

# Vanguard Emerging Markets Stock Index Fund

International stock fund | Institutional Shares

## Fund facts

Risk level Low ← → High					Total net assets	Expense ratio as of 02/26/21	Ticker symbol	Turnover rate	Inception date	Fund number
1	2	3	4	5	\$7,686 MM	0.10%	VEMIX	10.1%	06/22/00	0239

## Investment objective

Vanguard Emerging Markets Stock Index Fund seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in emerging market countries.

## Investment strategy

The fund employs an indexing investment approach designed to track the performance of the FTSE Emerging Markets All Cap China A Inclusion Index, a market-capitalization-weighted index that is made up of approximately 3,500 common stocks of large-, mid-, and small-cap companies located in emerging markets around the world. The fund invests by sampling the index, meaning that it holds a broadly diversified collection of securities that, in the aggregate, approximates the index in terms of key characteristics. These key characteristics include industry weightings and market capitalization, as well as certain financial measures, such as price/earnings ratio and dividend yield.

### Plain talk about risk

An investment in the fund could lose money over short or even long periods. You should expect the fund's share price and total return to fluctuate within a wide range, like the fluctuations of the overall stock market. The fund's performance could be hurt by:

**Stock market risk:** The chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising stock prices and periods of falling stock prices. The fund's investments in foreign stocks can be riskier than U.S. stock investments. Foreign stocks tend to be more volatile and less liquid than U.S. stocks. The prices of foreign stocks and the prices of U.S. stocks may move in opposite directions. In addition, the fund's target index may, at times, become focused in stocks of a particular market sector, which would subject the fund to proportionately higher exposure to the risks of that sector.

**Country/Regional risk:** The chance that world events—such as political upheaval, financial troubles, or natural disasters—will adversely affect the value of securities issued by companies in foreign countries or regions. Country/regional risk is especially high in emerging markets. The index's, and therefore the fund's, heavy exposure to China, Brazil, and Taiwan subjects the fund to a higher degree of country risk than that of more geographically diversified international funds.

**Emerging markets risk:** The chance the stocks of companies located in emerging markets will be substantially more volatile, and substantially less liquid, than the stocks of companies located in more developed foreign markets.

**Currency risk:** The chance that the value of a foreign investment, measured in U.S. dollars, will decrease because of unfavorable changes in currency exchange rates.

**Index sampling risk:** The chance that the securities selected for the fund, in the aggregate, will not provide investment performance matching that of the index.

**China A-shares risk:** The chance that the fund may not be able to access a sufficient amount of China A-shares to track its target index. China A-shares are only available to foreign investors through a quota license or the China Stock Connect program.
