| Sharpe ratio (10 year): | -0.03 |
| Volatility (10 year): | 5.13% |
| Beta to S&P 500 (10 year) | 0.17 |

Time-tested systematic approach to U.S. value investing

The fund invests in a diversified portfolio of U.S. stocks using the Research Affiliates Equity (RAE) strategy, an innovative value approach designed to outperform the 3 Month USD LIBOR Index.

• Captures robust sources of excess returns

RAE is a systematic strategy that selects undervalued stocks using valuation metrics designed by Research Affiliates, while also incorporating quality and momentum signals to improve performance. The RAE strategy combines several well-researched measures of each signal to achieve higher returns over time.

• **Capitalizes on market inefficiencies** Selected stocks are weighted based on fundamental measures of company size such as sales, cash flows, dividends and book value. This weighting methodology allows the fund to capitalize on market inefficiencies by systematically buying low and selling high and benefit from long-term mean reversion in stock prices.

• Offers the benefits of investing systematic equity strategy

The fund's unique rules-based approach seeks a consistent investment process and a contrarian portfolio designed to deliver market outperformance.

Hypothetical growth of \$10,000 is calculated at NAV and assumes that all dividend and capital gain distributions were reinvested. It does not take into account sales charges or the effect of taxes. Results are not indicative of future performance.

| Average annual total returns (%) as of 31 Mar '21 | 1-yr. | 3-yr. | 5-yr. | 10-yr. | Inception |

If this material is used after 30 June 2021, it must be accompanied by the most recent Performance Supplement.

Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Investment return and the principal value of an investment will fluctuate. Shares may be worth more or less than original cost when redeemed. Current performance may be lower or higher than performance shown. For performance current to the most recent month-end, visit PIMCO.com or by calling 888.87.PIMCO.

For the periods prior to the inception date of a share class, performance information is based on the performance of the Fund's oldest class shares, adjusted to reflect the fees and expenses paid by that class of shares.

Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. There is no assurance that any fund, including any fund that has experienced **high or unusual performance** for one or more periods, will experience similar levels of performance in the future. High performance is defined as a significant increase in either 1) a fund's total return in excess of that of the fund's benchmark between reporting periods or 2) a fund's total return in excess of the fund's historical returns between reporting periods. Unusual performance is defined as a significant change in a fund's performance as compared to one or more previous reporting periods.

Performance reflects changes in share price, reinvestment of dividends and capital gains distributions. All periods longer than one year are annualized. The Lipper, Inc. Lipper Average is based on total return, with distributions reinvested and operating expenses deducted, though not reflecting sales charges. Fund classes share the same portfolio, but have different investment minimums and different fees and expenses. The minimum initial investment for institutional class shares is \$1 million; however, it may be modified for certain financial intermediaries who submit trades on behalf of eligible investors.

About PIMCO

PIMCO is one of the world's premier fixed income investment managers. Since our founding in 1971 in Newport Beach, California, we have continued to bring innovation and expertise to our partnership with clients seeking the best investment solutions. PIMCO introduced the groundbreaking StocksPLUS strategy in 1986 - the same award-winning approach used across our "PLUS" portfolios - which capitalizes on the depth and breadth of PIMCO's global resources. PIMCO has partnered with Research Affiliates to deliver systematic equity strategies since 2005. Today, we manage RAE "PLUS" portfolios across a range of objectives and market exposures.

| US Government Related | 0.27 |
| Securitized ¹ | 0.39 |
| Invest. Grade Credit | 0.49 |
| High Yield Credit | 0.01 |
| Non-USD Developed | 0.95 |
| Emerging Markets | 0.16 |
| Other ² | 0.09 |
| Net Other Short Duration Instruments ³ | 0.18 |

¹ The Securitized bucket will include Agency MBS, non-Agency MBS, CMBS, ABS, CDO, CLO, and Pooled Funds. ² Other may include convertibles, preferreds, and yankee bonds. ³ Net Other Short Duration Instruments includes securities and other instruments (except those instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

Investors should consider the investment objectives, risks, charges and expenses of the funds carefully before investing. This and other information are contained in the fund's prospectus and summary prospectus, if available, which may be obtained by contacting your PIMCO representative. Please read them carefully before you invest or send money. Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

A word about risk: Morningstar ratings are only shown for those funds that have achieved a 4 or 5 star rating. Ratings for other funds or series are either lower or not available. MV% may not equal 100 PF40881_1Q21

due to rounding. The SEC yield is an annualized yield based on the most recent 30 day period.

Duration is a measure of a portfolio's price sensitivity expressed in years. The **Sharpe Ratio** measures the risk-adjusted performance. The risk-free rate is subtracted from the rate of return for a portfolio and the result is divided by the standard deviation of the portfolio returns. The 3 Month USD LIBOR (London Interbank Offered Rate) Index is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money (3 months) in England's Eurodollar market. It is not possible to invest in an unmanaged index. S&P 500 Index is an unmanaged market index generally considered representative of the stock market as a whole. The Index focuses on the large-cap segment of the U.S. equities market. It is not possible to invest directly in an unmanaged index.
