

The GoodHaven Fund - GOODX

INVESTMENT OBJECTIVE

The Fund seeks to achieve long-term growth of capital. The Fund's investment advisor, GoodHaven Capital Management, focuses on a few carefully chosen companies whose securities appear significantly undervalued. Most often, these are strong and enduring businesses, run by strong management teams. We may also pursue other value investing strategies such as those related to risk arbitrage, spin-offs, distressed debt investing and companies in or emerging from bankruptcy. We are not constrained by geography, sector, industry, or market capitalization in seeking out sensible investments.

MANAGEMENT

Larry Pitkowsky is a Co-Founder and currently the sole Managing Partner of GoodHaven Capital Management and also serves as Chairman of the Board and President of the GoodHaven Funds Trust. Prior to founding GoodHaven, Larry was one of the three members of the investment management team at Fairholme Capital Management and that firm's associated Fairholme Fund from 1999 through most of 2008. In addition, Larry was a Vice-President of Fairholme Funds, Inc., the parent company of the Fund, from March 2008 through January 2009. Larry has more than 30 years of experience in securities research and portfolio management across a wide range of companies and industries.

DEFINITIONS AND DISCLOSURES

The S&P 500 Index is a capitalization weighted index of 500 large capitalization stocks which is designed to measure broad domestic securities markets. It is not possible to invest directly in an index.

References to other mutual funds should not be interpreted as an offer of these securities.

The GoodHaven Fund's investment objectives, risks, charges, and expenses must be considered carefully before investing. The statutory and summary prospectuses contain this and other information about the investment company, and may be obtained by calling 1-855-OK-GOODX (1-855-654-6639) or by visiting www.goodhavenfunds.com. Read carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. The Fund invests in midcap and smaller capitalization companies, which involve additional risks such as limited liquidity and greater volatility. The Fund may invest in foreign and emerging market securities which involve political, economic and currency risks, greater volatility and differences in accounting methods. The Fund may invest in REIT's, which are subject to additional risks associated with direct ownership of real property including decline in value, economic conditions, operating expenses, and property taxes. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment in lower-rated, non-rated and distressed securities presents a greater risk of loss to principal and interest than higher-rated securities.
