Class C shares for periods longer than 10 years reflect the performance of Class A shares after the deemed 10-year conversion to Class A shares within such periods.

### Calendar year returns (%)

	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021 YTD
Class I	11.11	31.73	8.95	0.29	4.76	19.30	-2.34	6.35	-0.79	22.39
Class A without sales charge	10.83	31.37	8.69	0.06	4.49	19.00	-2.57	6.07	-1.03	22.21
Russell 1000 Index	16.42	33.11	13.24	0.92	12.05	21.69	-4.78	31.43	20.96	14.95
Morningstar Long-Short Equity Cat. Avg	5.15	14.62	2.92	-2.02	2.34	11.18	-6.29	11.90	7.89	9.18

### Expense ratios (%)

	Class I	Class A	Class C
Total annual fund operating expenses	2.85	3.09	3.84
Total net annual fund operating expenses after fee waivers and/or expense reimbursement	2.73	2.98	3.72
Net expenses excluding dividends on securities sold short expense and prime brokerage expense	1.35	1.60	2.35

Expense ratios are based on the Fund's most recent fiscal year end. Other expenses include Dividends on Securities Sold Short and Prime Broker, which are incurred in connection with the Fund's short sales of securities. The net expense ratio reflects a contractual commitment by the Fund's investment adviser to waive fees and/or reimburse expenses through 31 Jul 2022. Absent the waiver and/or reimbursement, expenses would be higher and total returns would be less. Please see the prospectus for details.

## Fund description

The Fund establishes long and short positions primarily in large-capitalization stocks of U.S. companies. The strategy seeks long-term capital appreciation through balancing quantitative analysis with fundamental research in constructing a portfolio of securities of companies that we believe to have above-average growth potential at attractive prices.

## Portfolio management

Effective 01 Jun 2021, Claire Ross was added as a portfolio manager on the strategy.

**Scott Tonneson, CFA** | 26 years industry experience

**David A. Chalupnik, CFA** | 36 years industry experience

## Morningstar rankings and percentiles

Morningstar Long-Short Equity Category

	1 year		3 years		5 years		10 years	
	Rank	%	Rank	%	Rank	%	Rank	%
Class I	45/202	23	91/179	50	15/151	12	6/49	10
Class A	49/202	24	95/179	52	20/151	16	7/49	11
Class C	55/202	27	107/179	60	30/151	23	11/49	20

Morningstar ranking/number of funds in category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less. Morningstar percentile rankings are the Fund's total return rank relative to all the funds in the same Morningstar Category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

For the period ended 30 Jun 2021, Morningstar rated this Fund's I shares, for the overall, three-, five-, and 10-year periods (if applicable). The Class I shares received 4, 3, 5, and 4 stars among 179, 179, 151, and 49 Long-Short Equity Funds, respectively. These ratings are for Class I shares only; other classes may have different performance characteristics. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower. For the most current ratings, please visit [nuveen.com](http://nuveen.com).

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2021 Morningstar, Inc. ## Glossary

**Gross exposure** provides an indication of the total gross value of the Fund's market investment exposure reflecting a summation of the absolute value of all long and short positions in the portfolio across asset class investment categories. This is an indication of the scale of the Fund's total investment positions regardless of direction. **Long** is the buying of a security with the expectation that the asset will rise in value.

**Net exposure** provides an indication of the Fund's directional exposure to the market at period end and reflects the value of the portfolio's long positions minus the short positions across asset class investment categories. This is an indication of the Fund's sensitivity to market movements. **Short** is a security position created by selling borrowed securities in anticipation of a market decline.

**Russell 1000 Index** measures the performance of the large cap segment of the U.S. equity universe which includes approximately 1000 of the largest securities based on a contribution of their market cap and current index measurement. **It is not possible to invest directly in an index.**

## A word on risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Prices of **equity securities** may change significantly over short or extended periods of time. The Fund sells securities that it has borrowed but does not own ("**short sales**"), which is a speculative technique. The Fund will suffer a loss when the price of a security that it holds long decreases or the price of a security that it has sold short increases. Losses on short sales arise from increases in the value of the security sold short, and therefore are theoretically unlimited. Because the Fund invests in both long and short equity positions, the Fund has overall exposure to changes in value of equity securities that is far greater than its net asset value. This may magnify gains and losses and increase the volatility of the Fund's returns. In addition, the use of short sales will increase the Fund's expenses. More information on these risks considerations, as well as information on other risks to which the Fund is subject, such as frequent trading, futures contract, and large cap stock risks, are included in the Fund's prospectus.
