

SPDR® Portfolio S&P 600™ Small Cap ETF

Key Features

- The SPDR® Portfolio S&P 600™ Small Cap ETF seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the S&P Small Cap 600® Index (the "Index")
- One of the low-cost core SPDR Portfolio ETFs, a suite of portfolio building blocks designed to provide broad, diversified exposure to core asset classes
- A low-cost ETF that seeks to offer precise, comprehensive exposure to small cap US equities
- The Index is float-adjusted and market capitalization weighted

About This Benchmark

The S&P Small Cap 600® Index measures the performance of the small-capitalization sector in the U.S. equity market. The Index is float-adjusted and market capitalization weighted.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit [ssga.com](https://www.ssga.com) for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index.

The S&P SmallCap 600® IndexSM reflects linked performance returns of the S&P SmallCap 600® IndexSM, the SSGA Small Cap Index, and the Russell 2000 Index. The index returns are reflective of the Russell 2000 Index from fund inception until 11/16/2017, the SSGA Small Cap Index effective 11/16/2017 until 1/24/2020, and the S&P SmallCap 600® IndexSM effective 1/24/2020. Prior to 01/24/2020, the SPDR® Portfolio S&P 600® Small Cap ETF was known as the SPDR Portfolio Small Cap ETF.

Glossary

NAV The market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding.

Market Value Determined by the midpoint between the bid/offer prices as of the closing time of the New York Stock Exchange (typically 4:00PM EST) on business days.

Gross Expense Ratio The fund's total annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

30 Day SEC Yield (Also known as Standardized Yield) An annualized yield that is calculated by dividing the net investment income earned by the fund over the most recent 30-day period by the current maximum offering price.

Est. 3-5 Year EPS Growth Based on the underlying holdings of the fund. The actual earnings estimates for the underlying holdings are provided by FactSet, First Call, I/B/E/S Consensus, and Reuters and are used to

calculate a mean 3-5 year EPS growth rate estimate.

Index Dividend Yield The weighted average of the underlyings' indicated annual dividend divided by price, expressed as a percentage.

Price/Earnings Ratio FY1 The weighted harmonic average of current share price divided by the forecasted one year earnings per share for each security in the fund. Negative and positive outliers are included in the calculation.

Price/Book Ratio The weighted harmonic average of closing market price divided by the most recent reported book value for each security in the fund's portfolio as calculated for the last twelve months.

Important Risk Information

Investments in **small-sized companies** may involve greater risks than in those of larger, better known companies. Returns on investments in stocks of small companies could trail the returns on investments in stocks of larger companies.

Equity securities may fluctuate in value in response to the activities of individual companies and general market and economic conditions.

Non-diversified fund may invest in a relatively small number of issuers, a decline in the market value may affect its value more than if it invested in a larger number of issuers. While the Fund is expected to operate as a

diversified fund, it may become non-diversified for periods of time solely as a result of changes in the composition of its benchmark index. The Fund may not purchase securities of any issuer if, as a result, more than 5% of the Fund's total assets would be invested in that issuer's securities; except as may be necessary to approximate the composition of its target index. This limitation does not apply to obligations of the U.S. government or its agencies or instrumentalities.

Passively managed funds hold a range of securities that, in the aggregate, approximates the full Index in terms of key risk factors and other characteristics. This may cause the fund to experience tracking errors relative to performance of the index.

While the shares of ETFs are tradable on secondary markets, they may not readily trade in all market conditions and may trade at significant discounts in periods of **market stress**.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.
