Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 800.668.0434 or visit janushenderson.com/performance.

Maximum Offering Price (MOP) returns include the maximum sales charge of 5.75%. Net Asset Value (NAV) returns exclude this charge, which would have reduced returns.

High absolute short-term performance is not typical and may not be achieved in the future. Such results should not be the sole basis for evaluating material facts in making an investment decision.

INVESTORS

Index represents the Russell 1000® Growth Index.

Performance for Class A Shares, Class I Shares and Class T Shares that includes periods prior to 7/6/09 reflects the performance of one or more share classes of the Fund or a predecessor fund, adjusted, where applicable and permitted, for differing fees and expenses. See the Fund's prospectus for further details.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

This Fund has a performance-based management fee that may adjust up or down based on the Fund's performance.

Holdings are subject to change without notice.

There is no assurance the stated objective(s) will be met.

Equity country, regional, sector and industry weights primarily based on MSCI and GICS classifications. Fixed income country, regional, sector and industry weights primarily based on Bloomberg classifications.

Investing involves market risk and it is possible to lose money by investing. Investment return and value will fluctuate in response to issuer, political, market and economic developments, which can affect a single issuer, issuers within an industry, economic sector or geographic region, or the market as a whole.

Growth stocks are subject to increased risk of loss and price volatility and may not realize their perceived growth potential.

The fund is classified as "nondiversified", meaning it has the ability to take larger positions in a smaller number of issuers than a "diversified" fund. Nondiversified funds may experience greater price volatility.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged and not available for direct investment.

Russell 1000® Growth Index reflects the performance of U.S. large-cap equities with higher price-to-book ratios and higher forecasted growth values. **S&P 500® Index** reflects U.S. large-cap equity performance and represents broad U.S. equity market performance. **Alpha** compares risk-adjusted performance relative to an index. Positive alpha means outperformance on a risk-adjusted basis. **Beta** measures the volatility of a security or portfolio relative to an index. Less than one means lower volatility than the index; more than one means greater volatility. **R-squared (R²)** measures the relationship between portfolio and index performance on a scale of 0.00 (0%) to 1.00 (100%). A higher R² indicates more of the portfolio's performance is affected by market movements and vice versa. **Standard Deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe Ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk. **Turnover** is a measure of portfolio trading activity. Higher turnover may indicate higher transaction costs and vice versa.
