Description / Objective
The investment seeks long-term capital appreciation. The fund seeks to invest, under normal market conditions, in common stocks of publicly traded companies that the subadvisor believes demonstrate, at the time of a stock's purchase, strong growth characteristics such as a leadership position in the relevant industry, a sustainable advantage, strong earnings growth potential and experienced management. It will invest at least 80% of its net assets in mid-cap companies. There is no assurance the objectives will be met.
Small and mid-sized companies may present greater opportunities for capital appreciation, but may also involve greater risks than larger companies. As a result, the value of stocks issued by these companies may fluctuate more than stocks of larger issuers.
