

# Utilities

TICKERS Investor Class: BULIX

## Overall Morningstar Ratings™

Morningstar Category: Utilities

Investor Class ★★

Morningstar ratings vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

## Goal and Strategy

Long-term growth of capital and income through investments in companies engaged in the utility industry.

## Distinguishing Characteristics

Invests at least 80% of its assets in the stocks of companies that are engaged in the utilities industry. The portfolio is constructed systematically with a risk management framework that seeks the optimal tradeoff between risk and return.

## Portfolio Management Team

To obtain performance data current to the most recent month end, please visit [www.americancentury.com/performance](http://www.americancentury.com/performance). Investment return and share value will fluctuate, and redemption value may be more or less than original cost. Data assumes reinvestment of dividends and capital gains. Returns for periods less than one year are not annualized.**

**You should consider the fund's investment objectives, risks, and charges and expenses carefully before you invest. The fund's prospectus or summary prospectus, which can be obtained at [americancentury.com](http://americancentury.com), contains this and other information about the fund, and should be read carefully before investing.**

**DUE TO MARKET VOLATILITY, CURRENT PERFORMANCE MAY BE DIFFERENT THAN THE FIGURES SHOWN.**

## A Note About Risk

Due to the limited focus of this fund, it may experience greater volatility than funds with a broader investment strategy. The fund is not intended to serve as a complete investment program by itself. There is no guarantee that the investment objectives will be met. Dividends and yields represent past performance and there is no guarantee that they will continue to be paid. The information is not intended as a personalized recommendation or fiduciary advice and should not be relied upon for investment, accounting, legal or tax advice.

The holdings listed should not be considered recommendations to purchase or sell a particular security. Equity holdings are grouped to include common shares, depository receipts, rights and warrants issued by the same company. Fund holdings subject to change.

## Morningstar Rating - Investor Class

Morningstar Category - Utilities	Overall	3 Year	5 Year	10 Year
Rating	★★	★	★	★★
# of Funds	58	58	54	47

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating™ metrics. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) Past performance is no guarantee of future results.

The S&P 500 Utilities index is comprised of companies in the S&P 500 Index which are classified as members of the GICS utilities sector. This classification includes, but is not limited to, utilities such as electric, water, and gas, as well as independent power producers and energy traders and companies that generate and distribute electricity from renewable sources.

In no event shall S&P be liable for any direct, indirect, special or consequential damages in connection with recipients' use of such data or information. The S&P 500® Index is composed of 500 selected common stocks, most of which are listed on the New York Stock Exchange. Stocks are chosen on a market capitalization-weighted basis. Because of this weighting, the fund expects that the 50 largest companies will comprise a large proportion of the S&P® Index. Created by Standard & Poor's® Corporation, it is considered to represent the performance of the stock market in general. It is not an investment product available for purchase.

**Key Terms:** **Alpha:** Shows how a fund did relative to what would have been expected given the fund's beta and the performance of the benchmark index. For example, an alpha of 1.4 means that the fund outperformed its estimated return (based on market activity alone) by 1.4%. **Beta:** Measures the volatility of the fund, as compared to that of the overall market. The market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. **Weighted Average Market Capitalization:** The average of the weighted capitalizations of a portfolio's holdings. **Price/Earnings Ratio (P/E):** The price of stock divided by its annual earnings per share. **Price/Book Ratio (P/B):** The ratio of a stock's price to its book value per share. **R2 - (R-squared):** A statistic that indicates how much of a fund's fluctuations were attributable to movements in the fund's benchmark index. **Sharpe Ratio:** Measures the potential reward offered by a mutual fund relative to its risk level using the fund's standard deviation and its excess return to determine reward per unit of risk. The higher the sharpe ratio, the better the fund's historical risk-adjusted performance. **Standard Deviation:** Defines how widely returns varied from an average over a given period of time. A higher standard deviation means a more volatile fund. For example, a fund with a standard deviation of 6 and an average annual return of 10% saw annualized monthly returns fall within 6 percentage points of that average (or between 4% and 16%) two-thirds of the time.
