Investment Style

The OCM Gold Fund employs an active tiered approach to the gold mining industry. The portfolio is invested in major gold producers with progressively smaller positions in intermediate and junior gold producers along with exploration and development companies. While predominantly value oriented, the Fund seeks out companies that are growing production and reserves on a per share basis utilizing a disciplined approach to return on capital. The Fund also seeks out special growth opportunities within the precious metal sector.

Portfolio Manager

Greg Orrell is the president and portfolio manager of the OCM Gold Fund. Mr. Orrell has over 35 years of experience in the gold mining sector. He has been the portfolio manager of the Fund since 1996. Mr. Orrell received his BS in Economics and Business Administration from Saint Mary's College of California.

Investment Advisor

Orrell Capital Management is a specialty money manager in the precious metals mining sector. In addition to advising the OCM Gold Fund, the fund manages private and institutional accounts.

The table presents past performance, which is no guarantee of future results and may be lower or higher than current performance. Returns reflect applicable fee waivers and/or expense reimbursements. Had the Fund incurred all expenses and fees, investment returns would have been reduced. Investment returns and Fund share values fluctuate so that investor's shares, when redeemed, may be worth more or less than their original cost. Fund returns assume that dividends and capital gains distributions are reinvested in the Fund. Net Asset Value (NAV) Index returns assume dividends of the Index constituents in the Index have been reinvested. Calendar Year Performance Without Sales Load

The Fund's Total Annual Operating Expenses for the OCM Gold Fund Investor Class and Advisor are 2.18% and 1.68% respectively. Please review the Fund's Prospectus for more information regarding the Fund's fees and expenses. The Philadelphia Stock Exchange Gold/Silver Index (XAU) is a capitalization-weighted index featuring sixteen widely held securities in the gold and silver mining industry and is a good indicator of the performance of the common stock of companies in the gold and silver mining industry. The S&P 500 Index is a market-value weighted index consisting of 500 stocks chosen for market size, liquidity, and industry group representation. You cannot invest directly in an index, and, unlike the Fund, an index does not incur fees and expenses. There is no assurance that the Fund will achieve its investment objective.

The fund invests in gold and other precious metals, which involves additional risks, such as the possibility for substantial price fluctuations over a short period of time and may be affected by unpredictable international monetary and political developments such as currency devaluations or revaluations, economic and social conditions within a country, trade imbalances or trade or currency restrictions between countries. The prices of gold and other precious metals may decline versus the dollar, which would adversely affect the market prices of the securities of gold and precious metals producers. The Fund may also invest in foreign securities which involve greater volatility and political, economic, and currency risks and differences in accounting methods. The Fund is non-diversified, meaning it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore, the Fund is more exposed to individual stock volatility than a diversified fund. Prospective investors who are uncomfortable with an investment that will fluctuate in value should not invest in the Fund.
