<sup>1</sup> The performance data includes the performance of the Fund's predecessor investment company, ("SG Cowen Predecessor Fund"), which prior to December 14, 2001, was managed by SG Cowen Asset Management Company, Inc. The SG Cowen Predecessor Fund has investment objectives and strategies that are substantially similar to the Fund. The SG Cowen Predecessor Fund's performance was calculated using the fees and expenses of the Class A shares not including the 4.75% sales charge for Class A shares of the SG Cowen Predecessor Fund. <sup>2</sup> Portfolio characteristics and holdings are subject to change at any time. <sup>3</sup> The annualized since inception return for the index reflects the inception date of the Class I and Class N Share Funds, respectively. For periods 10/29/04-6/30/21; 9/19/86-6/30/21. <sup>4</sup> Russell 1000® Value Index – Measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values. The index is not available for direct investment; therefore its performance does not reflect a reduction for fees or expenses incurred in managing a portfolio. The securities in the index may be substantially different from those in the Fund. <sup>5</sup> It should not be assumed that an investment in the securities listed was or will be profitable.

## Investment Objective and Approach

The Fund seeks to realize a high level of dividend income consistent with prudent investment management. Capital appreciation is a secondary objective.

To pursue this goal, the Fund will primarily invest in equity securities of companies with a record of paying dividends.

There is no assurance that the objectives and/or trends will come to pass or be maintained.

## Expense Ratio (%)

	I Share	N Share
Gross	0.75	1.02
Net*	0.70	0.90

Annual fund operating expenses as stated in the Prospectus dated March 1, 2021, excluding interest and acquired fund fees and expenses, if any.

\* Effective March 1, 2021, the Fund's investment advisor has agreed to waive fees and/or reimburse expenses to limit the Fund's total annual operating expenses (excluding interest, brokerage, extraordinary expenses and acquired fund fees and expenses, if any) to 0.70% of average daily net assets with respect to Class I shares and 0.90% of average daily net assets with respect to Class N shares. This contractual fee waiver/expense reimbursement will remain in place through March 1, 2022 and may be terminated by the investment adviser, or extended or modified with approval of the Board of Directors.

The performance data presented represents past performance and is no guarantee of future results. Total returns include reinvestment of dividends and distributions. Current performance may be lower or higher than the performance data presented. Performance data current to the most recent month end is available on the Fund's website at TCW.com. Investment returns and principal value will fluctuate with market conditions. The value of an investment in the Fund, when redeemed, may be worth more or less than its original purchase cost.

## GLOSSARY OF TERMS

**Average Price/Earnings** – A valuation ratio of a company's current share price compared to its per-share earnings. **Dividend** – A distribution of a portion of a company's earnings, decided by the board of directors, to a class of its shareholders. **Market Capitalization** – Represents the aggregate value of a company or stock. It is obtained by multiplying the number of shares outstanding by their current price per share. **Portfolio Turnover** – A measure of how frequently assets within a fund are bought and sold by the managers. Portfolio turnover is calculated by taking either the total amount of new securities purchased or the amount of securities sold – whichever is less – over a particular period, divided by the total net asset value (NAV) of the fund. The measurement is usually reported for a 12-month time period. **Price-to-Book Value** – A ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. **Price-to-Cash Flow** – A ratio that measures the market's expectations of a firm's future financial health. It is calculated by dividing the share price by the cash flow per share. **Price-to-Sales** – A ratio for valuing a stock relative to its own past performance, other companies or the market itself. **Yield** – The income return on an investment. This refers to the interest or dividends received from a security and is usually expressed annually as a percentage based on the investment's cost, its current market value or its face value.
