

# Federated Hermes MDT Large Cap Growth Fund

Nasdaq symbol — IS: QILGX | A: QALGX | B: QBLGX | C: QCLGX

6/30/21

## Product highlights

- Pursues long-term capital appreciation.
- Invests primarily in growth stocks of large-cap U.S. companies.
- Selects stocks primarily from companies that comprise the Russell 1000® Growth Index through a fundamentally based, quantitatively driven process.
- Seeks to remove subjective and emotional influences from security selection and capitalize on market inefficiencies.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after-tax returns, contact us or visit [FederatedInvestors.com](http://FederatedInvestors.com). Maximum offering price figures reflect the maximum sales charge of 5.5% for A Shares, and the maximum contingent deferred sales charges of 5.5% for B Shares and 1% for C Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

\* The fund's expense ratio is from the most recent prospectus. The expense ratio may reflect voluntary fee waivers and/or expense reimbursements determined by the fund's Advisor and its affiliates. The voluntary waivers and/or reimbursements, if applicable, are in effect up to but not including the later of 10/1/21 or the date of the fund's next effective prospectus.

# Federated Hermes MDT Large Cap Growth Fund

## Growth over time

If you had invested \$10,000 in A Shares on 9/30/05 (month end of the fund's performance inception) and reinvested all distributions, here's how your account would have grown by 6/30/21.

The fund is the successor to MDT Large Cap Growth Fund pursuant to a reorganization that took place on December 8, 2006. Prior to that date, the fund had no investment operations. Accordingly, the performance information shown for periods prior to that date is that of MDT Large Cap Growth Fund.

The fund's B Shares commenced operations on March 29, 2007. For the period prior to the commencement of operations of the B Shares, the performance information shown is for the fund's Institutional Shares (since inception date September 5, 2005), adjusted to reflect the contingent deferred sales charges and expenses applicable to the B Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

The B Shares of this Federated Hermes fund are closed to new investors and new investments from existing shareholders (excluding reinvestment of dividends and capital gains and exchanges from B Shares of other Federated Hermes Funds).

### A word about risk

Mutual funds are subject to risks and fluctuate in value.

The quantitative models and analysis used by the fund may perform differently than expected and negatively affect fund performance.

### Definitions

**The holdings percentages** are based on net assets at the close of business on 6/30/21 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

**Total return** represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

**Growth over time** performance is for the fund's A Shares. Figures do not reflect the 5.5% maximum sales charge. The fund offers additional share classes whose performance will vary due to differences in charges and expenses.

**Weighted median P/E (LTM - latest twelve months)** is a ratio comparing share price to earnings per share using data from the previous twelve months.

**Weighted median P/E (NTM - next twelve months)** in calculating this, individual holdings with values greater than 60 are capped at 60 in accordance with Morningstar's methodology for calculating "weighted Median P/E."

**Weighted median market capitalization** is the calculation represented by the median market capitalization of the stocks in the portfolio, weighted by the amount of each stock.

**Weighted median price/book** is a ratio comparing share price to book value or assets minus liabilities.

**Russell 1000® Growth Index** measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The Index is completely reconstituted annually to ensure new and growing equities are included and that the represented companies continue to reflect growth characteristics.

Indexes are unmanaged and cannot be invested in directly.

*Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a summary prospectus or prospectus containing this and other information, contact us or visit [FederatedInvestors.com](http://FederatedInvestors.com). Please carefully read the summary prospectus or the prospectus before investing.*
