Who We Are

Fred Alger Management, LLC is widely recognized as a pioneer of growth-style investment management. We have been an independent, privately owned firm since our founding in 1964. For more than 50 years, we have had **three leaders with one vision**: Maintaining the legacy and continuity of the Alger Investment Philosophy.

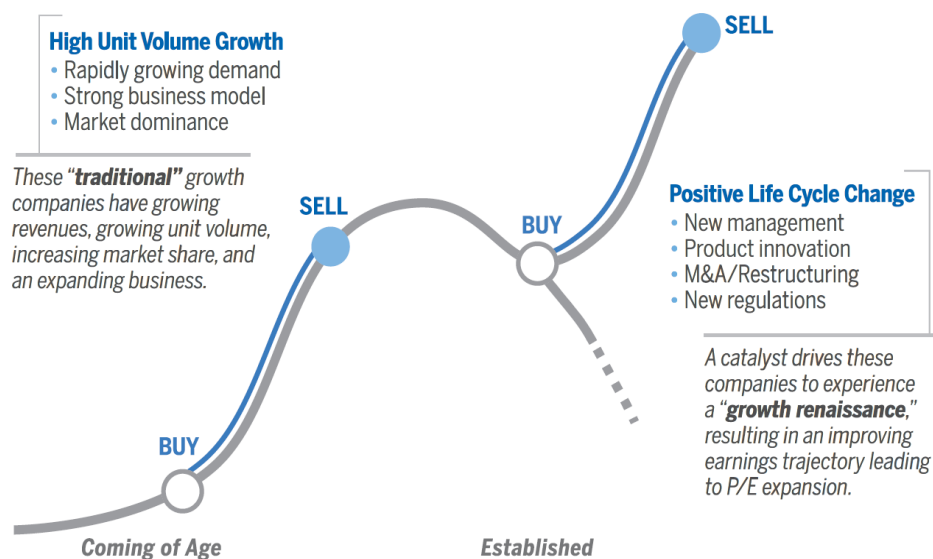

Philosophy

Alger has been committed to a growth style of investing since the firm was founded in 1964. We believe that the best way to uncover and evaluate such companies is through intensive, fundamental, proprietary investment research. At Alger, we believe companies undergoing **Positive Dynamic Change** offer the best investment opportunities. By Positive Dynamic Change, we mean those companies experiencing High Unit Volume Growth and Positive Life Cycle Change.

High Unit Volume Growth

- Rapidly growing demand
- Strong business model
- Market dominance

These "**traditional**" growth companies have growing revenues, growing unit volume, increasing market share, and an expanding business.

Process

NEW IDEAS

Analysts identify companies experiencing positive dynamic change in their sectors and regions to generate potential investment ideas

ANALYSIS

Analysts perform in-depth company analysis to develop a differentiated view supported by detailed financial models and stress-tested for a range of potential outcomes

DIALOGUE

Analysts present their ideas to portfolio managers and have their investment thesis and assumptions challenged

CONSTRUCTION

Portfolio managers construct portfolios of the highest conviction ideas while managing risk

MONITORING

Risks are collaboratively managed by analysts, portfolio managers, the Director of Quantitative and Risk Management, and compliance

Alger is committed to sustainability and is a signatory to the PRI.

Inspired by Change, Driven by Growth.

Sector Allocation (as of 9/30/21)

■ Alger Small Cap Growth Institutional Fund ■ Russell 2000 Growth Index

3rd Quarter 2021

Risk Disclosures - Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness such as COVID-19 or other public health issues, recessions, or other events could have a significant impact on investments. A significant portion of assets may be invested in securities of companies in related sectors, and may be similarly affected by economic, political, or market events and conditions and may be more vulnerable to unfavorable sector developments. Investing in companies of small capitalizations involve the risk that such issuers may have limited product lines or financial resources, lack management depth, or have limited liquidity. Foreign securities and Emerging Markets involve special risks including currency fluctuations, inefficient trading, political and economic instability, and increased volatility. This material is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

Class I shares are an investment vehicle for institutional investors, such as corporations, foundations, and trusts managing various types of employee benefit plans, as well as charitable, religious, and educational institutions. Investors may purchase or redeem Class I shares through a financial intermediary. There are no sales charges on purchases or redemptions.

Sector allocations shown are exclusive of cash.

Portfolio Statistics are sourced from Morningstar, an independent source which we believe to be reliable and based on the fund share class referenced.

Active Share is a measure of the percentage of stock holdings in a portfolio that differs from the benchmark index. Alpha measures the difference between a portfolio's actual returns and its expected performance, given its level of risk (as measured by beta). Beta measures a portfolio's sensitivity to market movements relative to a particular index; a portfolio with a beta of 1.00 would be expected to have returns equal to such index. Characteristics and portfolio statistics are sourced from FactSet, an independent source which we believe to be reliable. Fred Alger Management, LLC, however, makes no representation that it is complete or accurate. Downside Capture Ratio measures a portfolio's performance in down markets relative to the benchmark. It is calculated by taking the portfolio's downside return and dividing it by the benchmark's downside return. A down-market is defined as those time periods in which market return is less than 0. Equity Holdings for the referenced product represents individual securities held, excluding private placements, private equity, rights, warrants, options, other derivatives, cash or cash equivalents and securities where the total market value in the portfolio is less than one dollar. A list of all holdings can be found at www.alger.com for the applicable fund or composite. Information Ratio was calculated as the portfolio's rate of return less the index's rate of return relative to the portfolio's standard deviation less the index's standard deviation for the period shown. P/E Ratios were calculated using a weighted harmonic average and EPS Growth rates were calculated using a weighted median. Please note that alternative methodologies exist for calculating P/E Ratios and EPS Growth, and utilizing another methodology might produce materially different results than those shown. Earnings per share (EPS) is the portion of a company's earnings or profit allocated to each share of common stock. Sharpe Ratio was calculated as the portfolio's rate of return less the 3 month T-Bill's rate of return relative to the portfolio's standard deviation less the 3 month T-Bill's standard deviation for the period. Please note that using different points of comparison may have materially different results. Standard Deviation measures how much the portfolio's return has deviated from its average historical return. Upside Capture Ratio measures a portfolio's performance in up markets relative to the benchmark. It is calculated by taking the portfolio's upside return and dividing it by the benchmark's upside return.

Women in Asset Management utilized several criteria when selecting a recipient of its Active US Equity Manager of the Year award. All qualified nominees were female portfolio managers, or, alternatively, women who have active roles via their research on/analysis of U.S. listed equities. Qualified nominees could be involved in a publicly available fund or in an institutional portfolio. Judges considered portfolio performance statistics as well as evidence of challenges faced and overcome by nominees. No ranking was conducted as part of the winner selection process. Fred Alger Management, LLC uses the Global Industry Classification Standard (GICS®) for categorizing companies into sectors and industries. GICS® is used for all portfolio characteristics involving sector and industry data such as benchmark, active and relative weights and attribution.

The Global Industry Classification Standard (GICS®) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's Financial Services, LLC (S&P). Neither MSCI, S&P, their affiliates, nor any of their third party providers ("GICS Parties") makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including warranties of accuracy, completeness, merchantability and fitness for a particular purpose. The GICS Parties shall not have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of such damages. Sector and industry classifications are sourced from GICS. Historical classifications use GICS categories available as of the date of this presentation. Portfolio holdings may change and stocks of companies noted may or may not be held by one or more Alger portfolios from time to time. Investors should not consider references to individual securities as an endorsement or recommendation to purchase or sell such securities. Transactions in such securities may be made which seemingly contradict the references to them for a variety of reasons, including but not limited to, liquidity to meet redemptions or overall portfolio rebalancing.

The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. **Past performance is no guarantee of future results.**

Morningstar percentile rankings are based on the total return percentile rank that includes reinvested dividends and capital gains (excluding sales charge) within each Morningstar Category. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100. If sales charges were included, performance would be lower and the rank may be lower.

Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating may differ among share classes of a mutual fund as a result of different sales loads and/or expense structures. It may be based in part, on the performance of a predecessor fund. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

Alger Small Cap Growth Institutional Fund I was rated 4, 5, and 4 Star(s) for the 3-, 5-, and 10-year periods among 575, 506, and 381 Small Growth funds as of 09/30/21.

Rankings and ratings may be based in part on the performance of a predecessor fund or share class and are calculated by Morningstar using a performance calculation methodology that differs from that used by Fred Alger Management, LLC's. Differences in the methodologies may lead to variances in calculating total performance returns, in some cases this variance may be significant, thereby potentially affecting the rating/ranking of the Fund(s). When an expense waiver is in effect, it may have a material effect on the total return or yield, and therefore the rating/ranking for the period.

The Russell 2000® Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 companies with higher growth earning potential as defined by Russell's leading style methodology. The Russell 2000 Growth Index is constructed to provide a comprehensive and unbiased barometer for the small-cap growth segment. Russell 2000® Growth Index performance does not reflect deductions for fees or expenses. Investors cannot invest directly in any index. Index performance does not reflect deductions for taxes. Note that comparing the performance to a different index might have materially different results than those shown. **The performance data quoted represents past performance, which is not an indication or a guarantee of future results.**
