

Diversified International Equity

30 June 2021

Strategy description

The strategy aims to provide long-term capital growth by investing primarily in the shares of companies domiciled in developed (ex-US) and emerging market countries. The strategy is research-driven and focused on bottom-up stock selection, not bold calls on macro or geopolitical conditions.

Index

MSCI ACWI ex-US Index

Risk warning

- The potential for profit is accompanied by the possibility of loss.
- Equity markets are subject to many factors, including economic conditions, government regulations, market sentiment, local and international political events, and environmental and technological issues that may impact return and volatility.
- There is a risk that an investment will decline in value. Equity stocks of small-cap companies carry greater risks including that they may be more volatile and less liquid than equity stocks of larger, more established companies.

Composite performance (%)

	3M	YTD	1YR	3YR	5YR	10YR
Diversified International Equity (gross)	5.01	8.42	39.77	10.94	12.22	7.68

*Portfolio security weight minus the index security weight.

Due to rounding, figures and percentages shown may not add to the total or equal 100%.

Figures relating to the index are shown for comparative purposes only. The two methods of calculation may not be identical and it is not possible to invest in an index.

About Principal Global Equities

Principal Global Equities is a specialized investment management group within Principal Global Investors. The investment team is powered by an intensive research effort encompassing focused fundamental analysis, a deep understanding of the principles of behavioral finance and specialized expertise in equity factor risk premiums. Our objective is to deliver competitive risk-adjusted returns across a diverse range of investment solutions to help clients meet their investment goals.

Investment philosophy

We believe that fundamentally based, bottom-up stock-selection is the most reliable and repeatable source of consistent performance and wealth generation over time. We also recognize that persistent behavioral biases and structural impediments to capital flows create market inefficiencies and opportunities.

We seek to exploit these anomalies and inefficiencies through a focused fundamental research process and a disciplined multi-faceted approach to risk management, grounded in the principles of behavioral finance. Simply put, we focus on the early identification of businesses becoming better.

Investment process

All our resources and efforts are focused on bottom-up stock selection with strong collaboration across our globally integrated team.

Recognizing that investors can change averse and risk averse, we capitalize on persistent biases, anomalies, and inefficiencies by focusing on:

- Investing in three distinct types of businesses that we believe are becoming better as a result of positive change: innovators, renovators, and pacesetters
- Identifying potential underappreciated growth and improvement opportunities ahead of the market
- Isolating stock selection as the key driver of results - delivering style consistency over time using a comprehensive system of checks and balances

We leverage powerful analytical tools and technology platforms to complement our investment professionals' original fundamental research, analysis, and insights in order to make well-informed, high-conviction stock selection and portfolio construction decisions.

Disclosures

Unless otherwise noted, the information in this document has been derived from sources believed to be accurate as of June 2021. Information derived from sources other than Principal Global Investors or its affiliates is believed to be reliable; however, we do not independently verify or guarantee its accuracy or validity. This material contains general information only and does not take account of any investor's investment objectives or financial situation and should not be construed as specific investment advice, recommendation or be relied on in any way as a guarantee, promise, forecast or prediction of future events regarding an investment or the markets in general. The opinions and predictions expressed are subject to change without prior notice. Any reference to a specific investment or security does not constitute a recommendation to buy, sell, or hold such investment or security, nor an indication that Principal Global Investors or its affiliates has recommended a specific security for any client account.

Subject to any contrary provisions of applicable law, Principal Global Investors and its affiliates, and their officers, directors, employees, agents, disclaim any express or implied warranty of reliability or accuracy and any responsibility arising in any way (including by reason of negligence) for errors or omissions in this document or in the information or data provided in this document.

All figures shown in this document are in US dollars unless otherwise noted. Indices are unmanaged and do not take into account fees, expenses and transaction costs are not available for direct investment.

The MSCI ACWI ex-U.S. Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the U.S. For time periods prior to March 1, 2008, the MSCI EAFE index returns are used. From March 1, 2008, forward, the MSCI ACWI ex-U.S. Index returns are used. In reports issued prior to March 1, 2008, the MSCI EAFE Index was used for comparison purposes. The benchmark was changed to be more representative of the composite strategy. Information regarding the comparison to the benchmarks is available upon request.

Composite performance results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Gross performance shown does not reflect the deduction of investment management fees and certain transaction costs, which will reduce portfolio performance.

Effective March 2021, composite net performance is calculated using the highest applicable fee as shown in the composite fee schedule. Prior to March 2021, composite net returns were derived based the aggregation of underlying portfolios and their noted actual or model fee tier. Actual investment advisory fees incurred by clients may vary. Composite net returns after January 1, 2011, are inclusive of performance-based fees (where applicable). Performance-based fees are accounted for on a cash basis.

Each portfolio included in the composite is managed according to its own individual investment restrictions and limitations and therefore their characteristics may vary from those of the Representative Portfolio shown. Portfolio performance, characteristics and volatility may differ from the benchmark shown. Holdings and weightings are subject to change daily. The holdings listed should not be considered a recommendation to purchase or sell any security and there is no assurance an investment in these securities will be profitable.
