Our patient investment philosophy

Ariel Investments is headquartered in Chicago, Illinois, with offices in New York, San Francisco, and Sydney. We serve individual and institutional investors through our no-load mutual funds and separate accounts. As of June 30, 2021, firm-wide assets under management are \$16.8 billion. Since our founding in 1983, we have been disciplined, long-term investors. This defining characteristic is the cornerstone of our investment philosophy, and symbolized by our turtle logo and the firm's motto, "Slow and steady wins the race."

Patience

We take the long-term view.

Independence

We invest to our convictions, not to benchmarks.

Expertise

We specialize in bottom-up, fundamental research.

Teamwork

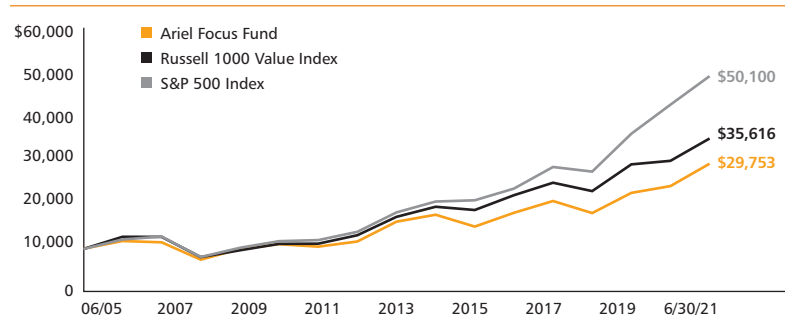

We work collaboratively with a shared commitment to excellence.

Performance data quoted represents past performance and does not guarantee future results. All performance assumes the reinvestment of dividends and capital gains. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To access performance data current to the most recent month-end, visit arielinvestments.com. Any extraordinary performance shown for short-term periods may not be sustainable and is not representative of the performance over longer periods. The total returns reflect that certain fees and expenses have been waived or reduced by the Adviser.

⁵ The inception date for the Institutional Class shares is December 30, 2011. Performance information for the Institutional Class prior to that date reflects the actual performance of the Fund's Investor Class (and uses the actual expenses of the Fund's Investor Class, for such period of time), without any adjustments. For any such period of time, the performance of the Fund's Institutional Class would have been substantially similar to, yet higher than, the performance of the Fund's Investor Class, because the shares of both classes are invested in the same portfolio of securities, but the classes bear different expenses, which are primarily differences in distribution and service fees.

[†] Forward price to earnings: returns price divided by earnings; this calculation uses the median consensus EPS estimates for the current or next fiscal year to calculate a P/E ratio depending on the length of time until the end of the current fiscal year. Source: FactSet. 5-year estimated earnings growth: projected earnings per share growth rate of the companies invested in by the Fund. Projected growth rates are consensus analyst forecasts for companies' long-term (typically five years) growth rates; actual earnings growth rate may differ from projected earnings growth rate. Only stocks with at least three estimates in the I/B/E/S database are included; medians are less useful with fewer estimates, and research coverage may be less current. Source: FactSet. Interest coverage ratio (EBIT/interest): This characteristic measures companies' ability to pay interest expense with current profits. Source: FactSet.

Ariel Focus Fund is a non-diversified fund and therefore may be subject to greater volatility than a more diversified investment. The Fund is often concentrated in fewer sectors than its benchmarks, and its performance may suffer if these sectors underperform the overall stock market. The intrinsic value of the stocks in which the Fund invests may never be recognized by the broader market. Investing in small cap and mid-cap stocks is more risky and more volatile than investing in large cap stocks. Investing in equity stocks is risky and subject to the volatility of the markets.
