INVESTMENT PROCESS

- The Co-CIOs and their team of equity analysts employ Gotham's proprietary analytical framework to evaluate stocks within the coverage universe on measures of absolute and relative value.
- Gotham's equity research and risk controls are used to select long and short stock portfolios primarily from the U.S. large and mid-cap range.
- The long (short) portfolio is rebalanced daily to weight most heavily those stocks priced at the largest discount (premium) to Gotham's assessment of value.
- In general, as a company appears cheaper, its weight in the portfolio increases.
- Risk for the fund is managed by limiting concentration in any one company, industry or sector. In addition, gross and net exposures are managed daily to remain within carefully defined ranges.

CUMULATIVE PERFORMANCE SINCE INCEPTION

PORTFOLIO MANAGERS

Joel Greenblatt

Managing Principal & Co-Chief Investment Officer

Mr. Greenblatt serves as Managing Principal and Co-Chief Investment Officer of Gotham Asset Management, the successor to Gotham Capital, an investment firm he founded in 1985. Since 1996, he has been a professor on the adjunct faculty of Columbia Business School where he teaches "Value and Special Situation Investing." Mr. Greenblatt is a director of Pzena Investment Management, Inc., a global investment management firm. He formerly served on the Investment Boards of the University of Pennsylvania and the UJA Federation. Mr. Greenblatt is the author of *You Can Be A Stock Market Genius* (Simon & Schuster, 1997), *The Little Book that Beats the Market* (Wiley, 2005), *The Little Book that Still Beats the Market* (Wiley, 2010), and *The Big Secret for the Small Investor* (Random House, 2011). He is the Former Chairman of the Board (1994-1995) of Alliant Techsystems, a NYSE-listed aerospace and defense contractor. He holds a BS (1979), summa cum laude, and an MBA (1980) from the Wharton School of the University of Pennsylvania.

Robert Goldstein

Managing Principal & Co-Chief Investment Officer

Mr. Goldstein serves as Managing Principal and Co-Chief Investment Officer of Gotham Asset Management, the successor to Gotham Capital, which he joined in 1989. Mr. Goldstein also founded and served as Managing Partner (1989-1997) of Metropolis Partners, a value and special situation investment partnership managing capital on behalf of institutions and wealthy individuals before returning capital to outside investors at the end of 1997. Mr. Goldstein currently serves on the Board of Trustees of the Museum of the City of New York. He holds a BA (1988), magna cum laude, from Tufts University.

* The net long exposures are approximate and are the targeted exposures during most market environments.

¹Net exposure excludes exchange traded funds ("ETFs") bought or sold for cash management purposes (inflows and outflows). Generally, such ETF positions are closed out within one trading day.

The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares upon redemption may be worth more or less than their original cost. The performance quoted does not reflect a 1% redemption fee on shares redeemed within 30 days of purchase. Returns would have been lower if certain expenses had not been reduced or reimbursed. Current performance may be lower or higher than the performance quoted here. To obtain performance current to the most recent month-end, please call 877-974-6852 or visit www.gothamfunds.com/performance.aspx.

Mutual fund investing involves risks, including possible loss of principal. Short sales by a fund theoretically involve unlimited loss potential since the market price of securities sold short may continuously increase. The fund will use leverage to make additional investments which could result in greater losses than if the fund were not leveraged. The fund utilizes swap agreements in its investment program. The use of derivatives such as swaps exposes the fund to additional risks including increased volatility, lack of liquidity and possible losses greater than the fund's initial investment. It is anticipated the fund will frequently adjust the size of its long and short positions and thus may experience high portfolio turnover which may increase brokerage costs. The fund may invest in large, mid and small cap companies. Small and mid cap equity securities may be more volatile and less liquid than the securities of larger companies.

An investor should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. The prospectus and summary prospectus contains this and other information about the fund. To obtain a copy of the prospectus and summary prospectus, please call 877-974-6852 or visit www.GothamFunds.com. The prospectus and summary prospectus should be read carefully before investing.

The S&P 500 Total Return Index is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. Returns for the S&P 500 Total Return Index include the reinvestment of income and do not include transaction fees, management fees or any other costs. The performance and volatility of the fund will be different than those of the index. The index is unmanaged and investors cannot invest directly in the index.
