

### Fund Objective:

The Fund seeks to provide capital appreciation through exposure to foreign equity markets while hedging overall market risk.

### Fund Description:

A goals-based, risk-managed hedged equity approach designed for growth investors seeking to achieve superior risk-adjusted returns over a full market cycle with potentially less downside risk and volatility than the fund benchmark, MSCI EAFE Index.

### Distinguishing Characteristics:

- Distinct, innovative approach to address market risk since 1997
- Always hedged using long-term put options (LEAPs) to hedge against large stock market declines
- Diverse and time-tested options strategies
- No reliance on market timing or stock selection

### Fund Facts:

Total Net Assets = \$33.60M

Class I	SDJIX	66538G262	12/29/2015	\$100,000	2.17%	1.90%*

\* The fund's investment advisor has contractually agreed to reduce its fees and/or absorb expenses of the Fund, at least until October 31, 2021 (exclusive of any taxes, interest, brokerage commissions, dividend expense on securities sold short, acquired fund fees and expenses, or extraordinary expenses such as litigation or reorganization costs). The Fund's total gross annual fund operating expenses are 2.42% for Class A; 3.17% for Class C; 2.17% for Class I. After the fee waiver these expenses are 1.65% for Class A, 2.40% for Class C, and 1.40% for Class I shares, respectively.

Performance shown is historical and does not guarantee future results. Current performance may be lower or higher. Because share price, principal value, and return will vary, you may have a gain or loss when you sell fund shares. Performance assumes the reinvestment of dividends and capital gains. "Without sales charge" performance does not reflect the current maximum sales charge. Had the sales charge been included, the Fund's returns would have been lower. Class I shares have no sales charge and may be purchased by specified classes of investors. The MSCI (Morgan Stanley Capital International) EAFE index comprises the MSCI country indexes capturing large and mid-cap equities across developed markets, excluding the U.S. and Canada. You cannot invest directly in an index or average. For performance information current to the most recent month end, please call (877) 896-2590. Maximum sales charge for Class A Shares is 5.50%. The fund's investment adviser has contractually agreed to reduce its fees and/or absorb expenses of the fund, at least until October 31, 2021. Please review the fund's prospectus for more information regarding the fund's fees and expenses.

## The Defined Risk Investment Process

There is no guarantee that any investment strategy will achieve its objectives, generate profits, or avoid losses.

## Footnotes, Definitions, and Disclosures

**Definitions:** Put Option: A put option is an option contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying security at a specified price within a specified time. At the Money: Refers to an options contract where an option's strike price, or the price at which the option contract can be exercised, is identical to the price of the underlying security. Near the Money: Refers to an options contract where an option's strike price is close to the current market price of the corresponding underlying security. The Sharpe Ratio is used for calculating risk-adjusted return by measuring the average return earned in excess of the risk-free rate per unit of volatility or total risk. Standard Deviation is a measure of the dispersion of a set of data from its mean. The more spread apart from the benchmark, the higher the deviation. Beta is a measure of the volatility, or dispersion, of a security or a portfolio in comparison to the market as a whole.

**Risk Information:** *Mutual Funds involve risk, including possible loss of principal. ETFs are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in ETFs and may be higher than other mutual funds that invest directly in stocks. ETFs are subject to specific risks, depending on the nature of the fund. Investments in underlying funds that own small and mid-capitalization companies may be more vulnerable than larger, more established organizations.*

*Investments in foreign securities could subject the Fund to greater risks including currency fluctuation, economic conditions, and different governmental and accounting standards. The use of leverage, such as that embedded in options, could magnify the Fund's gains or losses. Written option positions expose the Fund to potential losses many times the option premium received. A Put Option is an option contract giving the owner the right, but not the obligation, to sell a specified amount of an underlying security at a specified price within a specified time.*

*The adviser's dependence on its DRS process and judgments about the attractiveness, value and potential appreciation of particular ETFs and options in which the Fund invests or writes may prove to be incorrect and may not produce the desired results.*

*Purchased put options may expire worthless and may have imperfect correlation to the value of the Fund's sector ETFs. Written call and put options may limit the Fund's participation in equity market gains and may amplify losses in market declines. The Fund's losses are potentially large in a written put or call transaction. If un-hedged, written calls expose the Fund to potentially unlimited losses.*

Investors should carefully consider the investment objective, risks, charges and expenses of the Swan Defined Risk Foreign Fund. This and other information is contained in the prospectus and should be read carefully before investing. For a prospectus please call (877) 896-2590.
