# WisdomTree U.S. Total Dividend Fund

## Investment Objective

The WisdomTree U.S. Total Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.28%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 29	\$ 90	\$ 157	\$ 356

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 22% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that is comprised of U.S. companies listed on a U.S. stock market that pay regular cash dividends. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$100 million; and (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted.

The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 5%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the information technology and financials sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to,

disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.

- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to

the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. In addition, performance is shown for another index that also represents the asset class in which the Fund invests. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 13.90%.

## Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	16.01%	2Q/2020
Lowest Return	(25.20)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

## Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. Total Dividend Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	2.57%	10.99%	11.54%
Return After Taxes on Distributions	1.83%	10.26%	10.85%
Return After Taxes on Distributions and Sale of Fund Shares	1.93%	8.62%	9.43%
WisdomTree U.S. Dividend Index (Reflects no deduction for fees, expenses or taxes)	2.96%	11.32%	11.89%
Russell 3000 Index (Reflects no deduction for fees, expenses or taxes)	20.89%	15.43%	13.79%
Russell 3000 Value Index (Reflects no deduction for fees, expenses or taxes)	2.87%	9.74%	10.36%

## Management

### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as investment adviser to the Fund. Mellon Investments Corporation (the "Sub-Adviser") serves as sub-adviser to the Fund.

## **Portfolio Managers**

The Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

## **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the "bid/ask spread"). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

## **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

## **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

# WisdomTree U.S. High Dividend Fund

## Investment Objective

The WisdomTree U.S. High Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. High Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 43% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that is comprised of companies with the highest dividend yields selected from the WisdomTree U.S. Dividend Index, which defines the dividend-paying universe of companies in the U.S. stock market. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$200 million; and (iii) average daily dollar trading volume of at least \$200,000 for the preceding three months. Securities eligible for inclusion in the Index are ranked by dividend yield. Securities ranking in the highest 30% by dividend yield are selected for inclusion. If a company currently in the Index is no longer ranked in the top 30% by dividend yield at the time of the annual Index screening date but remains ranked in the top 35% by dividend yield, the company will remain in the Index.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted. At the time of the Index's annual screening date, the maximum weight of any security in the Index is capped at 5%. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 5%); however, security and/or sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the consumer staples and financials sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in

times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

- **Consumer Staples Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global and economic conditions.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 14.31%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	13.13%	4Q/2020
Lowest Return	(25.98)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. High Dividend Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	(5.68)%	7.13%	9.81%
Return After Taxes on Distributions	(6.66)%	6.19%	8.91%
Return After Taxes on Distributions and Sale of Fund Shares	(2.76)%	5.50%	7.92%
WisdomTree U.S. High Dividend Index (Reflects no deduction for fees, expenses or taxes)	(5.35)%	7.53%	10.21%
Russell 1000 Value Index (Reflects no deduction for fees, expenses or taxes)	2.80%	9.74%	10.50%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. Dividend ex-Financials Fund

## Investment Objective

The WisdomTree U.S. Dividend ex-Financials Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Dividend ex-Financials Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 47% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is comprised of the 10 highest dividend-yielding companies in each sector, selected from the 300 largest companies by market value in the WisdomTree U.S. Dividend Index outside the financials sector. The WisdomTree U.S. Dividend Index defines the dividend-paying portion of the U.S. stock market. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$100 million; and (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months.

The Index is the only one of the WisdomTree U.S. Dividend Indexes that is not weighted by the dollar value of cash dividends to be paid. A component company’s weight in the Index is determined by dividing its indicated annual

dividend yield by the sum of all the indicated annual dividend yields for all the component companies in the Index. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 10%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, health care, industrials, information technology, materials, communication services, and utilities. The financials sector is excluded from the Index. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the consumer staples sector comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

- **Consumer Staples Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global and economic conditions.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index.. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 17.21%.

## Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	15.23%	2Q/2020
Lowest Return	(29.59)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

## Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. Dividend ex-Financials Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	(5.81)%	7.37%	9.53%
Return After Taxes on Distributions	(6.68)%	6.46%	8.67%
Return After Taxes on Distributions and Sale of Fund Shares	(2.94)%	5.70%	7.70%
WisdomTree Dividend ex-Financials Index (Reflects no deduction for fees, expenses or taxes)	(5.51)%	7.78%	9.93%
Dow Jones U.S. Select Dividend Index (Reflects no deduction for fees, expenses or taxes)	(4.56)%	9.25%	11.00%

## Management

### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as investment adviser to the Fund. Mellon Investments Corporation (the "Sub-Adviser") serves as sub-adviser to the Fund.

### Portfolio Managers

The Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. LargeCap Dividend Fund

## Investment Objective

The WisdomTree U.S. LargeCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. LargeCap Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.28%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 29	\$ 90	\$ 157	\$ 356

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 20% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that is comprised of the large-capitalization segment of the U.S. dividend-paying market. The Index is comprised of the 300 largest companies ranked by market capitalization from the WisdomTree U.S. Dividend Index, which defines the dividend-paying universe of companies in the U.S. stock market. As of June 30, 2021, the Index had a market capitalization range from \$7.5 billion to \$2.3 trillion, with an average market capitalization of \$81.9 billion. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$100 million; and (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 5%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the information technology, health care and consumer staples sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Large-Capitalization Investing Risk.** The Fund invests primarily in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.

- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Consumer Staples Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global and economic conditions.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.
- **Health Care Sector Risk.** The Fund currently invests a significant portion of its assets in the health care sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.
- **Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.

- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. In addition, performance is shown for another index that also represents the asset class in which the Fund invests. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 13.03%.

## Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	15.78%	2Q/2020
Lowest Return	(23.04)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

## Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. LargeCap Dividend Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	4.55%	11.63%	11.88%
Return After Taxes on Distributions	3.81%	10.90%	11.21%
Return After Taxes on Distributions and Sale of Fund Shares	3.10%	9.14%	9.74%

<b>WisdomTree U.S. LargeCap Dividend Fund</b>	<b>1 Year</b>	<b>5 Years</b>	<b>10 Years</b>
WisdomTree U.S. LargeCap Dividend Index (Reflects no deduction for fees, expenses or taxes)	4.81%	11.96%	12.19%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	18.40%	15.22%	13.88%
Russell 1000 Value Index (Reflects no deduction for fees, expenses or taxes)	2.80%	9.74%	10.50%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. MidCap Dividend Fund

## Investment Objective

The WisdomTree U.S. MidCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. MidCap Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 57% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that is comprised of the mid-capitalization segment of the U.S. dividend-paying market. The Index is comprised of the companies that compose the top 75% of the market capitalization of the WisdomTree U.S. Dividend Index, which defines the dividend-paying universe of companies in the U.S. stock market, after the 300 largest companies have been removed. As of June 30, 2021, the Index had a market capitalization range from \$2.1 billion to \$17 billion, with an average market capitalization of \$6.8 billion. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$100 million; and (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 5%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the financials and industrials sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Mid-Capitalization Investing Risk.** The Fund invests primarily in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion.
- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.

- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.
- **Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Industrials Sector Risk.** The Fund currently invests a significant portion of its assets in the industrials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The industrials sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.

■ **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. In addition, performance is shown for another index that also represents the asset class in which the Fund invests. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 21.34%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	21.55%	4Q/2020
Lowest Return	(35.90)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. MidCap Dividend Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	(5.40)%	8.15%	10.49%
Return After Taxes on Distributions	(6.16)%	7.43%	9.71%
Return After Taxes on Distributions and Sale of Fund Shares	(2.86)%	6.29%	8.44%
WisdomTree U.S. MidCap Dividend Index (Reflects no deduction for fees, expenses or taxes)	(5.27)%	8.51%	10.83%
S&P MidCap 400 Index (Reflects no deduction for fees, expenses or taxes)	13.66%	12.35%	11.51%
Russell Midcap Value Index (Reflects no deduction for fees, expenses or taxes)	4.96%	9.73%	10.49%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. SmallCap Dividend Fund

## Investment Objective

The WisdomTree U.S. SmallCap Dividend Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. SmallCap Dividend Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 53% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index measuring the performance of the small-capitalization segment of the U.S. dividend-paying market. The Index is comprised of the companies that compose the bottom 25% of the market capitalization of the WisdomTree U.S. Dividend Index, which defines the dividend-paying universe of companies in the U.S. stock market, after the 300 largest companies have been removed. As of June 30, 2021, the Index had a market capitalization range from \$103 million to \$4.2 billion, with an average market capitalization of \$1.2 billion. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$100 million; and (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 5%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the financials and industrials sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Small-Capitalization Investing Risk.** The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.
- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.

- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.
- **Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Industrials Sector Risk.** The Fund currently invests a significant portion of its assets in the industrials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The industrials sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.

■ **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. In addition, performance is shown for another index that also represents the asset class in which the Fund invests. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 20.80%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	27.55%	4Q/2020
Lowest Return	(36.67)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. SmallCap Dividend Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	(4.41)%	7.40%	8.73%
Return After Taxes on Distributions	(5.12)%	6.54%	7.86%
Return After Taxes on Distributions and Sale of Fund Shares	(2.23)%	5.67%	6.91%
WisdomTree U.S. SmallCap Dividend Index (Reflects no deduction for fees, expenses or taxes)	(4.00)%	7.76%	8.95%
Russell 2000 Index (Reflects no deduction for fees, expenses or taxes)	19.96%	13.26%	11.20%
Russell 2000 Value Index (Reflects no deduction for fees, expenses or taxes)	4.63%	9.65%	8.66%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. Quality Dividend Growth Fund

## Investment Objective

The WisdomTree U.S. Quality Dividend Growth Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Quality Dividend Growth Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.28%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
	\$ 29	\$ 90	\$ 157	\$ 356

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 30% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that consists of dividend-paying U.S. common stocks with growth characteristics. The Index is comprised of the 300 companies in the WisdomTree U.S. Dividend Index, which defines the dividend-paying universe of companies in the U.S. stock market, with the best combined rank of growth and quality factors: specifically long-term earnings growth expectations, return on equity, and return on assets. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii) market capitalization of at least \$2 billion; (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months; and (iv) an earnings yield greater than the dividend yield.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted. At the time of the Index's annual screening date, the maximum weight of any security in the Index is capped at 5% and the maximum weight of any one sector in the Index is capped at 20% (with the exception of the information technology and real estate sectors, which are capped at 25% and 10%, respectively); however, security and/or sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the information technology, industrials, health care and consumer staples sectors comprised a significant portion of the Index.

To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Growth Investing Risk.** Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on the future expectations of the economy and the stock's issuing company.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.

- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Consumer Staples Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer staples sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be significantly affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global and economic conditions.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.
- **Health Care Sector Risk.** The Fund currently invests a significant portion of its assets in the health care sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.
- **Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Industrials Sector Risk.** The Fund currently invests a significant portion of its assets in the industrials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The industrials sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software,

hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.

- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. In addition, performance is shown for another index that also represents the asset class in which the Fund invests. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 11.61%.

## Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	17.87%	2Q/2020
Lowest Return	(19.41)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

#### **Average Annual Total Returns for the periods ending December 31, 2020**

<b>WisdomTree U.S. Quality Dividend Growth Fund</b>	<b>1 Year</b>	<b>5 Years</b>	<b>Since Inception May 22, 2013</b>
Return Before Taxes Based on NAV	13.83%	14.71%	13.10%
Return After Taxes on Distributions	13.23%	14.11%	12.52%
Return After Taxes on Distributions and Sale of Fund Shares	8.50%	11.71%	10.60%
WisdomTree U.S. Quality Dividend Growth Index (Reflects no deduction for fees, expenses or taxes)	14.07%	15.07%	13.42%
NASDAQ U.S. Dividend Achievers Select Index (Reflects no deduction for fees, expenses or taxes)	15.62%	15.02%	12.29%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	18.40%	15.22%	13.63%

### **Management**

#### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

#### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

#### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NASDAQ, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. SmallCap Quality Dividend Growth Fund

## Investment Objective

The WisdomTree U.S. SmallCap Quality Dividend Growth Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. SmallCap Quality Dividend Growth Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 83% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that consists of the small-capitalization segment of dividend-paying U.S. common stocks with growth characteristics. The starting screening universe for the Index is the constituents of the WisdomTree U.S. SmallCap Dividend Index, which consists of the bottom 25% of the market capitalization of the WisdomTree U.S. Dividend Index, which defines the dividend-paying universe of companies in the U.S. stock market, after the 300 largest companies have been removed. As of June 30, 2021, the Index had a market capitalization range from \$103 million to \$2 billion, with an average market capitalization of \$1.2 billion. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) payment of regular cash dividends on shares of common stock during the preceding 12 months; (ii)

market capitalization of at least \$100 million; (iii) average daily dollar trading volume of at least \$100,000 for the preceding three months; and (iv) an earnings yield greater than the dividend yield. From this starting universe, the Index is comprised of the top 50% of companies with the best combined rank of certain growth and quality factors: specifically long-term earnings growth expectations, return on equity, and return on assets.

The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share, a measure of fundamental value. Companies projected to pay more dividends are more heavily weighted. At the time of the Index's annual screening date, the maximum weight of any security in the Index is capped at 2% and the maximum weight of any one sector in the Index is capped at 25% (with the exception of the real estate sector, which is capped at 10%); however, security and/or sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the industrials, financials and consumer discretionary sectors comprised a significant portion of the Index.

To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Small-Capitalization Investing Risk.** The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.
- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company's dividend payments may adversely affect the Fund.
- **Growth Investing Risk.** Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on the future expectations of the economy and the stock's issuing company.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other

factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.

- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile and retail companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers’ disposable income levels, and propensity to spend.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.
- **Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Industrials Sector Risk.** The Fund currently invests a significant portion of its assets in the industrials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The industrials

sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.

- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 18.57%.

## Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	29.33%	4Q/2020
Lowest Return	(33.47)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

**Average Annual Total Returns for the periods ending December 31, 2020**

<b>WisdomTree U.S. SmallCap Quality Dividend Growth Fund</b>	<b>1 Year</b>	<b>5 Years</b>	<b>Since Inception July 25, 2013</b>
Return Before Taxes Based on NAV	7.43%	10.89%	8.78%
Return After Taxes on Distributions	6.72%	10.24%	8.15%
Return After Taxes on Distributions and Sale of Fund Shares	4.74%	8.53%	6.90%
WisdomTree U.S. SmallCap Quality Dividend Growth Index (Reflects no deduction for fees, expenses or taxes)	7.73%	11.20%	9.06%
Russell 2000 Index (Reflects no deduction for fees, expenses or taxes)	19.96%	13.26%	10.31%

**Management****Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

**Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

**Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NASDAQ, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable

about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

# WisdomTree U.S. Quality Shareholder Yield Fund

## Investment Objective

The WisdomTree U.S. Quality Shareholder Yield Fund (the “Fund”) seeks income and capital appreciation.

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 59% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund, an exchange traded fund, is actively managed using a model-based approach.

The Fund seeks to achieve its investment objective by investing primarily in U.S. equity securities that provide a high “total shareholder yield” and exhibit favorable quality characteristics that demonstrate a company’s profitability, such as strong returns on equity (ROE) and/or returns on assets (ROA). The Fund’s investment adviser, WisdomTree Asset Management, Inc. (“WisdomTree Asset Management”), using a disciplined model-based process focused on a long-term approach to investing, seeks to identify approximately 200 companies with a high total shareholder yield, comprising return of capital to shareholders through either dividend distributions or the repurchase of shares (“buybacks”), while also displaying favorable quality characteristics. WisdomTree Asset Management believes screening equity securities by quality measures such as ROE and ROA can improve the Fund returns relative to traditional value oriented investment strategies that focus exclusively on total shareholder yield, while also continuing to provide a source for potential income. At a minimum, the Fund’s portfolio will be reconstituted and rebalanced annually, although a more active approach may be taken depending on such factors as market conditions and investment opportunities, and the number of holdings in the Fund may vary.

The Fund invests primarily in equity securities of companies domiciled in the U.S. or listed on a U.S. exchange. The Fund generally expects to invest in large- and mid-capitalization companies and may invest in any sector. As of

June 30, 2021, companies in the information technology and financials sectors comprised a significant portion of the Fund.

### Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

- **Dividend Paying Securities Risk.** Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by the Fund or the capital resources available for such company’s dividend payments may adversely affect the Fund.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Active Management Risk.** The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will be successful or that the Fund will achieve its investment objective.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services.

This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.

- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Mid-Capitalization Investing Risk.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion.
- **Models and Data Risk.** While the Fund is actively managed, the Fund's investment process is expected to be heavily dependent on quantitative models and the models may not perform as intended. Errors in data used in the models may occur from time to time and may not be identified and/or corrected, which may have an adverse impact on the Fund and its shareholders.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.
- **Value Investing Risk.** Value stocks, as a group, may be out of favor with the market and underperform growth stocks or the overall equity market. Value investing focuses on companies whose stocks appear undervalued, but value stocks may not realize their perceived intrinsic value for extended periods of time or may never realize their perceived intrinsic value.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Russell 1000 Value Index, a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform

in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's name and objective changed effective December 18, 2017. Prior to December 18, 2017, Fund performance reflects the investment objective of the Fund when it was the WisdomTree U.S. LargeCap Value Fund and tracked the performance, before fees and expenses, of the WisdomTree U.S. LargeCap Value Index.

The Fund's year-to-date total return as of June 30, 2021 was 21.84%.

#### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	21.53%	2Q/2020
Lowest Return	(31.17)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

#### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. Quality Shareholder Yield Fund*	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	6.14%	11.11%	11.35%
Return After Taxes on Distributions	5.65%	10.67%	10.96%
Return After Taxes on Distributions and Sale of Fund Shares	3.87%	8.76%	9.35%
Russell 1000 Value Index (Reflects no deduction for fees, expenses or taxes)	2.80%	9.74%	10.50%

\*The Fund's objective changed effective December 18, 2017. From June 19, 2009 through December 17, 2017, the Fund's objective sought to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. LargeCap Value Index.

#### Management

##### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as investment adviser to the Fund. Mellon Investments Corporation (the "Sub-Adviser") serves as sub-adviser to the Fund.

##### Portfolio Managers

The Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. ESG Fund

## Investment Objective

The WisdomTree U.S. ESG Fund (the “Fund”) seeks capital appreciation.

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.28%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years	5 Years	10 Years
	\$ 29	\$ 90	\$ 157	\$ 356

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 78% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund is actively managed using a model-based approach. The Fund seeks to achieve its investment objective by investing primarily in U.S. equity securities that exhibit certain characteristics that the Fund’s investment adviser, WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”), believes to be indicative of positive future returns as well as incorporating favorable environmental, social, and governance (“ESG”) characteristics based on a model developed by WisdomTree Asset Management. WisdomTree Asset Management employs a quantitative model to identify which securities the Fund might purchase and sell and opportune times for purchases and sales. Generally, the Fund’s portfolio will be rebalanced quarterly according to the Adviser’s quantitative model, although a more active approach may be taken depending on factors such as market conditions and investment opportunities, which may lead to frequent trading, cause the number of Fund holdings to vary, and increase the Fund’s portfolio turnover rate.

WisdomTree Asset Management seeks to identify equity securities that have the highest potential for returns based on proprietary measures of fundamental factors, such as value and quality, and technical factors, such as momentum and correlation. In addition, WisdomTree Asset Management seeks to identify equity securities with positive ESG characteristics as determined by a company’s Sustainability score, which is a composite score based on independent third party ESG research and data and measures a company’s ESG impact along with its exposure to potential controversies. Securities of companies involved in certain controversial products or activities, such as tobacco, small arms, controversial weapons, and fossil fuels are excluded regardless of revenue measures. In

addition, securities are weighted on a modified market-capitalization basis taking into consideration the Sustainability score (*i.e.*, securities with a higher market capitalization *and* a higher Sustainability score are more heavily weighted).

As of June 30, 2021, companies in the information technology sector comprised a significant portion of the Fund.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

- **ESG Investing Risk.** The Fund’s ESG investment strategy limits the types and number of investment opportunities available to the Fund and, as a result, the Fund may underperform other funds that do not have an ESG focus. The Fund’s ESG investment strategy may result in the Fund investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG criteria. In addition, companies selected for inclusion in the Fund may not exhibit positive or favorable ESG characteristics at all times and may shift into and out of favor depending on market and economic conditions.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Active Management Risk.** The Fund is actively managed using proprietary investment strategies and processes. There can be no guarantee that these strategies and processes will be successful or that the Fund will achieve its investment objective.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.

- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Models and Data Risk.** While the Fund is actively managed, the Fund's investment process is expected to be heavily dependent on quantitative models and the models may not perform as intended. Errors in data used in the models may occur from time to time and may not be identified and/or corrected, which may have an adverse impact on the Fund and its shareholders.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the S&P 500 Index, a relevant broad-based securities index, and the MSCI USA Extended ESG Focus Index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's name and objective changed effective March 16, 2020. Prior to March 16, 2020, Fund performance reflects the investment objective of the Fund when it was the WisdomTree U.S. Total Market Fund and tracked the performance, before fees and expenses, of the WisdomTree U.S. Total Market Index.

The Fund's year-to-date total return as of June 30, 2021 was 14.85%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	22.34%	2Q/2020
Lowest Return	(24.88)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. ESG Fund*	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	12.97%	13.84%	12.86%
Return After Taxes on Distributions	12.52%	13.28%	12.35%
Return After Taxes on Distributions and Sale of Fund Shares	7.87%	10.96%	10.62%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	18.40%	15.22%	13.88%
MSCI USA Extended ESG Focus Index (Reflects no deduction for fees, expenses or taxes)	22.66%	N/A	N/A

\* The Fund's objective changed effective March 16, 2020. Prior to March 16, 2020, the Fund's objective sought to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Total Market Index.

## Management

### Investment Adviser and Sub-Adviser

WisdomTree Asset Management, Inc. ("WisdomTree Asset Management" or the "Adviser") serves as investment adviser to the Fund. Mellon Investments Corporation (the "Sub-Adviser") serves as sub-adviser to the Fund.

### Portfolio Managers

The Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund's portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### Buying and Selling Fund Shares

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the "bid/ask spread"). Recent

information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares ("Creation Units"), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

# WisdomTree U.S. LargeCap Fund

## Investment Objective

The WisdomTree U.S. LargeCap Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. LargeCap Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.08%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.08%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 8	\$ 26	\$ 45	\$ 103

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 21% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that consists of the 500 largest companies ranked by market capitalization in the WisdomTree U.S. Total Market Index, which is comprised of earnings-generating companies within the large-capitalization segment of the U.S. stock market. Companies in the Index are incorporated, domiciled and listed in the U.S. and have generated positive cumulative earnings over their most recent four fiscal quarters prior to the annual Index screening date. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening date: (i) market capitalization of at least \$100 million; (ii) average daily dollar trading volume of at least \$200,000 for each of the preceding six months; and (iii) a price to earnings ratio of at least 2.

The Index is earnings-weighted annually to reflect the proportionate share of the aggregate earnings each component company has generated. Companies with greater earnings generally have larger weights in the Index. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 15%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments and will be reset at each annual rebalance date. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the information technology, health care and financials sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Large-Capitalization Investing Risk.** The Fund invests primarily in the securities of large-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Health Care Sector Risk.** The Fund currently invests a significant portion of its assets in the health care sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.

■ **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 15.97%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	18.82%	2Q/2020
Lowest Return	(22.90)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. LargeCap Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	11.88%	13.92%	12.97%
Return After Taxes on Distributions	11.29%	13.39%	12.47%
Return After Taxes on Distributions and Sale of Fund Shares	7.32%	11.06%	10.73%
WisdomTree U.S. LargeCap Index (Reflects no deduction for fees, expenses or taxes)	12.02%	14.20%	13.26%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	18.40%	15.22%	13.88%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. MidCap Fund

## Investment Objective

The WisdomTree U.S. MidCap Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. MidCap Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 50% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that is comprised of earnings-generating companies within the mid-capitalization segment of the U.S. stock market. The Index is comprised of the companies in the top 75% of the market capitalization of the WisdomTree U.S. Total Market Index, which defines the earnings-generating universe of companies in the U.S. stock market, after the 500 largest companies have been removed. As of June 30, 2021, the Index had a market capitalization range from \$1.6 billion to \$17 billion, with an average market capitalization of \$6.8 billion. Companies in the Index are incorporated, domiciled and listed in the U.S. and have generated positive cumulative earnings over their most recent four fiscal quarters prior to the annual Index screening date. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening

date: (i) market capitalization of at least \$100 million; (ii) average daily dollar trading volume of at least \$200,000 for each of the preceding six months; and (iii) a price to earnings ratio of at least 2.

The Index is earnings-weighted annually to reflect the proportionate share of the aggregate earnings each component company has generated. Companies with greater earnings generally have larger weights in the Index. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 15%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the financials, consumer discretionary and industrials sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Mid-Capitalization Investing Risk.** The Fund invests primarily in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market

price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

- **Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile and retail companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Industrials Sector Risk.** The Fund currently invests a significant portion of its assets in the industrials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The industrials sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 20.83%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	28.15%	4Q/2020
Lowest Return	(36.79)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. MidCap Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	5.50%	10.11%	10.86%
Return After Taxes on Distributions	4.97%	9.68%	10.49%
Return After Taxes on Distributions and Sale of Fund Shares	3.48%	7.92%	8.91%
WisdomTree U.S. MidCap Index (Reflects no deduction for fees, expenses or taxes)	5.78%	10.47%	11.18%
S&P MidCap 400 Index (Reflects no deduction for fees, expenses or taxes)	13.66%	12.35%	11.51%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. SmallCap Fund

## Investment Objective

The WisdomTree U.S. SmallCap Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. SmallCap Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.38%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.38%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 39	\$ 122	\$ 213	\$ 480

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 56% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 95% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is a fundamentally weighted index that is comprised of earnings-generating companies within the small-capitalization segment of the U.S. stock market. The Index is comprised of the companies in the bottom 25% of the market capitalization of the WisdomTree U.S. Total Market Index, which defines the earnings-generating universe of companies in the U.S. stock market, after the 500 largest companies have been removed. As of June 30, 2021, the Index had a market capitalization range from \$103 million to \$6.2 billion, with an average market capitalization of \$1.2 billion. Companies must be incorporated, domiciled and listed in the U.S. and have generated positive cumulative earnings over their most recent four fiscal quarters prior to the annual Index screening date. To be eligible for inclusion in the Index, a company must meet the following criteria as of the annual Index screening

date: (i) market capitalization of at least \$100 million; (ii) average daily dollar trading volume of at least \$200,000 for each of the preceding six months; and (iii) a price to earnings ratio of at least 2.

The Index is earnings-weighted annually to reflect the proportionate share of the aggregate earnings each component company has generated. Companies with greater earnings generally have larger weights in the Index. The maximum weight of any one sector in the Index, at the time of the Index's annual screening date, is capped at 25% (with the exception of the real estate sector, which is capped at 15%); however, sector weights may fluctuate above the specified cap in response to market conditions and/or the application of volume factor adjustments. The Index methodology applies a volume factor adjustment to reduce a component security's weight in the Index and reallocate the reduction in weight pro rata among the other securities if, as of the annual Index screening date, a component security no longer meets certain trading volume thresholds.

WisdomTree Investments, Inc. ("WisdomTree Investments"), as Index provider, currently uses Standard & Poor's Global Industry Classification Standards ("S&P GICS") to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the financials, industrials and consumer discretionary sectors comprised a significant portion of the Index.

To the extent that the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Funds" and "Additional Non-Principal Risk Information."

- **Small-Capitalization Investing Risk.** The Fund invests primarily in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to adverse economic developments as well as changes in interest rates, government regulation, borrowing costs and earnings.
- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.
- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in

times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

- **Consumer Discretionary Sector Risk.** The Fund currently invests a significant portion of its assets in the consumer discretionary sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The consumer discretionary sector includes, for example, automobile, textile and retail companies. This sector can be significantly affected by, among other things, economic growth, worldwide demand, social trends, consumers' disposable income levels, and propensity to spend.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund's operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund's third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Financials Sector Risk.** The Fund currently invests a significant portion of its assets in the financials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund's investments.
- **Index and Data Risk.** The Fund is not "actively" managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Industrials Sector Risk.** The Fund currently invests a significant portion of its assets in the industrials sector, and therefore, the Fund's performance could be negatively impacted by events affecting this sector. The industrials sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economy growth, government and corporate spending, supply and demand for specific products and manufacturing, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.

- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.

### Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 27.40%.

### Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	30.84%	4Q/2020
Lowest Return	(41.51)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

### Average Annual Total Returns for the periods ending December 31, 2020

WisdomTree U.S. SmallCap Fund	1 Year	5 Years	10 Years
Return Before Taxes Based on NAV	2.79%	10.54%	9.95%
Return After Taxes on Distributions	2.36%	10.16%	9.60%
Return After Taxes on Distributions and Sale of Fund Shares	1.81%	8.30%	8.12%
WisdomTree U.S. SmallCap Index (Reflects no deduction for fees, expenses or taxes)	3.05%	10.79%	10.17%
Russell 2000 Index (Reflects no deduction for fees, expenses or taxes)	19.96%	13.26%	11.20%

## **Management**

### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as NYSE Arca, and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

### **Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

# WisdomTree U.S. Multifactor Fund

## Investment Objective

The WisdomTree U.S. Multifactor Fund (the “Fund”) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree U.S. Multifactor Index (the “Index”).

## Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below. The fees are expressed as a percentage of the Fund’s average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.28%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.28%

## Example

The following example is intended to help retail investors compare the cost of investing in the Fund shares with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
	\$ 29	\$ 90	\$ 157	\$ 356

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 147% of the average value of its portfolio, excluding the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s capital shares.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is generally comprised of 200 U.S. companies with the highest composite scores based on two fundamental factors (value and quality measures) and two technical factors (momentum and correlation). To be eligible for inclusion in the Index, a company must meet the following criteria as of the quarterly Index screening date: (i) listed on a U.S. stock exchange and incorporated and headquartered in the United States; (ii) average daily dollar trading volume of at least \$1,000,000 for each of the preceding three months; and (iii) only common stocks, real estate investment trusts (“REITs”), tracking stocks and holding companies are eligible for inclusion in the Index.

The top 800 companies by market capitalization that meet the foregoing criteria (the “Starting Universe”) are assigned a score for each of the following factors:

- Value – determined by fundamental valuation ratios, *e.g.*, price-to-book, price-to-sales, price-to-earnings
- Quality – determined by static observations and trends of these ratios over time, *e.g.*, return on equity, return on assets
- Momentum – determined by a stock’s risk adjusted returns over multiple periods of time
- Low Correlation – incorporates diversification potential of stocks that are less correlated to the market over historical periods

The score for each factor is used to calculate a company’s overall factor score. Companies from the Starting Universe are ranked by their overall factor score, and the top twenty-five percent (25%) (*i.e.*, 200 out of 800 companies) are selected for inclusion in the Index. Companies are weighted in the Index by a combination of their overall factor score and their inverse volatility over the prior 12 months, subject to certain sector weighting considerations set forth below. For the inverse volatility weighting component, the Index methodology determines each company’s volatility (or risk) as measured by standard deviation over the past 12 months, which reflects the average amount a company’s stock price has differed from the mean over that period. Companies with higher overall factor scores and lower volatility (or risk) receive higher weights in the Index and companies with lower overall factor scores and higher volatility (or risk) receive lower weights in the Index.

The Index is reconstituted and rebalanced quarterly. At the time of the Index’s quarterly screening date, the maximum weight of any security in the Index is capped at 4% and the sectors are weighted the same as the sector weights in the Starting Universe (*i.e.*, sector neutral). In response to market conditions and/or the volume factor adjustments, security weights may fluctuate above the specified cap and/or sector weights may fluctuate from the sector neutral weighting. If a component security no longer meets applicable trading volume thresholds as of the quarterly Index screening date, the Index methodology applies a volume factor adjustment to reduce such component security’s weight in the Index and reallocates the reduction in the weight pro rata among the other remaining securities.

WisdomTree Investments, Inc. (“WisdomTree Investments”), as Index provider, currently uses Standard & Poor’s Global Industry Classification Standards (“S&P GICS”) to define companies within a sector. The following sectors are included in the Index: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, communication services, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil and petroleum industries. As of June 30, 2021, companies in the information technology sector comprised a significant portion of the Index.

To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### Principal Risks of Investing in the Fund

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. The risks are generally presented in alphabetical order to facilitate finding particular risks when comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the sections in the Fund’s Prospectus titled “Additional Principal Risk Information About the Funds” and “Additional Non-Principal Risk Information.”

- **Investment Risk.** As with all investments, an investment in the Fund is subject to loss. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors, such as economic, financial or political events that impact the entire market, market segments, or specific issuers. The Fund’s NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. In addition, the respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States.

During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Although many global economies have begun to re-open as infection and hospitalization rates decline, some economies, including those of countries with limited access to COVID-19 vaccines, have struggled to control the spread of the virus and re-open their economies. As a result, it remains unclear how COVID-19 will impact global markets in the future.

- **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange traded funds (“ETFs”), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund’s shares in the secondary market generally differ from the Fund’s daily NAV and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines. Additionally, in stressed market conditions, the market for the Fund’s shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.
- **Cybersecurity Risk.** The Fund and its service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Fund in many ways, including, but not limited to, disruption of the Fund’s operational capacity, loss of proprietary information, theft or corruption of data, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting the Fund’s third-party service providers, market makers, institutional investors authorized to purchase and redeem shares directly from the Fund (*i.e.*, Authorized Participants), or the issuers of securities in which the Fund invests may subject the Fund to many of the same risks associated with direct cybersecurity breaches.
- **Geopolitical Risk.** The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally, each of which may negatively impact the Fund’s investments.
- **Index and Data Risk.** The Fund is not “actively” managed and seeks to track the price and yield performance, before fees and expenses, of the Index. The Index provider has the right to make adjustments to the Index or to cease making the Index available without regard to the particular interests of the Fund or its shareholders. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index calculations and/or the construction of the Index may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the Index, which is generally not used as a benchmark by other funds or managers.
- **Information Technology Sector Risk.** The Fund currently invests a significant portion of its assets in the information technology sector, and therefore, the Fund’s performance could be negatively impacted by events affecting this sector. The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation.
- **Investment Style Risk.** The Fund invests in the securities included in, or representative of, the Index regardless of their investment merit. The Fund does not attempt to outperform the Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to the Index.
- **Issuer-Specific Risk.** Issuer-specific events, including changes in the actual or perceived financial condition of an issuer, can have a negative impact on the value of the Fund.
- **Large-Capitalization Investing Risk.** The Fund may invest in the securities of large-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of these companies underperform

securities of smaller capitalization companies or the market as a whole. Large-capitalization companies may adapt more slowly to new competitive challenges and be subject to slower growth during times of economic expansion.

- **Mid-Capitalization Investing Risk.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund's performance may be adversely affected if securities of these companies underperform securities of other capitalization ranges or the market as a whole. Securities of mid-capitalization companies are often less stable and more vulnerable to market volatility and adverse economic developments than securities of larger companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion.
- **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.
- **Non-Diversification Risk.** The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. To the extent the Fund invests a significant percentage of its assets in a limited number of issuers, the Fund is subject to the risks of investing in those few issuers, and may be more susceptible to a single adverse economic or regulatory occurrence. As a result, changes in the market value of a single security could cause greater fluctuations in the value of Fund shares than would occur in a diversified fund.
- **Portfolio Turnover Risk.** The Fund's investment strategy may result in a high portfolio turnover rate. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and the distribution of additional capital gains, which generate greater tax liabilities for shareholders. These factors may negatively affect the Fund's performance.

## Fund Performance

Historical Fund performance, which varies over time, can provide an indication of the risks of investing in the Fund. The bar chart that follows shows the annual total returns of the Fund for each full calendar year since the Fund commenced operations, or the past 10 calendar years, as applicable. The table that follows the bar chart shows the Fund's average annual total returns, both before and after taxes. This table also shows how the Fund's performance compares to the Index and that of a relevant broad-based securities index. In addition, performance is shown for another index that also represents the asset class in which the Fund invests. Index returns do not reflect deductions for fees, expenses or taxes. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated performance information for the Fund is available online on the Fund's website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund's year-to-date total return as of June 30, 2021 was 12.46%.

## Best and Worst Quarter Returns (for the periods reflected in the bar chart above)

	Return	Quarter/Year
Highest Return	21.77%	2Q/2020
Lowest Return	(22.47)%	1Q/2020

After-tax returns are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on your tax situation and may differ from those shown and are not relevant if you hold your shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. In some cases, the return after taxes may exceed the return before taxes due to an assumed tax benefit from any losses on a sale of Fund shares at the end of the measurement period.

#### **Average Annual Total Returns for the periods ending December 31, 2020**

<b>WisdomTree U.S. Multifactor Fund</b>	<b>1 Year</b>	<b>Since Inception June 29, 2017</b>
Return Before Taxes Based on NAV	11.91%	12.19%
Return After Taxes on Distributions	11.45%	11.79%
Return After Taxes on Distributions and Sale of Fund Shares	7.24%	9.50%
WisdomTree U.S. Multifactor Index (Reflects no deduction for fees, expenses or taxes)	11.86%	12.29%
S&P 500 Index (Reflects no deduction for fees, expenses or taxes)	18.40%	15.56%
S&P 500 Equal Weight Index (Reflects no deduction for fees, expenses or taxes)	12.83%	11.96%

### **Management**

#### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) serves as investment adviser to the Fund. Mellon Investments Corporation (the “Sub-Adviser”) serves as sub-adviser to the Fund.

#### **Portfolio Managers**

The Fund is managed by the Sub-Adviser’s Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Fund’s portfolio are described below.

Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been a portfolio manager of the Fund since October 2020.

David France, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Todd Frysinger, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Vlasta Sheremeta, CFA, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

Michael Stoll, a Vice President, Senior Portfolio Manager and Team Manager, has been a portfolio manager of the Fund since June 2021.

#### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that individual shares of the Fund are listed on a national securities exchange, such as Cboe BZX Exchange, Inc., and may only be purchased and sold in the secondary market through a broker-dealer at market prices. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount). In addition, an investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying and selling shares in the secondary market (the “bid/ask spread”). Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid/ask spreads, is available on the Fund’s website at [www.wisdomtree.com](http://www.wisdomtree.com).

The Fund issues and redeems shares at NAV only in large blocks of shares (“Creation Units”), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. The Fund issues and redeems Creation Units in exchange for a portfolio of securities and/or U.S. cash.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

## Additional Information About the Funds

### Additional Information About the Funds' Investment Objectives

Each Fund, except U.S. Quality Shareholder Yield Fund and U.S. ESG Fund (together, the “Active Funds”), seeks to track the price and yield performance, before fees and expenses, of a particular index (“Index”) developed by WisdomTree Investments, Inc. (“WisdomTree Investments”). Each Index consists of securities in the market suggested by its name that meet specific criteria developed by WisdomTree Investments.

Since each Fund’s investment objective has been adopted as a non-fundamental investment policy, each Fund’s investment objective may be changed without a vote of shareholders upon 60 days’ written notice to shareholders.

### Additional Information About the Funds' Investment Strategies

*All Funds (except the Active Funds).* Each Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the types of securities suggested by its name (*i.e.*, investments connoted by its Index). Each Fund anticipates meeting this policy because, under normal circumstances, at least 95% (80% for the U.S. Quality Dividend Growth Fund, U.S. SmallCap Quality Dividend Growth Fund, and U.S. Multifactor Fund) of each Fund’s total assets (exclusive of collateral held from securities lending) will be invested in component securities of its underlying Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities, such as depositary receipts based on component securities. WisdomTree Asset Management, Inc. (“WisdomTree Asset Management” or the “Adviser”) expects that, over time, the correlation between each Fund’s performance and that of its Index, before fees and expenses, will be 95% or better. A number of factors may affect a Fund’s ability to achieve a high degree of correlation with its Index, and there can be no guarantee that a Fund will achieve a high degree of correlation.

The quantity of holdings in a Fund, by using a representative sampling strategy, will be based on a number of factors, including asset size of the Fund. In addition, from time to time, securities are added to or removed from its Index and consequently the attributes of its Index, such as sectors or industries represented in its Index and weightings, may change. Each Fund may sell securities that are represented in its Index, or purchase securities that are not yet represented in its Index, in anticipation of their removal from or addition to its Index or to reflect various corporate actions or other changes to its Index. Further, each Fund may overweight or underweight securities in its Index, purchase or sell securities not in the Index, or utilize various combinations of other available techniques, in seeking to track its Index.

*Indexes.* Each Index is “fundamentally weighted” and differs from most traditional indexes in that the proportion, or “weighting,” of the securities in each Index is based on a measure of fundamental value, such as dividends, or earnings, or, with respect to the U.S. Multifactor Fund, a combination of fundamental factors (value and quality measures), technical factors (momentum and correlation), and volatility. Most traditional indexes and index funds weight their securities by looking simply at the market capitalization of such securities.

Each “Dividend Index” is weighted based on either the amount of cash dividends that companies in the Index pay, or are expected to pay, or the dividend yield of the companies in the Index. This means that securities of companies that pay, or are expected to pay, higher amounts of cash dividends or have higher dividend yields generally will be more heavily weighted in each Index and Fund. Only regular dividends (*i.e.*, established or quarterly dividends as opposed to non-recurring or special dividends) are included in the determination of cash dividends or dividend yield.

Each “Core Equity Index” weights securities based on either the amount of earnings of the companies in the Index or the earnings yields of such companies. This means that securities of companies that have higher earnings or earnings yields generally will be more heavily weighted in each of these Indexes and Funds.

*Active Funds.* Each Active Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in securities of companies domiciled in the U.S. or listed on a U.S. exchange.

### Non-Principal Information About the Funds' Investment Strategies

Each Fund (except the Active Funds) may invest in other investments that the Fund believes will help it track its Index, including cash and cash equivalents, as well as in shares of other investment companies (including affiliated investment companies, such as ETFs), forward contracts, futures contracts, options on futures contracts, options and swaps.

**Temporary Defensive Strategies.** Each Active Fund’s investment process is heavily dependent on quantitative models, which do not adjust to take temporary defensive positions. However, each Active Fund reserves the right to

invest in U.S. government securities, money market instruments, and cash, without limitation, as determined by the Adviser or Sub-Adviser in response to adverse market, economic, political or other conditions. In the event an Active Fund engages in temporary defensive strategies that are inconsistent with its investment strategies, the Active Fund's ability to achieve its investment objective may be limited.

**Securities Lending.** Each Fund may lend its portfolio securities in an amount not to exceed one-third (33 1/3%) of the value of its total assets via a securities lending program through its securities lending agent, State Street Bank and Trust Company, to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. A securities lending program allows a Fund to receive a portion of the income generated by lending its securities and investing the respective collateral. A Fund will receive collateral for each loaned security which is at least equal to the market value of that security, marked to market each trading day. In the securities lending program, the borrower generally has the right to vote the loaned securities; however, a Fund may call loans to vote proxies if a material issue affecting the Fund's economic interest in the investment is to be voted upon. Security loans may be terminated at any time by a Fund.

### **Additional Principal Risk Information About the Funds**

This section provides additional information regarding the principal risks described under "Principal Risks of Investing in the Fund" in the Fund Summaries. Risk information may not be applicable to each Fund. Please consult each Fund's summary sections to determine which risks are applicable to a particular Fund. Each of the factors below could have a negative impact on Fund performance and trading prices.

#### **Active Management Risk**

The Active Funds are actively managed using proprietary investment strategies and processes. The Funds are subject to active management or investment-selection risk and their performance therefore will reflect, in part, the ability of the Sub-Adviser to select investments and to make investment decisions that are suited to achieving the Funds' investment objective. The Sub-Adviser's assessment of a particular investment, company, sector or country and/or assessment of broader economic, financial or other macro views, may prove incorrect, including because of factors that were not adequately foreseen, and the selection of investments may not perform as well as expected when those investments were purchased or as well as the markets generally, resulting in Fund losses or underperformance. There can be no guarantee that these strategies and processes will produce the intended results and no guarantee that the Funds will achieve their investment objectives or outperform other investment strategies over the short- or long-term market cycles. This risk is exacerbated when an investment or multiple investments made as a result of such decisions are significant relative to the Funds' net assets.

#### **Cybersecurity Risk**

The Funds and their service providers may be susceptible to operational and information security risks resulting from a breach in cybersecurity, including cyber-attacks. A breach in cybersecurity, intentional or unintentional, may adversely impact the Funds in many ways, including, but not limited to, disruption of a Fund's operational capacity, loss of proprietary information, theft or corruption of data maintained online or digitally, denial-of-service attacks on websites or network resources, and the unauthorized release of confidential information. Cyber-attacks affecting a Fund's third-party service providers, including the Adviser, Sub-Adviser, administrator, custodian, and transfer agent, may subject a Fund to many of the same risks associated with direct cybersecurity breaches and adversely impact the Fund. For instance, cyber-attacks may impact a Fund's ability to calculate its NAV, cause the release of confidential business information, impede trading, cause a Fund to incur additional compliance costs associated with corrective measures, subject a Fund to regulatory fines or other financial losses, and/or cause reputational damage to a Fund. Cybersecurity breaches of market makers, Authorized Participants, or the issuers of securities in which a Fund invests could also have material adverse consequences on a Fund's business operations and cause financial losses for a Fund and its shareholders. While the Funds and their service providers have established business continuity plans and risk management systems designed to address cybersecurity risks, prevent cyber-attacks and mitigate the impact of cybersecurity breaches, there are inherent limitations on such plans and systems. In addition, the Funds have no control over the cybersecurity protections put in place by their service providers or any other third parties whose operations may affect the Funds or their shareholders.

#### **ESG Investing Risk**

The U.S. ESG Fund's investment strategy limits the types and number of investment opportunities available to the Fund and, as a result, the Fund may underperform other funds that do not have an ESG focus. The Fund's ESG investment strategy may result in the Fund investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. In addition, companies selected for inclusion in the Fund may not exhibit positive or favorable ESG characteristics at all times and may shift into and out of favor

depending on market and economic conditions. There are different interpretations regarding what it means for a company to have positive or favorable ESG characteristics and the companies identified for inclusion in the Fund's portfolio could be viewed differently when considering different interpretations in addressing ESG matters. In addition, the company may not score positively or favorably with respect to all ESG characteristics.

### **Geopolitical Risk**

The United States has experienced security concerns, war, threats of war, aggression and/or conflict, terrorism, economic uncertainty, sanctions or the threat of sanctions, natural and environmental disasters, the spread of infectious illness, widespread disease or other public health issues and/or systemic market dislocations (including due to events outside of the United States) that have led, and in the future may lead, to increased short-term market volatility and may have adverse long-term effects on the U.S. and world economies and markets generally. Such geopolitical and other events may also disrupt securities markets and, during such market disruptions, a Fund's exposure to the other risks described herein will likely increase. For example, a market disruption may adversely affect the orderly functioning of the securities markets. Each of the foregoing may negatively impact the Fund's investments.

### **Index and Data Risk**

The Funds that employ a "passive management" – or indexing – investment approach are not "actively" managed and seek to track the price and yield performance, before fees and expenses, of the applicable Index. The Index provider has the right to make adjustments to the Indexes or to cease making the Indexes available without regard to the particular interests of the Funds or the Funds' shareholders. While the Index provider provides a rules-based methodology that describes what each Index is designed to achieve within a particular set of rules, neither the Index provider, its agents nor data providers provide any warranty or accept any liability in relation to the quality, accuracy or completeness of the applicable Index, its calculation, valuation or its related data, and they do not guarantee that the applicable Index will be in line with the Index provider's methodology, regardless of whether or not the Index provider is affiliated with the Adviser. The composition of the Index is dependent on data from one or more third parties and/or the application of such data within the rules of the Index methodology, which may be based on assumptions or estimates. If the computers or other facilities of the Index provider, Index calculation agent, data providers and/or relevant stock exchange malfunction for any reason, calculation and dissemination of Index values may be delayed and trading in Fund shares may be suspended for a period of time. Errors in Index data, Index computations and/or the construction of the Indexes may occur from time to time and may not be identified and/or corrected by the Index provider, Index calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Funds and their shareholders. The potential risk of continuing error may be particularly heightened in the case of the Indexes, which are generally not used as benchmarks by other funds or managers. Any of the foregoing may lead to the inclusion of securities in an Index, exclusion of securities from an Index or the weighting of securities in an Index that would have been different had data or other information been correct or complete, which may lead to a different investment outcome than would have been the case had such events not occurred. The Adviser, through the Sub-Adviser, seeks to manage each Fund to correspond to the applicable Index provided by the Index provider. Consequently, losses or costs associated with an Index's errors or other risks described above will generally be borne by the Funds and their shareholders and neither the Adviser nor its affiliates or agents make any representations or warranties regarding the foregoing.

### **Investment Risk**

As with all investments, an investment in a Fund is subject to loss. Investors in a Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time. An investment in a Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

### **Investment Style Risk**

Each Fund (except the Active Funds) invests in the securities included in, or representative of, its Index regardless of their investment merit. The Funds do not attempt to outperform their Indexes or take defensive positions in declining markets. As a result, each Index Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. The returns from the types of securities in which a Fund invests may underperform returns from the various general securities markets or different asset classes. This may cause a Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities (for example, large-, mid- and small-capitalization stocks) tend to go through cycles of doing better – or worse – than the general securities markets. In the past, these periods have lasted for as long as several years.

**Dividend Paying Securities Risk**

Securities that pay dividends, as a group, may be out of favor with the market and underperform the overall equity market or stocks of companies that do not pay dividends. In addition, changes in the dividend policies of the companies held by a Fund (which may be due to forces outside of a company's control, such as political, social or other pressures) or the capital resources available for such company's dividend payments may adversely affect the Fund. In the event a company reduces or eliminates its dividend, a Fund may not only lose the dividend payout but the stock price of the company may also fall.

**Growth Investing Risk**

Growth stocks, as a group, may be out of favor with the market and underperform value stocks or the overall equity market. Growth stocks generally are priced higher than non-growth stocks, in relation to the issuer's earnings and other measures, because investors believe they have greater growth potential, but there is no guarantee that their growth potential will be realized. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their prices are based heavily on future expectations. If investors believe an issuing company's future earnings expectations will not be met, growth stock prices can decline rapidly and significantly. An investment in growth stocks may also be susceptible to rapid price swings during periods of economic uncertainty.

**Value Investing Risk**

Value stocks, as a group, may be out of favor with the market and underperform growth stocks or the overall equity market. Value stocks tend to be inexpensive relative to their earnings or assets compared to other types of stocks. Value investing focuses on companies whose stocks appear undervalued, but value stocks may not realize their perceived intrinsic value for extended periods of time or may never realize their perceived intrinsic value.

**Issuer-Specific Risk**

Changes in the actual or perceived financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of a Fund.

**Market Risk**

The trading prices of equity securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, including, but not limited to, changes in interest rates, government regulation, and the outlook for economic growth or recession, as well as events that impact specific issuers, such as changes to an issuer's actual or perceived creditworthiness. A Fund's NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

**Recent Events**

The respiratory disease caused by a novel coronavirus (COVID-19) has spread globally for over a year, resulting in a global pandemic and major disruption to economies and markets around the world, including the United States. During this time, financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted or suspended. Liquidity for many instruments has been greatly reduced for periods of time. Some interest rates are very low and in some cases yields are negative. Some sectors of the economy and individual issuers have experienced particularly large losses. Governments and central banks, including the Federal Reserve in the U.S., have taken extraordinary and unprecedented actions to support local and global economies and the financial markets. The impact of these measures, and whether they will be effective to mitigate the economic and market disruption, will not be known for some time. In recent months, however, the rapid COVID-19 vaccination rollout in the United States and certain other developed countries, coupled with the passage of stimulus programs in the U.S. and abroad, have resulted in the re-opening of businesses, a reduction in quarantine and masking requirements, increased consumer demand, and the resumption of certain in-person schooling, travel and events. Despite these positive trends, the prevalence of new COVID-19 variants, a failure to achieve herd immunity, or other unforeseen circumstances may result in the continued spread of the virus throughout unvaccinated populations or a resurgence in infections among vaccinated individuals. As a result, it remains unclear if recent positive trends will continue in developed markets and whether such trends will spread world-wide to countries with limited access to vaccines that are still experiencing rising COVID-19 cases, hospitalizations and deaths.

## **Market Capitalization Risk**

### **Large-Capitalization Investing**

Securities of large-capitalization companies may underperform securities of smaller companies or the market as a whole. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

### **Mid-Capitalization Investing**

The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies, but mid-capitalization companies may also underperform the securities of small-capitalization companies because medium capitalization companies are more mature and are subject to slower growth during economic expansion. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole. Some medium capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies.

### **Small-Capitalization Investing**

The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of larger-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small capitalization companies have limited product lines, markets, and financial and managerial resources and tend to concentrate on fewer geographical markets relative to larger capitalization companies. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies. Small-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

## **Models and Data Risk**

The Active Funds are actively managed based upon the Adviser's quantitative model, which is heavily dependent on data from one or more third parties and may not perform as intended. If the computers or other facilities of the data providers malfunction for any reason, model calculation and dissemination may be delayed, and trading of Fund shares may be suspended for a period of time. Errors in the model data, calculations and/or the construction of the model may occur from time to time and may not be identified and/or corrected by the Adviser or other applicable party for a period of time or at all, which may have an adverse impact on a Fund and its shareholders. The potential risk of continuing error may be particularly heightened in the case of the model, which will likely not be used by other funds or managers.

## **Non-Correlation Risk**

As with all index funds, the performance of an Index Fund and its Index may vary somewhat for a variety of reasons. For example, each Index Fund incurs operating expenses and portfolio transaction costs, while also managing cash flows and potential operational inefficiencies, not incurred by its Index. In addition, an Index Fund may not be fully invested in the securities of its Index at all times or may hold securities not included in its Index or may be subject to pricing differences, differences in the timing of dividend accruals, operational inefficiencies and the need to meet various new or existing regulatory requirements. For example, it may take several business days for additions and deletions to an Index to be reflected in the portfolio composition of an Index Fund. The use of sampling techniques may affect an Index Fund's ability to achieve close correlation with its Index. By using a representative sampling strategy, an Index Fund generally can be expected to have a greater non-correlation risk and this risk may be heightened during times of market volatility or other unusual market conditions. When markets are volatile, the ability to sell securities at fair value prices may be adversely impacted and may result in additional trading costs and/or increase the Index tracking risk.

## **Non-Diversification Risk**

Each Fund is considered to be non-diversified. This means that each Fund may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase a Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on a Fund's performance. However, each Fund intends

to satisfy the asset diversification requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, for qualification as a regulated investment company (“RIC”). See the “Taxes – Qualification as a Regulated Investment Company” section of the Statement of Additional Information (“SAI”) for detail regarding the asset diversification requirements.

### **Portfolio Turnover Risk**

The U.S. Multifactor Fund’s investment strategy may result in a high portfolio turnover rate. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and the distribution of additional capital gains, which generate greater tax liabilities for shareholders. These factors may negatively affect the Fund’s performance.

## **Sector Risks**

### **Consumer Discretionary Sector Risk**

The consumer discretionary sector includes, for example, automobile, textile and retail companies. This sector can be significantly affected by, among other things, changes in domestic and international economies, exchange and interest rates, worldwide demand, competition, consumers’ disposable income levels, propensity to spend and consumer preferences, social trends, and marketing campaigns. Companies in the consumer discretionary sector have historically been characterized as relatively cyclical and therefore more volatile in times of change.

### **Consumer Staples Sector Risk**

The consumer staples sector includes, for example, food and drug retail and companies whose primary lines of business are food, beverage and other household items, including agricultural products. This sector can be affected by, among other things, changes in price and availability of underlying commodities, rising energy prices and global economic conditions. Unlike the consumer discretionary sector, companies in the consumer staples sector have historically been characterized as non-cyclical in nature and therefore less volatile in times of change.

### **Financials Sector Risk**

The financials sector includes, for example, banks and financial institutions providing mortgage and mortgage related services. This sector can be significantly affected by, among other things, changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis. These factors and events have had, and may continue to have, a significant negative impact on the valuations and stock prices of companies in this sector and have increased the volatility of investments in this sector.

### **Health Care Sector Risk**

The health care sector includes, for example, biotechnology, pharmaceutical, health care facilities, and health care equipment and supply companies. This sector can be significantly affected by, among other things, lapsing patent protection, technological developments that make drugs obsolete, government regulation, price controls, and approvals for drugs.

### **Industrials Sector Risk**

The industrials sector includes, for example, aerospace and defense, non-residential construction, engineering, machinery, transportation, and commercial and professional services companies. This sector can be significantly affected by, among other things, business cycle fluctuations, worldwide economic growth, government and corporate spending, supply and demand for specific products and manufacturing, rapid technological developments, international political and economic developments, environmental issues, and tax and governmental regulatory policies. As the demand for, or prices of, industrials increase, the value of a Fund’s investments generally would be expected to also increase. Conversely, declines in the demand for, or prices of, industrials generally would be expected to contribute to declines in the value of such securities. Such declines may occur quickly and without warning and may negatively impact the value of a Fund and your investment.

### **Information Technology Sector Risk**

The information technology sector includes, for example, internet, semiconductor, software, hardware, and technology equipment companies. This sector can be significantly affected by, among other things, the supply and demand for specific products and services, the pace of technological development, and government regulation. Challenges facing companies in the information technology sector include distressed cash flows due to the need to commit substantial capital to meet increasing competition, particularly in formulating new

products and services using new technology, technological innovations that make existing products and services obsolete, and satisfying consumer demand.

### **Shares of the Funds May Trade at Prices Other Than NAV**

As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of a Fund will not materially differ from a Fund's NAV, there may be times when the market price and the NAV vary significantly, including due to timing reasons, perceptions about the NAV, supply and demand of a Fund's shares (including disruptions in the creation/redemption process), during periods of market volatility and/or other factors. Thus, you may pay more (or less) than NAV when you buy shares of a Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the Fund's shares or sells at a time when the market price is at a discount to the NAV of the Fund's shares, an investor may sustain losses. Additionally, in stressed market conditions, the market for a Fund's shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

### **Additional Non-Principal Risk Information**

**Trading.** Although each Fund's shares are listed for trading on NYSE Arca, Inc., NASDAQ or Cboe BZX Exchange, Inc. (each a "Listing Exchange") and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Listing Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. The trading market in a Fund's shares may become less liquid in response to deteriorating liquidity in the markets for a Fund's holdings or due to irregular trading activity in the markets. Trading in shares may be halted due to market conditions or for reasons that, in the view of the Listing Exchange, make trading in shares inadvisable. In addition, trading in shares on the Listing Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Listing Exchange "circuit breaker" rules. There can be no assurance that the requirements of the Listing Exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged or that Fund shares will trade with any volume, or at all, on any stock exchange.

**Costs of Buying or Selling Shares.** Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Fund shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to buy shares (the "bid" price) and the price at which an investor is willing to sell shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares based on trading volume and market liquidity (including for the underlying securities held by a Fund), and is generally lower if a Fund's shares have more trading volume and market liquidity and higher if a Fund's shares have little trading volume and market liquidity. Further, a relatively small investor base in a Fund, asset swings in a Fund and/or increased market volatility may cause increased bid/ask spreads. Shares of the Funds, similar to shares of other issuers listed on a stock exchange, may be sold short and are therefore subject to the risk of increased volatility associated with short selling. Due to the costs of buying or selling Fund shares, including bid/ask spreads, frequent trading of Fund shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

**Securities Lending.** Although the Funds are indemnified by the Funds' lending agent for losses incurred in connection with a borrower's default with respect to a loan, the Funds bear the risk of loss of investing cash collateral and may be required to make payments to a borrower upon return of loaned securities if invested collateral has declined in value. Furthermore, because of the risks in delay of recovery, a Fund may lose the opportunity to sell the securities at a desirable price, and the Fund will generally not have the right to vote securities while they are being loaned. These events could also trigger negative tax consequences for a Fund.

**Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.** The Funds have a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a prolonged and material premium or discount to NAV (or not trade at all) and possibly face trading halts and/or delisting: (i) APs exit the business, have a business disruption (including through the types of disruptions described under "Cybersecurity Risk" and "Operational Risk") or otherwise become unable or unwilling to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business, have a business disruption (including through the types of disruptions described under "Cybersecurity Risk" and "Operational Risk") or significantly reduce their business activities and no other entities step forward to perform their functions.

**Operational Risk.** The Funds and their service providers, including the Adviser, Sub-Adviser, administrator, custodian, and transfer agent, may experience disruptions that arise from human error, processing and communications errors, counterparty or third-party errors, technology or systems failures, any of which may have an adverse impact on the Funds. Although the Funds and their service providers seek to mitigate these operational risks through their internal controls and operational risk management processes, these measures may not identify or may be inadequate to address all such risks.

#### **Portfolio Holdings Information**

Information about each Fund's daily portfolio holdings, including the identities and quantities of such portfolio holdings, is available at [www.wisdomtree.com](http://www.wisdomtree.com). In addition, each Fund discloses its complete portfolio holdings as of the end of its fiscal year (March 31) and its second fiscal quarter (September 30) in its reports to shareholders. Each Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters (June 30 and December 31, respectively) with the SEC in Part F of Form N-PORT no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC's website, [www.sec.gov](http://www.sec.gov), or by calling WisdomTree Trust at 1-866-909-WISE (9473). A summarized description of each Fund's policies and procedures with respect to the disclosure of each Fund's portfolio holdings is available in the SAI.

## Management

### Investment Adviser

As the investment adviser, WisdomTree Asset Management has overall responsibility for the general management and administration of the WisdomTree Trust (the “Trust”) and each of its separate investment portfolios called “Funds.” WisdomTree Asset Management is a registered investment adviser with offices located at 245 Park Avenue, 35th Floor, New York, New York 10167, and is a leader in ETF management. As of June 30, 2021, WisdomTree Asset Management had assets under management totaling approximately \$45.1 billion. WisdomTree Investments\* is the parent company of WisdomTree Asset Management. WisdomTree Asset Management provides an investment program for each Fund. The Adviser provides proactive oversight of the Sub-Adviser, defined below, daily monitoring of the Sub-Adviser’s buying and selling of securities for each Fund, and regular review of the Sub-Adviser’s performance. In addition, the Adviser arranges for sub-advisory, transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Funds to operate.

\* “WisdomTree” is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. WisdomTree Investments has been issued a patent and has a patent application pending on the methodology and operation of its Indexes and the Funds.

For the fiscal year ended March 31, 2021, the Funds paid advisory fees to the Adviser, as a percentage of average daily net assets, in the amounts listed below.

Name of Fund	Management Fee
U.S. Total Dividend Fund	0.28%
U.S. High Dividend Fund	0.38%
U.S. Dividend ex-Financials Fund	0.38%
U.S. LargeCap Dividend Fund	0.28%
U.S. MidCap Dividend Fund	0.38%
U.S. SmallCap Dividend Fund	0.38%
U.S. Quality Dividend Growth Fund	0.28%
U.S. SmallCap Quality Dividend Growth Fund	0.38%
U.S. Quality Shareholder Yield Fund	0.38%
U.S. ESG Fund	0.28%
U.S. LargeCap Fund	0.08%
U.S. MidCap Fund	0.38%
U.S. SmallCap Fund	0.38%
U.S. Multifactor Fund	0.28%

Under the Investment Advisory Agreement for each Fund, WisdomTree Asset Management has agreed to pay generally all expenses of each Fund, subject to certain exceptions. For a detailed description of the Investment Advisory Agreement for each Fund, please see the “Management of the Trust” section of the SAI. Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of chief compliance officer (“CCO”) services with respect to each Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of each Fund’s average daily net assets for providing such services and paying such expenses. WisdomTree Asset Management provides CCO services to the Trust.

The basis for the Board of Trustees’ approval of the Funds’ Investment Advisory Agreements is available in the Trust’s Semi-Annual Report to Shareholders for the period ended September 30, 2020.

### Sub-Adviser

Mellon Investments Corporation (the “Sub-Adviser”) is responsible for the day-to-day management of the Funds. The Sub-Adviser, a registered investment adviser, is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at One Boston Place, 201 Washington Street, Boston, Massachusetts 02108. As of June 30, 2021, the Sub-Adviser had assets under management totaling approximately \$673 billion. The Sub-Adviser is an independently operated indirect subsidiary of The Bank of New York Mellon Corporation, a publicly traded financial holding company. The

Sub-Adviser chooses each Fund's portfolio investments and places orders to buy and sell the portfolio investments. WisdomTree Asset Management pays the Sub-Adviser for providing sub-advisory services to the Funds.

The basis for the Board of Trustees' approval of the Funds' Investment Sub-Advisory Agreements is available in the Trust's Semi-Annual Report to Shareholders for the period ended September 30, 2020.

WisdomTree Asset Management, as the investment adviser for the Funds, may hire one or more sub-advisers to oversee the day-to-day activities of the Funds. The sub-advisers are subject to oversight by WisdomTree Asset Management. WisdomTree Asset Management and the Trust have received an exemptive order from the SEC that permits WisdomTree Asset Management, with the approval of the Independent Trustees of the Trust, to retain unaffiliated investment sub-advisers for each Fund, without submitting the sub-advisory agreement to a vote of the Fund's shareholders. The Trust will notify shareholders in the event of any change in the identity of such sub-adviser or sub-advisers. WisdomTree Asset Management has ultimate responsibility for the investment performance of the Funds due to its responsibility to oversee each sub-adviser and recommend their hiring, termination and replacement. WisdomTree Asset Management is not required to disclose fees paid to any sub-adviser retained pursuant to the order.

### **Portfolio Managers**

Each Fund is managed by the Sub-Adviser's Equity Index Strategies Portfolio Management team. The individual members of the team jointly and primarily responsible for the day-to-day management of the Funds' portfolios are described below.

Ms. Marlene Walker-Smith, a Director, Head of Equity Index Portfolio Management, has been with the Sub-Adviser since 1995. Ms. Walker-Smith leads a team of portfolio managers covering domestic and international index portfolios, as well as corporate actions. Previously, she served as an equity index portfolio manager and equity trader for the Sub-Adviser. Prior to joining the firm, Ms. Walker-Smith was a trader for Banc One Investment Advisors Corporation and a brokerage services manager for Mid Atlantic Capital Corporation. She has been in the investment industry since 1990. Ms. Walker-Smith earned an MBA in finance from the University of Pittsburgh and a BA in history and Russian from Washington & Jefferson College.

Mr. David France, CFA, a Vice President, has been with the Sub-Adviser since 2009. Mr. France is a senior portfolio manager and team manager in the equity index portfolio management group. He manages and leads a team of portfolio managers responsible for US and non-US equity index portfolios. Prior to joining the firm, he was an investment advisor with PNC Wealth Management. Previously, he worked as an investment analyst with Greycourt, an independent advisory firm serving wealthy families and foundations, and before that he held various fixed income and equity support positions at T. Rowe Price. He has been in the investment industry since 1995. Mr. France earned an MS in finance from Loyola University Maryland and a BSBA in accounting from Duquesne University. He holds the CFA® designation and is a member of CFA Institute and CFA Society Pittsburgh.

Mr. Todd Frysinger, CFA, a Vice President, has been with the Sub-Adviser since 2007. Mr. Frysinger is a senior portfolio manager and team manager in the equity index portfolio management group. He manages and leads a team of portfolio managers responsible for US and non-US equity index portfolios. Prior to joining the firm, Mr. Frysinger served as assistant portfolio manager for Mellon Financial Corporation's Corporate Treasury group, managing fixed income investment portfolios. He has been in the investment industry since 1996. Mr. Frysinger earned an MS in finance from Boston College and a BS in finance and management from Elizabethtown College. He holds the CFA® designation and is a member of CFA Institute and CFA Society Pittsburgh.

Ms. Vlasta Sheremeta, CFA, a Vice President, has been with the Sub-Adviser since 2011. Ms. Sheremeta is a senior portfolio manager and team manager in the equity index portfolio management group. She manages and leads a team of portfolio managers responsible for US and non-US equity index portfolios. Prior to joining the firm, she provided trade execution support to the FX trading desk at BNY Mellon. She has been in the investment industry since 2010. Ms. Sheremeta earned an MBA from Carnegie Mellon University and a BS in business administration from the University of Pittsburgh. She holds the CFA® designation and is a member of the CFA Institute and the CFA Society of Pittsburgh.

Mr. Michael Stoll, a Vice President, has been with the Sub-Adviser since 2005. Mr. Stoll is a senior portfolio manager and team manager in equity index portfolio management group. He manages and leads a team of portfolio managers responsible for US and non-US equity index portfolios. Prior to joining the firm, he was a senior manager in consulting engineering at Northgate Environmental Management. He has been in the

investment industry since 2005. Mr. Stoll earned an MBA and an MS in geotechnical engineering from the University of California at Berkeley and a BS in civil engineering from the University of California at Irvine.

The Funds' SAI provides additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of shares in the Funds.

## Additional Information on Buying and Selling Fund Shares

Most investors will buy and sell shares of the Funds through broker-dealers at market prices. Shares of the Funds trade on the Listing Exchange and elsewhere during the trading day and can be bought and sold throughout the trading day like other shares of publicly traded securities. When buying or selling shares through a broker, most investors will incur customary brokerage commissions and charges and you may pay some or all of the spread between the bid and the offered prices in the secondary market for shares. Shares of the Funds trade under the trading symbols listed on the cover of this Prospectus.

### Share Trading Prices

Transactions in Fund shares will be priced at NAV only if you are an institutional investor (*e.g.*, broker-dealer) that has signed an agreement with the Distributor (as defined below) and you thereafter purchase or redeem shares directly from a Fund in Creation Units. As with other types of securities, the trading prices of shares in the secondary market can be affected by market forces such as supply and demand, economic conditions and other factors. The price you pay or receive when you buy or sell your shares in the secondary market may be more or less than the NAV of such shares.

### Determination of Net Asset Value

The NAV of each Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the Listing Exchange, generally 4:00 p.m. New York time (the "NAV Calculation Time"). NAV per share is calculated by dividing a Fund's net assets by the number of Fund shares outstanding.

In calculating its NAV, a Fund generally values: (i) equity securities (including preferred stock) traded on any recognized U.S. or non-U.S. exchange at the last sale price or official closing price on the exchange or system on which they are principally traded; (ii) unlisted equity securities (including preferred stock) at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask price; and (iii) fixed income securities at current market quotations or mean prices obtained from broker-dealers or independent pricing service providers. In addition, a Fund may invest in money market funds which are valued at their NAV per share and affiliated ETFs which are valued at their last sale or official closing price on the exchange on which they are principally traded or at their NAV per share in instances where the affiliated ETF has not traded on its principal exchange.

Fair value pricing is used by the Funds when reliable market valuations are not readily available or are not deemed to reflect current market values. Securities that may be valued using "fair value" pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by "significant events." An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund's next NAV Calculation Time that may materially affect the value of the Fund's investment (*e.g.*, government action, natural disaster, or significant market fluctuation). When fair-value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

### Dividends and Distributions

The U.S. Total Dividend Fund, U.S. High Dividend Fund, U.S. Dividend ex-Financials Fund, U.S. LargeCap Dividend Fund, U.S. MidCap Dividend Fund, U.S. SmallCap Dividend Fund, U.S. Quality Dividend Growth Fund and U.S. SmallCap Quality Dividend Growth Fund intend to pay out dividends on a monthly basis. The remaining Funds intend to pay out dividends on a quarterly basis. Nonetheless, a Fund may not make a dividend payment every month or quarter, as applicable.

Each Fund intends to distribute its net realized capital gains to investors annually. The Funds occasionally may be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

### Book Entry

Shares of the Funds are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding shares of each Fund.

Investors owning shares of the Funds are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all shares of the Funds. Participants include DTC, securities brokers and dealers, banks, trust companies, clearing corporations, and other institutions that directly or indirectly maintain a

custodial relationship with DTC. As a beneficial owner of shares, you are not entitled to receive physical delivery of stock certificates or to have shares registered in your name, and you are not considered a registered owner of shares. Therefore, to exercise any right as an owner of shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any securities that you hold in book-entry or “street name” form. Your broker will provide you with account statements, confirmations of your purchases and sales, and tax information.

#### **Delivery of Shareholder Documents – Householding**

Householding is an option available to certain investors of the Funds. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Funds is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

#### **Frequent Purchases and Redemptions of Fund Shares**

The Funds have adopted policies and procedures with respect to frequent purchases and redemptions of Creation Units of Fund shares. Since the Funds are ETFs, only APs are authorized to purchase and redeem shares directly from the Funds. Because purchase and redemption transactions with APs are an essential part of the ETF process and may help keep ETF trading prices in line with NAV, each Fund accommodates frequent purchases and redemptions by APs. Frequent purchases and redemptions for cash may increase index tracking error and portfolio transaction costs and may lead to the realization of capital gains. Frequent in-kind creations and redemptions generally do not give rise to these concerns. Each Fund reserves the right to reject any purchase order at any time. Each Fund reserves the right to impose restrictions on disruptive, excessive, or short-term trading.

#### **Investments by Investment Companies**

Section 12(d)(1) of the Investment Company Act of 1940, as amended (the “1940 Act”), restricts investments by investment companies in the securities of other investment companies, including shares of each Fund. Registered investment companies are permitted to invest in the Funds beyond the limits set forth in Section 12(d)(1) of the 1940 Act subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Funds.

## Additional Tax Information

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Funds. Your investment in a Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Fund shares, including the possible application of foreign, state, and local tax laws.

Each Fund intends to qualify each year for treatment as a RIC. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, a Fund's failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- A Fund makes distributions;
- You sell Fund shares; and
- You purchase or redeem Creation Units (APs only).

### Taxes on Distributions

For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long a Fund owned the assets that generated them, rather than how long a shareholder has owned Fund shares. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by a Fund for one year or less generally result in short-term capital gains and losses. Distributions of a Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are properly reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains. For non-corporate shareholders, long-term capital gains are generally subject to tax at reduced rates. Distributions of short-term capital gain will generally be taxable as ordinary income. Distributions reported by a Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties.

To the extent a Fund lends its securities and receives substitute dividend payments, such payments will not generate qualified dividend income when distributed to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, but declared by a Fund in October, November or December of the previous year, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by a Fund before your investment (and thus were included in the price you paid for your shares).

Dividends and distributions from the Funds and capital gain on the sale of Fund shares are generally taken into account in determining a shareholder's "net investment income" for purposes of the 3.8% tax on net investment income applicable to certain individuals, estates and trusts.

A Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. A Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause such Funds to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, such Funds may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Distributions (other than Capital Gain Dividends) paid to shareholders that are neither citizens nor residents of the U.S. or to foreign entities will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies, but Capital Gain Dividends generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the United States for 183 days or more per year. A Fund may, under certain circumstances, report all or a portion of a dividend as an "interest related dividend" or a "short term capital

gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Different tax consequences may result if you are a non-U.S. shareholder engaged in a trade or business within the United States.

You should note that if you purchase shares just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as “buying a dividend” and should be avoided by taxable investors.

The Fund (or your broker) will inform you of the amount and character of any distributions shortly after the close of each calendar year.

Certain Funds may invest in REITs. “Qualified REIT dividends” (*i.e.*, ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income eligible for capital gain tax rates) are eligible for a 20% deduction by non-corporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). Distributions by a Fund to its shareholders that are attributable to qualified REIT dividends received by such Fund and which such Fund properly reports as “section 199A dividends,” are treated as “qualified REIT dividends” in the hands of non-corporate shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend, and is not under an obligation to make related payments with respect to a position in substantially similar or related property. A Fund is permitted to report such part of its dividends as section 199A dividends as are eligible, but is not required to do so.

REITs in which a Fund invests often do not provide complete and final tax information to the Fund until after the time that the Fund issues a tax reporting statement. As a result, a Fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement. When such reclassification is necessary, the Fund (or a financial intermediary, such as a broker, through which a shareholder owns shares) will send you a corrected, final Form 1099-DIV to reflect the reclassified information. If you receive a corrected Form 1099-DIV, use the information on this corrected form, and not the information on the previously issued tax reporting statement, in completing your tax returns.

The Funds (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally are required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

### **Taxes When You Sell Fund Shares**

Any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if you held the shares you sold for more than one year. Any capital gain or loss realized upon a sale of Fund shares held for one year or less is generally treated as a short-term gain or loss, except that any capital loss on a sale of shares held for six months or less is treated as a long-term capital loss to the extent of Capital Gain Dividends paid with respect to such shares. The ability to deduct capital losses may be limited depending on your circumstances.

### **Taxes on Creation and Redemption of Creation Units**

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes that exchanges securities for Creation Units generally will recognize a gain or loss equal to the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the exchanger’s aggregate basis in the securities surrendered and any amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger’s basis in the Creation Units and the sum of the aggregate U.S. dollar market value of the securities plus the amount of any cash received for such Creation Units. The Internal Revenue Service (“IRS”), however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be permitted to be currently deducted under the rules governing “wash sales” (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position.

Gain or loss recognized by an Authorized Participant upon an issuance of Creation Units in exchange for non-U.S. currency will generally be treated as ordinary income or loss. Gain or loss recognized by an Authorized Participant upon an issuance of Creation Units in exchange for securities, or upon a redemption of Creation Units, may be

capital or ordinary gain or loss depending on the circumstances. Any capital gain or loss realized upon an issuance of Creation Units in exchange for securities will generally be treated as long-term capital gain or loss if the securities have been held for more than one year. Any capital gain or loss realized upon the redemption of a Creation Unit will generally be treated as long-term capital gain or loss if the Fund shares comprising the Creation Unit have been held for more than one year. Otherwise, such capital gains or losses are treated as short-term capital gains or losses.

A person subject to U.S. federal income tax with the U.S. dollar as its functional currency who receives non-U.S. currency upon a redemption of Creation Units and does not immediately convert the non-U.S. currency into U.S. dollars may, upon a later conversion of the non-U.S. currency into U.S. dollars, recognize any gains or losses resulting from fluctuations in the value of the non-U.S. currency relative to the U.S. dollar since the date of the redemption. Any such gains or losses will generally be treated as ordinary income or loss.

Persons exchanging securities or non-U.S. currency for Creation Units should consult their own tax advisors with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rules apply and when a loss might be deductible. If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Fund shares you purchased or redeemed and at what price.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in a Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in a Fund under all applicable tax laws.

## **Distribution**

Foreside Fund Services, LLC (the “Distributor”) serves as the distributor of Creation Units for each Fund on an agency basis. The Distributor does not maintain a secondary market in shares of the Funds. The Distributor’s principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor has no role in determining the policies of any Fund or the securities that are purchased or sold by any Fund.

## **Premium/Discount and NAV Information**

Information regarding a Fund’s NAV and how often shares of each Fund traded on the Listing Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund during the past calendar year and most recent calendar quarter is available at [www.wisdomtree.com](http://www.wisdomtree.com).

## **Additional Notices**

### **Listing Exchange**

Shares of the Funds are not sponsored, endorsed, or promoted by the Listing Exchange. The Listing Exchange makes no representation or warranty, express or implied, to the owners of the shares of any Fund or any member of the public regarding the ability of a Fund to track the total return performance of any Index or the ability of any Index identified herein to track stock market performance. The Listing Exchange is not responsible for, nor has it participated in, the determination of the compilation or the calculation of any Index, nor in the determination of the timing of, prices of, or quantities of the shares of any Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. The Listing Exchange has no obligation or liability to owners of the shares of any Fund in connection with the administration, marketing, or trading of the shares of the Fund.

The Listing Exchange does not guarantee the accuracy and/or the completeness of any Index or any data included therein. The Listing Exchange makes no warranty, express or implied, as to results to be obtained by the Trust on behalf of its Funds, owners of the shares, or any other person or entity from the use of the subject Indexes or any data included therein. The Listing Exchange makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to any Index or any data included therein. Without limiting any of the foregoing, in no event shall the Listing Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

### **WisdomTree and the Funds**

WisdomTree Investments and WisdomTree Asset Management (together, “WisdomTree”) and the Funds make no representation or warranty, express or implied, to the owners of shares of the Funds or any member of the public regarding the advisability of investing in securities generally or in the Funds particularly or the ability of any Index to track general stock market performance. WisdomTree Investments is the licensor of certain Indexes, trademarks, service marks and trade names of the Funds. WisdomTree Investments has no obligation to take the needs of the

Funds or the owners of shares of the Funds into consideration in determining, composing, or calculating the Indexes. WisdomTree Investments is not responsible for, and has not participated in, the determination of the timing, prices, or quantities of shares of the Funds to be issued or in the determination or calculation of the equation by which the shares of the Funds are redeemable. WisdomTree and the Funds do not guarantee the accuracy, completeness, or performance of any Index or the data included therein and shall have no liability in connection with any Index or Index calculation. An Index's past performance is not necessarily an indication of how the Index will perform in the future. WisdomTree Investments has contracted with an independent calculation agent to calculate each Index.

## **Financial Highlights**

The financial highlights table is intended to help you understand each Fund's financial performance for the past five fiscal years or, if shorter, the period since a Fund's inception. The total return in the table represents the rate that an investor would have earned (or lost) on an investment in the respective Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the Funds' financial statements, are included in the Funds' Annual Report, which is available upon request.

## Financial Highlights

Selected data for a share of beneficial interest outstanding throughout the period is presented below:

<b>WisdomTree U.S. Dividend ex-Financials Fund</b>	<b>For the Year Ended March 31, 2021</b>	<b>For the Year Ended March 31, 2020</b>	<b>For the Year Ended March 31, 2019</b>	<b>For the Year Ended March 31, 2018</b>	<b>For the Year Ended March 31, 2017</b>
Net asset value, beginning of year	\$ 64.64	\$ 85.52	\$ 84.43	\$ 82.50	\$ 75.41
Investment operations:					
Net investment income <sup>1</sup>	2.67	3.11	3.06	2.73	2.52

<b>TOTAL RETURN<sup>2</sup></b>	<b>60.80%</b>	<b>(12.73)%</b>	<b>6.34%</b>	<b>13.31%</b>	<b>19.39%</b>
<b>RATIOS/SUPPLEMENTAL DATA:</b>					
Net assets, end of year (000's omitted)	\$88,374	\$72,824	\$113,025	\$69,946	\$62,755
Ratios to average net assets of:					
Expenses	0.28%	0.28%	0.28%	0.28%	0.28%
Net investment income	1.29%	1.90%	1.89%	1.75%	1.87%
Portfolio turnover rate <sup>5</sup>	78%	56%	22%	22%	19%

<sup>1</sup> Based on average shares outstanding.

<sup>2</sup> Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. For the periods in which the investment advisor waived advisory fees for the WisdomTree U.S. Dividend ex-Financials Fund, the total return would have been lower if certain expenses had not been waived.

<sup>3</sup> The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.

<sup>4</sup> The expense ratio includes investment advisory fee waivers. Without these investment advisory fee waivers, the expense ratio would have been unchanged.

<sup>5</sup> Portfolio turnover rate excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation.

<sup>6</sup> The information reflects the investment objective and strategy of the WisdomTree U.S. Total Market Fund through March 16, 2020 and the investment objective and strategy of the WisdomTree U.S. ESG Fund thereafter.

<sup>7</sup> Per share amounts were adjusted to reflect a 3:1 stock split effective November 10, 2017.

Net asset value, end of year	\$ 47.23	\$ 22.38	\$ 36.08	\$ 35.70	\$ 32.16
<b>TOTAL RETURN<sup>3</sup></b>	<b>113.74%</b>	<b>(36.87)%</b>	<b>2.72%</b>	<b>12.09%<sup>4</sup></b>	<b>26.75%</b>
<b>RATIOS/SUPPLEMENTAL DATA:</b>					
Net assets, end of year (000's omitted)	\$609,327	\$419,676	\$736,098	\$588,999	\$490,370
Ratios to average net assets <sup>5</sup> of:					
Expenses <sup>6</sup>	0.38%	0.38%	0.38%	0.38%	0.38%
Net investment income	1.33%	1.45%	1.56%	1.08%	1.06%
Portfolio turnover rate <sup>7</sup>	56%	55%	45%	48%	51%

<sup>1</sup> Per share amounts were adjusted to reflect a 3:1 stock split effective November 10, 2017.

<sup>2</sup> Based on average shares outstanding.

<sup>3</sup> Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. For the periods in which the investment advisor waived advisory fees, the total return would have been lower if certain expenses had not been waived.

<sup>4</sup> Includes a reimbursement from the sub-advisor for an operational error. Excluding the reimbursement, total return would have been unchanged.

<sup>5</sup> The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.

<sup>6</sup> The expense ratio includes investment advisory fee waivers. Without these investment advisory fee waivers, the expense ratio would have been unchanged.

<sup>7</sup> Portfolio turnover rate excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation.

<sup>8</sup> Per share amounts were adjusted to reflect a 3:1 stock split effective February 6, 2017.

## Financial Highlights (concluded)

Selected data for a share of beneficial interest outstanding throughout the period is presented below:

<b>WisdomTree U.S. SmallCap Quality Dividend Growth Fund</b>	<b>For the Year Ended March 31, 2021</b>	<b>For the Year Ended March 31, 2020</b>	<b>For the Year Ended March 31, 2019</b>	<b>For the Year Ended March 31, 2018</b>	<b>For the Year Ended March 31, 2017</b>

Net assets, end of year (000's omitted)	\$875,531	\$634,956	\$648,103	\$579,232	\$571,504
Ratios to average net assets of:					
Expenses	0.28%	0.28% <sup>5,6</sup>	0.28% <sup>5,6</sup>	0.28% <sup>5,6,7</sup>	0.28% <sup>5,6,7</sup>
Net investment income	2.73%	2.82% <sup>5</sup>	2.78% <sup>5</sup>	2.56% <sup>5</sup>	2.63% <sup>5</sup>
Portfolio turnover rate <sup>3</sup>	22%	16%	11%	11%	12%

<sup>1</sup> Based on average shares outstanding.

<sup>2</sup> Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. For the periods in which the investment advisor waived advisory fees for the WisdomTree U.S. Total Dividend Fund, the total return would have been lower if certain expenses had not been waived.

<sup>3</sup> Portfolio turnover rate excludes the value of the portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund's capital shares. Short-term securities with maturities less than or equal to 365 days are excluded from the portfolio turnover calculation.

<sup>4</sup> Includes a reimbursement from the sub-advisor for an operational error. Excluding the reimbursement, total return would have been unchanged.

<sup>5</sup> The ratios to average net assets do not include net investment income (loss) or expenses of other funds in which the Fund invests.

<sup>6</sup> The expense ratio includes investment advisory fee waivers. Without these investment advisory fee waivers, the expense ratio would have been unchanged.

<sup>7</sup> Included in the expense ratio are legal expenses. Without these legal expenses, the annualized expense ratio would have been unchanged.
