

Calvert Equity Fund

Strategy Overview

The investment team applies a fundamental approach to investing, primarily in established large-cap growth stocks with a history of sustained earnings growth at a favorable price.

Key Attributes of Our Discipline

High quality

- Dominant franchises
- Pricing power
- Recurring revenues
- Sustainable free cash flow

Growth

- Secular tailwinds
- Long product life cycles
- Increasing market share
- Expanding margins

ESG

- Calvert Principles for Responsible Investment
- Materiality
- ESG risks and opportunities

Valuation

- Earnings and cash flow multiples
- Discounted cash flow models
- Private market value

Long term

- Competitive advantages
- High barriers to entry
- Solid management

Investment Philosophy

We believe that high-quality companies, those with a demonstrated history of consistent growth and stability in earnings, can more likely provide attractive returns with moderate risk over the long term.

Calvert Integration

The Calvert Principles for Responsible Investment (Calvert Principles) provide a framework for the evaluation of ESG factors and guide our active engagement efforts with company management teams.

CEYIX vs. Russell 1000® Growth Index during rising quarters, declining quarters and all quarters (10/01/1998 - 06/30/2021)².

We seek to participate in rising markets, protect capital during declining markets and outperform over the long term.

% Average Annualized Returns as of 06/30/2021

	Q1	YTD	1 Yr	3 Yrs	5 Yrs	10 Yrs
A Shares at NAV	9.64	12.19	34.32	23.64	20.77	14.94
I Shares at NAV	9.71	12.31	34.65	23.95	21.13	15.40
A Shares with Max. 4.75% Sales Charge	4.42	6.85	27.94	21.65	19.60	14.38
Russell 1000® Growth Index ³	11.93	12.99	42.50	25.12	23.64	17.85

¹Source: Fund prospectus.

²Sources: Zephyr, Morningstar and Eaton Vance. For illustrative purposes only. Total return prior to commencement of I Shares reflects the total return of another class. The chart above illustrates the average (annualized) return of Calvert Equity Fund I Shares during both rising and declining markets since 10/01/1998 when Atlanta Capital was retained as subadvisor. Results for other time periods may differ from the long-term trend shown above. Rising markets are defined as quarters where the return of the Russell 1000® Growth index was positive. Declining markets are defined as quarters where the return of the Russell 1000® Growth index was negative. These positive and negative quarters are separated out from the intervening quarters, cumulated across the period and annualized. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Inception date for Class I Shares is 11/01/1999. Performance during certain periods reflects strong stock market performance that is not typical and may not be repeated. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; the Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month-end, please refer to eatonvance.com.

³Russell 1000® Growth Index is an unmanaged index of U.S. large-cap growth stocks. It is not possible to invest directly in an index. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. Historical performance of the index illustrates market trends and does not represent the past or future performance of the fund.

⁴Percent of total net assets. Top 10 Holdings excludes cash and equivalents. Percentages may not total 100% due to rounding.

Alpha measures risk-adjusted performance, showing excess return delivered at the same risk level as the benchmark. Beta measures the volatility of a fund relative to the overall market. R-Squared represents the percentage of the portfolio's movement that can be explained by the general movement of the market. Standard deviation measures the historic volatility of a fund. Sharpe Ratio uses standard deviation and excess return to determine reward per unit of risk.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance is for the stated time period only; due to market volatility, the Fund's current performance may be lower or higher than quoted. For the Fund's performance as of the most recent month-end, please refer to eatonvance.com. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) with all distributions reinvested. Returns for other classes of shares offered by the Fund are different. Performance less than or equal to one year is cumulative. Performance prior to December 31, 2016 reflects the performance of the Fund's former adviser, Calvert Investment Management, Inc. The minimum investment is \$1,000 for A Shares and \$250,000 for I Shares. Minimums may be waived in certain situations. Please see the prospectus for additional information.

About Risk: The value of investments held by the Fund may increase or decrease in response to economic, and financial events (whether real, expected or perceived) in the U.S. and global markets. The value of equity securities is sensitive to stock market volatility. Investing primarily in responsible investments carries the risk that, under certain market conditions, the Fund may underperform funds that do not utilize a responsible investment strategy. The Fund is exposed to liquidity risk when trading volume, lack of a market maker or trading partner, large position size, market conditions, or legal restrictions impair its ability to sell particular investments or to sell them at advantageous market prices. The impact of the coronavirus on global markets could last for an extended period and could adversely affect the Fund's performance. No fund is a complete investment program and you may lose money investing in a fund. The Fund may engage in other investment practices that may involve additional risks and you should review the Fund prospectus for a complete description.

Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a mutual fund. This and other important information is contained in the prospectus and summary prospectus, which can be obtained from a financial advisor. Prospective investors should read the prospectus carefully before investing.
