

The Growth Fund of America®

Fiscal year-end summary: 8/31/20
Growth fund

Investing for growth, the fund offers a diversified approach to long-term capital appreciation to help investors pursue long-term goals.

Ticker symbols: A shares: AGTHX C shares: GFACX F-1 shares: GFAFX F-2 shares: GFFFX F-3 shares: GAFFX R-3 shares: RGACX

Figures shown are past results for Class A shares and are not predictive of results in future periods. Current and future results may be lower or higher than those shown. Prices and returns will vary, so investors may lose money. Investing for short periods makes losses more likely. Unless otherwise indicated, results shown are at net asset value with all distributions reinvested. If the 5.75% maximum Class A sales charge had been deducted, results would have been lower. For current information and month-end results, visit capitalgroup.com.

A broad mandate

Unlike some growth funds with a narrow investment universe, the fund can invest wherever growth opportunities may be, including up to 25% of assets outside the U.S. These investments often include:

- Traditional growth stocks.
- Stocks of companies that are cyclical.
- Stocks of companies that are depressed or in turnaround situations.

Company-by-company approach

The fund is focused on companies – not on specific market capitalizations, industries or sectors. The managers rely on in-depth global research to find companies that we believe have sound fundamentals and sustainable competitive advantages. As of its fiscal year-end on 8/31/20, the fund's portfolio included investments in approximately 346 companies.

Long-term focus

The investment professionals for the fund search for companies that they believe offer opportunities for capital appreciation over the long haul. As the chart below shows, this long-term focus has helped the fund outpace more traditional large-capitalization growth investments in 15 of 25 rolling 10-year periods.

The fund outpaced U.S. large-cap growth stocks in 15 of 25 rolling 10-year periods (9/1/86-8/31/20)

Fund results are for a hypothetical \$10,000 investment (with all distributions reinvested).

U.S. growth stocks are represented by the Russell 1000 Growth Index, which began on 12/31/78 and measures the results of large-cap growth companies with higher price-to-book ratios and higher forecasted growth values. The market index is unmanaged and, therefore, has no expenses. Investors cannot invest directly in an index. There have been periods when the fund has lagged the index.

Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is the trademark of Russell Investment Group.

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Experienced portfolio management

The fund's 13 portfolio managers each manage a portion of fund assets independently and have a median 28 years of investment experience as of the prospectus dated 10/30/20. A group of investment analysts also manages a portion of the fund.

Largest equity holdings

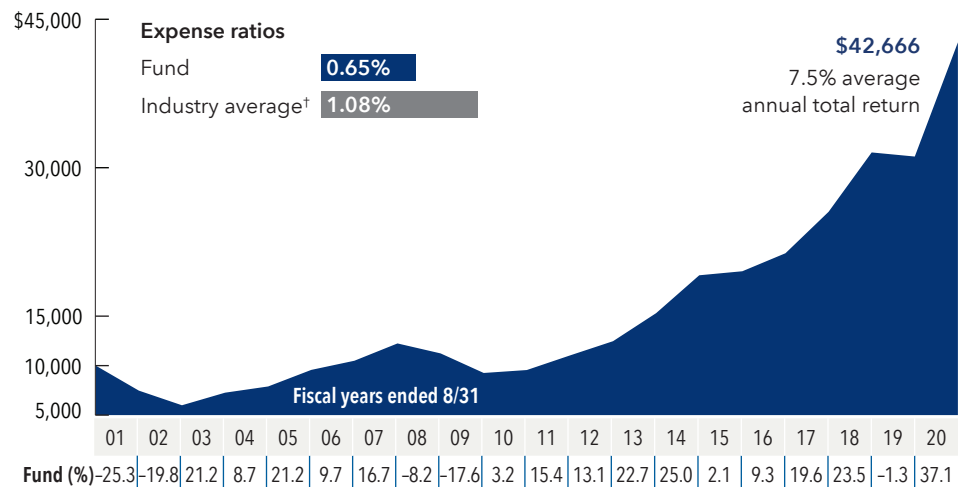

Facebook	6.5%
Amazon	6.1
Netflix	5.7
Tesla Inc	5.7
Microsoft	5.2

Industry holdings

Interactive media & services	9.7%
Software	9.5
Internet & direct marketing retail	6.9
IT services	6.7
Entertainment	6.4
Other industries	55.7
Cash & equivalents*	5.1

Largest equity holdings are based on the fund's net assets as of 8/31/20. Industry holdings are as of 9/30/20. The fund is managed, so holdings change.

Results of a hypothetical \$10,000 investment (9/1/00-8/31/20)

Average annual total returns for periods ended 9/30/20 after payment of the 5.75% maximum up-front sales charge for Class A shares:

1 year: 24.54%

5 years: 15.48%

10 years: 14.01%

Expense ratio: 0.65%

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility, as more fully described in the prospectus. These risks may be heightened in connection with investments in developing countries.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses. The expense ratio is as of the fund's prospectus available at the time of publication. When applicable, investment results reflect fee waivers and/or expense reimbursements, without which results would have been lower. Please see capitalgroup.com for more information.

*Includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

[†]Source for industry average: Lipper Large-Cap Growth Funds Average, which represents funds that, by portfolio practice, invest at least 75% of their assets in companies with market capitalizations (on a three-year weighted basis) above Lipper's U.S. Diversified Equity large-cap floor. Large-cap growth funds typically have an above-average price-to-earnings ratio, price-to-book ratio and three-year sales-per-share growth value compared to the S&P 500. The industry average expense ratio is based on statistics for front-end load funds (excluding funds of funds) for the most recent fiscal year-end available through 8/31/20.
