Investment Objective

The RiverPark Large Growth Fund seeks long-term capital appreciation.

Investment Strategy

The RiverPark Large Growth Fund seeks to make investments in securities of large capitalization companies, which it defines as those in excess of \$5 billion. The Fund invests in what it believes are exciting growth businesses with significant long-term growth potential, but patiently waits for opportunities to purchase these companies at attractive prices. RiverPark believes the style is best described as a "value orientation toward growth".

The Investment Adviser's investment process includes several well-defined steps:

1. Identify powerful secular changes in our society
2. Focus on industries being disrupted
3. Research company-specific business models
4. Assess the quality of the management team
5. Invest patiently with conviction and discipline

The performance quoted herein represents past performance. Past performance does not guarantee future results. High short-term performance of the Fund is unusual and investors should not expect such performance to be repeated. The investment return and principle value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost, and current performance may be higher or lower than the performance quoted. Please read the prospectus carefully before investing.

Mutual fund investing involves risk including possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. There can be no assurance that the Fund will achieve its stated objectives.

The Russell 1000 Growth Total Return Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The S&P 500 Total Return Index is an unmanaged capitalization-weighted index generally representative of large companies in the U.S. stock market and based on price changes and reinvested dividends. Morningstar Large Growth portfolios invest primarily in big U.S. companies that are projected to grow faster than other large-cap stocks. Index returns are for illustrative purposes only and do not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an Index.
