

Invesco RAFI Strategic US ETF

As of June 30, 2021

Fund description

The Invesco RAFI™ Strategic US ETF (Fund) is based on the Invesco Strategic US Index (Index). The Fund will normally invest at least 80% of its total assets in securities that comprise the Index. The Index is designed to measure the performance of high quality, large-sized US companies. The securities are assigned a business-size score based on the equally-weighted average of sales, operating cash flow, total return of capital and book value over the prior five years or life of the security. For real estate securities, operating cash flow is replaced by funds from operations and book value is replaced by total assets. The securities are then assigned a quality score based on the equally-weighted average of efficiency (ratio of sales-to-assets in the prior year) and growth (percentage change in ratio of sales-to-assets over the prior five years or life of the security). Finally, each eligible security is ranked in descending order by its Business-Size score. For inclusion in the index, securities ranked in the top 90% by Business-Size score are eligible and, of those 80% with the highest Quality score. Securities in the Index are weighted based on their float-adjusted Business-Size scores. The Fund and the Index are reconstituted annually.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See invesco.com to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times.

Index returns do not represent Fund returns. An investor cannot invest directly in an index.

Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund.

Investment risk

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

Investments focused in a particular industry or sector are subject to greater risk, and are more greatly impacted by market volatility, than more diversified investments.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

REITs are pooled investment vehicles that trade like stocks and invest substantially all of their assets in real estate and may qualify for special tax considerations. REITs are subject to risks inherent in the direct ownership of real estate. A company's failure to qualify as a REIT under federal tax law may have adverse consequences to the REIT's shareholders. REITs may have expenses, including advisory and administration, and REIT shareholders will incur a proportionate share of the underlying expenses.

Important information

The Invesco Strategic US Index is a trademark of Invesco Indexing LLC (index provider) and has been licensed for use by Invesco Capital Management LLC (investment adviser). Invesco Indexing LLC, Invesco Capital Management LLC, and Invesco Distributors, Inc. (ETF distributor) are wholly owned, indirect subsidiaries of Invesco Ltd.

Typically, security classifications used in calculating allocation tables are as of the last trading day of the previous month.

The Global Industry Classification Standards was developed by and is the exclusive property and a service mark of MSCI, Inc. and Standard & Poor's.

This does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial professional before making any investment decisions.

Before investing, investors should carefully read the prospectus and consider the investment objectives, risks, charges and expenses. Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
